New Age dunces okay I'm not talking about that but show me a physical place you can go to escape tyranny as a person living on planet Earth and when you have that you could say you know what masters and slaves enjoy your little earth drama hell that you've created here and we're out but until you could show me that place you're connected to all these other idiots and that means there's only one way to change the situation if you want to be free and that is to change their mindset by putting information forward at all times and places that's what the great work is and that's why it's so resisted because that takes courage to do that work because you've got have to not care about what other people think about you you have to not care about the comfort that you're going to receive from other people whether it's an employer or a spouse etc see I'm not one of the people who tries to say it's all gonna be okay or we don't have to worry about doing that work all we gotta focus on is our ourselves because I recognize we're connected the law of one is true we are bound to those other individuals unfortunately I don't want it to be like that but again I'm not a solid sis who says my perceptions are the reality and if I don't want it to be that way it magically becomes not that way no I recognize it is this way whether I want it to be this way or not it may be unfortunate but it is also true that we are connected to these other people that's why courage is so vitally important to be able to even start doing the great work to change yourself and then to influence other people to go through that same change that you went through to recognize that there is no such thing as Authority that it's all illegitimate the most dangerous religion on the face of the earth so I think that's probably a good place to leave this podcast for now because a lot was discussed and there's a lot of food for thought there I think next week what I want to do is talk about music it's something I really haven't done a full show on and you know I want to really get into the topic of the missing aspect of rebellion in music this is what I've largely been doing folks by the way I mean in taking a hiatus from the work I took a hiatus from it in this form that I'm doing right now such as my podcast and videos but I didn't take a complete hiatus from it I was putting out the great work through music because that's one of the ways I think it's very effective can be very effective plus I love music I've always been a performer in music since I was about 14 years old 15 years old and I've always liked it it's always been away to expects expend energy and put forward thoughts for me and it's that creative aspect you know that Sacred Feminine right brain creative aspect put forward in the right way put forward to try to change things which is the masculine aspect music is whole drained activity so I think next week I'm going to try to do a show about this and maybe bring on at least one member of the founders to have a little discussion about this so stay tuned for that and you know I just want to basically end with the thought that it's people who put art out there who put forms of creativity out there who put innovation to drive innovation forward you know artists musicians inventors these are the kind of people who are really directing positive change now you could look at what you do with information as an art form you know that's alchemy that's art and there's many ways of organizing it and forming it and shaping it science is an art form you know understanding how things work and then doing something with that knowledge to innovate and create people with that creative essence are the people who are driving humanity forward there are people who are doing things that make society better and make it really worth living especially if we use those things in an uplifting way to contribute to the great work of creating more freedom in our world so that's all I have for today for this edition of what on earth is happening I hope you've enjoyed the show and I hope you'll tune in next week well where I'll have a discussion about rebellion in music it should be a good one ladies and gentlemen you've been listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm have a great day everyone see you next time [Music] [Music]

What On Earth Is Happening Show #194

Topics: *Modern Music, Rebellion In Music, Origin of The Founders, Anarchy in music, False "Anarchy," Popularity/Fitting In vs. Truth, "Scenesters," Lyrical Messages, The Founders lyrics, Persistence, Courage, Bands Mark and Mike like and respect, Bands that promote rebellion, Bands that put forward a false sense of rebellion*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc past ago [Music] welcome one and all you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening dot-com today is Monday December 21st 2015 it's the winter solstice today the first day of winter hope everybody's having a good holiday season if you believe in all that kind of stuff and even if you don't I hope you're having a good winter season we have a great show lined up for you here tonight folks we're going to be talking about a topic that is really near and dear to my heart and something that I haven't really talked about too much on this radio show and in any of my podcasts or videos I want to do I've been wanting I have been wanting to do a show about music for a long time because music is such a popular influence in society and it's been such a huge part of my life since I was young that it's a topic that I really haven't covered nearly as much as I want to and today I'm gonna be getting into it in a big way with a good friend of mine and my bandmate in the founders Mike Thompson so he's gonna be the guest on the radio show today so that's coming up on this edition of what on earth is happening just a few quick housekeeping things and a couple of announcements I want to let everybody know that I am going to be giving a new live presentation coming up in February February of 2016 this is going to be another presentation hosted by art Capozzi who hosted my both my natural law seminar and my original demystifying the occult seminar those were done back in 2013 and 2014 so this new presentation is going to be live in Philadelphia in February the exact date is going to be forthcoming but I want to start the promotion for it now because this is going to be a great live seminar that's going to actually be consisting of myself and J Parker and the title for this entire seminar is going to be called demystifying the occult part to Satanism and the dark occult this is something that I only very very briefly touched on in the first demystifying the occult seminar and I think this is a topic that needs to be given more attention and clarified in people's minds explaining to people exactly what is Satanism compared to what most people think that it is and I explained to people how this dark religion operates in the world so demystifying the occult part to myself and Jay Parker we're going to be talking about Satanism and the dark occult this is going to be taking place in February of next year February 2016 new live presentation and this event is going to be hosted by art Capozzi this will be taking place I have the venue although we're still trying to work out the finalization of the date and time but the venue will be the ethical Society of Philadelphia in Center City Philadelphia so it's a great venue I've spoken there before as part of the Tesla Science Foundation's events that they have had at the ethical Society so it should be a really great overall all-day seminar with myself and J Parker there is coming up one of if not the biggest conference of its kind free your mind for coming at us in April of 2016 April 15th 16th and 17th for your mind is a conference on consciousness mind control and the occult and for your mind for this coming year will be hosted at the Sheraton Bucks County Hotel the same place that for your mind 3 was hosted the Sheraton box County it's another great venue that this hotel is at 400 North Oxford Valley Road Langhorne Pennsylvania just outside of the city limits of Philadelphia for your mine returns to Philadelphia in 2016 with a three-day conference featuring top caliber whistleblowers and researchers from across the country who will shed light upon our world's problems and bring forward empowering solutions spreading awareness on the topics of consciousness mind control subversive occult influences holistic body mind spirit health and solution oriented approaches to the problems humanity faces in these challenging times the speakers lined up for free or mine four are as follows Bob Tuscan cathy o'brien davidwhitehead freeman jamie Hanshaw Jay Parker Janis barceló Jim Mars John vibes Jordan Maxwell Josey Wales ken Rolla Laura Eisenhower myself mark passio Mark Phillips Mary Sean Young max Egan and Ross been an all weekend pass for the freer mind for conference one $69.99 individual day passes 59.99 tickets are available and have been available at free your mind conference calm the conference's website free your mind conference calm ladies and gentlemen if you're at all into any of the information that has been and continues to be talked about on this podcast or in the truth community in general for your mind for is not an event you are going to want to miss because this conference really brings people together from all over this country and many other countries as well who are who have a thirst for truth and knowledge and want to come and gather and meet with like-minded people and that's what a conference of this kind is all about it's about getting people together forging relationships forging alliances if you will and bringing people together who are interested in truth and freedom so for your mind for in Bucks County hotel in langhorne PA April 15th 16th and 17th don't miss it the conference website once again free our mind conference calm there is a donation button on the front page of the what on earth is happening dot-com website on the left-hand side of the page if you feel that the information that has been shared freely on this podcast and through my videos is of value to you feel free to make a voluntary donation help support my work and myself that is again on the left hand side of the what on earth is happening calm website also on that left hand side there is a link for what on earth is happening promotional t-shirts I still have plenty of these available they will also be available at the free your mind for a conference I think I might even have another design possibly we'll see how it goes but the t-shirts are still available they have the all-seeing eye design on them really great redesigned logo that says a truth love and freedom and above it reads one great work so if you're interested in that click that link and it'll send an email over to me and I'll tell you how you can pick up a what on earth is happening promo t-shirt for a voluntary donation so I think that's all the event announcements and other housekeeping that I have for right now I want Oh actually there is one more I want to let people know that the founders will be playing live here in Philadelphia in February as well February 27th we have another show coming up here in Philadelphia this is my anarchist hardcore punk band really going strong so far making waves in the city people talking about the band and if you're in the area come on out and see us on February 27 that's a Saturday night and we'll be playing at Connie's rickrack a local establishment that promotes local music so that's in the Italian market of South Philadelphia I'll have a flyer for that made pretty soon and we'll promote it here on the site and on the founders not us our website speaking of the founders my guest today is the lead guitarist of the founders Mike Thompson Mike thanks so much for coming on to the show today to have a discussion about modern music thanks for having me mark yeah absolutely it's something that needs to be spoken about in depth Oh without a doubt it's something that I've wanted to do for a while and something that I'll probably do in somewhat of an ongoing basis with people like yourself who are knowledgeable about you know music in general especially music that involves a powerful and needed message and music that is really about rebelling against this system of control and slavery that we find ourselves in so um I guess my first the thing that I'll throw out to you is if you want to tell the listeners about how we became involved in the current project that we're in that that backstory we could start there sure in fact the free your mind conference that you were just speaking about that's where the you know beginning of the founders actually that that's the very start of it where I met DJ our other guitar player and we hit it off we began speaking about music but also moreover we agreed on the same points as far as what the system was doing to society and how it was destroying the fabric and morality of society and that's that's essentially where I came in to you know the circle of friends where we ended up on the 4th of July getting invited over to your place this is before you and I began hanging out and that was when the band actually formed that day on Independence Day and you know ever since then we forged a great relationship and you know we we agree on the same points that we need to free humanity from slavery absolutely I mean I remember that day clearly in my mind we were having a cookout out and in my backyard for fourth of July and you came over with DJ and you you guys were asking me about the project that I was trying to get started musically and I was telling you how poorly it was going because some other people that I had involved you know weren't really dedicated to it and it was kind of falling apart and you know I felt like this isn't something that I'm gonna be able to take live or anything like that and you know you said what kind of music is it and I was telling you it was hardcore punk and you're like well I I play guitar you know I love that kind of music so you know it was kind of like no I was showing you the the prototype of the logo that I was trying to work out with the artist at the time and you know kind of everything just kind of like synchronistically gelled it synchronistically blended you know no and then DJ was talking about that he plays guitar and you know he would want to be involved in a project that talks about topics such as this and it just kind of almost like you know it really just came together that day where we said you know we have people who are very interested in it again also our other guitarists Carrie was there that night and our drummer Jared and you know it really just came all together suddenly like without even anybody pushing it or expecting that this is was gonna turn into a project you know we just all kind of like we're talking and realizing we had a lot of interests in the same kind of music and of course the same message and you know that one thing led to another so to speak and the rest is history as they say but very synchronistic very synchro mystic that the band would get started on the 4th of July you know that would be the place where we met and talked about this project and then you know agreed to start meeting and writing some some music so couldn't have planned it that way if we tried that's right so I guess what I really want to get into is the state of modern music and specifically like you know to just open up a topic rebellion in music in general but specifically the genres of music that were supposed to be about rebellion yeah you know metal hardcore punk you know these these genres were supposed to be about saying screw the system we want no part of this immoral system of control yeah you know and infusing a message of rebellion and standing up you know through the discordant types of sound that it puts out like shaking people you know making them pay attention yeah you know what do you have to say we're regarding that general gist of that these genres were really supposed to be rebellious in their nature and what's your view of what what has happened to them well what I see today and what it's become is a part of the control system what what I see is the opposition controlling rebellion controlling the rebellious nature within mankind and specifically within this art form of music itself and you can see over the years how it's just little by little than bred right out of people and why it's so necessary right now to be that mindset to live it and to bring it to people because it has been taken away from these genres of music because of how powerful it is the message itself that could be given to somebody through an art form like this so readily available is beyond reading a book beyond sitting through a lecture it's far more condensed and straight to the point and you know I see why they're doing it and what's happening within these genres of music and the lack of rebellion that's taking place within that and that's why we're doing what we're doing it's so much with music as an art form in general so much can be said so quickly yeah you know with so few words whereas explaining a concept you know for example in a lecture or presentation it often has to be elaborated upon but because you're you're giving things in a structured organized way that's you know has a sound accompaniment and it has a mathematical nature when it comes to music you're structuring words in a way that they have to be efficient and they have to convey the message quickly you know wrappers I find are very very very good at this you know I I'm amazed sometimes in conscious rap how few words that will take them to put a message out that's so you know distinct and clear and powerful exactly so I totally agree with what you're saying regarding the hijacking of these musical genres I mean you know they've been turned into more scenes and hangouts and you know identities and fashion statements feel good yeah yeah yeah lacking lacking completely any rebellion whatsoever that all it's become is a way of fitting in not questioning Authority not going against the grain and that right there is giving up your right to think and I have to say that that's been done a little too well because we're seeing that too much within the musical scene today you know I mean you talk about kinds of music that are popular that don't contain any hint of rebellion at all pop music you know things that you'll you'll see at you know music awards programs things that you'll see on if you do see any music on like MTV or the you know vh1 or any of these other channels it's just um it's so sanitized of any kind of a real message a message that matters you know so many people are even fearful of putting in a message that matters in music anymore because it's like oh you're taking yourself too seriously or you know what why are you trying to enter you're with my time to be entertained right you know you're trying to get me to learn something or pay attention to something or god forbid care about something you know I mean can you speak to that aspect that in modern music yeah I mean that goes into the control mechanism that you know is taking place right now where I did mention you know the feel-good aspect of it where people just want to feel good they don't want to think critically they would rather be on the side of popularity than to be on the other side where you know when you are a truth seeker you're usually ostracized you know because other people don't understand what you're saying right you know and as people fear that ostracization absolute because they want to belong yeah and so they're trying to be more popular so that they can get more well-known more famous if you will and therefore they are removing that message to be accepted just for acceptance so it's like it's a catch-22 you know do we want our music out there yeah but we want it out there for a reason we want it out there so it will help to awaken people it will people will pay attention to what we're actually saying it and think about those themes yeah I mean again that goes back to paying attention which most people aren't doing when they're listening to music or even what they're watching on television they're they're busy trying to be just distracted they want that distraction they love it unfortunately and you know when it comes to music they're not most of the time people are not paying attention to the lyrics even yeah if they don't know what's being pumped into their psyche and their subconscious most of the sure because they don't even know what they're being told and that's a dangerous thing and that seems to be what's been taking over the minds of people you know yeah that's why I've always been interested in hearing what a band has to say bands who don't have much to say and don't have a message in their lyrics never held a huge appeal to me right here I was always a lyric reader I wanted to hear why is this band bothering to write a song a lot of people don't even think about that they're just all about the music but they don't even recognize like you know if if you're gonna write a song what are you trying to say by the song it isn't it's supposed to be an expression of a message you know through a different medium in this case music right and most people just don't care about the lyrics and music and they like you said they just let it slip right into their subconscious I mean the lyrics were writing or very deliberate they have a deep message to them the message is rebellion and freedom and you know it that's a huge part of what we do as the founders because we want people to sit and listen to our music and read the words that we're putting out there and of course we want you to hear the music too but um you know when we get good recordings of this I think people are going to realize you know how much we're pushing the envelope of this genre of music and you know it's a little bit difficult to hear live because you know there's a lot of difficulty associated with not only presenting a band properly live but also recording it but when we get some studio recordings I think people will really clearly be able to hear what this band is really all about yeah um I want to shift the discussion into a little bit talking about like musics role in society or moreover it's perceived worth in society because you know you have so many people that look at music oh it's just you're gonna just become another starving artist you know and so many people don't even want to be associated with people that perform that put out art in all different forms whether it be you know a traditional art you know painting drawing etc art through making videos through making music I mean you just what's your view of how music isn't how its viewed it's perception it's worth in society well I mean unfortunately when you take a close look at what's going on it's easy to see that people most of the time I mean really most of the time need to be told what to think what to feel how to believe and what they believe in and a lot of the time people are told what is popular what is pop coal sure what you should be paying attention to by the mainstream and unfortunately a lot of people this is the way their mind works that they go toward that it's a moth to a flame essentially they go right for that and they will bite the bait and they do it almost every time and unfortunately bands like us that are going out and speaking the truth and doing it on our own you know we're not telling people you know what to believe this this is not an opinion this is the truth you know this this is what the truth is it's unbridled you know and whether you like it or not that's your problem you can take it or leave it but I'm telling you from what I see it's a lot a lot of it has to do with the fact people need to be told what to think and what's popular right and they flock toward what they think is secure what they think is safe I see this big-time and a lot of people even out in the music circuit you know they want the maximum safety they don't want to go anywhere where the boats being rocked right you know it's it's part of you know the whole topic of last week's show which was courage you know courage is so lacking in society it's it's no different in the music circuit you know a lot of people just want to run away from anything that is real you know continuing with that I think it's it's been increasingly difficult to get people excited about music to get them to want to come out and support music I mean this was a problem you know when I was a little bit younger doing music as well and it hasn't really gotten much better what's your view on that well yeah I mean people tend to say that with technology that we allowed ourselves to gain convenience when I don't see that I mean in certain respects yes but people also will say that you know and this is this is just a blanket statement I mean that it brings us closer together when it doesn't I mean in fact it's brought us further apart you know where people would rather just watch online or you know they're not willing to go out and support something in person right because they're taking a gamble on their satanic mindset of what I can do for myself what's gonna benefit me and if I go out and I don't enjoy myself and god forbid you know but take a chance yeah yeah and especially with a band that that has a message like our band the founders I mean we are speaking out against the establishment which most people are afraid to do you know as a matter of fact when you even mention that that's what you're about you see the fear come over people's minds come over their faith their facial expressions all of it their body language yeah it's like oh you're gonna talk about that now yeah oh where can I run to you know because they're cowards I mean that's what it really comes down to you know it's like they they just wouldn't stand up for themselves if you know they were being you know forced into a prison camp that's that's how late they'll wait yeah and then probably won't even do it then yeah unfortunately um what what about people who just use the music scene quote-unquote to be just that scene stirs to be people who are just there for fitting in and trying to make friends and don't even really care about the music they're more interested in you know what's the fashion that's gonna go along with this kind of music or what kind of friends am I gonna be able to make here at this club or at you know in this new scene what do you think of scenesters as if I need to really ask yeah I see them to be just as vile as the controllers that are ruining the fabric of society I mean whether you're willingly ignoring or you you just don't know I mean you're being a part of this system that is distracting people and and demoralizing completely the minds of people you know I mean I I don't have any appreciation whatsoever for somebody that wants to ignore the truth I mean it doesn't take much to look around to see the state of the world that riving in you know and if that's the way you want to go by ignoring it then you're just as much a part of the problem I'd say they are the problem yeah you know yeah that's a great point you know we have a song in the band about people who are inauthentic and just you know trying to fit in you know and they're the kind of people who will you know actually be vocal and talk out against people who are genuinely into this for bringing a message you know because it's almost like oh you're ruining my good time vibe right you know ladies and gentlemen the founders aren't here I mean yeah we want we want people to hear our music and have a good time at our shows but we're not here to placate people and tell them what they want to hear we're here to bring a strong powerful message of truth in and infuse that into the music and make that a part of the entire experience we're not here to just have a good time vibe flowing at every moment at one of our shows you know we're going to say uncomfortable truths regardless of what how that makes people feel it's just like I do in my presentations you know it's like we're not gonna sugarcoat what's going on in the world we're just going to put it to some cool hardcore punk music and let that be a different vehicle for the expression of this message so what we'll get into maybe some of our individual songs before we start talking about some some other topics too so we could give people an idea of what you know lyrically message wise this band is all about but essentially I didn't really talk about your background at all maybe we could start there you know how long have you been playing guitar what are some of your influences musically you know tell us a little bit about yourself and then we can get into like you know what we're doing with the founders as far as our message goes sure well I'm a lover of music from a very very young age and I always found the expression of anything artistic through sound and vision to be a very powerful vehicle you know for anything and at a young age I fell in love with rock and roll in punk-rock and you know saw bands like The Ramones and and you know Jimi Hendrix and saw that and I and I said that's what I want to do you know I want to get up there and do that and over the years you know I realized as I grew into my teenage years what real you know rebellion actually was and what would it stood for you know it wasn't just saying hey I'm gonna go against the grain it was looking at the state of the world and the punk rock that I got into was very much like that a band that that I think we both can agree on the exploited I got into at a very young age and they talked out against the system and I couldn't believe the powerful message that they were bringing better it made me want to be somebody to be able to bring that message and essentially I've been playing guitar since I was 13 years old I'm now 31 and I've never put it down no matter what it seems to be as far as being unpopular because it seems that you know artistic value is not really appreciated right and there's a reason for not making a ton of money it has no worth in society right exactly you know and that goes into the the socialist movement that wants to control that you know we're you know that's not being supported so you know I never gave up on that and yeah I mean I the bands that I played in it in the past I didn't really have other like minds you know as far as what I believed in as far as the John Rizzo I was in - that's something that we agreed upon and you know we like heavy music I mean we like heavy guitar riff driven music yeah you know with heavy drums and it's it's a personal taste preference obviously not everybody's gonna like this band you know that doesn't mean that we're not good at what we do that doesn't mean that we're not a good representation of this genre as an art form but not everybody's gonna it's not gonna appeal to everybody yeah you know they're a lot of people are gonna hear it be like oh that's terrible I don't like that kind of music you know and that's fine you know a lot of people don't like death metal a lot of people don't like black metal a lot of people don't like punk rock a lot of people don't like country music a lot of people don't like you know line dance music but whatever you know a lot of people don't like rap this you know as far as the style goes that's a taste preference there is no right or wrong when it comes to that it's like you know what appeals to one person's your is not going to appeal to other people's ears our goal here was not to try to find the kind of music that's the most wide widely light or accepted you know it's what we we're going to play what we like because this is our band it's not someone else's band if they like a different kind of music go form your own band go put out your own kind of music that you like this is what we like say you know a lot of people have a hard time with that they keep telling me oh I don't I don't like that or what why are you doing it like this so I'm not really interested in what people think of our musical style at all we're gonna play what we like exactly the end and more importantly beyond the sound sonically beyond the actual sound of the bands a lot of people need to start waking up to the message right now there are bands that I don't necessarily like their sound yes they're messy that's right is speaking about the truth speaking about freedom yep and breaking us from slavery then I will listen to them and we we will listen to music like that with an open mind exactly you know and support it because it's putting out a message of truth and freedom that's right without a doubt yeah great great point I totally agree fully so um I guess maybe it's a good time to talk about like some of the things we do get into in our in our songs and maybe talk about some of the songs specifically and you know and the writing process yeah so um how about the song a nation of sheep you know one of my favorites I mean you know it couldn't it just speaks for itself in the world that we're living in right now and what this country has become you know how easily people will be duped into believing whatever the control system wants them to without doing any critical thinking whatsoever this song right here touches upon it the lack of a courage the rinse yeah you know you know that is prevalent in society what the founders you know would think of us yeah you know the founding fathers of America I mean you know the line it opens up if they could see America today the founders would turn over in their graves I mean I think it's almost an understatement the founders would chastise us in on you know to the nth degree for what we have allowed this country to degenerate into and you know this song is you know all as all of our songs are they're hard-hitting they're in your face they don't pull any punches they don't mince words you know I guess if we want to let people get a little bit of a preview lyrically because I think this is something that I want to put out there for people to get the gist of what is you know what the founders really talk about in our music so I'll just read the lyrics to this song and you know then we can continue with maybe another one this song is called a nation of sheep it goes if they could see America today the founders would turn over in their graves they'd be sickened by what this country has become land of the cowards and the home of the effing dumb a nation of sheep baguettes a government of wolves police state rising a population of slaves fluoride in the water and the television rotting their brains ignorance apathy corruption everywhere you turn history repeating because these em efforts don't want to learn a nation of sheep that gets a government of wolves fascists neo-cons and their corporate dupes Marxists communists and their socialist tools liberals and conservatives all brainwashed fools while the people fall prey to totalitarian rule if they could see America today the founders would turn over in their raves the people in denial of truth they don't want to see submissive cattle who still believe they're free a nation of sheep but gets a government of wolves I mean you know that that's that's the overarching message of what this ban is bringing to the table in the way that we're saying it in this band yeah not sugar-coated not trying to make it seem like it's something else that it's not this is exactly what it is this is what we stand for you know um I uh when I introduced the next song that I want to talk about at the recent show that we played I noticed that it made a lot of people uncomfortable because so many people still don't know what a false flag is or so many people have been convinced that oh that's just a conspiracy theory right you know they don't even know the word and what it means right where it came from you know and you know when you try to let people know that a lot of the events that have been happening in this country or a contrive they are orchestrated they are scripted you know and they're there just to make people afraid so that then their rights can be stripped in the aftermath and claiming we need more security people still get uncomfortable talking about this and still don't understand the tactic that's being used against them in a false flag attack right it's amazing that the news media has been able to keep through what they will not talk about people so ignorant of this basic tactic that's been used throughout history yeah very ignorant to history in general or most people unfortunately you know they don't know what the reichstag is they don't understand what was done you know through that to take away people's rights and that that same narrative has been used over and over and over again and this song in particular really gets right to the heart of that and you know it's one of my favorite songs because this seems to be a perennial thing that they've been pulling where it's just constant happening left and right every other week it seems like there's another false flag and people don't seem to be waking up to it because the media is something that they were i upon still and i don't think that they are going to actually tell them the truth they don't know who owns the media boy they hit us with so many false flags in 2015 I mean we're at the end of the year and I think this year had more than any other in history yeah I mean it really was almost like they were coming every week yeah you know so as opposed to a nation of sheep that that song the sound is very punk rock oriented it's very hardcore punk sounding yeah I would say the song another false flag which is the song we're talking about is our most hardcore song this is the this one sounds more in the hardcore genre yeah without a doubt yeah so here's the lyrics folks for another false flag how do you get the people to surrender their rights unleash an act of chaos that snuffs out a lot of lives blame it on an enemy and easy lie to sell such an ancient tactic but it works so goddamn well 9/11 77 Port Arthur and Sandy Hook the Boston bombing Oklahoma City WTC 93 it was another false flag the times and places change but the technique remains the same will the people see the truth and know where to place the blame order out of chaos the most dangerous game understand the strategy or or fall for it again and again 9/11 77 Port Arthur and Sandy Hook the Boston bombing Oklahoma City WTC 93 it was another false flag just another false flag give up your freedom and we'll keep you safe give up your rights and you'll be just fine give up your freedom because you're afraid give up your rights and become our slaves 9/11 77 Port Arthur and Sandy hook the Boston bombing Oklahoma City WTC 93 it was another false flag just another false flag you know when people are still you know resistant to understanding that message because they don't want to believe that were ruled by Psychopaths exactly that would do something like this yeah yeah it's incredible that people don't have that discernment that that's been snatched away from them to not see and understand that the paradigm for the left and right you know is the same head of Hydra it's the same beast and they do not see that because they want to be fooled people love to be fooled and you know that's that's working a little too well I mean look at who is running right now for the presidency you know I mean it's absurd it's a joke a bunch of clowns you know and as it is people don't understand what it is to rule themselves to become moral themselves and to not need a master that's right I heard a recent quote from Adam Koch Esch I believe it was Adam he said when people ask me who I'm supporting for the next president I asked them what kind of cancer do you like most yeah I mean I thought that was just great that was just brilliant call spade us yeah exactly I mean they are they are a cancer upon society you know and if people don't see that they have a lot they need to do some research about to find out what these people stand for where he come from a lot of people are still in this naive mindset especially people in music and this is a good point to just do a brief aside to talk about like the lack or small amount of true anarchists and music I mean so many people you you start talking out against government in general and it turns them off because they're still under this a delusional childish naive and that people in government care about them and want to make life better for them they actually still believe this nonsense you know I mean it's a it's a it's a mindset of a four-year-old child literally absolutely absolutely I mean to not even know even within the lyrics of a nation of sheep how you explain the fluoridation of the water most people don't even understand what that actually is they're not even educated to understand cause they're fluoridated you know so it's no wonder why we've got a lot of this fog going on and just absolute shameful behaviors of thought where people think that these people actually care about them they're far gone and very lost they they ascribe their own moral sensibility to other people which is a dangerous prospect I've talked about that a lot on the show in the past you know just because you wouldn't take an action that is highly immoral doesn't mean someone else would not take that actions that you know you're not that person you don't know what their mindset is like you know to just describe your moral sensibilities to someone else is a dangerous proposition because you have to understand the kind of psychopath we're dealing with in the world so you know there's there's just such a small amount of people who are anarchists in the whole music circuit and not only that there's a small amount of people who understand real anarchy right you know there's this fake form of Anarchy that goes around in music that it's really communism in disguise socialism in disguise you know people have to understand Aniki means exactly what you just said no masters no rulers no authority and that's it it stops there you know if you try to inject something else into that then you know you're usually bringing a system in in place and yeah again this form of music is supposed to be about saying screw the system we don't need a system of controls in place we'll take a chance on chaos that's what real Anarchy is all about shedding the fear of chaos yeah you know anarchy isn't chaos but it involves that dynamic of refusing to give in to fear and if chaos is a possibility then so be it I'd rather be free and chaotic then perfectly safe orderly and totally enslaved I believe Thomas Jefferson said I prefer dangerous freedom and that's something that's right I know for a fact this band and as friends what we stand for that's right you know I prefer to live in danger that's right without it I don't want to be duped and lied to and you know be kissed with a lie I'm sick and tired of seeing people wanting to have that be their reality and you know that they are a part of the problem yeah yeah that fear that they give in to and perpetuate is definitely the problem and you know I've said it before I'll say it again I'll give me my 45 ACP and I'll take my chances with with these Psychopaths and or even cannibals all around us you know I don't I'm not interested in being protected anybody who wants to be protected is not a real man or a real woman that's right you know you're responsible for your own self defense and protection and there's no excuse for not understanding those principles and arming yourself to be able to to defend yourself if necessary with deadly force that's right and that's what they're trying to take away yep from people through all these false flags they want to give the illusion that if our guns are taken away that suddenly the terrorist is going to change its mind over the criminal yeah or the government yeah which look revenge yeah I mean that that's incredible that that dialectic is being used and relieved yeah that's more amazing very sad so we have another song about scenesters about people who just come out to be part of something and they're not even really into the music they're about a fashion making a fashion statement you know having a scene of friends fitting in stuff like that and they they're not they're certainly not about rebellion exactly they're the first people who will clear out when you start talking about rebellion they're the first people that will get all timid afraid shut down go glassy-eyed on you god forbid they have a message of truth right that's injected to their psyche you know that that's again going back to the whole feel-good behave right which they think they're any different from their parents they're no different from their parents that exacting you to allow this slavery to take place in society that's right you know and they imagine that they are very different from their parents generations why because they dress different they got a few more tattoos and their parents ever had oh wow that makes you real different it has mythology yeah exactly think that they're so hyper aware now that they've got their smartphones which in my opinion the phone is only as smart as the use that's right and you know that that's any different but it's no different I mean it's even worse in fact because they've got a library at hand that they could be looking up anything but they choose to just be placated into being you know a slave for the system that wants to you know be you know a part of this system and it be they set the whole paradigm that goes along with it they accept the whole view of reality the whole projected view of reality from the mainstream media exactly these people the worst part about this hipster generation is that they believe they're informed yeah they actually believe they know something they may think they know more than someone like me yeah you know yeah they they actually believe that there are highly informed people because they can click a few buttons and you look something up on Wikipedia right yeah a government-controlled right anyway so this song is called hipsters and costumes so I'll read the lyrics fake-ass Seamster pieces of just trying to look the part conformist scum just like your parents were system lovers from the start your mouths move a mile a minute but none of you got to say you wouldn't know what punk really means if it smacked you in your tattooed face all you want to do is belong you don't want to rebel you're nothing but hipsters and costumes and you killed Punk long ago to you punk is just about a look and a scene it's about fitting in and making friends punk was never supposed to be about belonging to a crowd it was supposed to be about taking the control system down fake-ass scenester pieces of just trying to look the part conformist scum just like your parents were system lovers from the start your mouths move a mile a minute and none of you got to say you wouldn't know what punk really means if it smacked you in your tattooed face all you want to do is belong you don't want to rebel you're nothing but hipsters and costumes and you kill Punk long ago that's that some of the lyrics I'm actually the most proud of for writing because it's something that really needs to be said in this scene oh yeah you know in this whole community of people absolutely you know which is like a scene it is a bunch of scenesters and we're going to come in and be the uncomfortable discordant dynamic within that quote unquote scene to make people uncomfortable you know because that's what this is what punk rock has become yeah you know and I say you killed punk long ago they killed what was the spirit of punk do I think punk is dead no I don't because we're living proof that it's not that's right you know we're that's not other thing I want to talk about like just as a personal side anecdote I don't dress at all like I'm a punk rocker you know I've been into punk rock since I was a child yeah okay listening to the Ramones and and other punk bands but people will look at me and immediately associate well he doesn't dress like a punk rocker is that what a punk rocker is his hair isn't like a punk rocker right oh is that what is that what it is to be into punk and understand punk rock conformity yeah that's that's what it is I don't have your yuta for it then you don't fit you know an act that goes in with mindset yep and if you're not towing the line of what people have been you know lied to about which they don't understand these aren't even their own thoughts that these are scripts written for them you know why that is yeah you know the fabian society if they don't know about that then they're completely uneducated about what's been done that's exactly right you know Caen steering mass movements of people you no steering society's in the way these things things want them to go so that song hipsters and costumes I particularly like it's a absolute venomous vitriol yeah as you can hear but I think it's needed vitriol absolutely so part of my background I was in a stoner rock really stoner metal project years ago called Oh mega Lord and you know we were kind of like the the stereotypical stoner metal type band the themes that you might think of as part of that genre but we also were very into freedom and rebellion and we had a song called not going to die with bullets in my gun kind of kept that in in this band we kind of like took that song and we're if you will covering it or just making it our own since it was on one of the songs that I was involved in the writing of when I was in Omega Lord so this song is really about not giving up you know it's about you know you could you could interpret it from the perspective of yeah a physical gun but to not die with bullets in your gun means you did everything possible that you didn't give up without trying without a fight you know so what do you think of this one yeah I mean what you just said I mean it's just not giving up no matter what the opposition is bringing your way which is a lot of people that are going to disagree that are going to swear that they've done enough research to know what you're talking about to say you're wrong and have no clue that they've been lied to you know I'm not giving up no matter what anybody tells me you know i I've used my discernment you know in my life and where I've been around the world I've seen it for what it is I know that the control system is doing its best to take people like us and turn against each other and essentially run away from freedom because it's not popular you know that the the talking or you know rather the the topic of freedom and truth is something that most be scoff at that's right and I don't care if you want to scoff at it I don't care if you don't think that that's cool or popular that's not what I'm on this planet for that's right you know what we're here to do is to bring morality back to cut the chains of slavery and I'm sick and tired of people trying to turn that away you know right from society and I don't care if it makes me unpopular we're here to lead a rebellion against the practice of human slavery he's right yep so the song not gonna die with bullets in my gun here's the lyrics you tried to hold me back you tried to keep me down try to make me live your lie this is where it ends I'm taking my shot ain't wasting no more time not gonna die with bullets in my gun no surrender no retreat no compromise or peace let slip the dogs of war and if you're in the way of this runaway freight train gonna get run down for sure not gonna die with bullets in my gun not gonna die no I'm not gonna die with bullets in my gun fighting with my future haunted by my past sure as hell wasn't the first so if at all because I won't be the last and if I have to go now let it just be so but I'm gonna take as many with me as I can may not win the battle may not even win the war but I'm shooting all my rounds not gonna die with bullets in my gun not gonna die no I'm not gonna die not gonna die no I'm not gonna die with bullets in my gun yeah yeah that really does get to the the heart of what we stand for never give up that's right persistence yeah you know the universe will reward courage and persistence exactly so one of our I think our more popular songs especially sound wise very well just go back quickly - not gonna die I'd say that's our most metal sounding song that's definitely got an element of Motorhead style you know meddler met punkish metal song in it I'd say that's definitely our most metal song that we have if you want to consider any part of what we do quote metal I tend to really look at us as straight a straight forward hardcore punk band but there's definitely elements of several genres in our in our music you know it's certainly a lot of undertones ya know from from all of our outside influences definitely but a culminated into one which i think is very unique in this genre of music so we'll just do a few more songs to talk about just give people an idea of what this band is all about will do well three percenters again this this is probably one of our more popular songs sound sound wise this is really about the small amount of people who will rebel against any form of tyranny you know the 3% or who fought the American Revolution I'd say maybe there's about three percent who are willing to fight the second one should it be necessary to take it into the physical domain and that'll be enough it'll be you know horrific if it has to go that way but it was enough the first time it'll be enough this time but this song is really about what you know are you a man or a mouse you know do you have real courage will you stand up will you stand together for for freedom or will you will you run you know will you be somebody who doesn't have the courage to stand up and run and you'll count yourself in the other 97% right yeah so you want to speak to this song or this is one of the favorites because this is what we understand as far as the revolution that took place you know these these men and boys that fought for our freedom I mean truly not what's going on right now in occupied occupied countries around the world I'm talking about the guys that fought against the Tories yep said to the Redcoats jog on that's what I don't want you here that's right now and that's what we're willing to do because unfortunately the Redcoats are somewhat still here they're completely Nazis and the Redcoats aren't here and the Communists all of them and they all shook hands to say we can't let this place be a bastion of freedom exactly we have to take it down from the inside yes you know too many people are here who will overtly physically fight for their freedom when you're trying to overtly conquer them but you know if we take it covertly if we take it through stealth if we take it through mind control and subversive influences then we have their minds and they'll just breed more people who are milquetoast people you know total milquetoast uncor aegis you know boy yeah Joey exactly no yeah and that is the opposite of what the three percenters were and are because those that are willing to give up their lives for the greater good for freedom you know these are these are men that's right these are men that are willing to actually go beyond their ego and say enough is enough with evil enough is enough with tyranny no we will not put up with no tomorrow's for any of those ones so nor should they be well it's so ever and when you when you know what's going on in the present world right now the poisoning of our food air and water there is more than enough good reason with that but again I mean the freedom is taken away from other individuals around the world through occupation enough is enough you know this has gone on long enough and this is what this song is about that's right so here's the lyrics to the song three percenters when hits the fan will you hit back or will you turn tail and run like a bitch grow a pair and get prepared to stand and fight the evil in our midst three percenters we stand together three percenters in liberty or death three percenters fight to the last man never surrender or retreat militia of the people fighting tyranny might die on our feet but we won't live on our knees three percenters we stand together three percenters in liberty or death come and take it don't tread on us Liberty or death don't tread on us we're the 3% don't tread on us Liberty or death don't tread on us because we're the 3% when hits the fan we'll hit back we'll stand and fight until the end if hope is still alive in this land it lies with the 3% 3% we stand together three percenters in liberty or death yeah like we're not messing around with the lyrics of these songs with the message that we're bringing at all and I'm trying to explain to people as we're on the stage - this isn't an act it's not a gimmick it's not a joke we're not playing we're not you know trying to make people think that were something that we're not it's as real as a heart attack ladies and gentlemen right that's right you know this is who we are and this is what we're talking about on stage you know there's no distinction so two other songs these are ones that we've written most recently our two newest songs we not even perform one of these yet live we have with one that we close our most recent set with in Philly but we'll be playing the second one that we'll be talking about at the next show so we wrote a song called kill the Masters influenced by the television show Game of Thrones the phrase that they put on that show if people aren't familiar with it there's a a scene in it where former slaves are basically going through the city and killing that people who thought that they were legitimate masters of these people legitimate owners of other people and in one of the scenes they actually paint the phrase on the wall with blood kill the Masters so I said you know that symbolically and literally even kind of depicts what needs to be done but you know we need to kill the idea of mastery of other people we need to put forward the idea of self mastery and kill the notion that other people can legitimately be ruled by others you know so uh you know I'll let you speak to this song you know your take on it yeah I mean when I first heard that you wanted to write a song kill the Masters I was ecstatic about that because we we understand that on a deeper level this isn't just some childish game of boohoo I don't like being told what to do this goes beyond that this is explaining exactly what we see in society what's being done to people the slow kill you know the the kidnapping and rape of children by our masters by these people that think that there are our masters these immoral Psychopaths these people have got to go we can no longer allow them to poison the psyche and the minds completely of anybody within society it's got to be ended you know and this is essentially from what we we agree with I mean there there is no reasoning with somebody that's completely immoral you know to stand on that same level ground is not going to happen we cannot do that with these people you know we can't sit and say let's go into their courts and try and figure it out people have been trying to do like talking is gonna is gonna stop Psychopaths from doing what they're doing exactly from controlling others and harming others and raping people's rights right you know they don't care you're up against an enemy that doesn't have any morality it doesn't have any chasity for morality doesn't have conscience it does it's never going to develop conscience exactly you know when you're when you've let that breed in society to a certain extent it is eventually going to come down to physical confrontation yeah it doesn't have to but where we're at I feel unfortunately i-i've said said in the last couple of weeks I don't really think we're gonna do it in consciousness now I which is a failure long-term I and this will probably have to be done again at some point you know to get it in consciousness but at the point that we're at I am very non hopeful regarding the ability of humanity to get its mind out of the prison that the mental the mental prison that humanity is in it's gonna be very very difficult yeah in order to unite I agree that it's going to take a lot more I mean a lot more but you know even more so just just speaking on that topic of how immoral these people are you can't reason with an immoral person with no conscience no there have been hearings where they've gone into their courts people that were a part of the MKULTRA program and if you don't know about that go to the back of Marc's podcasts and start from number one you have to understand that there have been hearings in Washington for people to try to stop these things from happening to other people and it never has stopped but they've upped their game and they've shut these people up so I don't see any more reasoning with these people you know so that's why kill the Masters is certainly one of my favorite songs so here's the lyrics folks to the song kill the Masters by the founders would be Kings without a conscience claiming the right to rule over us their robot enforcers follow their orders but they're nothing but gangsters and thugs when ignorant reigns this is the way that history always replace freedom destroyed we hope you enjoy the New World Order of slavery break out of their mind control embrace reality we're gonna make you see that there's no authority their system is illegitimate and we are not their slaves so kill the Masters and break your chains power-hungry Psychopaths raping liberty day by day every time they speak they lie to you so don't believe a word they say the so-called leaders of this world are corrupt and allege it they're rotten to the core what's even more their system ain't worth break out of their mind control embrace reality we're gonna make you see that there's no Authority their systems illegitimate and we are not their slaves so kill the Masters and break your chains phenomenal couldn't have said it better myself yeah I mean this is the kind of message you're gonna hear it a founders show it's not gonna be sugar-coated it's not gonna be for the faint of heart it's not gonna be for the wishy-washy milquetoast doughboys you know I know that's the new trend I know that's the new thing that's considered attractive in society right you know a dude who has no bass in his voice and looks like a woman yeah you know but you know right it's absurd but but even worse though is satanic agenda don't drive along with the system that's gotten the minds and something that Hitler said this is a direct quote from him saying where the women go the men and children follow that's right and what we see today is a bunch of doughy I can't even call men I mean yeah we need a new term we need a new I was talking with our other guitars I'm sorry our bass player John about this and you know we were saying we need a new term for the inauthentic woman and the inauthentic because we're degrading the word man and woman which are sacred words solutely you know by even referring to these people as men or women which they most certainly are not in no way shape or form you know and and it's working unfortunately within society and you see it with these so-called men that they'll do anything to get the attention of a woman even if it means just being ignorant going along with everything and it's it's happening rampant yep just for the sake of popularity and to not be ostracized yeah god forbid exactly that person might be there their whole scene of people might not want to hang out with me or might might you know marginalize me somehow like like that's important like what's some moron who has no idea about what's going on in the world thinks of me is important right yeah you know it's a no nothing that's absurd you know we needed new we need new terms for people like this you know we like a man Gollum or a manbot or a femme Gollum or a fembot you know something to that effect you know we just we can't call the men and women anymore because it's a degradation of the term but we need to come up with some kind of a term for you know the the garbage element of society that loves the slavery system you know the man golem and the FEM golem yeah well last one will do and then I want to talk about like you know bands we like and you know some influences that we've had throughout our musical careers your bands that are doing it right you know brands that are rebelling against the system and talking about similar things that we're talking about also I want to talk about like fake forms of rebellion and using you know that's important for people to understand you know how old they're putting out this with this kind of a message or so-called angst but it's just a distraction against what's really going on yeah so our last song I want to touch on is uh the newest song we just finished writing this at the last rehearsal session it's called stand and fight and uh that's the tagline of the NRA as well folks you know is stand and fight I actually you know didn't like the NRA in the past because I thought they were too soft on a lot of gun control legislation they've really been going after a lot of states that have been implementing unconstitutional anti Second Amendment gun laws they've been using those dues to really fight these people so I think they've gotten a little bit more hardcore in recent years there are people who will disagree with that but you know and I like other gun lobby groups you know like choose for the preservation of firearms ownership gun owners of america etc but you know I am an NRA member I actually subscribe to that and pay dues to just keep my membership because they're doing decent things with that they're promoting awareness of Second Amendment issues that are important in society and I think they've amped up their rhetoric quite a bit as far as I see which which is needed right now more than ever with all of these false flag attacks these control without a doubt things that they keep throwing out there so they could try to take our guns away you know they literally think like Eric Holder that psychopath that lying piece of crap saying we got a brainwash people to think about guns different way different way so we could do this daily openly talking about that they're just gonna quoted by somebody saying this honoring television and look at what they're doing they're doing it in plain sight you know and you know there's there's no other reason why they shouldn't be ramping up the NRA and you know putting out what they believe in it needs to be done without what we're doing that's right stand and fight moreover is really about standing your ground you know not giving in not going quietly you know pushing back because the people who are doing this have no right to do so here's the lyrics stand and fight by the way this is a tagline on our badge or button that we bring to our shows and give away for free to people it's a tagline on the back of the shirts that the founders just recently pressed we do have t-shirts available you can get them at our shows going to be going into the studio and recording a demo very shortly maybe even you know an EP type of thing yeah but here's the lyrics to stand and fight no surrender no retreat no quarter no prisoners we reject your brave new world of death and tyranny our souls we will not sell we embrace our sovereignty we will not surrender our freedom and our rights we will not go quietly into the night stand and fight we will speak the truth to all we meet both near and far we will not be silenced and we will not be disarmed we will not stand down wear active and we care we will not comply because we're awake and aware stand and fight no surrender no retreat no quarter no prisoners we bring to all who hear our words just one philosophy no masters and no slaves death to all authority when tyranny threatens everyone and we've run out of time it all comes down to one decision join us or die stand and fight I mean that's as hardcore as it gets ladies and gentlemen that's right you know the founders are definitely a band for the new three percenters let's just put it that way that's about how many percent of people that I would figure would probably be into our music and message because they have enough spirit and they have enough intelligence and they have enough courage to even be into a band like this right you know it's not the popular approach for 100% sure but you know what it's spreading a message of truth and freedom to the masses and you cannot unhear something you know you can reject it but you heard it yeah and you cannot unhear a message of truth so Mike what I really want to get into next is bands you like like who do you think's doing it right who you think's putting good stuff out there there are definitely some great bands that are bringing the message of truth out there and doing it in a way that is very unique you know a few bands that I I have to say on the top of my list you know and I think you'll agree with this I did mention before it'd be exploited one of my favorite bands personal yeah same here and in fact that was the first band as friends and as a band together that we all salt together that's right and we actually went and saw them when they came to the US for the first time in about 15 or so years a couple months back during the summer powerful very powerful great show and you know they are true and our kists and they come from Scotland right and the oppression that they have had to put up with you're an absolute real reason why they believe in what they believe in it's not just for this look in fashion you know they they believe in anti-authority you know taking a chance on chaos right and you know taking it to the next level rather than saying there's something wrong with this picture actually saying what needs to be done here's the solution and you know they're they're one of those bands and other bands that I've been listening to for many years that's one of my favorite bands is Killing Joke right and rape bands they've been doing it since the get-go since 84 you know I mean talking about real issues and yeah you know a lot of element coltd elements of society exactly exactly and doing it in a way that it's tangible you know it's tangible for anybody but you could feel what it is that they're talking about i mean they're they're speaking about Bohemian Grove and Kay ultra Tavistock Institute ending the Fed right calling out Bono that right there Oh has he gotten the groom of the stool position yet Yeah right apparently he's a hot for that anybody that that's time out against the fake guy like that I respect them wholeheartedly you know and yet the whole arenas of people ya know who love popular stuff yeah again and there's an example where musically I don't have a problem with what a band like that is doing but look at what he's involved in yeah why would I support that and and you know who's a sees kiss and huh you know yeah look at look at the people he's mailing with you know take a look at that and it will give you a very honest perspective more like wiping them exactly exactly you know so um alright exploited Killing Joke I want to throw one out there yeah Black Sabbath oh yeah I mean that goes hand in hand and this is why they're so attacked by the system especially religion you know oh they have a dark name oh they sing about all this dark stuff yeah because they're making people aware of it exactly you know exactly this is the band that is has been doing that for more years than anybody else and are still doing exactly I mean their new album the way I saw their new album it is like saying to all the little boys out there hey boys let us show you how it's actually done yeah you know because you've been copying us ad infinitum you know trying to sound like us and let us show you the real deal and how it's really done and it just like makes a mockery of all the the Sabbath imitations in stone or rock etc down yeah that's and it's all generic - it's like you know stoner rock when I was playing stoner metal 12 13 years ago nobody was into it it wasn't if it wasn't cool right you know now all of a sudden it's the big thing especially in in somehow East Coast cities yeah this has become the big thing yeah you know and it's like every band sounds exactly identical to each other you can go out on any given night see a bunch a stoner rock lineup and it's like rehashed riffs yeah that there's there's no real originality to it and it's just like you know it's just to be cool and to follow the trend yeah first of all you're about 13 years late on that guy's yeah I hate to break that lose - you missed the wave sorry looking at a band like Black Sabbath you know these youngins that have listened to them they heard a song like sweet leaf and they didn't even listen to the message right they just said oh they like to smoke weed right we are gonna do the same thing and we're not even gonna listen to the message you know so they're just spreading nothing but ignorant these kids so yeah I mean they are shown it and shown these young and so it's done all right you know it's it's great these guys are in their older age and they're pushing hard so it's good to see man I mean the song Sabbath have put out war pigs you know electric funeral yeah a lot of songs off master of reality how about children of the gray yeah oh my goodness yeah after forever about a legend they're just views or even anti-religious for you yeah and on the new album zeitgeist I mean right you're very eclectic song like that with a message you know another band I've always been into that I feel did take a lot of influence from Black Sabbath but took it to a whole new level as Cathedral Cathedral is one of my favorite bands of all time always talking about breaking down the control system breaking mind control exactly you know the first of all that's the intro music of this show is a Cathedral song these guys are from the UK Lee Dorian who was the former singer of napalm death started at I believe back in the early 90s and in 89 or 90 and it's just these guys have been one of the strongest do metal influences in the world and they have a very powerful and relevant message I mean you know talking about mind control the song satanic hiss roboticus you know satanic robots is what the society is trying to breed just about every song off caravan beyond redemption that the intro song comes from that album freedom the song revolution you know the song iconoclast yeah I mean just listen to the words of that one you know that's from I believe the seventh coming just all the realms one is heavier than the next you know very powerful band God you throw one in alright I I have to say you know out of recent times a band that is doing it or was doing they're not playing as much anymore they'll do a show here and there is System of a Down oh sure and you know the these guys their parents fled the Armenian Genocide something that most Americans in most of the world know nothing about I did not even know that yeah and it all had to do with gun control folks and this is what they're trying to do here you think that's gonna end up very well then you got another thing coming but um you know they they get into everything I mean they talk out against Hollywood they talk out against the psychotic behaviors of this system I mean one of my favorite songs of theirs is the prison song where just blatantly is saying they're trying to build a prison for you help me and how they've hiked up the rates of people going into prison how we're used as nothing more than cattle for them to make money off of they also have a song about chemtrails yeah yeah no I mean they they get into all of it what's being done to us and why it is important to stand up against it the the founders are going to put out a song about chemtrails as well it's one of the next songs we're going to write it's called sprayed like bug that's gonna be coming up our system of a down definitely great band how about in connection with Black Sabbath of course do know I mean yeah I call him the sage of heavy metal absolutely absolutely from everything that he did in rainbow to you know the actual band do I mean the gates of Babylon yeah kill the king you know one of my favorites I mean he he had not only a powerful stage presence but the message in his lyrics were very very beautifully richer so yeah that's that's another one of my favorites right there um let's see oh I one of my biggest influences as far as persona goes in music is Jim Morrison yeah you know the the doors of course became very popular but Morrison was one of these people who really woke up to the control system a lot of people you know have talked about his connection with his father in intelligence and in naval intelligence very quite possible why they possibly assassinated Morrison the death definitely didn't make much sense it was in a bathtub of course this is harkens to the killing of the King ritual I've talked about this in another interview series and you know he was known as the The Lizard King right you know this whole idea that we're going to take a possible very influential member of society that could be a change agent on a wide scale and kill them you know this was done with Kennedy he was a so you know synchronistically associated or synchronistically associated with Arthur of Camelot hence you know he and he was president so the killing of the king you had Michael Jackson more likely than not ritualistically murdered and you know he was the King of Pop and you can go on and on Elvis Presley the king of rock yeah you know again possibly ritualistically you know take him down from his position and murdered you see how this is also done with females being built up to be destroyed particularly in pop music yeah oh so but the doors were always big musical influence for me and of course Jim Morrison who basically got on stage repeatedly during his career and told his his own audience that they were a bunch of slaves they were a bunch of weaklings and soft people who were letting themselves be pushed around and called them slaves to their faces yeah yeah sometimes things like that really do need to be done and said yeah just straight out it's like what are you allowing yeah what are you allowing to happen to yourself and your society you know yeah you want to throw another one out there uh yeah I'd have to say they're not a favorite band of mine by any means I do appreciate what they're doing being in mainstream mm-hmm because that's something that does take courage because you could easily become very well unlike like that message gets brought across the wrong way Muse in English bands they have come straight out over the last two albums talking out against mind control right against war and you know I mean the latest album is called drums you know and it's it's what it is yeah you know so you know when I look at that that band in particular I I feel bad sometimes because their audience is a wide large audience and it doesn't seem like they're really getting it in their minds because people don't read lyrics they're not reading the lyrical content which is so important it's utterly important if you want to get the message of what a band is transferring across I'm familiar with them and I've liked some of their lyrics definitely Oh without a doubt without it it's again not really what I tend to prefer musically but sure yeah and say for what they do they're pretty good yeah absolutely yeah and and you know for what it's worth you know I'm sure there are some people that have gotten gotten some sort of knowledge from this information that there I went in there and woken to whatever's going on right now hopefully you know that's better what I hope for what they've done but especially with a big audience like that yeah yeah a large I throw another couple out there yeah maybe a little bit more popular um Pink Floyd I mean oh yeah they talked out against mind control and indoctrination of the youth totally and completely yeah I mean I attended Roger Waters doing the wall you know the whole double album and I felt like people didn't even understand what was being said you know yeah what was being said yeah about how dictatorships rise to power and you know how people are conformist and they build walls of barriers of identity up for themselves and they don't really get it because they're not paying attention to what's being said yeah you know it's all just about hanging out and listening to the music and having a good time you know how about Megadeth Megadeth is a band that puts it out there pretty plainly big time yeah big Dave Mustaine is pretty a pretty awake one of my favorite bands certainly you know I mean he's not afraid to say how it is and is is an incredible musician you know somebody that that you know came from a band like Metallica and continued on the way he did but went even further you know nothing against Metallica I like them as well they're older stuff more you know but he went the extra mile by actually putting truth into his music beyond what Metallica was doing in my opinion you know and he knows that it's a mind control agenda how there's covert weapons use subversive influences you know so he injects that into it in addition to the political stuff I think we just got to get him a little further to convert him to full adder exactly but definitely a very good man performance wise as well Megadeth I've seen them a couple of times and was never disappointed with their stage presence and performance Larry very very very tight musical and without a doubt absolutely just a couple more nuclear assault old-school thrash head phenomenon again talking out about mind control they have a song called brainwash yeah you know telling people stop listen to these popular forms of media they're just trying to tell you what to think you know they have other songs that are about you know thinking for yourself and not listen to other people's opinions and you know your you know best what's best for you stop listen the society trying to make you conform to what they think is best for you you know I always loved their musical style today the same here man so uh havoc is a really good modern thrash band very technical modern thrash band speed metal yeah and they speak openly about all the subversive political agendas going on you know about you know the need for rebellion in society so that's a band that I really appreciate anybody else you want oh we left out one of the probably most important and really forthright bands when it comes to a message freedom and that Sons of Liberty yeah absolutely I mean I would love for the founders and Sons of Liberty to have a gig together sometimes what I you know that would be like a perfect band for us to maybe open up for in the future because these guys are putting it out there very very very plainly for people talking about the Federal Reserve you know talking about the loss of freedom in America how we're becoming a police state how the world is enslaved you know just open openly discussing these themes in their music yeah it's not sugar-coated it's very naked out in the open and it's attainable for those that are Liberty loving human beings that that actually want to know the truth that want to live it and not just be placated into being entertained right and shutting off their brain I mean that that's all well and good you know if you want to sit down and watch a film but you know when that's all you want to do is just be entertained you know you know that you're just turning off your brain and you're not going further you know you're not you're not adding to freedom certainly when that's happening speaking of sons of liberty and people who just want to be entertained I mean I recently saw a piece of YouTube footage from one of their concerts and that by the way that we're talking about the band son the Sons of Liberty is a side project of Mike Schafer from East earth another pretty popular metal band that talks about a lot of these themes as well that that's a band that should be included in this discussion but Sons of Liberty was playing a gig and Schaffer was on stage trying to explain to people about the loss of freedom and society and how you know these people are trying to completely take over every aspect of our lives and you hear a couple of people in the background at the show just saying you know you could hear it on camera them saying just play the song and we just want to hear the music you know it's just like why would a person like that even be at the Sons of Liberty show yeah you know it's like you don't know what this band is all about right you know yeah you know there there are three percenters by them without question ABS you know I mean he's talked about his attitude his mental attitude Schafer's has said in interviews you know I'm a feral human being I'm I'm like a caveman you're not going to control me that's Adam intelligent yeah and that's the thing this system fears the most that fears an intelligent feral man and will not be put in in in bondage and chains that's right you know they're trying to breed that out of society they're trying to keep men from being desirable that are like that to women that want of a slave they want somebody that's going to lay down not cause any ripples whatsoever and that's what's happening right now we're watching that take place yeah it's very unfortunate but I chuckled when you said that Mike because I could tell a little personal anecdote it's almost becoming like a tradition on the show now just as a brief aside I actually and I was telling barb this the other day it was uh I was I was out with another friend who was having some problems and I was trying to talk to him about the situation that he was in and won't mention any names but I was at a pub and there was a table of a few women sitting having drinks and food and I was at the edge of you know that area where that table was at the bar and they were having a discussion and I couldn't help but overhear some of the things that they were saying but when they got into a discussion about their view of men I have to just confess and admit I did start kind of deliberately either eavesdropping a little bit okay just hear what was gonna what was being said what was coming out of their mouths and one woman actually turned to the other woman and said you know I have to be honest that she did not know I was listening or could hear but I was definitely within earshot range but you know my back was turned to her and I was really trying to tune out the other noise and really listen what to what she was saying and she said what I really want in a man what I want a man to be is my slave she actually I swear to God ladies and gentlemen this was spoken aloud she actually said what I want in a man what I want a man to be is my personal slave and she wasn't joking her kidding and they weren't didn't view it as a big joke yeah they let they laugh like uh-huh you know you're saying it right out in the open cuz they're basically saying thinking the same thing yeah and this is this is the reason they are enslaved they don't even understand the very reason you are a slave and don't even really even know you're a slave because you're too you know ignorant to even recognize that fact because you haven't even looked into anything you're a slave B cause you think like this is that is the causal factor because what it happens in the mental realm gets reflected in the physical realm especially if it's happening in the aggregate sense then that happens in the aggregate sense societal exactly when one suffers awesome right and that's what and that mentality is creating the slavery that is being perpetuated and they don't understand that they don't understand that that's how natural law works you know as many people are thinking like that you're that's gonna be given to you by the universe Ackley you know precisely and they're enslaved because they think like that but we got into this topic because we were we were talking about you know people who just want to be entertained just want to hear you know music they don't want to hear the message of freedom injected in something a band like Sons of Liberty again very popular band Iced Earth this is a side project of theirs and you have people saying I just want to come because oh you know I want to hear the music and I don't really want to take part in that you know discussion about rebellion that they don't want to be feral you know they don't want to be untamed because they're worried about what what's what's this person gonna think what's that person or think is this person gonna like me is this person gonna ostracize me am I gonna be popular with women you know am I going to be popular amongst my peer group you know and that's what we're this social engineering aspect comes in where they're actually trying to make women not desire not be attracted to not one a guy who has any of those quote-unquote feral masculine untamable qualities that will stand up for his rights that will stand up for us freedom because subconsciously they're like somebody who plays with the system you know and and complies with the system they make more money they don't be they're not harassed you know they're they're gonna be easier to control because they can be controlled in this sense so they're gonna be easily controlled by me and influenced by me yeah you know and they have a lower they have what I call the mini-me Satanism mindset absolutely the controllers are the big Satanists and these are the many Satanists you know they're they're propagating the whole system by what they're thinking in the aggregate sense but there are just a smaller version of their psychopathic satanic controllers exactly any other bands you want to throw they're uh yeah um Dead Kennedys is definitely up there you know more so from my younger age old school old old-school punk and hardcore punk yeah they got right out there I mean if the name doesn't tell you what they were about I mean they they basically spoke out against the system you know yeah that's something that resonated within me yeah you know since I was a teenager so yeah that's that's definitely know we're probably leaving a million million names out of this but yeah I mean I think that's a good place well how about some rap because you know we've been talking about metal hardcore punk stuff like that absolutely I like rap personally um you know III don't listen to a whole lot of it because I really limit to conscious rap one of my favorite conscious rappers is Paris I mean if you've heard this guy stuff I mean he is he could say so much in so few words this is he's from the gorilla funk label I think people should check out all the rappers on that label but Paris I think is one of the people who really stands out yeah absolutely you know I I I'm not as familiar with Paris but as far as I know you know he's very similar to a guy like immortal technique sure you know where he's very colorful with what he's saying and he's not sugarcoating thank sure anybody but as far as hip-hop goes you know immortal technique for me is definitely up there a guy I've been checking out a lot recently is que Reno yeah just phenomenal great I'm probably the best lyrical writer and the the flow of his raps lyrically are just incredibly impressive but he gets into mind control in the stuff that he talks about the occult stuff definitely worth checking out absolutely how about our personal friend Saint Pete I mean this is a guy who has to come up and get more popular in the music in rat with clothes that I did he is just incredibly talented yeah there's just the message he brings is about truth it's about the tyranny taking place in society but the power behind it yeah I mean you know he opened up for us for our first show and I was in the back green room just you know going over some chords and warming up before we went on and listening to him in the back man I was so fired up because he's not sugarcoating it he's saying it how it is and he's doing it in a very educated way right you know so without a doubt very very very intelligent guy st. Pete folks I mean you got to check this guy stuff out just brilliant absolutely um anybody else yeah Kay rs.100 old-school stuff you know this is a very learned man he understands the dark occult you know he could call it out very well and you know some enjoyable songs out there you know so he's definitely up there you know that gives you an idea like what we're about musically I think you know I think it's a good place to leave the section of you know the topic of bands we like right how about people who are doing it wrong how about people or yeah there's a lot of too many how about um you know this idea of petty rebellion focused on this but you know really that's not gonna get you anywhere yeah yeah that there's too much of that going on where it's it's in my opinion I I see it to be no different from the George Soros race Wars right that he funded I mean it's the same rhetoric the same thing and a lot of these these guys don't really realize what they're doing is actually pinning everybody up against each other you know and you know one guy I can think of that's an absolute sell out completely P Diddy you know Puff Daddy you know this guy come on you know he goes and says vote or die back back you know when Bush was was running you know and then he's now saying you know don't vote you know but yet he's still in love with the system still putting out the same garbage music there's no message behind it you know so I see it for what it is I mean it's it's just garbage just Seamster punk rock you know the I always found a contradiction in terms pop punk I hate punk rock you're not pop yeah exactly who's making profits hop you don't understand it's not Punk you can't put those things together they're oxymorons yeah they're diametrically opposed opposites now you know abandoned we didn't discuss who I thought really had a phenomenal message of freedom early on but then went in a completely different direction for many years now I think they're very slightly beginning to get an edge back is Metallica I mean I don't think any discussion about you know metal could be complete without talking about the path they went down absolutely a lot of people feel they sold out I think somebody got to them I think after the album and justice for all which if you just listen to the lyrics on that album is unbelievable absolutely regardless of what you think about the sound of the album right the lyrical content alone is one of the most messes absolutely anti-government albums out there yeah and then in the next album they're not talking about any of it and it's you know a black cover with the gadsden snake hidden yeah as if they were trying to send a message you know I think perhaps someone got to them and said you want to be the next Elvis Presley you want to be the next you know Jim Morrison well I'll keep doing what you're doing yeah you know yeah you know and they didn't really have the nerve to say okay whatever you think you need to do we're gonna do what we need to do right you know I think they just said we'll go with the program at least for a while then that's when you saw Hetfield's you know total alcoholism come in yeah you know because I think then he knew what he was doing was I think if anything you know of the members left in the band he might have the most possible you know chance to really still fully awake and bring a good message of freedom the people that he's the lyric writer Cliff Burton was really doing that oh yeah his influence is still all over unjustice absolutely you know absolutely it's a shame he's not with us any longer right but I think they were somehow gotten to and decided hey you know very policy because that the transformation between those two albums its Tucson yeah it's night and day yeah truly so I just wanted to say that we were talking about other bands that you know lead up what you might call false sense of rebellion or just uphold the system completely are there bands that you think are you know fully satanic and just uphold the systems you know what love the system of slavery as it is yeah yeah one band I can think of that comes to minds and musically you know again this is this is how it works folks I mean they paint it the way they want to to bring people and they reel them in and you know they make it all seem like it has to do with rebellion and going against the system or you know just being rebellious period but most of the time it's just garbage and one band that I think of is a band called ghost BC and they're from Sweden this band comes from a black metal band called repugnant and now for those out there that don't understand what black metal is black metal is a genre of music that is 100% satanic I mean they literally use satanic imagery lyrical content has everything to do with eugenics and you know you name it this this is what these people stand for and unfortunately a band like ghosts are actually doing pretty well within the music scene and you know I mean the lead singer dresses like the black Pope and their songs have everything to do with child rape black mass and sacrifice and yet they're drawing large crowds of people and unfortunately and I understand this mindset of a young person that wants to go against the system that wants to be rebellious in nature and the corruption within you know things like the Vatican or just you know the Christian Church in general I'm not saying that all people that follow these religions are that way but the people that are the the spearhead are these religions they are very immoral people and and I understand that you would want to go against that and you know that that's something that I can I can attest to because when I was younger you know I grew up in a Christian household and you know it from from what I saw from it I saw a lot of fakeness I saw a lot of false reality going on with adults that they they were trying to put upon me that made me angry and want to go against it so I started listening to black metal and thinking that that was the right way to rebel you know and I realized over years and specifically when I lived downtown in Manhattan in New York in the financial district in Battery Park for a few years what a Satanist really was you know and this is before I actually knew what what it really stood for wasn't this Red Devil it wasn't right this you know entity that that's sitting with a pitchfork this is a mindset that's right and I saw it outright I saw it for the years that I lived out there and was repulsed by the people that lived in that neighborhood you know not everybody but by and large the materialistic behaviors of people and the the mimimi mentality is so overridden that you you you can't miss it when you're in that neighborhood can't escape from it one of the biggest false Flags took place in that neighborhood and yet people are flocking to it to go to Ground Zero to like it's Disney World right you know and and don't even remotely question what took place worshiping the official story exactly I mean the 9/11 truth museum IRS's all of their predispositions and prejudices etc exactly exactly this whole false rebellion it's just the dialectic you know they're saying well you don't like this aspect of the control system oh here we have the other arm for you you could flock right into the arms over here and we'll take you in you know but you're not gonna get anything different right you know I mean that's what I fell for earlier when I moved towards Satanism because I hated organized religion to the extent that I did you know because that was one aspect of the control system and then when you see what that is and you say I'm done with this oh hey we have this other arm of the bird of prey this other wing of the bird of prey ready and waiting for you we'll gladly take you into that will call it rebellion but you're just gonna get more slavery exactly you know don't people wake up to the fact that this is a dialectic and you know there is a a way out of that it's by rejecting the dialectic realizing this these are all aspects of the control system and you have to break free of all of those forms of mind control right so I guess I'll that's really basically what I really wanted to get into but it I'll leave the floor for you Mike can talk about anything else that you want to get into and then we can wrap up yeah absolutely I mean with with what we're speaking about right now at the false message of rebellion you know there are bands that try to paint themselves as being rebellious and you know I touched upon that within the metal scene and and we did touch upon that within the punk rock scene and and you know a band that I actually knew personally you know that their entertainment lawyer was a friend of mine and we ended up hitting it off and I was pretty young at the time I was in my early 20s and you know my mindset you know I thought that they were cool because you know they were popular and I didn't know any better that their message of rebellion this false pretense of you know just taking the same line that's being given by the media because let's just face it I mean everybody pretty much knows that George Bush is a very unpopular man in America I mean for the most part and that that was something that I noticed with their music that they just would toe the line that they would say exactly what you want to hear and still be asking for a master essentially which is completely immoral you know these guys are not about a message of truth and as I got to know them I realized all they cared about was partying the feel-good which look if you want to have a good time that's fine I'm not saying you can't do that but they in no way we're promoting the message of truth they were very self-indulgent and did not care about anything other than themselves and money so you know for them to call themselves punk rock couldn't be further from the truth these guys and there's a lot of that that goes on within the musical scene unfortunately but um you know I gotta say people gotta use discernment you know you can't just jump on a bandwagon and think that these people care about them same way as government you know that they're gonna actually bring them a message of truth you got to do some discernment and critical thinking and a lot of times they're being promised things yeah you know oh we'll give you money and fame and power etc you know they're they're just toeing the line because of what they're being promised exactly and that goes on not only in government of course but in religion it goes in in music and in all aspects of our lives you know the financial world business world etc absolutely III think discernment is a huge problem for a lot of people you know because they don't take in all the points of view all the information and then you know filter it and analyze it and you know see what comes out in the wash so to speak you know they're just very easily led and influence and that's why they're using music to lead and influence people because it is a form of art that can reach the subconscious mind quickly and can say a whole lot in so few words you know so it's it could be its again it's a tool and it's how it's used it can be used as a mechanism of enlightenment and it can use be used as a mechanism of mind control it's about the consciousness of the wielder of the tool Mike I am proud and honored to have you as one of the wielders of the founders sonic assault you know and it's a blessing that we met and feeling we met all in the 4th of July that's right of this year and it's been a great relationship both as friends and musically ever since and I want to thank you for coming on and sharing your views on the modern state of music and rebellion within the the musical community so thanks for coming on what on earth is happening and we should do this again sometime in the near future absolutely thanks for having me we've got ladies and gentlemen Mike Thompson of the founders the founders dot us the most extreme 3% er hardcore punk band that you will ever hear musically and lyrically so come out to see the founders here in Philadelphia On February 27 Saturday night February 27th at Connie's rickrack in South Philadelphia you could check out their website Connie's rickrack calm check out our website the founders thought us I'll be putting a poster up on the founders not us and at what on earth is happening when I make it for this show and don't forget I'll be speaking live here in Philadelphia in February be getting an exact date on that it's going to be called myself and Jay Parker both speaking live on the same day full day seminar it's going to be called demystifying the occult part 2 Satanism and the dark occult you're not going to want to miss that because the to insiders into this world talking about what they know about what goes on in Satanism and the dark occult myself and Jay Parker that's coming up in February in Philadelphia at the effort Society and of course free your mind for April 15 to 16th and 17th for your mind conference calm do not miss that biggest conference of its kind anywhere in the world ladies and gentlemen you've been listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm thanks so much for listening have a great day everyone see you next time [Music] [Applause] [Music]

What On Earth Is Happening Show #195

Topics: *Physical Health, the Mind-Body-Spirit Connection, Physical condition is critical for physical resistance, Truth-seeking as a sedentary activity, Effort and Persistence, Maintaining Physical Well-Being, Diet and Exercise, Mark's personal routines for physical conditioning, Cardiovascular Health, Martial Arts, Jeet Kune Do, Yoga, Biking, Wlaking, Firearms, Juicing, Blending, Fermented Foods, Health Supplements, the importance of pure drinking and cooking water, Shielding ourselves against toxins by building a stronger immune system, Living in Alignment with Natural Law, Preparedness for what is coming*

freedom mat that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe you [Music] welcome one and all you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening dot-com today is Monday December 28th 2015 this will be the last what on earth is happening podcast for the year 2015 almost completely wrapped up I hope everybody had a good Christmas and I hope you have a good New Year coming into 2016 we have a great show lined up for you here tonight I'm going to be talking about the importance of a strong physical Constitution building the body and working with the body diet health exercise all absolutely critical and important ingredients in any person who wants to actively participate in rebellion here on earth so that's coming our way in this edition of what on earth is happening I want to thank my guest from last week Mike Thompson who came on the show to discuss the state of music in general and specifically rebellion in music Mike of course is the guitarist the lead guitarist of my band the founders and I have a few event announcements before we get started with the topic of discussion for today the free your mind for conference is going to be coming at us very quickly so if you haven't gotten your tickets to get them now for your mind for a conference on consciousness mind control and the occult taking place at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in langhorne pennsylvania April 15th 16th and 17th of 2016 for your mine returns to Philadelphia with a three-day conference featuring top caliber caliber whistleblowers and researchers from across the country who will shed light upon our world's problems and bring for empowering solutions spreading awareness on the topics of consciousness mind control subversive occult influences holistic body mind spirit health and solution oriented approaches to the problems humanity faces in these challenging times the speakers for free or mind for are as follows Bob Tuscan Cathy O'Brien davidwhitehead Freeman Jamie Hanshaw Jay Parker Janice barceló Jim Marrs John vibes Jordan Maxwell Josey Wales Ken Rolla Laura Eisenhower myself mark passio Mark Phillips Mary Sean Young Max Egan and Ross Ben ladies and gentlemen please do keep in mind Ross been at this time because uh his father recently passed away so he could use your positive energy and support at this time I'm sure he's going through a difficult time so keep that in mind I believe some more speakers are still going to be announced I'm not sure if that's definitely the case but that's the main line up right now all featured speakers an all weekend pass for the freer mind for conference one $69.99 individual day passes available for 59.99 you can get your tickets today at free your mind conference calm once again the conference's website for your mind conference calm for your mind for is going to be an event like no other of its kind and it's going to be an event that you're not going to want to miss coming at us in April of 2016 I will be giving an all-day seminar with Jay Parker entitled demystifying the occult part - Satanism and the dark occult this will be a live all-day seminar taking place at the ethical Society of Philadelphia the ethical Society is at 19 1906 Rittenhouse Square Philadelphia PA this will be taking place Saturday February 6th so just a little over a month Saturday February 6 2015 an all-day seminar starting a little after noon 12:30 p.m. and going until 9:00 p.m. so this is going to be one you're not gonna want to miss folks because I'm gonna really get into my experiences in the dark occult what it really is what it's about what Satanism really is how it has infiltrated our culture the the general ideology and how most people adhere to it and you're not going to want to miss the things that Jay Parker is going to be talking about at this either he's gonna be getting into trauma-based mind control and the kind of horrific things that these people do to their own kind let alone to other people but to the people within these cult systems and to their own children so this is going to be a very powerful all day seminar on the darkness Satanism and the dark occult demystifying the occult part - Satanism and the dark occult live all-day seminar myself and Jay Parker Saturday February 6th 2015 all day at the ethical Society of Philadelphia a great venue by the way I've spoken there a few times as part of the Tesla Science Foundation's events that they have hosted there my recent Tesla presentation called the dark side of Tesla technology was held there was recorded there so this is a great venue and you know the topic the the the topic matter could not be any more absolutely necessary for people to understand at this point this is something that is completely rampant in our culture and most people don't understand this twisted religion that really has the reins of power in this world most people are in denial of it they don't want to accept that these people are Satanists that these people are dark occultists you know it frightens them to such an extent that they won't even talk about it but it's it's a discussion that has to be tabled and understood so this is going to be a very very important seminar so come on out if you're in the Philadelphia area or even if you're not in the Philadelphia area the prices are going to be announced next week the price for the attendance of this seminar so I'll just hold on for that information but that will be available probably even before next week you know we're working that out and it will be available very shortly just watch the website for that I'll be putting this flyer for this event up with the podcast and also I'll be putting a banner on the homepage regarding this event as well of what on earth is happening calm so demystifying the occult Saturday February 6th don't miss it the founders my anarchist hardcore punk band will be playing Saturday February 27th 2016 at Connie's rickrack that's at 11:32 South 9th Street in the Italian market section of South Philadelphia that's just off the corner of 9th and Ellsworth streets it's on 9th Street between Ellsworth Street and Washington Avenue so we'll be playing a full set Saturday February 27th come on out for that other bands to be announced I still have some what on earth is happening promotional t-shirts with the one great work sigil the all-seeing eye and the one great work of truth love and freedom those shirts are available for a voluntary donation you can click the button on the left hand side of what on earth is happening calm about those t-shirts to get information on how you can get one there's also a donation button on the left hand side of what on earth is happening calm and if you feel that the information that I have presented here on this radio show and on my website through my videos has been of value to you then please feel free to make a voluntary donation to help support my work and my efforts so that I can continue them into the future so with that having been said let's jump into our main topic of discussion for today which is the importance of a strong physical body how to maintain physical strength how to maintain physical health you know so much of what we talk about here on what on earth is happening is you know cerebral it deals with the psychological information the spiritual information but you know seeking truth in the way that most people do today can be a sedentary lifestyle it's sedentary activity it's it's activity that is done with the mind but it's very sedentary regarding the body you know you just think of a person who is seeking truth they're generally usually sitting at a screen somewhere or reading a book sitting down in a chair or lying down in a prone position maybe reading a book or reading something off of a tablet or a phone you know or sitting at a computer desk and staring into a computer screen well of course this is vital you know to do to learn what's going on in the world the physical body can take a toll can be taken on the physical body because of the sedentary nature of that work you know I joke around with people and say you know a lot of these truthers and you know people who are actively researching what's going on they think if they have to they're gonna be able to just hop right up out of that chair and physically fight if they have to defend themselves physically and it doesn't work like that folks believe me you know people think if they're gonna just you know pop right out of you know where they're sitting and researching and be able to suddenly defend themselves and have they're gonna have the dexterity the capability the stamina etc the strength and stamina required to do that I have news for them it's not that easy you know you have to condition the body to work in certain ways you have to condition the body to be able to put up with certain physical rigors and if you're not doing that activity if you're just doing the mental and spiritual work and you're not doing the physical work that's gonna you know it's not going to work out well for you in the long term if you do have to rely on physical strength and endurance you know in order to defend yourself or your rights or your life or the life and rights of your loved ones so physical conditioning is critical for physical resistance should that become necessary and more likely than not is going to become necessary I tell people in a very serious way that there are people who are training right now to take your rights and your life it's not a joke it's a very serious matter it's very real it's a very real matter right now in this world there are people who are training to take your property your rights and if necessary your life in their eyes if it becomes deep if they deem it necessary or their masters deem it necessary and that's going on every day so becoming physically strong is as important as becoming mentally and spiritually strong you know it's the mind body spirit connection the body plays a critical role in that Trinity if the body's not strong the minds not really ultimately going to be strong you know that's what you have to really get your health in good order to be able to think clearly and logically to be able to really deeply understand what's going on around you the body is part of overall consciousness and in dealing with the kind of material that I deal with and that I put out there to other people you know you can get into the pattern of focusing even too much on the mental and spiritual aspects of things and that can cause the body to suffer I mean conversely it works the other way as well focusing too much on physical activity you know and ignoring what's really going on around you in the world or even within your own psycho-spiritual makeup you know that can cause the mental and spiritual aspects of a being to suffer a lot of people do this as an escape mechanism they want to run away from themselves and what's going on with life on Earth you know they so they you know over work out and you know constantly move on from one physical activity to the next to the next to the next so there has to be a balance in place you know that's what I want people to take away from this whole thing that I'm talking about today there needs to be a balance you have to be balanced between good mental and spiritual work and proper physical work building up the physical body and in conjunction working with the psyche working with the spiritual aspects of yourself so just to let people know I mean I kind of did in the podcast that I came back on a few weeks ago I told people that you know I have been going through some rough times especially emotionally and been a little bit depressed about not only the state of the world you know things going on in my personal life so in order to remedy some of that it's like I recognized I was being too sedentary as well doing what I do the nature of the work that I do so I wanted to start very consciously focusing on the physical body a little bit more and preparing it and getting stronger physically because first of all I know more likely than not what's coming if it doesn't work out that way it would be a miracle at this point I mean I look at nothing short of divine intervention practically or the intervention of nature is going to stop warfare from occurring down the line in this country so I mean knowing that I want to be prepared I don't intend to go quietly into the night I don't intend to have my life taken very easily by the enemy I intend to be a big problem for them and without making the body strong that's it's not going to work out like that so I've put in a lot of effort over the you know pretty much the last year since early 2015 really to start to build those aspects more I mean I I didn't look at myself as in being in bad physical shape prior to that and have been focused on trying to maintain proper diet but I've been doing a lot more physical activity and I'll get into that in this episode diet of course is just as important as the physical activity again there needs to be a balance there you know you want to be able to do you want to have your diet in proper order of course because nutrition is key but you also want the right amount of physical activity and to do that daily make it a part of your schedule a part of your routine it has to be habituated made habitual made into a habit so both physical activity and of course you know a good high nutrient diet have been a big key in what I consider for for myself in 2015 to have been an additional health makeover I look at it like I went through a health makeover for myself years ago when I learned all the bad stuff that was going on in our food and changed my diet for the better but I feel like I've done an additional health makeover of sorts in 2015 because of the physical activity that I've integrated into my life so you know as with any work to improve oneself effort is going to be required you know you you have to put your mind in the mindset that this is going to be work it's if it was easy everybody would immediately do it and see the results with hardly any effort or work it's you know there's a reason this is work it requires effort to get it done it requires energy so you have to built you have to start where you're at and build a little at a time nobody can go from zero to 100 miles an hour instantaneously you know you this is a process that's another thing that should be understood with all of it it's a process I never you know I think a vegan lifestyle is a better choice than a highly carnivorous lifestyle I've talked about you know that I see carnism as immoral and against natural law and you know people come down on both sides of this since we're gonna be talking about you know physical activity and nutrition you know there's people who think if you're advocating for a vegan lifestyle you're evil there's people who think if you're not vegan you're evil you can't win okay you have to start where you're at and work in a progressive way to be better than you were the day before that's what balance is you know I tell people I'm not competing with anybody regarding this I don't need people telling me that if I don't eat me I'm evil or if I eat meat I'm evil I'm competing with no one but myself with that with the person I was the day before yesterday and yesterday that's who I'm competing with so it's not a competition folks you know it's a it's it's trying to improve upon the self by starting from where you're at and then working forward so with that being said I mean I was going to say I do think that yeah a vegan lifestyle is the way the direction you want to go in I think that will really not only optimize your health but optimize your alignment with natural law however do you need to do it immediately you know from being a heavy meat-eater this day to being a vegan the next no and there's a matter of fact that probably could create health problems if you do it that way it's a process you know move in the direction that you want to go and get better at it each day so I want to very clearly emphasize that I'm not saying that this needs to be overnight changes never have so works going to be required that's the first thing to understand this is going to require effort and you have to put that in your mindset you have to say I know that this is gonna be hard work but I'm up to the challenge you know if this is something I can do it's possible people look at the whole thing and they say oh you know it looks like an insurmountable challenge an impossibly tall mountain to climb well you know as the saying goes the first a journey of a thousand miles begins with the first steps you have to begin somewhere you know it's like an understanding the truth people always just say well where do I start they get my art drive or something like that where do I start start from wherever your interest is that start from whatever you find appealing initially you know there's so many good foods out there so many good high-quality nutrient-dense foods out there that taste good as well you know there's good gyms that people can go and join you know you can get involved in all kinds of physical activity if you like swimming do that if you like biking do that you know if you like mountain climbing do that you know I mean you could research things just about anywhere you know and get involved it's about starting from what interests you so of course in my own personal life I try to maintain this balance between doing physical work and doing the mental and spiritual work and I've done tons of psychic work you know spiritual works shadow work upon the self but over the last year year and a half or so I personally felt like you know there wasn't a balance for me and it was not only having an it was having most of an effect emotionally for me you know and other factors of course are involved personally which I'm not going to get into today but you know I felt like I needed to ramp up my efforts to put myself in a better physical condition so that the the endorphins and the kind of biochemistry that goes on when your body's in an optimum state of health really does help with an emotional state of well-being that's something that people have to really understand the body and the mind are connected so I kind of took the approach that I was going to put more effort into trying to become as physically strong as possible and that's one of the reasons I took the hiatus that I took for several months so what I really want to talk about today on the show is what I do just some examples of what I do again I think one of the most important things somebody can do is going to talk about the truth is live what you talk about you know do what you say if you're going to put an idea out there let it be something that you've done and has shown an improvement for yourself so that you know this works and then you can put it out there for other people knowing that it's not going to harm them it's kind of like the idea of you know don't discuss the problem unless you're going to talk about the solution to the prom you know I'm not saying you have to stick to that rule you could talk about whatever you want but it's a good idea if you're going to talk about something that's highly negative like all the problems that are going on in the world understand what the solution is like living in harmony with natural law you know if there's all these poisons and things that are attacking the body in the environment understand here's some of the things you could do to mitigate that and to lessen its impact by making the body as strong as possible this is like shielding you know it's a form of alchemy that you're strengthening the thing that's being attacked you know and by strengthening it those attacks are going to be negligible they're going to have negligible impact I should say so I feel like as a result of this work I'm physically stronger than I've ever been I have more strength more physical strength more stamina I can do physical a lot of physical activity without getting winded or out of breath like I used to I've lost weight I joke around with friends that you know that they talk about age you know I'm over 40 now and I joke that you know youth is overrated I I could kick my 20 year old self ass if he was standing in front of me you know so people who were thinking well I'm a little bit older now I don't want to take something like this on it's absolutely possible you can start at any age so one of the things I did actually not even I don't even think it was this year it was late last year was got a gym membership and started working out at a gym about two to three times a week ideally three you know sometimes schedule not permitting a couple of times a week really really helps not only to build a stronger physical body you know muscularly but it builds a lot of cardiovascular conditioning heart health so one of the things I the I'll just run down some of the exercises that I do when I do go to the gym stairs this is something that people will look at and go oh god you know like even at the gym not many people go on the stair climber which I'm surprised that because that that's probably my favorite thing to do there and I guess it's because you know it's like the idea of just climbing steps you know repeatedly it definitely takes its toll on you physically cardiovascular you get out of breath pretty quick when you when you start doing this for the first time of course now when I hit the stairs for the first time at the gym that I go to I could barely do ten flights of stairs you know it's like when I got up to the 10th flight it was like whoa this is like grueling and you got to start at a slow pace you know cuz you could increase the pace that the stairs flow at now I used to work in a Ivy League university as a tech support specialist and when I was there I would always take the stairs I hated the elevators they were slow they were always packed with people I always had equipment sometimes I would have to wait for another car because I would be carrying equipment or pushing equipment in a cart so I got in the habit of starting to take stairs of course if I had a cart I couldn't but it was just me going someplace or just carrying small amounts of equipment I would just take the stairs and you know that really built my cardiovascular conditioning for a while because I worked on the ninth floor of the building where I was at so I was walking up and down those nine stories of stairs multiple times a day then you see when you stop doing that you know you go back to you know not having really good and not replacing it with anything else you go back to having not very good cardiovascular conditioning and stamina so when I joined the gym one of the things I wanted to do is really build cardio condition so I knew that stairs were one of the best ways of doing that from my experience walking them in the past you know physical flights of steps well real flights of steps I should say instead of you know kind of simulated staircases but in the gym of course these machines are great because you could set them for different speeds and it works really well to condition you pretty quickly if you stick with it you just do what you can at first when you get really really tired and stop you know and then just try to do a little bit more next time you go and a little bit more next time so this is what I was doing starting at about maybe 9 or 10 floors and then just building up a little bit at a time 5 stairs 5 flights of stairs more each time a flight is about 15 so you know 15 steps so you know I eventually got up to like being able to do a hundred flights of stairs and then you know said well I want to do something more than that and go a little bit take this into the symbolic realm you know so each time I go to the gym I start with the cardio of the stairs and I said well what's a good number to try to hit as it as far as an amount of floors to do and I settled on a hundred and ten because I looked at it like this was I looked at it like what was what had a lot of stairs you know like the building I worked at it only had like 14 flights 14 floors so I was on the 9th you know there was only 14 flights of stairs I was already doing a hundred flights of stairs I'm like what had that many flights and I immediately thought of the World Trade Center towers which were 110 storey buildings so symbolically I started climbing a hundred and ten flights of stairs doing an extra 10 after I had reached a hundred just you know to kind of commemorate the people who died in that horrific false flag attack and then I said well I'm gonna add one more flight you know and started doing 111 for the three pillars you know as a really three towers came down so as a commemoration to the people who were ritualistically murdered in that dark occult ritual false flag event I was doing for a while a hundred and eleven floors of stairs every time I went I go to the gym now that will definitely put you in decent cardiovascular health let me just tell you that right there if you even did nothing else so now I'm well beyond that and I do about 2,000 steps which approximates it's approximately one hundred and thirty three flights of stairs and that's what I do as soon as I go to the gym before I do any other exercise I'd do that for cardiovascular health now I'm not telling anybody try to go to the gym tomorrow and do one hundred and thirty three flights on the Stairmaster you know you have you would have to build your way up to that you know it's I couldn't possibly come close to doing anything like that it would have been like a feat that would have been unbelievable unfathomable when I first started at the gym over a year ago and I have had gym memberships before in the past but just never really made it habitual I would go and then stop going you know it's now habituated into my lifestyle that's the key you know you you keep doing something till it becomes a habit a pattern then it becomes easier to do that's why bad habits are very hard to break because even with bad habits they become easier and easier to just keep doing them once we become accustomed to doing them for a long period of time the same could be said of good habits if you have bitch away a good habit it becomes easier and easier to do as time goes on so now 2,000 stairs is not that difficult for me to do and I could probably be probably push it and do more if I wanted as a matter I have in the past the most I've ever walked on the that Stairmaster was 150 flights of stairs just to see if I could do it one day so you know that's over 2,000 steps so it's something that you build to you don't do it all at once small steps pun intended another exercise that I began doing almost every time I go is a rowing machine an ERG machine so it's like crew rowing and this is like a full body workout you know it'll really put you in good cardiovascular health too and again you can take this at your own pace and there's tension that you could set on the machine most gyms have all of this stuff and more you know there's very complicated machines that you could find at certain gyms that work all kinds of different muscle groups you know most gyms have just simple machines that work one muscle set and then you move on to another machine and they're pretty easy to understand and work like people who are intimidated shouldn't be you know who thing called I won't know how to use this machine there's always people there that are very helpful the the staff at any decent gym will help you out I mean they want members you know they want membership so they're gonna be as nice as possible to people and as supportive as possible so the people will join and keep the membership so a rowing machine great exercise I usually do about 3,000 meters on the rowing machine which takes me approximately a little less than 15 minutes jumping rope they hear something everybody can do in their home you know just and again it's it's harder than people think especially as an adult you know we watch kids jump rope it's not the same for an adult you know we have a lot more weight and size and you know you got to start light and just do a few and then work your way up to doing sets you know so I do a few hundred jumps of rope when I go to the gym and you know it's like I do it in usually like 20 or 25 sets and then just keep repeating that but talk about great cardiovascular conditioning and something that will build up your your legs for leg strength jumping rope there's practically nothing better than that that's what one of the other activities I really enjoy when I go also vertical jumps onto a platform like they have these hard foam platforms that you could just you know leap up on to set up at the gym like I belong to I mean people could do this like you know if they have any kind of a platform in their house or outside like maybe in their their backyard or something like that and just if it's sturdy and you know you're not gonna hurt yourself you just do a vertical leap onto it I do a lot of these you know to basically improve dexterity balance and leg strength then of course there's all the machines the the general circuit weight machines and you can work out your arms your legs ABS etc you know III do those machines too after doing a lot of this cardio workout so joining a gym is something that you know a lot of people look at and they are hesitant or they are intimidated there's people of all ages you know all backgrounds races everything ages and it's again it's not something that people really need to be so intimidated about it's just like go go a couple times a week you know it could be a social thing too you can go with friends you know my gym membership allows me to take a person you know so I could take a guest it again it's a habit that you just want to get into by doing it and starting light over stressing yourself when you start light you're gonna it's gonna be something you feel you can handle and then you could do more the next time it's just like induction into truth nobody's going to be able to be explained what's going on on this planet overnight didn't happen that way for me it's not gonna happen that way for other people you can refute something that is completely wrong and try to explain to somebody about that point what is correct but you're not going to get all the information that somebody needs to know into their brain immediately in or in one day or in one week or in one month it's a process it's the same thing with the body building the body up as a process it's you're you're not gonna go from eating you know really bad high sugar low nutrient quality you know high bad fat you know low quality GMO food and having a body that's very out of shape or overweight to immediately being in great shape and you know having you know strong physical body it's a process it's gonna take time to do it's going to take work its effort so you know this is all about willpower folks I mean that's what we're talking about here exercise of the will and you know it's it's mind over matter really is your - to say I'm gonna make this matter called the body stronger now by what I'm going to work I'm going to perform upon it through the will so again it start where you're at and it's and remember that it's a process and you'll see results over time but it will be something that takes time that's what people don't like about it you know they want instant gratification that's part of the whole satanic culture in America we want instinct we want to see instant results instant gratification you know if I wanted to see totally instant results for the work I did I would have done one show you know try to explain everybody as much as possible in one show what's going on and then say oh I want that to take root and well it's not gonna work that it takes persistence the great work is about persistence it's about saying well here's what I've been able to accomplish today tomorrow I'm gonna be right back on that I'm gonna be continuing to work on that you know that's that's something that requires willpower that's what this whole thing is about willpower the willpower to get out of slavery ultimately you know because these people who consider them themselves our masters are not going to easily give up their their grip their stranglehold so another thing that I've been doing aside from just the gym is martial arts and you want to talk about something that will put you in good shape relatively quickly because it works the entire body and the mind and I mean it will work muscles you didn't think you had you know and I talked about this briefly on the first podcast after I came back from my hiatus that I've been getting involved in jeet kune do-- which was Bruce Lee's system of integral integral martial arts and it's even kind of a inadequate way of explaining what Jeet Kune Do is because Jeet Kune Do is a formless martial art form that basically says take whatever works and use it and if it does not work don't employ it and this is unheard of in the martial arts world because it's a very regimented world for the most part where that they say these are the forms this is how you do something and then you just practice it this way and don't deviate from that Jeet Kune Do is a radical departure from that kind of a mentality in ideology when it comes to martial arts because it's saying everybody's body is different you know everybody moves different ways they have different strengths and you have to play to your strengths so it's one of the things that attracted me to it not to mention I always love Bruce Lee growing up and you know this guy had a very great attitude and philosophy when it came to the flowing nature of martial arts how it should be a floo that works instead of something you're trying to you're trying to adapt to you should adapt it to yourself again radical departure from old-school way of thinking in martial arts that's why he was hated by many people who were considered gurus and seafoods in different martial arts forms and you know he was not well-liked amongst that community and again one of the other reasons is because he brought this all to the United States and taught it to the American culture they didn't want that information a lot of this they wanted to hold it tight to the chest again prior to a lot of the stuff Bruce Lee did you know in the last century you could call martial arts in occulted form of knowledge you know because not many people were into it it was you know something that wasn't as widespread nearly as it is now and I think a lot of that is because of Bruce Lee and his system called G kundo so this is what I've been studying and I have a good instructor for it and I take I meet with a private instructor a couple of times a week and it's been going great and we've been integrating that with Kali Kali is a Filipino system of stick fighting and sword fighting and often it is integrated with with JKD as are other weapon systems so that's that's the form of martial arts I've been studying there are many others and you know not telling anybody to just get involved with that one you know there's plenty of other martial arts that if you're attracted to for whatever reasons pursue it again one of the reasons I like martial arts is because I like JKD and and wanted to get involved in that is because it says you know all of these martial arts are have value and all of them are legitimate and we can take a little bit from this one and a little bit from this one and a little bit from this one and we can even adapt those techniques to suit what we want to do with them and you know employ them all depending on the situation or circumstance I mean to me that's kind of the approach I take with the information I'm putting forward hey maybe this religion has something that's worthwhile maybe this occult tradition has something that's worthwhile we don't need to make each one a religion or something that's set in stone but we could integrate concepts and ideas from all of them based on what works especially for the circumstances that we are in so that's kind of the approach that jeet kune do-- takes to martial arts and that's why i liked it because of its open-minded philosophy but not to say that other martial arts systems wouldn't be a great way to go to improve physical health you know strengthen the body improve the mind get better dexterity physically it's just a great way to go and it's so you want to talk about pushing and challenging yourself there's no better way than through the martial arts to do that one of the things I've been studying on my own outside of meeting with my instructor for JKD and Kali lessons is nunchucks really the actual name is nunchuck ku but people in the United

States generally know them as nunchucks it's a weapon that again Bruce Lee used and kind of popularized but the actual combat techniques are very different than the Freestyle techniques and that's kind of what I've been looking into on my own and it's a kind of an interest of mine again a weapon that you know is flexible and powerful and silent insofar as that aside from firearms you know if you're using firearms they're gonna make big noise and if you want to be kind of stout you want to have some stealth aspect to a defense or attack then you want something that's not going to make a lot of noise that's where edged weapons and flexible weapons are going to come into play so I seem to have an affinity for them for nunchucks and been kind of integrating that with my other martial arts studies also if you have an opportunity to do it one of the best things you can do for not only a physical strength and you know strengthening the muscles and the muscle tone and getting stronger to be able to do perform strikes is hitting a heavy bag now of course not everybody has one of these or has space for one of these but some gyms will have them I happen to have a personal friend who has one in their house and it really really helps with you know being able to practice strikes and practice kicks and also get some aggression out and just get a good workout in and sweat a lot you know that's that's one of the things that you know I've heard that is so important like sweating eliminates toxins from the body there are people who say you should do something to break a hard sweat every day because that's a part of eliminating toxins you know and I I couldn't agree more I mean like you do physical activity to the point of sweating and you're doing something right you know and you could just keep doing that activity every day it's removing the bad stuff from the body through the skin the skin is the biggest organ you know that's why physical activity is so important you sweat through the skin that's the one of the biggest surface area is the skin it's an organ and its function is to remove its that allow things into the body and remove things from the body so in addition to being you know defending being the outer layer of defense for what's inside of your body hitting a heavy bag definitely one of the best things that I've been doing over the last year or so and it really really helps to focus you to strengthen you and to help to release you know any pent-up tension as well so another thing that I've actually been delving into because of my interest in studying martial arts is yoga now I've talked about yoga as part of the New Age deception when it's used for the wrong reasons and in many cases it is it's used for escapism it's used to just have people ignore the negative aspects of what's going on and be able to tolerate those things more they're told oh you're you're not spiritual if you're going to be upset about these things so Oh take some yoga and you'll fight you'll learn ways to control that anger when it's something you should be getting angry about even so yoga can be used for the wrong reasons but there are positive applications for it I never tried to explain to anyone that yoga should be thrown out or is not a valid discipline of course it is it's just you've got to be using that tool for the right reasons there are valid reasons to employ and study yoga and then there are invalid ones you know it's about how you're using the tool it's a tool how are you using it so I think yoga is a way to really get in touch with the self and learn what about what your work to do here on earth is all about it's a centering tool especially for those who are too right brained it can be a very centering tool you know I'm sorry those who are too left brain it could be a very centering tool to bring you toward the right hemisphere of the brain and achieve balance for those who are very right brained I think yoga can actually if it's not used properly can imbalance you because New Age practices in general which I'm not saying yoga is new just a New Age practice of course it's been around for thousands of years before you know what we would consider the New Age movement came about this is an ancient Eastern tradition especially used in you know India and the the Indus Valley area the Vedic tradition etc but New Agers the way they're using it if somebody is right brain if doing yoga and meditation can imbalance them more toward the right brain and then they don't develop tendencies of self-defense and really standing up for themselves you know you have to be careful when things like this are used to get you to stand down you know they should be used to get you to build yourself up and get ready to stand up you know and take a stand and you know have more care about yourself and your rights and what other people are trying to take from you you know this is something that absolutely could focus you on reality if it's used properly so of course I feel that I have a firm grasp on what's really going on worldwide you know in the in the global picture sense of the term but how I've been using yoga is the supplement my martial arts studies by using it for strengthening muscles that are used in martial arts that you generally don't work when you work out at a gym or even just do physical activity on a daily basis every day yoga part of it could be isolating certain core groups of muscles and the the muscles around the stomach the core you know that the hips these are muscles that are always used in martial arts there are actually like the critical group of muscles that you use there so I've been practicing certain kinds of yoga that specifically address and target core muscles and again people could use yoga in many different ways for many different reasons but it's just been kind of an adjunct a supplement to my martial arts studies to integrate some yoga into my routine so that you're working with and strengthening a lot of the muscles that you use in martial arts another thing I do and try to do at least a few times a week is bicycling I got a bike from a neighbor a couple of years back and just gave it to me just like it was like you know this we used to be my sons he moved out never comes here never uses it doesn't want it at his new place do you want it like a really good bike to a good mountain bike and I was like yeah I'll take it so I got this bike for free and you know I really started putting it to use and it's a little bit obviously more difficult in a city than it is in a rural area because in a city there's a lot of traffic with cars and you have to be very careful or you can become injured but it's um you know it's something that I've adapted to pretty quickly and really I've enjoyed doing and I think it's something that's pretty easily easy and affordable for most people to get involved with so biking is definitely a whole body exercise cardiovascular exercise as well of course you know if you join a gym you can you know go on a stationary bike but no substitute for the real thing certainly again that could also be a social activity for people because they could do it with a friend so walking I mean here's one that you know more people should do every day and a lot of people just loathe to get involved with doing just you know that everybody wants to take a car everywhere they go you know I've walked certain places with people that you know at their age they should be able to walk ten times the length that was walked and they're completely winded and you could tell their cardio is way out of shape and you know insufficient certainly for their age where it should be in the city again it's something that some people really employ and get used to because it's actually easier and faster than driving someplace in many cases now if you have to go a long distance obviously then people are gonna get in the car but you know most places around here I could are within walking distance for me and if I could walk it that's that's what I do or bike firearms training I mean here's another thing that Pete a lot of people won't consider a physical activity but it's a combined physical and mental discipline because there's dexterity and marksmanship obviously involved but you know there's a lot of physical this is one of the reasons I wanted to get in better shape folks I mean you try holding a fully loaded semi-automatic rifle for any length of time you know some of them are lighter than others but you know they're they all have some significant weight to them and you know if you're not in physical condition to be able to do that you know you're not going to be able to defend yourself I think training with firearms also very much puts you in a psychological state of preparedness for what may very well be getting ready to occur and I think that's very important do as much physically be in shape for something like that for scenarios like what we're alluding to here on the show you want to be in good psychological condition you know and again hearing rounds large rounds go off you know it's it's way louder than what you think you know I wouldn't recommend doing it without any kind of ear protection but you know when hits the fan so to speak you know it's going to be quite enormous sound volume produced you know and being around that will almost psychologically desensitize you to it I mean you know it's a cold way of putting it but you know you have to hear those many ature explosions from rounds going off and you know not flinch not have your concentration broken you know I go in to the range somedays and it's like you know hardly anyone is there and you could really take your time and focus and there you don't have a lot of distraction and sound and then some days I go and it's packed and it sounds like World War 3 is already happening you know and there's a round going multiple rounds going off every second so I think going to arrange getting better with your aim and marksmanship plus learning the firearm you know practicing with it holding it and practicing with it for you know in standing position for lengths of time is also good physical exercise and but moreover it's a very good psychological preparedness so I want to shift from physical activity a little bit toward diet and talk about some of the things that I've been using on a daily basis to sustain my body and as supplemental you know dietary supplements etc I've been of course continuing to do a lot of juicing and try to make juicing a stable a staple and a stable part of my diet you know people still don't quite understand I find that people don't understand juicing and a lot of them think it's not something that we should be doing and they have no idea your body is a juicer you are a juicer there is the big revelation from podcast 195 folks you are a juicer okay whether you know it or not or like it or not your body already works as a juicer this is how we get the nutrients from our food you take it into the mouth you bite off a piece you chew it masticate it grind it up with your teeth then you swallow it it goes into the stomach and the intestinal tract which then squeeze it and process it and get the micronutrients out of it in the form of the moisture and the water and the soluble fiber and then you eliminate the bulk of the insoluble fiber your body does use a bit of that insoluble fiber as well but then you essentially eliminate that that's exactly that process of digestion of you know mastication chewing and then swallowing and digesting and eliminating and using the micro nutrient dense water and eliminating the bulk of the insoluble fiber that process of digestion of eating and digesting food is the exact process that a juicer performs upon the fruits and vegetables that you put into it therefore making your body take in all the positive benefits of that process by drinking the juice that is full of micronutrient dense with micronutrients and then you don't have the body does not have to expend the amount of energy required to do that if you had just eaten a solid meal of solid food not to say don't eat solid food okay again balance is the key you're going to introduce juicing into your existing diet you don't even have to make any other changes at first you know then you could start eating around the juicer a lot of people do this as a technique you know that the whole idea here is you're taking in distilled water full of micronutrient compounds it's also structured water because it is distilled and structured as it is pulled up through the root system of that plants the vegetables and fruits that we consume so juicing is one of the biggest things that I think people leave out of the modern diet and it's the biggest mistake that they make and I will continue to support that position because nothing has shown me that that is the incorrect way of viewing the benefits of juicing the guy who got me into juicing years and years and years ago was Jay Kordich I don't know him personally but I've you know watched a lot of his material and saw him on infomercials in the past and the guy resonated with me you could just tell he's got a good heart and you know first of all look at his health I mean I mean this guy's in his 90s and it's still strong as a bowl you know so it works you know you have to integrate it into your diet and then you could do it more and more and get better at doing it and find the combinations that work right for you I like doing some green juice juicing right before I came on the air today to do this podcast I drank some deep green juice and it was kale spinach cucumbers and a little bit of apples for sweetness and it was awesome you know I mean totally charges you up you know that's that's what we need that deep green nutrient density and I mean you could combine this with blending especially if you have yeah I recommend a good auger juicer a single auger juicer is probably the way to go if you don't want to break the bank makes a great juice the juice I made today I did in a masticating juicer a centrifugal masticating juicer I use the Breville so I use them both I have one of each and they work great for what I do you know certain ones work better for certain things I really like how the slow juicer does carrots and green leafy vegetables and I like the way that the centrifugal masticating juicer does citrus fruits so you know they have their strengths and you know people have to look into them and decide what works best for them and then you know what's within their budget and and pick one up just buy one and start using it it's not that difficult and they've come a long way in their in their quality and you know in their capability so their efficiency I should say so another thing I'd like to do is make raw food smoothies with fruits and vegetables and what works great for this is a Vitamix which I also own that's a very expensive high-speed blender with a tamper and it's like a proprietary you know system of shape and it's variable speed etc but I'll tell you what for as expensive as they are not trying to make this into an infomercial the Vitamix was one of the best investments in my health that I've ever made and I use it every single day you know you can't beat it for making great high nutrient dense smoothies especially if you're going to incorporate greens into the smoothie which can produce a bitter taste you know you want them really really really well blended so that it is the smoothie is in fact smooth I use a lot of spinach and kale and the smoothies that I make and of course use bananas oranges I you know I like to make citrus flavored smoothies a lot so I'll put oranges in there grapes strawberries blueberries any berries really will really kick up the taste of a smoothie apples for sweetness I'll add chia seeds and flax seeds for healthy fats and they're you know really super foods you know that have all the proteins that they have all the building blocks the amino acids for building the proteins the body needs you throw those into smoothies I mean and your your your golden green powder blends many different kinds good ones on the market I like maca which is like kind of like a root it's a for energy vitamin C powder I'll add additional vitamin C powder into a smoothie I use sodium a sorbet powder not a sorbic acid the sodium is sorbate gets integrated much better than a sorbic is a healthier form of vitamin C for vitamin C I also recommend beyond tangy tangerine again not not a product placement for it but I use it I mean I think this is one of youngevity 's best products and it works I mean it it has all the micronutrients it has a ton of trace mineral elements in it it tastes great I put that in green smoothies and you know it's a perfect blending it blends perfectly with the the greens bitter you know this has a little bit of a sweet and a tangy and citrusy flavor and the combination works perfectly I've been using youngevity 'he's beyond osteo effects for bone health and car you know cartilage joint her joint health etc I find they put out some good products another place that I think has been putting out great products for health is Infowars and hey we're gonna have you know tons of people explode about that you know how could you talk about Alex Jones you know it's like you know he's doing good work with what he's putting out there still would like to see him go full anarchist you know he's still towing the men are kissed line but I like Alex I like his energy in his spirit and he's bringing this information out to the forefront for the people who are new to it and will be introduced to deeper aspects of it through him so and they'll go on other people will talk about those deeper aspects you know once they get the frontline information so to speak so I like some of the stuff that he has in his health product section on you know his store and I use the coffee that he puts out the immune system support blend I think it's great I think it's one of the best coffees I've ever tasted honestly I'm not a huge coffee drinker I'll have a cup every now again but this is organic Arabica coffee and they have six different immune system supporting mushrooms blended in with it and I enjoy a cup of that in the morning sometimes and I also like rooibos tea rooibos is a very high antioxidant red tea that has six times more antioxidants in it then green tea even does and it's caffeine free naturally it's not decaffeinated tea it's naturally no caffeine because it's from a shrub that grows in South Africa and South Africans have been using this for health benefits for decades and maybe even hundreds of years the West was kind of more recently introduced to rooibos and I grind it very very fine I actually put it in the Vitamix with I have a dry blade container for the Vitamix as well and I'll grind it super fine that's how I'll grind my coffee so I can make it like espresso style and I make an espresso style rooibos and I'm telling you this stuff is as good if not better than coffee and just gives you this charged feeling because so high in antioxidants great tea great to give the children even because there's no caffeine in it and very you know very healthy for the for the body because of all the antioxidants in it rooibos have spelled Roo IBOs pronounced huevos looks like rooibos but it's pronounced rooibos and it's just it's fantastic some supplements i've been using again you know to just give the info whores products a little kick here i've been using their super male vitality formula and what this does the claim that it makes is that it balances or hormonal e balances the male hormone system because it has a lot of testosterone supporting roots in the mixture fruits and roots some of them I'll just name a couple of tribulus terrestris suma ashwagandha maca again use maca powder myself I put that in smoothies Avena sativa tongkat Ali Catawba more more Mira palma and i think that's it so these basically are testosterone boosting in many of them and they will also enhance energy and and clarity mental clarity and mental function so I do find that they it's been working I mean it's a combination of these things you could buy these things anywhere - and make tinctures with them yourself you know but I found that this definitely helps to balance you know the chemicals that are in your body that give you energy and you know I've been talking about more and I'm going to be talking about especially at the free or mine for conference the war on testosterone there is a war on this chemical in the body like that the powers that should not be our waging war on the chemical called testosterone they don't want it in you if you're a man they really don't want it in you but they don't want it in you if you're a woman again people have to understand testosterone is not only vitally important for a met males hormonal balance and makeup but it is absolutely critical for a woman's hormonal balance if a woman has low testosterone levels of course a woman's testosterone levels should not be anywhere near what a man's testosterone levels are but if a woman's testosterone levels are low for a woman or non-existent that throws off a lot of the hormonal balance and a woman and they develop all kinds of health problems as well and sexual dysfunctions as well so the the the reigning powers certainly are waging a war on this naturally produced chemical in the body that and they want it gone they don't want it in society because it's a problem for them testosterone makes people resist their enslavement and they don't want that they want people to go quietly you know so I find that the super male vitality formula definitely does work for you know keeping testosterone levels where they should be also been using their nascent iodine and you can get nascent iodine from anywhere I've been using this survival shield and I find that it does what it claims to do you know it's supposed to be for thyroid health and proper thyroid function and you know I it's the energy that it helps you to maintain it's it's it's a valid legitimate claim I have found it to be valid I have found that it works now other people might take it and sell it doesn't work for them well whatever then don't use it you know but the I'll stand by those three products from Infowars and what Alex Jones has been putting out the survival shield nascent iodine the super male vitality formula and the immune system support blend coffee are phenomenal products as far as I'm concerned another powder that I try to use as much as possible is apricot seed powder and this is a rare thing only a few places even sell this online but it's laetrile and light a visit to talk about another compound that they want eliminated that they want to wait war on they don't want laetrile in the human diet because it is a cancer killer it's also known as vitamin b17 one of the B vitamins that most people are completely deficient in you can get it from apricot seeds ground up and absolutely powerful for not only killing cancer cells but creating an environment that is cancer resistant another powder all put in smoothies is Moringa oleifera and for people who haven't heard of Moringa it is an absolute superfood with some of the highest nutrient density of any food in the world also just known as Moringa mor ing a people should really look into it and get some for themselves because it's fantastic I'll use some niacin and zinc sometimes in you know to supplement my diet for cleansing diatomaceous earth food grade diatomaceous earth you can get it as fossilized phytoplankton powder which is an excellent supplement for doing the gentle cleanse if you need a stronger cleansed and obviously you know this wouldn't suffice for that but for gentle intestinal cleanse food grade diatomaceous earth is excellent and for our chelation and pulling you know metals out of the body that don't belong in it activated charcoal is also a good product to use so you know again I want to emphasize the role of balance in all of this folks you know this is about what you do most of the time I can't critically stress that enough you know you can go and have the piece of chocolate cake that's made with you know whatever white sugar in the icing etc if you do good healthy nutrient-dense quality foods most of the time you know don't deny yourself having a beer every now and again if you know you're not gonna make it a bad habit you know I I just uh you know before the podcast had a piece of fudge okay high sugar high butter you know tasty I can have that because you know I'm generally eating right you know it's not this isn't about extremism everybody wants to take everything and make it into a total extreme you know what you should be extreme about understanding your rights and not trying to take other people's rights you know don't do violence against other people be extreme about that I know people extend that immediately to animals and veganism okay just like with people not immediately getting out of the religion of authority and statism you know they may not immediately go to going from a total carnivore one day to a vegan the next it's a process of course there's an underlying truth regarding natural law and what we have a right and don't have a right to do but balance is the key balance is the key factor in all of this so you know should you be concerned about GMOs yes should you be concerned about excitotoxin and food yes does that mean you can never go to a restaurant and eat out I don't see it that way you know with people make it that extreme I think what you're doing is you're actually harming the body because you're you're you're weakening your defense system the the defense system of the body does need some things to quote-unquote practice against you know if your body's so clean that you the first thing you put into it that has a little bit of toxicity your body has a horrible reaction that means you're weaker than you were you know I'm not saying go and put tons of toxins in the body either I feel like I'm strong enough from what I do every day that if I do encounter toxin my body's gonna deal with it it's gonna deal with it that's what a good immune system is about it's not about totally sanitizing everything no more than we can totally sanitize the behaviors of everybody in the world there's always going to be some toxins and toxic elements out there but if you what you do most of the time is what's gonna make the difference so you'll you you stay on stuff like this healthy stuff and building the body up the other things that are geared as an attack against the immune system an attack against the body an attack against the mine will be mitigated they their impact will be made negligible you know that's why think the things like radionics and the mind control methodologies and all that don't have as much of an effect on me because I've strengthened myself against them again this is like shielding this is an hour chemical form of shielding not only against it's not only psychic defense it's physical defense as well and then you can get into making your own things making your own foods I mean this this is something folks if you told me about 10 to 15 years ago that I would be doing things I would be doing today I would have left you hysterically out of the room but now I make all of these things you know on a daily and weekly basis fermented foods you know I wouldn't would have believed that if you told me I'd be making my own pickles or sauerkraut you know fermented green beans kombucha another great fermented drink that it has anti-cancer properties because of the beneficial acids that it contains that's another thing they want gone they want it oh they want to take kombucha off certain markets because oh if it sits it can develop this tiny tiny little bit of alcohol in it that is so insignificant you know no they don't want it out there because they're worried about people you need to drink ten times your body weight to even get a buzz you know and they're worried about the tiny little bit of alcohol that's in it they don't want that out there because it it is a cancer preventive same reason they don't want cannabis out there you know so you know a lot of these things with fermented foods therefore probiotics are for putting the right Mike microbes in the dinette digestive system you know the health starts in the digestive system it starts in the gut the gut lining it has to have the right flora the right you know microorganisms that create the intestinal flora fermented foods help maintain that condition and they maintain an alkaline condition so fermented foods I mean I can't stress it enough fantastic I love sauerkraut I always always make my own sauerkraut and keep it in the house we make kombucha it's a it's a fun thing to do and you can experiment with different you know flavor profiles to by putting different things in fermented foods I make my own almond milk to try to you know essentially come off of dairy and you could get almond based cheeses as well which I found have been the best you know imitation cheeses that come probably the closest but making almond milk is very simple and it's good for you a lot of antioxidants in it nuts have good protein content so if you have a Vitamix it's real simple you know put a couple of cups of almonds in the Vitamix fill it with water blend on high and strain that's and you have great almond milk and you could flavor it with whatever you want you could put some liquid steeped vanilla stevia in it you know or you know flavour it with raw sugar or some agave nectar or whatever you like honey or whatever and you can make a great almond milk that way I make my own homemade peanut butter in a Vitamix which is simple throw the peanuts in there and just grind them up with the tamper on high you know if you want some natural sea salt or a little bit of raw sugar you could add that to taste and if it makes the best peanut butter you'll ever you'll ever eat I've been experimenting with baking making homemade bread from ancient grains like spell millet quinoa rye stuff like that they come out great sprouting seeds this is another thing I mean that's very easy to do you know and you make bean sprouts mung beans work really great there's alfalfa sprouts are awesome and real high high nutrient sprouting is something I think people should get into more and you know every once in a while especially around this time of the year I'll bake a few pies you know for desserts you know splurging into the sweet realm a little bit I personally like apple and sweet potato pies I make them around this time of the year recently made a few you know you got to have fun with it too so you know it's not always you know doesn't always have to be extreme and serious you know you can make some stuff that you like and not isn't necessarily even the healthiest thing in the world and enjoy a dessert occasionally you know it's like people have to realize again balance is the key to all of this and the main thing I'm emphasizing here is get your body in as strong active healthy condition as possible because you're going to be using it you are going to need it you are going to have to depend upon it and rely upon it in what is coming in America so do not neglect the physical vehicle you know the basis for that folks the very very underlying basis for that is water you know this is what I talked about when I talked about food and depth and past podcasts we're largely made of water water is the carrying agent for all the nutrients in the body and it's the carrying agent for the toxins that get them out of the body water does those things you want as pure water as possible the body needs pure water for hydration does not need water with anything in it this is a myth this is a piece of disinformation distilled water is the best water you can put into your body that's why juicing is great because juicing releases distilled water from the plants with they're micronutrient elements in it distilled water is the most important thing that you could really put into the body this it's Brooke were required for hydration now barring having a distiller or buying distilled water you can get a reverse osmosis system for your house this is what I use and it gets it down to very very close to levels of distilled not quite completely there but I tested my water yesterday from my reverse osmosis filter and the water in coming into my house was 250 parts per million of undissolved solids which is like ridiculous and I've seen it I've tested it in other places in Philadelphia and it's been upwards of 600 parts per million which you're getting into like you know damaging the kidneys territory at that point the water at my faucet in my kitchen sink was coming out at about 250 parts per million which for Philadelphia municipal drinking water I guess is not that bad compared to what I've seen in other places I mean at the Jersey Shore testing water that I'll forget it it's in the multiple thousands of undissolved so you could see the undissolved solids in new New Jersey Shore drinking water I mean their municipal water supply is a mess a mess so I tested my reverse osmosis system yesterday and it was at nine parts per million that's pretty darn good and there's RO systems that we need to get it down lower than that and that filter has been in there for six months I have to change it in January so this is the the the sixth month that it's been in use and it's still you know at nine parts per million that's fantastic that's a unit that works properly so I I'm a big fan of RO systems I think it's probably one of the best ways to cheaply purify your water and for an investment of like $200 plus installation from a plumber which will probably run you less than $100 for about $300 you can get a great reverse osmosis osmosis system installed under your sink and have pure drinking water and cooking water this is what we always use in this house for cooking drinking we give it to our dogs it goes into the fish tank you know that this is absolutely the only thing that I'm putting into my body we haven't hooked up to the ice cube lying to go to the ice cube maker and they're in the freezer so even our ice is reverse osmosis filtered you know will fill up jugs of water and put it on a dispenser but it's all our oh I think healthy pure drinking water is one of the foundations for good health in general period if you have water structure err you could also structure the water structured water the claim of it is that it goes into the cells more efficiently when it's structured a certain way so there's different water structures one was given to me as a gift from a listener and we structure the water that we use to overall I think one of the best ways that anybody can really improve their quality of their life not only just by improving their mental clarity their mental focus you know their ability there to reason their understanding of natural law of course you know is going to bring about better overall well-being in addition to physical well-being spiritual well-being you know being physically strong you know it's it's like it's a it's it's a balance it's a back and forth being spiritually strong will help you to want to increase the physical well-being being physically strong will help you to resist other forms of toxins and mind control and you know the manipulation efforts that are geared against us the body plays a huge role in that so it's not all just about sitting at your computer or at the TV taking in documentaries and reading books it's about get being active as well there's a balance that needs to be struck there it's something not again I haven't talked enough about but I want to even move into more especially regarding the time that we are in folks you know because there's a lot of toxic toxic elements in the environment there's not only just toxic people because they don't have a shielding to this because they're not doing a lot of this work but you know we have physically toxic agents all around us the chemtrails that they continue to spray the poisons in the food radion equiping read that we know even very little about guaranteed that's at work you know so-called drugs and medications that go to work on the physiology and horrible ways fluoride in the water you know which is so important to get that out of there with things like a reverse osmosis system or a water distiller there's so much garbage in the environment it's constantly barage in us and going to work to try to break down our defenses physically and then to get into the body and break down our defenses psychically and spiritually learning about all of this stuff learning the truth and then living according to the principles of natural law is going to be our biggest shielding against that getting the physical body in good condition is going to be an additional certainly a strong additional layer of shielding against that it starts with the mind it flows to the body and then as the body gets stronger the minds and mind and spirit are going to get healthier it's a cycle it can help us to overcome bad emotional states depression when we think of the state of the world you know that's one of the things I think it's very effectively helped me to do a lot of physical activity and staying fit and eating right you know you you you dip out of that and you don't do those things and you feel that the depression coming on more and you know when you look especially when you look at the state of the world it's easy to become overcome by all those things so doing that physical activity will help keep you in a balanced emotional state and that's very important especially if you're going to be doing the great work and continuing to do it persistently most of all physical strength imparts the ability to defend oneself and those around us who we care about when the time becomes necessary to do that to actually physically defend oneself and one's rights and one's life ladies and gentlemen that time is coming if not already upon us so my suggestion to everybody is to get ready physically prepare yourself an additional to spiritually and psychologically preparing yourself because the physical body is going to be required and what we are going to encounter moving forward so prepare yourself get ready and ultimately take a role in caring about your physical strength and well-being because that is part of the total makeup of the self and that's ultimately what it's all about improving the self and being better than the person that we were again last year or last month or last week or yesterday so I think that's a really good place to leave this topic of discussion for today I hope people have found this interesting and will be motivated to put some of these things into practice directly in their own lives ladies and gentlemen you've been listening to what on earth is happening I'm your host mark passio we'll see you right here next week thanks so much for listening have great day everyone [Music] [Applause] [Music]

What On Earth Is Happening Show #196

Topics: *Excuses people make for immoral Order-Followers, Allegiance To Truth And Freedom is higher than allegiance to family, Order-Followers as Cult Members, True Courage, Obama's Executive Orders regarding firearms, Disarming Anti-Authoritarians and Veterans, the Oregon standoff with Militia members at the Mahler Wildlife Refuge, Standing up to Tyranny, How the Oregon Militia members' situation differs from the situation of the Occupy Protesters, Saying The Lost Word "NO," Overt Criminals vs. Occult Criminals, Courage to stand up to bullies and tyrants, Left-Brained "EggHeads," Right-Brained "Spiritualists," the Cowardice of people who are Brain-Imbalanced, how the situation we face is NOT A JOKE, the Importance of the R-Complex of the Brain, the Importance of Preparedness and Self-Defense, "Having The Psychopath," Apocalypse vs. Armageddon, Idiots who belive government propaganda about ISIS being their biggest threat, Philadelphia Police Officer shooting "in the name of Islam," Operation Cyclone, the covert radicalization of Islam by the CIA and ISI, "Charlie Wilson's War."*

freedom man that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe you [Music] welcome one and all you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening dot-com today is Monday January 11 2016 and this is the first what on earth is happening podcast of the year this is podcast number 196 I didn't do a podcast last week because well it's actually an interesting story two weeks ago my podcast was on physical health and the importance of physical health when it comes to combating the current immoral system of slavery that humanity is living in but I did not ultimately get to doing a show last week because I had to visit a sick relative in the hospital who has not been taken to well care of themselves in their own physical condition and that you know led to me having to spend some time last week going and visiting them hopefully the person will turn around they're ingrained habitual behavior when it comes to choosing the wrong things to put into their body and not putting the right things into their body but you know as we all know old habits die hard so we have a great show lined up for you here today though I'm going to be getting into talking about more issues related to the topics of self-defense rebellion and courage and this is going to be an ongoing theme of this show as we move forward certainly other topics will be revisited and new topics will it be introduced but this is something that I think people really have to get through their head and a lot of people still don't have a have an understanding or a grasp of it because they're too right brained many people will insist that I'm too left brained because I talk about these issues I would definitely take exception to that because I think the Sacred Feminine dynamic care for truth and care for freedom is what drives the dynamic of self-defense and true courage so this is what I'll be getting into and also discussing some discussing those topics in light of some worldly events that are currently taking place as as we speak so that's coming up on this edition of what on earth is happening want to do some housekeeping in some event announcements right now the free your mind for conference of course coming up in April of this year the freer mind for conference a conference on consciousness mind control and the occults will be taking place April 15th 16th and 17th that's Friday Saturday and Sunday April 15th through 17th 2016 at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in Langhorne Pennsylvania just outside the city limits of Philadelphia for your mine returns to Philadelphia with a three-day conference featuring top caliber whistleblowers and researchers from across the country who will shed light upon our world's problems and bring forward empowering solutions spreading awareness on the topics of consciousness mind control subversive occult influences holistic body mind spirit health and solution oriented approaches to the problems humanity faces in these challenging times the speaker list for free or mind for Bob Tuscan Cathy O'Brien davidwhitehead Freeman Jamie Hanshaw Jay Parker Janis barceló Jim Marrs John vibes Jordan Maxwell Josey Wales ken Rolla Laura Eisenhower Mark passio Mark Phillips Mary Sean Young max Egan and Ross been an all weekend past for the free your mind for conference $169.99 individual day passes $59.99 tickets are available right now get them now if you can make a donation of the conference that's also very welcome the website that you can get your tickets free your mind conference calm this is gonna be the biggest event of its kind certainly on the East Coast probably in the whole country probably in the whole world in 2016 free your mind conference calm don't miss it ladies and gentlemen free your mind for April 15th 16th and 17th of this year I will be giving a live all-day seminar along with Jay Parker this will be called demystifying the occult part 2 Satanism and the dark occult a live all-day seminar by myself Mark passio and my good friend Jay Parker this will be taking place Saturday February 6th 2016 from 12:30 p.m. to 9 o'clock p.m. at the ethical Society of Philadelphia the ethical Society is located at 1906 Rittenhouse Square Philadelphia PA the admission price is a twenty to forty dollar cash donation whatever the attendee can afford to give minimum cash donation asked for is twenty dollars but if people can give more you know you can donate up to forty if you are inclined to do so there will be discounted parking available for this seminar demystifying the occult part two at easy parking which is just around the corner at 21st and chestnut streets in Philadelphia what this seminar is going to be about is what the dark occult actually is and how it works I gave a seminar about different occult traditions last year and this one is going to specifically focus on dark occultism Satanism in particular so the description is as follows what is Satanism what is dark occultism how are they employed to control us how can we defend ourselves against their methods of manipulation in this seminar I will discuss what Satanism really is versus what most people unfortunately still believe it to be I'll outline the basic ideology of Satanism the ideology which is running our society and the ideology which is ultimately ruling this entire planet I will explain the psychological mindset of the adherence of this dark religion called Satanism and that mindset is such an integral part of the continuation how that mindset is such a integral part of the continuation of human slavery I will delve into the knowledge of how this old religion works in order for people to strengthen their own defense against its unholy influence in our society and in our lives this is what demystifying the occult part to Satanism and the dark occult is going to be all about once again along with Jay Parker I'll be giving this all-day seminar Saturday February 6th you can it's uh only at the door tickets can be purchased no advance tickets plenty of space don't worry about running out of space the the room is a nice large room so it will accommodate everyone who will come and attend this this all-day seminar it's all day from 12:30 to 9:00 p.m. at the ethical Society of Philadelphia once again Saturday February 6th really really looking forward to this of course this is going to be hosted by Arthur Capozzi of pattern-recognition time who also hosted demystifying the occult part one and who also hosted my natural law seminar a couple of years back I will have DVDs and t-shirts both what on earth is happening DVDs what on earth is happening t-shirts and I will also have some founders merchandise my band the founders I'll have t-shirts available there as well speaking of the founders we will be playing my hissed hardcore punk band the most extreme anarchist band in the world to my knowledge were called the founders and we'll be playing with Saturday February 27th 2016 at Connie's rickrack in South Philadelphia Connie's is on just off the corner of 9th and Ellsworth streets the exact address is 1132 South 9th Street Philadelphia PA so we don't have other bands yet we're looking for bands that would be appropriate for our style to book on this bill but will basically be headlining it and it'll be our second full show we'll be playing a full set so come on out to check out the founders if you're into freedom minded music with a very powerful and positive message of freedom and anti-authoritarianism once again February 27th Saturday night will be probably starting around 9:00 p.m. so if you're into good heavy freedom oriented music come on out and check out my band the founders will also have t-shirts available there for the band there are still what on earth is happening t-shirts available you could check that out on the website what on earth is happening calm clicking on the left hand side the promo t-shirts still available for a donation you could click the button and find out how that works by emailing me also there is a donation link on the left hand side of the what on earth is happening calm website if you feel that you have received value from the information that I have shared as part of what on earth is happening please do feel free to make a voluntary donation so that I can continue to do this work long into the future I want to thank Alex Avery of authentic news Mediacom I did an interview video interview with him this past week and it is now up live on my website in the new section and in the recent news on the left hand side the site I'm gonna be covering some of the things that I talked about with him in that interview in this podcast today I will also be interviewed by Joyce Reilly of the famous radio show the power hour and I'll be on that show this Friday January 15th at 9 o'clock a.m. Eastern Time that's 8 a.m. Central time so you could check out a live interview that Joyce Reilly will be conducting with me this Friday again on the power hour 9 a.m. Eastern Time the topic for discussion most likely will be order followers and the cult of ultimate evil that they are member members of and you know there's still so much so many excuses that people give to order followers you know I'll just I could actually even lead-in to this podcast with that but just one other very brief point of housekeeping uh also I am still looking for kind of new topics to talk about on this show I will be getting into the concept that I refer to as maven targeting in a future show I'll be covering um preparedness it's something I think is very important in the times we're living in and we'll be coming will become increasingly important as events move forward I'll be covering self-defense in the form of martial arts and bringing on a martial arts expert to talk about that as well I will be talking more about the dark occult and especially the influence that dark occultism had in the rise of Nazism and still has influence in the form of Nazi ideology in our world today so there are some topics that are coming in future shows but I have asked for some topics that people want to hear discussed through Facebook and we did receive a nice long list of topics that people want to hear talked about and I'll be considering them for future what on earth is happening show topics regarding order followers I still hear so and again this is a good lead-in to what I want to talk about today because I want to get into self-defense and gun control and I want to get into the situation happening with the militia at the mall or Wildlife Refuge in that whole situation you know I also want to briefly talk about toward the end of the podcast today people who still think you know that Isis is the main problem that we face in the world today you know the radicalized form of Islam that the United States created as a way to take people's freedom away by putting them in fear but it this all relates to order followers because people are still making excuses for these people's behavior and thinking that there is any excuse for the behavior of order followers and people still don't get it they still think that the way to deal with these people is to sugarcoat the truth and you know try to you know blow smoke up their ass and talk to them like they're a child you know it's like we're not gonna get out of this mess that we've created for ourselves until we start being honest with people who are doing things that are completely immoral and telling them that it's not okay and telling them that they need to stop doing it regardless of what that means for them I didn't put them in that situation I don't care how much mind control they were put under okay I was put under a lot of mind-control - and I still didn't go and do that job and become an order follower and somebody who oppresses somebody else's rights yeah I got involved with a dark cult until I found out that it was a dark cult and how they were scheming to put people in permanent slavery and then said no to it so somebody who was as into a cult as I was in the past can say no anybody can and there's no excuse for these people continuing to do what they're doing you know what people will take exception to what I'm saying when I'm telling them to quit their job and attack me like I'm the bad guy for saying that because I'm saying oh if you have a family to support and feed I'll care how how else or how much how else you need to work to go and do that or how much hardship you or your family might come under as a result of you quitting your current job that's immoral immoral yeah I don't care about that you know because if it comes down to you either harm and continuing to harm people or your family having some hardship because you're currently out of money from your immoral occupation then maybe your family needs to suffer in the short term that's how it works that's how it is okay you know I didn't put somebody in that situation they put themselves in that situation they have to deal with the repercussions and the consequences even if it means they have to suffer short-term people want to think Oh everybody has the ultimate Allegiance and the ultimate thing that they have a responsibility to is family okay can I say it any plainer folks that's absolutely not the case your family is not your first responsibility a human beings first responsibility is ultimately to the truth and human beings second responsibility is to freedom then your family comes next actually your self should ultimately come next because if you can't care for yourself and put yourself in a good spiritual and psychological condition you can't care about anybody else so I would say yourself comes next and then your family comes next because and I mean the higher self I'm not talking about just caring about selfishly yourself no don't twist my words and you know try to twist the meaning of what I'm saying I mean you got to get yourself in a proper spiritual state otherwise any kind of care that you might quote unquote care that you might give to somebody else is a low form of care that's what that's what people are arguing for about these order followers that they're low form of care over their immediate family somehow supersedes care with a capital C that somebody should have to the truth and about human freedom okay so this nonsense about how the family unit has to first over truth and freedom is utter nonsense the laws of morality come first and the law freedom comes second that which is directly connected to the laws of morality so when I tell people yeah you need to quit your job no matter what it means for you in the short term quit your cult am i interested in what's gonna happen to you short term not my business or my problem quite frankly and if you think that sounds callous and uncaring you can think whatever you want am i interested in what people think about how I feel about other people or how they feel about me I'm explaining the right thing to do is the right thing to do always the comfortable thing to do or the easy thing to do no it isn't but when it comes to harming somebody else's rights that's when it's time to take immediate action and stop performing that behavior and people will say oh what about repercussions if there's going to be blowback amongst the actual institution that they're involved in hey look at my situation I was involved with the people who are actually running things do you think they don't have resources and the ability to do whatever they want harmful to another person and I still said no to them and left they consider what I understood about their operation insignificant and didn't want to come after me because I don't know quote where the bodies are buried about specific crimes that might be high-level crimes that's when they really physically go after somebody when somebody just understands their ideology and what they're doing ideologically in the world to put people into a trance into thrall you know so that they can continue to feed the Machine of slavery that these people have built they don't really care about that because they know they have 99.9 percent of people's minds but you know what if their order followers if their robot order followers started quitting their jobs and Mastro's those people would be in trouble because they they couldn't punch their way out of a wet paper bag you know they're not gonna physically control people they have to control the minds of dumb idiot and the and earth all men to get them to do their bidding for them violently and they got to control the minds of dumb idiot Neanderthal women you know and you know I shouldn't be insulting our Neanderthal brothers because they were probably much more intelligent than modern human beings are okay bad choice of words all right you know these dumb idiot moron women who then support the behaviors of these dumb idiot moron men who go and give their free will choice and their behaviors over to psychopathic lunatics because they're secondary Psychopaths but oh hey that brings in a paycheck and that creates our quote unquote perceived level of security so let's support all the men that's the X most women's attitude let's support men for doing this let's not make excuses they're providing for our comfort and the comfort of our children I mean please you're a moral trash you're the people like that are a moral trash so I'll be getting into some of these issues regarding order followers and the absolute excuses that people continue to make for them because they're soft weak minded idiots and they don't want to hear the truth about that they certainly don't want to hear it spoken plainly to their face like that but like I said if it is about an issue that is affecting people's rights and freedom and that's what order followers are doing every day it needs to be spoken plainly to their face just like that and if nobody else will do it I'll do it so how about this Obama gun control situation going on and people just sitting back accepting it I mean this is like one of the most ridiculous things that I've heard and he started early this year I knew he was going to you know because this is his last year full year in office and he's gonna hit it hard this year as Pappa dent you know as the puppet on the master strings he's going to be mr. yes-man to his overlords and he's gonna try to put Jam forward the cultural Marxist agenda and Jam forward the gun gun control agenda supplemented by tons of false flags this year I'm telling you I said a couple weeks ago 2015 was the year of false flags we had more false flag events in 2015 than ever before in one year and I'm telling you 2016 my prediction is 2016 is going to supersede 2015 in the amount of false flags were gonna see this year it's gonna be out of control because this guy is determined you know he's his elite masters love him because he's a good actor he's a good enough actor okay he comes across as intelligent and sure of himself to all the dunces of the world who hang on his every word okay he's a rabid communist he's a rabid gun grabber and that's not alarmist that's very real world practical understanding of who this guy is and he lied to everybody about saying you know the executive branch has become too powerful you know under Bush previously and we need to get rid of this precedent about signing statements and executive orders and then he became the president who did more executive orders and signing statements than any other president in history and now the new thing he as our King is going to implement is all executive orders regarding guns you know the new executive orders he put forward makes it more difficult for people to obtain guns he's trying to eliminate private sales of all kind in the whole in the whole United States saying that anybody who wants a saw a gun to another person should have to get a firearms dealer license in order to do that to take away people's ability to exchange firearms long arms rifles and shotguns etc between individuals which has been a tradition of this country since its beginning when handguns came in they regulate those so as that private people can't sell them you have to be a firearms dealer to sell handguns but long arms have always been sold and traded between people with no problem in this country now all of a sudden Obama wants to change this and make individuals have to obtain a license in order to sell property to another person totally doing an end-run around Congress with all of this even if you believe in the laws of man okay and said he wouldn't do any round Congress that that had been done too much and the presidency and gotten too powerful and out of control as a result of that during all of his campaign promises saying he wouldn't do those things and here he is doing them and people who support him still won't acknowledge that he was an absolute bald-faced liar that's because as long as long as he supports the Liberals worldview you know then anything he do he could do no wrong anything he does it doubts it's fine as long as it supports our worldview and what we want done through the violence of the state I mean another thing he promised in these executive orders as he wants to get radically increase the size of the BATFE the Bureau of Alcohol Tobacco Firearms and Explosives as if this isn't a completely out-of-control federal bureaucracy as it stands he wants to hire tens of thousands of people to you know take part in this absolutely criminal enterprise as if any of those things need regulation by government of all people yeah you know an another thing he wants to do is he just wants to set the precedent that anybody who is anti-authoritarian shouldn't have weapons that's one of the big things in these signing statements well it's the most dangerous thing of all in them he wants to make it so that if you're diagnosed as having some absolute nonsense made up a health condition called oppositional defiant disorder odd meaning if you don't believe in the legitimacy of the authority of human beings over other human beings meaning that you don't believe in the authority of the legitimacy of Authority and slavery then you can be diagnosed with this fake condition made up by psychologists that are completely on board with the globalist agenda and you could have your firearms seized see this is a new precedent he wants to set if you have OD D oppositional defiant disorder if you're anti-government in any way yeah people who are you know coming back from the absolute manipulation of warfare of the wars of aggression that the United States is waging throughout the world military veterans and who say you know stand up and talk out against government and their manipulations he wants to take guns away from those people saying uh we're saying oh they have PTSD so they shouldn't have weapons to be allowed to defend themselves that's what that's what part of these are all about and let me tell you something it isn't military veterans coming home doing these shootings it isn't people with oppositional defiant disorder it's people on psychotropic drugs it's people on SSRIs and SNRIs people on antipsychotic drugs you know who are basically put on these things because people want to numb out their emotions and people want to numb out nonconformity to society and one people all in a totally numbed out deadened state of awareness and then part of the the the suppressed personality breaks through and does crazy stuff and harmful things and chaotic things and half of it is there directly mind controlled patsies to put to be put up to do these false flag events the other half of them are all on all these you know absolutely brain destroying chemical drugs pharmaceutical drugs like the SSRI and an SSRI class of drugs that I've talked about on what on earth is happening in past shows but no nobody wants to talk about those issues those mental health issues they just want to say if your anti-authoritarian you should have your guns seized that's what this clown communists in in the white house this puppet is trying to put ram through through executive orders and make no mistake folks that's exactly what it's about exactly what it's about so hand in hand with this situation is this developing story in Oregon at the mall or Wildlife Refuge where this militia has taken over this plot of federal land which was the seat of a lot of tyranny done unto people to seize their land and to put them in prison and they chose that as you know an area that would be a good target to take to do some pushback against the government so a lot of people come down on different sides of this issue something and it's a false flag itself something and you know while these people shouldn't have done this because the people who were going to be put in jail as a result of this fire situation which I'll briefly explain you really didn't want their assistance or help I tend to come down more on the side of the people who are doing this occupation you know a lot of the people who I want to talk about how this is similar and yet different from the so-called Occupy movement that all these leftists and liberal and you know and so called a narco communist contradiction in terms but the people like that agreed with in the Occupy Wall Street movement but then somehow this is completely different to them you know there were there's a practice that is done by ranchers when you know brush fires are in danger of being ignited because of weather conditions and growth of certain kinds of foliage they basically take take down certain you know leaves and and foliage and they burn it and sometimes this is done close to federally held land and sometimes since the borders are constantly encroaching on their land from federal territory that the feds are continuously seizing they have almost all of the western land in the United States if you look at a map of federally held territories in the United States they have almost the entire western portion of the United States which is completely unnecessary there's no reason that people shouldn't be allowed on those lands to you to use it to do what they want with it but yet we believe the federal government has a right to keep people off of those lands and say that they own it when in fact they're just you it's just an agenda 21 mechanism to basically push people into tighter and tighter territories so that they're easier to control and so that they're on top of each other so tensions boil between them and they don't actually utilize the space they think there's overpopulation they want eugenics etc that's why that's what this whole agenda is all about of you know crowding people into cities and take more and more land away from them I've talked about here many times there's no such thing as overpopulation the planet could probably support 50 times the population that we have now with the amount of space that is on this planet we couldn't continue to do things the way that we are doing them now as far as the unsustainable ways that we do things if we had that kind of a population but space wise there's absolutely zero doubt in my mind that we could have at least 2030 4050 times the population that we have now on this planet and I know that sounds strange or even crazy to people who haven't looked into the issue you know I'm not saying we could continue to do that using the types of technologies that we have now that aren't based on clean energy and and sustainable energy but as far as just the amount of space that we have for people to live on absolutely and the amount of food that can be grown in the in the land that is on this planet absolutely at least that much at least that many people could live on this planet but this issue is ultimately about setting the precedent that the United that the federal government owns the land and everybody on it that's what this is Alta Mele about that there are the gods they're the kings they own everything and they're gonna take more and more and more land and they're gonna push people in a tighter and tighter spaces and they're gonna come in and say if you did something that was an inch over this imaginary line then we're gonna put you in jail for 20 years or 15 years or whatever they want so the Bundys who were involved in another land grab situation and another tyrannical situation dealing with the federal government couple years back were involved with this the this other family the Hammonds and since the Hammonds were convicted in a court of law regarding their practice of setting fires and then the federal government said that one of them got out of control and spread onto their land that they you know they served a jail sentence and now another judge wants to put them in double jeopardy which is meaning that they're going to say that after you've been tried and sentenced and you've served your time I can say that wasn't enough post fact but after the fact it's called double jeopardy it's illegal in the United States you're not allowed to go back and say oh we can basically tack on to your sentence it's like if that means you're really being tried twice for the same crime and that's called double jeopardy it's a totally unconstitutional and this is what this issue is ultimately about it's about the land grabbing of the federal government and it's about double jeopardy that's one of the biggest issues in this that hardly anybody is talking about so the Bundys are basically what we're saying that the Hammonds are basically cowards who won't stand up for their rights so they're gonna stand up to the federal government for them now I understand people will say oh they're not within their rights to do that because if they have refused help help shouldn't be rendered I think it's more like they realize that these people are wet noodles you know who are just gonna lay down and what some people are saying is well I don't care whether other people lay now we're not going to lay down you could fit you could think you have everybody because you have their mind and their acquiescing to your but you're not going to have us and I can at least get behind that kind of mentality I don't uh in all honesty you know people make the other argument oh they're the selfish type who only care about their rights and you know what that's better not then not caring about any rights that's better than being such a wishy-washy person that you laid down the tyranny I'll take the people who were left brain selfish but do care about their own rights over the people who don't give a damn about any rights I'll take those people any day any day that's why I said compared to the idiot moronic people who want slavery and and Satanists even folks I'll go on record I told people this before I would go back to the kind of people who were involved in Satanism in a heartbeat rather than the idiot that walks the street that I walk around today in a heartbeat and I'm very open about it and I don't care what people think about that you want to know why those people at least care about themselves they care about whether they're free they don't want to be slaves they want to be the master of slaves I think that's wrong too don't get me wrong I'm not saying I advocate that I'm saying you know what's better to want to be a master or to want to be a slave neither one of them is you should be acting but guess what wanting to be a slave is infinitely worse than wanting to be a master over other people as bad as wanting to control somebody else is wanting to accept and lay down to control because you so don't care about yourself or anybody else is even infinitely worse than wanting control over other people and so what the Bundys are basically saying is they're drawing a line in the sand they're saying they're going to oppose criminal acts and tyrannical acts regardless of whether the person who are directly affected by them care or not so whether you support the actual action and think it's the time or place okay I'm not gonna even get into debating all of those things because maybe you know there are bigger things that they could have chosen and better places that they could have chosen to do this but whatever you know it is what it is it's going on right now and you know they're shutting down this facility because that's was the seat of the tyranny that was taking place in that region so that was their choice for it they're using the lost word of no saying no this far no further we're drawing a line in the sand I can have respect for that and how this occupation difference from the Occupy Wall Street occupations is it's being done with teeth these people aren't just going there with signs and placards and you know megaphones and demands that they're making from you know the steps of a City Hall or something like that they're there with weapons and that's why they're being treated completely differently than the government treated the Occupy protesters let me tell you something folks the safest places I have ever been or where firearms were prominent and openly displayed the places where people wouldn't have even dreamed about doing violence to another person or trying to start violence with that group of people you you wouldn't even imagine the politeness that was display I've been to open-carry rallies where firearms are just oh boy rifles semi-automatic rifles are just openly displayed openly carried and let me tell you something safest place I've ever been or felt in life on this planet no safer place that I've ever been or attended because there is not one person that would have thought to come in there and start trying to take other people these people's rights when they're in that kind of a situation and it was totally peaceful totally peaceful and polite some of the most polite peaceful conversations I've had have happened with people that I when I've attended open-carry rallies and the people that partook in those rallies I'll tell you what no police pushback police pepper spray pull it you know police absolute trouncing of people's rights to speak and assemble not when they're well armed to the teeth you won't see those cowards do anything like that there and guess what you know what they might roll in with physical force but I guarantee you one thing that does happen they're gonna meet resistance they won't be able to do it with people like this without consequence there will be physical repercussions and physical consequence upon the aggressors know it like you know your name so therefore whether they have my complete approval or not and I think it's the greatest of ideas what they have begun they have my respect that's where I come down on this issue and I wonder why more people who just stand against government period won't basically say that they at least respect these people whether they want to say that they condone their actions or not we're the anarchists saying any pushback against government is a good thing anybody willing to stand up against tyrants is a good thing folks I don't Mensah any words and I just tell people if at this point if open fully out in the open criminal types like flagrant criminals said I stand against government will you help me okay just take a stand against them I would take those types of people any day of the week because you know why let's say drug dealing cartels let's say weapons dealing cartels okay let's say just absolute criminal gangster thieving thugs okay but aren't government theming thieving thugs okay from the general population what's worse the overt criminal who's basically telling you I'm just gonna do what I want because I'm a criminal and I don't care about you or your rights or a person who's gonna lie to your face make other people believe them make other people trust them in their naivete and say I care about you but I'm gonna rape your rights and be a tyrant claiming the whole time that I care about you and I'm doing it for your own good what's infinitely more dangerous the overt criminal or the covert criminal the criminal who's out in the open about their criminal behavior or the occult criminal who wants to hide their criminal behavior while pretending to be a wonderful person that cares about you and is doing these things for your own good and the good of the the greater good of the group I'll take the overt criminal any day of the week so at this point folks I don't care who's standing up to government I don't care how immoral they are if they recognize the problem is government we could work out our other moral issues on the other side of doing away with the occult criminals that's infinitely more important to me I don't care who disagrees with that position like I said folks the time for me sugar coat things even in the sense of how I've been doing the water on earth is happening great work that I do okay of trying to influence and change people's minds how I've been doing it is over it's over in case you haven't noticed since I've come back and it's going to get more extreme okay because we're living in extreme times and extreme measures are gonna have to be taken so I'm not interested in being some lovey dovey person who has to explain things sugarcoat and feed it to baby because they can't handle it never really did that but did it enough to an extent that I can help people who were on the fence and who wanted information to get it now I'm not even bothering with any kind of a buffer I'm gonna be who I really am and I'm gonna lay it out how I lay it out to a friend that I talk to in front of me because time is short and if you don't realize that you're not paying attention and this is part of this whole thing of getting prepared which future shows are going to be on I might might try to bring back Fernando salgueiro who I did a show on water-purification way back because I consider him a preparedness expert I'll see if I can get him to come back in a future show I intend on bringing my own personal martial arts instructor on the show to talk about self-defense bodily self-defense without weapons if that individual agrees to come on the show you know I want to talk about preparedness that I do and what I think other people should be doing and again I said not all my eggs are in that basket I'm still trying to change people's minds otherwise I wouldn't be doing seminars you know otherwise I wouldn't be speaking at conferences but you know what some more my eggs are going into that basket if you take my meaning and you know what if anybody else out there listened and thinks this is a joke this is a whole big part of this people who think this is a people still laughing and making jokes that all the memes out there making jokes about this whole thing about you know you know these people are short on snacks or whatever because they need food there just to keep an occupation going now they're not laughing when the occupiers wanted food camps set up for them you know because they were sitting out there with no food and in many cases no sanitation you know uh but that's okay but these people who are saying you were gonna need donations and food supplies somehow that's different let me tell you what the only difference is folks the occupiers did it with no teeth no fangs no venom and they wonder why they got completely shut down so quick these people are doing it at least the right way and now another militia from Idaho has arrived and they're setting up a defense perimeter which I actually think is a good idea it's going to be a lot harder for the feds to wage another Waco in this situation you know what I mean we got to start thinking about tactics like this you know I'm not telling anybody go out and do something like that but it's already done and then people got to start thinking about how defense is going to be created for this you know so I think that's what should be done really at all protests quite frankly you want to know my actual take on on protesting I think all protesting should be done with a militia a malicious should surround the protest and say we are here to ensure that these people's rights of assembly and speech will not be aggressed upon and if you try it then we will defend them you know and you understand what that means now if that was done when government agents want to come in and shut down protests you'd see a lot less protest shut down folks a lot less you why why were Ferguson protests shut down because there was nobody there armed and willing to defend their rights when the I came under attack that's why they were shutdown has nothing to do with race has nothing to do with what color your skin is folks it has to do with the presence of the ability to defend yourself through firearms get your head off from up your ass and understand that boys and girls people think it's all joke they're still laughing about this stuff you know I can't impress upon you how deadly serious this is the whole situation that's going on in America with all the false flags with the gun grabbing with the total encroachment of communist ideology cultural Marxism people wanting to grab people's guns and yeah there that is a legitimate concern yes they do want them it's not alarmist they're making incremental inroads to that will eventually lead to confiscation if Americans are not vigilant and people are watching it all happen like it's a movie because they're conditioned to see life as images that are taking place on a screen and they think this is a laughing joke and they're gonna find out how deadly serious it is they're gonna find out what a bullet whizzes past their head and that's when they're gonna start waking up you know and and that could come from a patriot group or it could come from a tyrannical Fed agent eventually people who are laughing and thinking this is all big joke and it's going to go on forever like this are gonna get caught up in the crossfire somewhere and then they're going to stop laughing real quick people have to understand what kind of preparedness is gonna have to happen not only you know physically but psychologically understand you know if war is coming to this country folks it ain't like you see it in Hollywood films it doesn't look like that a bit not even a little bit they better be realized there they better realize real fast in what kind of physical condition they're gonna have to because like I said in past weeks there's a lot of keyboard commandos out there think they're gonna hop up off the keyboard and they're gonna be in shape to wage battle physically you're gonna get taken out in seconds is what's gonna happen they're unprepared people and most of them are just these egghead types that think this is all just about you know putting ideas forward it's largely about that hey all that's what all of my work has been about but you know what while I've been doing that I've been getting ready physically in the event that the great work is a failure because once the great work is recognized as a failure if you have to have a real physical revolution and so be it it has to be done that way is that long-term failure of the ultimate goal to get it done in consciousness yes it is but in the short term sometimes those drastic measures need to be taken so you can live to fight another day ideologically because if you're not alive physically you ain't gonna be able to wage an idea an ideological war but most people are unprepared cowards who wouldn't rebel for anything physically there's nothing they would actually physically fight for especially these egghead types look folks I'm I've been described as somewhat left brained okay I think in a logical progressive manner there's nothing wrong with that there's nothing wrong with a scientifically oriented mind that that needs to be part a large part of who we are but then you need the creative unique the imagined imaginative side of the personality you need the nurturing side of the personality you need to side of the personality that's capable of getting angry that's capable of displaying intense emotions you know intense emotions drive forward right behavior if they're aligned for the right reason which is for justice seeing injustice should create anger in people these egghead types I I wonder whether they're even human sometimes because they can't get angry I talked about this on the show I did with Alex on authentic news media there are people who I have seen in my personal life who are incapable of anger I've never seen him display the emotion of anger I mean his name was brought up the other day somebody like Deepak Chopra you know this is a guy learned a lot from about you know the spiritual side of things in the past and he's made the statement he never gets angry really you never get angry well you're not a human being then there's something seriously absolutely wrong with you I'm not telling people they should get angry and be angry all the time but if you are incapable of getting it getting angry there is a human aspect to the psyche that is missing from you you are an incomplete being that is actually broken and that means you're too far in the right brain imbalance and you don't understand what the Sacred Feminine dynamic is that has nothing to do with femininity or being female I have the Sacred Feminine dynamic because what that dynamic is about is caring enough for truth and freedom that you can get angry and use the sacred masculine principle to defend your life your rights and your freedom so people out there and want to say I'm to left-brain or I'm saying that the masculine dynamic is more important than the feminine you haven't been listen to a goddamn word I've been saying and you want to twist it you want to get it off with stood up largely because your to right-brained and there's nothing you'd stand up for people who are too left brain also won't stand up for anything because they're little cowards who have only ever used their mind and think that there's no role for the usage of the physical body you have the spiritual types you think the body isn't important you have the egghead types who think the body isn't important that's why half these people look the way that they do they look like they blow over a strong wind you know there's no strength to them there's no substance to them yeah they do just look like the kind of person that would just let themselves be walked all over and would never say no and you know what people like that are infinitely more dangerous than even people who want control over others and you heard it I said openly here and I don't care what people think of it they're more dangerous because they're the kind of people who will overly intellectual eyes or overly spiritual eyes I read everything and there's no balance they're not in really in the world they're in their head I like I said in my spirit in my streetwise spirituality seminar you got to be in the world but not be of it it's feel the ground spirituality it's spirit in the flesh and this is what these people want to ignore because they because ultimately they're cowards this all comes down to folks it all ultimately comes down to nobody would take a physical stand to protect their life rights and freedom and property because they're chicken cowards and people better start realizing you're gonna have to power your way through whatever fear you're feeling and

I'm not telling people don't feel fear there's plenty of things that legitimate fear should be felt about you know people think these people are invincible that's another thing I want to touch on how so not invincible they are and I'm talking about in a physical manner they're not invincible let alone invincible mentally / psychologically but the the fear the people are feeling has to be worked through has to be gone through the way out of it is through it not running away from it as I've said courage is not the absence of fear it is right action in spite of any fears that may be present you're going to say yeah I feel that fear and in spite of it being there I'm still gonna do the right thing and that's what these cowards who won't quit their jobs are all about oh I'm in fear because I don't know how I make this much money I'm in fear because I don't know what will happen to my family I'm in fear cuz I don't know what my peers will think of me for just upping and quitting well you know what you're a coward little boy if you feel all those fears and you let them own you instead of you owning them and this is exactly what all the rampant right brain spiritual types are all about letting fear zone them not wanting to say anything about the negative not wanting to speak out not wanting to say anything against tyranny you know that's all it's all just working upon the self and being super spiritual as I can and then all the egghead types who are just all over analytical and over intellectual they'll talk about ideology and philosophy ad infinitum but when it comes time to take in real world back oh I want no part of it and ultimately both of those kind of people are trash because they won't stand up physically for what's right they'll talk about it endlessly but they'll never do anything there are the same kind of people that want guns taken from people as a matter of fact you know these egghead is leftist these egghead leftists I mean you couldn't have any more of a joke of a human being they're not real people they're wishy-washy milquetoast little children who never emotionally grew up they don't have real emotions they're constantly living in their head and then oh here's somebody like me and say oh I have outbursts oh well a world that is run by coercion violence tyranny enslavement we should have any outbursts about that it's nots not the time to get angry ha ha yeah yeah we should we should just think it's a joke we should make some witty jokes about it like our egghead leftist friends would do you're a bunch of clowns is what you are and you're gonna find out how clowned you are you're gonna find out just how clowned up and clowned out you are and like I said you'll wake up to it when bullets start flying past your head or hitting them then you'll wake up to it quick quick it'll be a Satori awakening both for the yet let the leftist eggheads and for the right-brain spiritualists it'll be you'll have a instant Satori Awakening trust me nothing will do it quite that well as being thrust into a situation where a physical confrontation is happening around you that you thought was a big joke was never coming Civil Wars comin in this country folks it may not be this week or next month or even next year but it's coming at the rate human consciousness is plummeting trust me it's coming because I walk outside I don't see things improving I don't know where all these people and the so-called spiritual movement think that the world is waking up or in the freedom movement think the world is waking up I go outside and I see nothing but dumb ignorant soft hipsters who think they're cool and who think they know something and they know absolute is what they know they don't they they barely know their name they know what the television tells them because they're all TV watchers they think everything's a joke they think nothing serious they want government to be mommy and daddy and protect them and care for them from cradle to grave because they're soft ignorant weak-minded people who don't want per any personal responsibility and that's what human Vaman is okay and that's all I see around me I walk out that I walk outside folks I don't see hardly one person who cares about a real issue or will even discuss a real issue and you know what they are they're people who think nothing physically bad or dangerous can ever happen to them they actually believe that they actually believe because restraint has been being used by people in society to the extent that it has that things will never break down and people will never say no with teeth and you you bring up the idea of physical rebellion against tyrannical government to them and they think it's not possible they I mean what do they think it has never happened first of all it's already happened in this land and the seat of that rebellion was right here in the city where I live and I don't think that's an accident I think I came back here willfully because of what happened in this city and the kind of men who were here present in this city and I'll tell you what I feel they're spirits when I walk on the streets where they walked and it's tangible and palpable they're still here with us make no mistake about it we are not going to go quietly into the night all these people they think nothing physical you know or dangerous can ever happen to me they think they're so protected and they think the state is their friend and they think it's going to protect me forever because they want no personal responsibility for their own self defense that's what a chicken coward how a chicken coward thinks I want somebody else to defend me should it ever become necessary I'll just call the police and they'll say when something bad happens to you and the police aren't around that's when you'll change your attitude no little boy no little girl I don't want any help from anybody like I said I'll arm myself and I'll take my chances and if it means my death then so be it no I'm not gonna be calling from Hell I'll call for help from other private individuals who understand real freedom and real responsibility that's who I'll call for some help for not from somebody who worships the state not from somebody who thinks they're doing the right thing while simultaneously they're raping people's freedom who are under the illusion that they're the good guys I don't want help from people like that don't need it again I'm not above accepting help from people but I'll accept it from the right people who do have their heads on straight and whose heads are not up their ass and who do know what's going on and who do really know the difference between right and wrong those people can help me and I'll help them I'll have their back just as they'll have mine because we're brothers and sisters in freedom and in right but people who don't understand that I we don't want your help or need it okay so don't tell me who I'll beg for help from you don't know me at the time that we're living in folks people really have to start understanding your complex of the brain and its role okay I know people will sell that somehow this is going to go against what I've already talked about about the higher brain the importance of the higher brain functions no doesn't go against it at all I never told you that one part of the brain needed to somehow be trashed or not used go back and listen to that material again I'm explaining how all of its important the emotional part the part that is governed self-defense and the part that governs higher-order thinking it's all important that's what makes a human being a complete human being I'm gonna probably do a podcast or a presentation in the future called having the psychopath now I hear the title of that that's going to be the title of it whether regardless of what form it comes in but it is going to be called having the psychopath not not being a psychopath but having the psychopath meaning that there is a component of the human personality that has psychopathic qualities in it that is there for a reason people should watch the movie equilibrium one of the greatest movies ever made watch it several times okay to understand the allegorical content of this movie and part of this movie is about having the psychopath the psychopath needs to be part an integrated part of the human purse of the complete human personality like a tool never governing the personality ever but like a tool it needs to be picked up out of the toolbox and used when it is necessary to use it and then when the job is complete then the tool gets put back into the toolbox neatly and gets put away you know how few people can do that in in society hardly any because that takes self-mastery to be able to do that people will have already had to have worked with their shadow material and understand that component is there and sometimes maybe even nurture that component a little bit if they've been become super right brain imbalanced wasn't as difficult for me because I came from a place of super super left brain imbalance develop the Sacred Feminine of care for truth and care for freedom and care for all beings rights and then push that back toward the development of the sacred masculine principle of self-defense and quote unquote having the psychopath then you could say hey here are those psychopathic personalities that were actually ruling me before now I've still maintained the actual possession of those but I rule them now and they're in the toolbox for when I need them that's the role of the Ark complex of the brain that's the role of the psychopathic aspect of the human personality everybody should have that vicious animal there that's why we have a reptilian component to the human consciousness the snake why do you think the symbols of the American Revolution were rattlesnakes you think that's an accident I mean the people who made those symbols who put them on the original flags of this country did it for a reason the people who fought against their oppressors the tyrants that came over here and tried to put us under the rule of an absolute psychopathic boy king they needed to be fought with absolute viciousness they needed to be fought like a rattlesnake attacking it's its attacker the psychopathic aspect of the personality through the arc complex needs to come out at certain times it's not there accidentally it's there for a reason it's part of the survival complex of the brain and you know what the times are coming when that that's gonna have to be take the tool box and put into usage and unfortunately there's so many people out there that don't even have that in their toolbox and that's sad it's not a bit it's not a good thing it's a bad thing that they don't have it once again never ever my advocating nor ever have advocated that that part of the personality rule the Bing you can't allow that to set up shop and say I own this place that's what all of these controllers have done that that have that the masculine aspect of the personality completely run away from them and a need they therefore they want to control other people I'm not interested in controlling anybody the game of control needs to be put away and laid down forever and people need to understand you shouldn't be trying to control anybody else or wanting to be controlled and accepting control from anybody folks if you aren't making preparations physically to defend yourself and your loved ones and your rights most of all your rights and freedom you're mentally ill I said this on the authentic news media interview which is in my news section right now and I want to reiterate this emphatically it is a clear-cut sign of true mental illness if right now you are even remotely semi aware of the situations that are taking place on this planet and you are not making any kind of preparatory taking any preparatory actions regarding your own defense you are mentally ill and I'm gonna I want to say this even more emphatically okay I don't care how poor you are does not matter how much you think you're in a hurting financial situation if you need to literally starve your self and live off your body fat if you need to eat substandard food for a short amount of time I'm not telling you to do it to a point where you're gonna die okay that would be counterproductive because you're not gonna be able to defend anything but if if you need to cut make cutbacks in food in the amount of food that you eat in the quality of food that you eat I'm trying to explain to you that it is going to be so important for you to have the physical means of resistance and defense that if you need to sell furniture in your house do it if you need to move to a place that's less expensive do it if you need to move out of a place that prohibits the procurement of certain kind of arms do it because you know what when the time comes and you're unprepared you're going to be caught with your panties down around your ankles and you know what you're gonna say oh why didn't I get ready when I had the chance that's what you're gonna be saying unless you're the kind that just wants to go quietly into the night you know and you know what folks I had that attitude before this is a totally screwed up planet the people are all screwed up they don't really care you know and if it all comes down and it you know it goes to pot so to speak and and fan collide then whatever happens happens and if I get killed in it I get killed I no longer think that way folks that is no longer I thought that way once years ago I no longer think that way and you know why I'm too important and I recognize that I'm too important if I have something significant to contribute and teach the human society I want to survive the be able to teach it to where whoever's gonna be left so I intend to come out the other side of Armageddon and notice I don't use the word apocalypse the apocalypse already happened is over and done with folks you know surprise apocalypse means the great revealing that which has been is now revealed all already done done that next next is was the truth that was previously hidden accepted and acted upon and if it was then you know what happens ascension transformation transmutation and ascension and if the answer is no it was rejected and the people don't give a damn about truth well then you know what followers apocalypse Armageddon and that's the place that we're rapidly approaching and I know people who understand what I'm saying will agree with that statement and they won't take it as alarmist thinking thinking it's all a joke it's all a movie that's playing you know what the hour of the time is okay so I'm once again I'm gonna come out and say how I really feel no more sugarcoating this no more telling people it's all gonna be okay because I don't think that it is kind of never did really think it was gonna be okay because I thought I had a pretty good pulse on where the human mindset was probably by the time I started speaking you know previous to that I thought it was gonna be a matter of explaining this to people and they were going to accept it how naive I was how wrong I was couple more things before I end the podcast for today and it they're all connected this cop shooting in Philadelphia that just happened by this guy dressed like you know an Islamic Imam and you know uh with this white robe you know saying he did the shooting of this cop in the name of Islam first of all for people who haven't seen it you could just go in to YouTube and say Philadelphia cop shot in the name of Islam it'll come up the the video itself is very suspect to me I'm not immediately claiming that this is a false flag event I don't know that for certain but it's it smells fishy let's put it that way I own handguns that are in the nine-millimeter and 45 calibers and I'm telling you if someone was shot multiple times with a 9-millimeter handgun the amount of blood that would be produced would be ridiculous all right and there's absolutely not a drop of blood his adrenaline pumping heart pumping you know he gets out of his car to give chase to this guy after he's been shot three times and not a drop of blood you know I mean that does not and people say Oh wounds happen in different ways and you know look folks somebody shoots you three times in the arm with a nine-millimeter pistol at point-blank range practically you think you're gonna get out of a car immediately start giving chase and there's not gonna be a drop of blood spilled on the ground I mean to me that's suspect you know people will of course you know come down on both sides of it and they'll be debunking of all kinds but I'm just saying it just looked contrived and setup to me you know like the cameras were just right there in a perfect angle and high-def video captured and you know it just seemed like it was like okay action you know to me that's what it looked like people will you know say different things about it and they're entitled to their opinion but ultimately what I think this is just gonna do is make cops more radicalized get them up in arms about you know oh we have to watch out for these radical Islamists that are all here all around us and you know they're gonna be much more willing to immediately go to violence against the regular citizen and that's what the whole Isis quote-unquote Isis thing is about Isis ISIL al-qaeda whatever you know you want to call the whole result of operation cyclone which I want to get into in a minute you know people still think that this radicalized form of Islam is the big problem you know and they don't understand how this is just all being used as a one huge false flag to take Americans rights put them in fear give them the boogeyman and then we'll propose the solution but Oh incidentally the solutions all involve violence being done to the ordinary citizen and taking away all their rights so will sanitize society make you perfectly safe but oh in the meantime you'll have no rights and you'll be our slaves you know and people are still buying into this absolute nonsense about Isis being the biggest threat to human society you know and you talk to idiots like this and they know nothing about how radical Islam was even formed they think this is what Islam is they don't even understand this is a sub sect a small subset of a radicalized variant of Islam that the United States created this wasn't created over in the Middle East so oh I won't I shouldn't say that it wasn't it was created in the Middle East but the the the brainchild of it and the people all fostering this plan well then you need to go to the CIA you need to go to the Pakistani ISI you need to go to British military intelligence you need to go to the think-tank institutions like Tavistock Institute you know then you understand how you know this radicalized form of Islam was fomented and actually handed to people who we wanted to do our dirty work for us you know and if people don't know what I'm talking about you need to research operation cyclone you know it was that the biggest intelligence operation ever conducted in the entire world ever by the CIA and the US CIA in the Pakistani ISI procuring arms from Israel arms merchants and then selling them to the Mujahideen which were the so-called freedom fighters the Islamic freedom fighters in Afghanistan that were fighting the whole territory in Afghanistan when the Soviet Union was making incursions and trying to annex parts of Afghanistan in the 1970s so that they could take resources from that area of the world and also essentially extend the Soviet regime to the the Persian Gulf Coast realizing that that would have really been disastrous because communism would have really spread further and that region of the world the a covert faction of the US Senate led by senator senator Charles Wilson I believe he was from Texas you know went into taxpayer funds covertly channeled it through black budget ops through CIA and other intelligence agencies and bought tons and tons of weapons Soviet weapons may look like it was coming from you know they were taken from the Soviet Union made almost all of the arms came from Israel arms merchants Israeli arms merchants you know covertly funneled those in their Afghanistan and uh you know handed them to Islamists who they felt weren't radicalized enough we need to give them a religious aspect to fight against our enemy oh they're gonna be doing the fighting of our enemy the Soviet Union for us but you know we need to give them a deeper reason to fight so let's make it all about their God you know and give them a radicalized form of Islam and you tell us the people that this is all Declassified this was Declassified decades ago just look it up operation cyclone don't take my word for it go research it you not only has it Declassified he made a Hollywood movie about the senator who did all this stuff who helped it with the Senate Appropriations Committee you know it's called Charlie Wilson's War book was it's actually a movie based on the book the book explains it in great detail the movies based on the book of course it's Hollywood dramatized and everything but still a great movie starring Tom Hanks I mean one of the biggest Hollywood superstars in the movie people still don't understand that this went on we created the radicalized version of Islam through the Mujahideen the Mujahideen the CIA trained Mujahideen went into a huge database from of our intelligence agencies that's where the name al-qaeda came from which means the base it literally meant the database of CIA trained assets of Mujahideen fighters who were trained and radicalized to fight the Soviet Union in the mountainous regions of Afghanistan which is why the Soviets couldn't really wage a protracted war hot war there in that region and that kind of terrain and climate and eventually it bled them of a lot of money and it's been attributed to one of the reasons that the Soviet quote-unquote Empire or regime began to crumble because it bled them militaristically and bled them financially and Wilson was hailed as a big hero but then there's unintended consequences is there a real aspect of radicalized Islam yeah it's not fake it exists in the world certainly but who made it how what was its origins how did it get that way nobody wants to look at causal factors well you need to do your research and homework and you know I this is all connected with the creation of the big bad boogeyman I'm not saying somebody like Wilson who was a pawn and puppet in all of this it was part of the master plan other people saw this they're like wow here's a new booking man that can be created and get off the leash so then we have to call for the destruction of people's rights and freedoms and we have to create a bigger military police state you know and that means more military industrial complex spending and buying and bankers getting rich and more debt being taken from from countries more imperialism being waged and resources being seized for the super elites they're controlling these whole projects people have to wise up about how it all works and fits together and you need to realize it's all an illegitimate mafia operation but yet there's still people who buy into it and oh we got to go get all the ISIS characters you know there are the big threat let me tell you something folks like I said before nobody from the ISIS organization has ever posed the physical threat to my physical well-being American police pose a gigantic physical threat to not only my well-being but yours American military the Dunst order followers that are still in the military pose a gigantic threat to your freedom because when they're ordered to fire on American citizens they'll do it in a heartbeat without thinking about it moron little boy order followers in the National Guard you want to talk about who will fire on American citizens as soon as they're given that command you think they won't you're a naive punk child and you need to start realizing how insidious the acquiescence to Authority is in the order following cult you'll hear a little bit more about that when I go on the Power Hour with Joyce Reilly this Friday folks I kind of wanted to make this one you know short and sweet if you will you know maybe a little shorter maybe not so sweet but that's really all I have to say and I think people really have to start taking this much more seriously and realize that the hour is late I mean I will continue to teach people until I can't anymore and at one point when things go south then I'll no longer be a teacher I'll become a warrior at that point but until then I'll try to continue to explain what people need to look into in research no part of that is going to be this seminar coming up on the dark occult in Philly on February 6th part of that is going to be continuing to talk about the order followers part of that is going to be exposing the occult dark occult connections to Nazism and how alive and well Nazism still is in the United States and abroad and a huge part of it is going to be the brainwashing the immense unimaginable brainwashing that females of our species are unfortunately still under and that is the Neo feminism agenda which stems directly out of Satanism and communism and that will be my topic of and by the way I don't know if I officially mentioned I think I'd have officially mentioned it but the full official title of my presentation at free your mind for is the unholy feminine again this is part of like almost like a series that I've been conducting at the for your mind conferences I did a series of freer I did a presentation for your mind one which was about the dark occult and how they Mock the masculine members of society the male members of society who are doing their dirty work for them a cult mockery of the police and military in for mine too it was about the destruction of the sacred masculine the New Age religion that turns people super right brain and won't allow them to say no and stand up for their rights and that's destroying the sacred masculine dynamic of standing up physically for yourself when someone else is in the wrong and his core is exercising coercion and violence to take your rights then last year for your mind three I presented the destruction of the Sacred Feminine how the order followers of the world are destroying true care about what's right and about other people's rights and freedoms because they just want to be given orders and then act upon them regardless of whether their behaviors morally right or not this year I'm going to talk about the destruction of the true feminine more but by explaining how specifically females in the society are being turned into an unholy variant of the feminine energy and therefore they're supporting the slavery system and the on the unholy monetary system the religions of the world that work hand in hand to put people into deeper bondage and guess what a lot of people won't like it once again so be it not here to be your friend here to tell the cold uncomfortable unfortunate truth the truth is ugly but if we look at it and care about it enough to do something to set things right the world will will change for the better so move forward in your own research move forward in what you can do hear the truth speak the truth and put it out there for others to understand accept it and then put it out there for others doesn't matter what people think of you you will have planted a seed life is not about just making friends you can make friends along the way it's a wonderful thing not knocking it but ultimately it's a the first and foremost responsibility is to understand what's really going on and help other people to understand that as well that's what the great work is all about folks so I hope you've enjoyed this edition of what on earth is happening I know it was a kind of you know harsh and intense one but you know we really need a fire lit under our rear ends folks I hope I could maybe influence that a little bit with my vitriol and how I'm trying to impress upon people the moral imperative and the seriousness of the times in which we are living you've been listening to what on earth is happening I'm your host mark passio once again my website what on earth is happening calm ladies and gentlemen thanks so much for listening I'll see you here next week [Music] [Applause] [Music]

What On Earth Is Happening Show #197

Topics: *New What On Earth Is Happening live streaming video show, Where is Humanity at in Consciousness, the inability of most human beings to distinguish reality from illusion, the intact power of Social Engineering/Mind Control/Media Propaganda, knowing your Self and knowing your Enemy, the Occult as deep ancient psychological knowledge, the Five Steps of Occult Initiation, Polarization Dialectics, Political Polarization and how bad it has gotten, the REAL "Political Spectrum" as a function of Human Consciousness, the belief in False Axioms, the false Axiom of the Belief in "Authority," Government is Slavery, Keyboard Warriors on Facebook, Mark's personal bitterness about the Human Condition, what it means to be in True Relationship with another*

freedom man that's what it's all about [Music] you got the groove on freedom book says [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening to endeavour to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery thanks so much for tuning in to the new live streaming video format right here on what on earth is happening dot-com we're also simulcasting on Facebook live YouTube live and Vimeo live welcome to the new format we have a really great show planned for you here today today is January 20th 2009 teen this is episode number 197 it's really really great to be back I've been out of the live broadcasting business for about three years three whole years it's been actually and this show was conceived about three years ago just as I went off the air in the original podcast format the original radio internet radio format and since that time well I've been working very hard to make a new format happen with a lot better production values a live internet streaming video show so many people really came together and helped out and donated and came forward to dedicate their time and skill to this endeavor I want to first and foremost thank everyone who has made this show possible you know it from the time of conceiving it all the way to the point of bringing it into actual manifestation really it did take that whole three years and I want to thank the production crew my producers I want to thank the setup crew for all of their help I want to thank everyone who donated to make this new format possible and I want to before we get into the material for today's show I want to let everybody know how the the new video format is set up so as you can see we have a beautiful new interface kind of a dual windowed windowpane interface where I'll be sitting down in that bottom left-hand corner and then in the upper right hand side I'm going to be able to present anything that I want to show to the listening audience in there so like we can show you my actual laptop you know and I could present slides in there that to do actual live presentations we can put videos in there and let you see videos in real time or play audio so this is going to be a great teaching tool it's going to be a great environment for being able to convey ideas to the listening audience to the watching audience so this interface I kind of came up with back about three years ago and at the time I didn't have a production staff to help me with actually broadcasting it you know and having to sit there and produce while you're actually delivering content looks very awkward so that's why it took a while to reach out and find people who were willing to come and help and boy the people who showed up I mean they are absolutely invaluable and I want to just thank them from the bottom of my heart for making this possible once again so basically I want to go over a couple of quick introductory items I want to let everybody know that I'll be speaking at a Newark apoco 2019 again this year I spoke there last year in 2018 and went really great I had a presentation on the main stage and I had a workshop there that went very successfully if we can switch over to the laptop view this is of course the what on earth is happening dot-com website and what's great about this video format is I could show you things live in real time whereas before I had to kind of just describe them and then you know let people go up there and figure it out for themselves but now I could show you exactly what I'm talking about on the website so right here there's a banner about me being a speaker at an arc apoco 2019 so I'm gonna click on that actually I already did I have it up in another tab and this is the an ARCA poco website you can check out all about the conference there and there's a speaker page here's my my speaker bio that's up there with many many other speakers I mean so many great speakers going to be at this event this year and there this is my page right here you can click that of a little info guide there and you can read my bio and also there is a page about my workshop here it's called demystifying the occult revisited initiation into the mysteries this is actually going to be taking place right before the main a narco poco conference on February 13th so if you click into the website in the adequate poco website through this banner you can get tickets right there it'll take you right to the tickets page and tickets from my workshop are available right on the well via the get tickets button at the top right hand side right here on the workshop page so hopefully I'll see a lot of people out at an ARCA poco this year great event great conference looking forward to meeting with the other speakers and with people who turn out as attendees I will be leaving for that on the 7th of February so I just want to very briefly let everybody know that we'll be doing three shows live to start this new video format off and then I'll be heading down to Mexico so I'm going to gauge whether to do shows while I'm down there through my laptop if I have an adequate internet connection but basically the first three shows are going to be you know this one and the two over the next two weeks then I'll be leaving so there may not be shows for those you know four weeks four and five and then I'll be doing shows after I come back from Anika poco obviously but again I'll be assessing whether I could do shows live from down in an arc apoco maybe even bringing on a couple of the speakers to interview while I'm down there if that works out you'll be seeing live shows from Acapulco Mexico over those couple of weeks if it doesn't work out I'm unable to do it we'll just not air shows for that week just to let everybody know what the topics are going to be over these first three shows back the first show today is going to be called where as humanity at in consciousness and you know I have a whole lot of slides planned for this will be giving a whole presentation today on the air and it's gonna be just basically where I see overall the overall dynamic of human consciousness in the year 2019 in early 2019 so that's coming up on today's episode next week's episode I'm going to be getting into what prompted my hiatus from live broadcasting and what I've been doing in the interim in the three-year interim since I've been broadcasting live on the Internet so it's gonna be next week's shows gonna focus largely on me and the issues that went on during the hiatus and the projects that I did while I wasn't broadcasting live on the Internet airwaves and I think people will find that pretty interesting a lot of people have been asking me a lot about that so we'll be going into that in detail next week I wanted to put a show together that kind of tried to put my finger on the pulse of where we're at this week so I think people will find that valuable the next week so the third show back is going to be all about the arc Drive the arc Drive is called the amazing repository of knowledge I'm gonna briefly go to my website and show you the arc page on the website so I'm gonna click this tab right here that says arc okay and you could read all about what the arc Drive is it's basically a one terabyte USB bus powered hard drive okay that I fill up with data from all of my research over the years and that is a free offer I ask basically for a donation for my time and effort but if you want to take me up on the offer for the archive you just fill this form out and you can get the request these shipping instructions that way pretty stringent shipping instructions for very valid reasons which I'll get into on the show that I do that is all going to be about the arc the third show back is going to be about why this is so important how this fills in a lot of the gaps and fills in a lot of the blanks and puts a lot of the puzzle pieces together for people and can help them to come to a level of completeness in their understanding because there's a lot of gaps in people's understanding there's a lot of gaps in their knowledge base about what is really taking place in our world and that's why they're not going all the way that's why they're not getting the the true full holistic picture and that's what I think the arc drive can help to do in a very very significant way at least the people who have taken me up on the offer have said it has really helped them you know a plug basic holes in their worldview picture and I'll help them to understand much more fully what is really taking place around us so that's all going to be the third show back and then we'll be getting into deeper material you know we'll be going into further much deeper into issues related with the occult and related with mind control and with human consciousness and how to really change it for the better that's what this show has always been about as we'll be seeing as we go deeper into today's show so I think that covers the basis for basically what I wanted to get into regarding any kind of announcements and preparation so I think we're set to just jump into the material for today's broadcast ok so I'm going to start the presentation slides we can cut back to the laptop and of course this is the new live streaming video format for what on earth is happening again people have to be aware that this is most certainly a continuation of the former podcast series ok so today's gonna sort of be like a reintroduction to the show and what I do here and it's gonna be more about like where I see humanity at and headed ok and what we have to really do and do within ourselves to really create much more positive and lasting change if we want to see that happen in the world because we have a long way to go and a lot of work to do on our personal spiritual journey in our journey to end slavery on this planet and create a society based in voluntary interaction and true human freedom so one of the things I also want don't want to forget is that we are gonna take calls on this subject matter and really anything else that the viewing audience wants to discuss you can actually go to what on earth is happening calm slash show if you're not already there and click on the calling link at the bottom of that page and basically that callin link will take you into a discord call-in room a chat room basically discord is like Skype on steroids that's how I kind of described it it's a chat application that was originally introduced for gamers to chat back and forth while they're playing video games but it kind of evolved into a lot more than that where you can set up live chat sir servers and voice rooms so that's basically what I did I set up a call-in room and basically you can read the instructions when you get into that room and basically that's how you're going to call in what this is different how this is different from how I used to take calls in the past is it doesn't require any calling through a phone so no international calling required if you're calling from another country you know you don't have to rack up tolls to call in to the show this is all done just through you know voice over the Internet so a really efficient way of doing it I think people will find it really that it works very well when they try it out I highly recommend to use the actual discord app you can get that from discord app com so that being said you know we're gonna jump into the topic which is what is the state of humanity where are we at in human consciousness okay so you know we're talking about the overall masses of people in the aggregate now okay we're not talking just about individuals we're talking about how the individuals come together to form what you might call a mass mind where is the mass consciousness of humanity at okay now three years have passed since I've really commented on this in a big way at least in a in a live format you know I've done many interviews in that downtime you know I've done some presentations in that downtime but really you know I think that my my take on human consciousness has been sorely missing I think there's a lot of shows out there that don't hit upon what really is going on beneath the surface they cover the 3d world aspects of things you know they cover you know the political and the financial machination 'z they you know cover the effects as I like to say that the realm of affects the the plane of effects see what we do here is a little bit differently and we get into the the causal factors that's what sets what on earth is happening apart and we switch back to the presentation slides you know what we're really talking about is on an individual level where is most people's mindset at okay in the aggregate see because the individuals comprise the whole you know so if we change ourselves then we're going to be contributing to a change on a mass scale and here's the problem this is the problem with humanity where we're at where we've been at I think it's getting worse and not better you know I think you know 1012 years ago when I first started this endeavor you know I started this about you know 11 going on 12 years ago now publicly anyway I think we were in a better position quite frankly I think I think individual consciousness was in an actual better position compared to where it is today and I'm gonna get into the reasons for that okay um you know we have to understand that most people are in a place where they want change to occur on the external level in the realm of external manifestation but they don't really want to change who they are how they think how they behave they think they're quite okay just the way that they are in most cases and you know the New Age and spiritual communities are often too quick to tell them oh you're fine you're perfect just the way you are okay but yet that's not really the case we have a lot of personal growing and personal shadow work to do upon ourselves and many people are loathe to do that internal work especially in the so called truth and freedom movement you see a lot of people who they want to see the change happen on the external level but they don't want to work upon themselves to make that change happen because they don't really understand the first principle of natural law which is the principle of mentalism everything is ultimately mental and then the second principle and this principle of Correspondence is that which is below is like to that which is above and that which is above is like to that which is below so as we change things on an individual level we are helping to change things on the aggregate or the collective level and this is what a lot of people in the so-called freedom movement which I say there is no real freedom movement there's only a my freedom movement people want wanting different levels of freedom just for their own selfish gain and personal interests but on a on a mass scale as far as humanity goes and ending human slavery there's very little in the way of an actual freedom movement still to this day unfortunately and you know people have to understand that the real chain has to happen inwardly that's where this battle really is at it's in changing your own consciousness it's in changing your own awareness your own understanding of what the real causal factors are so moving to the next slide unfortunately people this is what I actually think of the human condition this is where Humanity is really at as an overall condition in the aggregate sense and I know people will say I'll mark you're so negative it's such a condescending way of looking at humanity but unfortunately it's exactly true okay and you know people will say you know oh this is gonna turn people off so I'm doing it at the very beginning the very beginning of the new broadcast I'm trying to explain to people and show to people that I don't really care what anybody thinks about the information that I'm presenting ok I'm not interested in the human reaction to what I'm saying because if you're just reacting to what I say you're not paying attention and listening to whether the for whether the information that I'm telling people is actually true or not which is all that ultimately matters so this is part of falling prior falling victim to what I call emotional mind control which I want to see a lot of people are like oh just address people in a more gentle way it's probably never gonna happen with me folks this is probably about as general as you're ever gonna see me get okay I am NOT here to be gentle with people and be their friends I've said it endlessly an infinite number of times I'm here to speak harsh reality and tell people the absolute bitter truth about what is really going on on this planet I'm not here to hold people by the hand Pat them on the back say how great of a job they're doing when slavery is continuing and growing worse okay I'm here to explain to people what is actually required the requirements to making a change for the better happen on a mass scale and I'm trying to explain to people that we are nowhere near that change in consciousness we're nowhere near that paradigm shift okay the factors that need to take place for it to happen are not even close to being present on any kind of a scale or factor that is required okay so if we cut back to the slide my tagline for this show has always been get as offended as you like okay I'm not interested in whether you find what I'm saying offensive okay we're not here to engage in politically correct language we're not here to tread very delicately with other people's emotional sensibilities okay you cannot come to the reality or the truth about what is happening with your fields okay you have to engage the mind you have to engage logic and reason you have to get your feelings out of the way you have to get your ego out of the way okay so I see I see I take a different approach to how a lot of people in the so-called spiritual community I consider what I do highly spiritual I consider it really get delving into what the epitome or the essence of spirituality really means and I do try to do that from a streetwise level I'm not doing this from some pie-in-the-sky airy-fairy seeing the world through rose-colored glasses level of spirituality I think that's false spirituality okay what I'm talking about is getting right down to the nitty-gritty getting right down to the meat and potatoes of things and saying things as they are unapologetically and it's the viewer the listener it's their job to get their ego out of the way it's their job to get their you know skewed sense of emotions when it comes to what is being said out of the way and listen to what's being said be present being true present moment awareness and actually listen to what's being said instead of your interpretation of what's being said or instead of how you feel while it's being said you have to listen for the veracity of it and you have to do that with the logical part of the mind okay and you have to you have to do that feeling comfortable enough I'm not I don't want to berate people completely because I know there's some people who are trying what I'm gonna try to do throughout this series this new format is try to balance between being very honest and oftentimes Stern about what's taking place versus trying to inspire people to do something to create change on a real-world level okay and I'm gonna talk a little bit today about my personal frustration with the lack of advance in consciousness okay so moving on in the presentation what we really have to understand is that humanity is still in a place in consciousness unfortunately highly unfortunately where they still are not at a level of awareness that they can tell reality from fantasy they are still not at a level where they can pull the veil back and see reality for as it actually is very few people and very few people have delved deeply enough into knowledge to be able to accurately do that okay they pull back one veil and another one presents itself but they're still not at the real world yet okay and that's because they still lack the overall picture as far as the totality of knowledge that they need to take in is concern they have some disparate pieces of it but they haven't drank deeply enough of the spring of knowledge in order to really put a full world view picture together so this has been a focal part of my work for from day one is helping people to get past the perceptions and the the the mental projections that they put on to the real world and it's they're simply artificial constructs of mind you know this is part of knowing who we are I'm going to talk a lot about knowing who we are knowing who the enemy is critical factors of really creating change in the world and in order to do this you have to be willing to look at the truth no matter how harsh or ugly it is and see that's why people put these blinders on that's why people throw up these veils of perception and you know we have to be willing to strip all of that away as painful of a process as that may be and I think that's where this show sets itself apart what on earth is happening has always been about looking at the harsh and ugly reality and being honest with ourselves about it this is a part of that the first step of initiation which I'm going to talk about you know because again this show is all about the occult ladies and gentlemen and you know for new listeners maybe new viewers okay that word might scare people but that's what this show is all about it's about the realm of the hidden okay and it's about pulling the veil away from it to reveal what has been hidden from us and that's what the word occult means is we're going to be getting into so I think this show does that very effectively pulls those veils back and gets try I try to endeavor to get people to really be honest with themselves because that's what we have to do we need that level of honesty okay again my work has always made this huge distinction as one of the biggest factors of my work it has always been about the distinction between the natural or the world of the real the actual inherent aspects of nature and reality versus the artificial realm the manufactured realm okay the realm of simply constructional thoughts and ideas that aren't necessarily in alignment with reality they are just perceptions of things that are can waver very drastically from reality that artificial world of thought and the artificial realm of ideas okay see the the human imagination can be so very powerful in helping us to achieve our goals and helping us to envision a better state for ourselves but it can also go the other way and it can imagine all kinds of completely artificial and ideas that are not in keeping with or in alignment with reality whatsoever and this is what I have always tried to from day one make this show about about it's it's it's trying to define and create a very real world distinction between the realms of the natural and the realms of the artificial it's been a defining hallmark of my work I feel and that's where natural law comes in actual behavior ads and as to whether it is in alignment with the laws of morality of the universe whether an action causes harm or does not cause harm and if it causes harm it's a wrongdoing and if it does not cause harm it is an actual right then no one has a right to stop us from enacting so you know this distinction between the artificial and the natural people really have to get into their minds as one of the defining characteristics of everything that we do here on the show okay and that that was the underlying basis for the whole natural law seminar that I gave that really I think put a lot of my work on the map so the next slide is the other aspect of my work that I feel very very very few other researchers and presenters and talk-show hosts are delving very deeply into if at all and that is the deep understanding of the causal factors that have led to the current human condition see we can describe the prison all we want we could describe the prison endlessly okay but unless you get down to the actual causal factors of what put us in the prison why we are in the state that we are in okay describing all the aspects of the cage is not going to do very much in in the sense of in the way of getting you out of the cage getting you out of the prison that has been built up all around us and that's what I think what on earth is happening and particularly myself I think that's what I do very effectively I think that if you don't understand causal factors you are always treating symptoms okay I liken it to a couple of things I give a couple of brief you know anecdotes as to or analogies as to what it's like doing okay imagine a human being continuously putting their hand on a hot stove and being burnt every time they do it and not learning from that okay and being like why are my hands always burnt I mean what wood is going on here and they don't understand well that's the causal connection you put your hand on the hot burner it's going to burn it doesn't matter whether you believe that that's what's going to happen it doesn't matter whether you want it to happen or not it's a natural effect driven by the cause of you deciding to put your hand on the burner okay and unfortunately what humanity has become I don't believe it's what humanity is from their nature level from the actual underlying inherent aspects of the being the individual human beings that comprise humanity it's not our nature but it is the condition of humanity that we have become sort of a retarded species and when I say retarded I'm not using that in a derogatory way to people who have certain conditions of you know the brain and nervous system I'm talking about that we are slowed down in our processing and understanding the word retard to retard means to slow down if you look it up in a dictionary okay so to become retarded is to have become slowed down in our uptake in our understanding of what the causal factors of reality are we are like a retarded species okay slowed down completely to a very slow level in being able to connect cause and effect and that's the problem that's the one of the entire problems with humanity that we have a very short term vision when it comes to seeing what is really taking place and then going back a little bit in time and connecting that with the cause that set that factor in motion okay so in in occult terms when you when you study this from occult philosophical perspectives you will realize that this is part of what is called in Hermeticism particularly the law of cause and effect and if you study that they break it down into two planes or two aspects of reality you could say there is the plane of effects and that is the realm of manifested reality okay this is where you know things have actually come into physical manifestation in the 3d world okay that's the plane of effects once something has come into manifestation in the 3d world okay it's what is it's what is it has become the truth it has become the reality of what is okay you cannot affect change from that level of reality because the manifests the result is already there okay so if you want to affect change you have to affect it from the causal level of a reality you have to get down to causality what made that effect in the real 3d world in the the realm of manifestation happen and we have to analyze those causal factors well everything starts in the mind since everything that comes into 3d manifestation had to exist as a thought or an idea first okay so you have to understand the principle of mentalism and then you understand the causal factors the principle of cause and effect when you understand the principle of cause and effect you're gonna invariably start to get into natural law and behavioral consequence okay if we behave a certain way that's gonna be the causal factor and then that's the Y that underlies and proceeds all physical world manifestation okay then that behavior sets a series of events into motion and it becomes a manifested reality in the three world 3d world at a later time in the plane of effects see we're stuck as a species in the plane of effects we think we're going to rearrange all the deck chairs on the Titanic and somehow stop the ship from sinking when what we need to do is back up and prevent it from hitting the iceberg okay this is the whole entire problem with the way humanity thinks okay we think we're going to do something in this 3d manifested reality realm of things that have already happened without changing who we are in our mind and in our heart okay and magically the world's just gonna change because we wish it to and want it to and reality doesn't work that way folks sorry to burst your bubble get as offended as you like crying your milk about it you know whatever you want to do okay but we have to become adult about this and understand that we have to get down to the causal factor level of reality the plane of causality to understand the why that precedes manifestation and that's what this show has been about since day one all power to affect change lies in the realm of causality no power to affect change lies in the realm of effects okay unfortunately that's where human consciousness is trapped in that realm of effects it needs to get down to that deeper level of awareness to get to the plane of causality and understand the causal factors you know another allegory I gave for that is you know like people think well I can continue to do what I have always been doing okay I can i'm gonna dry these clothes by pouring buckets of water on them and they'll get dry no the doesn't reality doesn't work like that okay you could do that all you want and you're never going to see the effect change you could say you want that change all that you want you will never get it by continuing to do the same thing that has never gotten you that result again that's the definition of being insane or as I like to call being slow on the uptake or being retarded as a species that's what where humanity is at right now unfortunately so again what we talk about here on what on earth is happening is the world of the occult and again this is an off-putting word for a lot of people who aren't familiar with my work already so as a brief reintroduction to the world of the occult we have to stop seeing this as evil we have to stop seeing this as how Hollywood often portrays it because it's a nonsense worldview about what occultism really is ok and we have to realize that what the occult is is about is a body of knowledge it is hidden knowledge about our reality that the control class or as I call the hidden occult priests class that are controlling everything and our other social engineers of our society do not want people to understand we are ruled by what I would call a sorcerer class ok and you have to not look at that in the terms of Harry Potter sorcery ok again Hollywood portrays this allegorically to dramatize it ok what we have to understand is what a sorcerer is is someone who knows the hidden laws of nature and the hidden dynamics of human consciousness and the human psyche and they know that in very deep awareness in fullness and yet they have made the freewill decision to instead of uplift humanity and tried to increase human consciousness by teaching that knowledge and spreading it in an egalitarian way to all of human society they have chosen to hoard it for themselves and in doing so a wield a power differential that is gained by their knowledge differential okay so I'll say that again the sorcerer class or the priests class of the dark occult as I call them is wielding a power differential that they have come into by way of a knowledge differential ok so I liken this to a very advanced psychologist and that's what the occult is it's very advanced human psychology okay so if you have an extremely advanced psychologist that knows just about everything there is to know about how the human mind works and he develops a hatred for someone for whatever reason that it may be and the other person has no idea about their own psyche has no idea about their own mental emotional and spiritual development how much of a number do you think that extremely advanced maybe the most advanced psychologists on earth could do to someone who has absolutely no clue about themselves and has not looked into psychology one bit for one moment of their lives if they were so inclined to really do a number on that person psychologically well that's where humanity is at because Humanity is that person that has no idea about its actual self and the control class as I call the dark occult priests class or the sorcerer class that is engaged in social engineering and mind-control practices is that advanced psychologist who has that level of knowledge and is wielding it for their selfish purposes for their purposes to dumb down and to control okay and that's what we have to understand the occult is it's just knowledge that anyone can take in and if they take it in they will level the playing field that power differential will go away because that knowledge differential that knowledge gap will be leveled that's what I'm trying to help move humanity in that direction that's what I'm trying to help do here on what on earth is happening and have been since day one okay so let's look a working definition of what the occult the world of the occult and occultism is in the next slide so occultism is actually the study of the hidden laws of nature specifically those laws which are at work in the invisible mental and spiritual domain far more than the laws that are at work in the visible or physical world okay so we're talking about laws that actually govern human conduct okay we're talking about laws that bring to us the result of what we put out into the world and then we are going to have to live that result as far as human experience goes okay so the universe in that sense acts like a huge mirror it's a mirroring process of what we put out we ultimately get back from creation and from the universe itself in the form of experience and that's what the whole process is understanding how to change our behavioral free will choice okay and then align our behavior to the laws of morality so that we get the result that we say we want which is freedom peace order justice you know etc okay so that's what the realm that's what we're talking about when we talk about studying the world of the occult and the occult laws of nature the hidden laws of nature okay so therefore occultism in involves the acceptance of a much wider worldview than that which is ordinarily taken by the everyday human being we have to expand our worldview into understanding the world is not some just mechanized machine of pure matter and materialism too many people are locked into that Newtonian scientific worldview and that's exactly what it is it's scientism it's not science and it's actually been proven an inaccurate paradigm or an inaccurate worldview of the universe for over a hundred years easily and yet many people still accept the Newtonian paradigm of materialism as being accurate and it most certainly is not so you know we have to understand that there is living dynamic intelligence that underlies everything in nature in the natural world and that is the power of mind okay whatever you want to call that the creative force god I'm perfectly comfortable with that term many people are not and I could care less whether anyone is or not it's your personal choice whether to be comfortable with that but there is a living dynamic intelligence that underlies everything and that is pure consciousness and that is what gives rise to physical form through vibratory energy and you know when you when you study deeper into the realm of the occult which is not a religion it is hidden science it is absolutely provable hidden science when we delve into new sciences that are emerging including quantum mechanics new physics new biology epigenetics we find that all of these aspects that have been discussed regarding consciousness in the realm of the occult and occultism teachings throughout history have been borne out to be true in modern science true modern science not science ient ism and this is the merging that is very very slowly happening between the realms of science and spirituality and I'd like to see that advance and move faster but unfortunately much of humanity is just still too stuck in ego as we're gonna be talking about here today so the an occultist the definition of an occultist then may be defined as those who study all of the laws of nature not just the physical laws but the physical and spiritual dynamics that are inherent in the natural world both those that are readily seen and those which are much more difficult to see with simply the physical eyes or with the measuring instruments that we use as part of scientific instrumentation alone ok so that's what the occult is it's a holistic worldview of understanding and knowledge and too few people have delved delved deeply into it that's why we're in the situation that we are the worst of our species has delved into it in a deep way and has used that knowledge to basically keep humanity under its thumb and what I'm attempting to do is to inspire people to become what I call do cultists see as long as the the realm of the occult the the realm of hidden knowledge and hidden science and hidden psychology remains hidden as long as it remains occult it again the word occult comes from the Latin occult RA which means to hide or to conceal ok as long as it stays hidden slavery's going to continue we're not going to have any kind of a paradigm shift in consciousness that leads to true human freedom as long as the occult remains the occult so I'm trying to inspire people to look into this world of hidden knowledge and to understand it at a deep fundamental level when we do that we're start to understand ourselves more because that's what this is all really about the occult is actually a deep study of the self that's what human psychology is and this is hidden human psychology okay so we have to become those master psychologists through our study of the world of the occult and then when we do that then we're going to see the the playing field start to level on a worldwide basis and we're going to see the ability of people to really take an empowering charge over their lives and get out of this control that we've all been put under specifically the mind control that we've been put under we're going to see that be able to be done far more effectively as more people study this knowledge moving to the next slide you know unfortunately we don't have that right now we have what is akin to chess pieces being moved on a giant board that represents the earth and you know you could say that this is between the forces of good and evil okay and unfortunately evils kicking goods ass right now okay good hasn't even sat down at the board that hasn't learned the rules of the chess game and hasn't shown up to play and the evil side is basically the chess master that is running rampant on the other side okay and if we want to change that if we want to see any headway being made we have to start to really get down to the underlying causal factors of this game and understand its rules and that's what natural law is okay you know and this is something that like so many people are so loath to do their solos to getting down to those causal factors they think they're just going to analyze things endlessly to death from the 3d perspective and never go into the mental and spiritual aspects of this okay and they're gonna change things by putting new people in office they're gonna change things by putting a new financial system in you know and everything is going to be hunky-dory and people's minds are gonna be just as degraded and just as undermine control as they ever have been and yet we're gonna have a wonderful new reality utter bunk okay get as offended as you like is no way to change reality from that level of ignorance from non awareness okay you're just gonna be a chess piece being moved on the board instead of a grand champion who's actually really changing the reality by really moving the pieces okay and we're going to continue to get our asses kicked and handed to us as a result of that level of ignorance so we have to become mature about this and understand we have a lot more work and a lot more knowledge to take in and again that's why I'm gonna keep Remus izing on this show okay go back to all my former podcasts okay listen to them all all 196 of them that precede this one in order okay you need to do that to get the big picture to get the world view the world view picture established that you need to understand material going forward okay there are prerequisites for the knowledge I'm gonna be talking about and they're in the podcast what on earth is happening calm slash podcasts or just hit the podcast tab or the podcast button on the left hand side of the site okay and you know that's gonna take time and attention these are the spiritual currencies I find that most people who really lay hard into my work and say I don't like passio I don't like what he does this and they haven't listened to the material and it's fulness they've listened to bits and pieces on YouTube okay and if you do that you are not gonna understand what I'm really talking about okay I'm trying to explain to you you go to YouTube and listen to some mark passio videos you'll get a tiny bit of what I say but you are not gonna understand the totality of the picture you're gonna get the totality of the picture from my podcast series the audio and the associated images and documents that go with the podcast audio series you can get that on my gifts area of the website of the podcast flash drive which I make available which has all 196 episodes with all of the images and documents that go along with it on one flash drive okay so you can get that on the gifts area okay so you know going back to the slides I just want to let everybody know in order for us to really change from being a piece moved on the board to being the the chess champion that's really change the nature of the game much much more deep level knowledge is required and most people aren't there they have studied cursorily they have looked at things in a very fun at a very you know non deep non-penetrating level that is just skirts the periphery of things and then they make the mistake that I'm gonna now try to reach out to other people with what I think I know that I haven't really studied in in it all of its fullness and make a big change and that's a big mistake to do you know get yourself in the position where you've gathered the grammar and you've developed the understanding to know what it means first and then exercise your rhetoric or put that out into the world so where is humanity add in consciousness we're still under mind control deep mind control and folks let me tell you something everybody's like oh well we're making progress more people are waking up daily then you know that may be true but percentage-wise I don't think things are changing that much I think things were better back in 2007 when I really started doing this type of work than they are today I think there were more people questioning things there were more people that were tuning out of the mainstream media there were more people that were questioning 911 okay and what really happened on that day and today the mainstream media has ramped up its efforts and people are gonna say people don't really pay attention to television that much anymore well that's partially true and partially that's not where the entirety of mainstream media is at okay it is moved to the realm of the internet it is censoring things on the internet as I'm going to talk about we have to understand at a very fundamental level that they've ramped their efforts up tremendously to continue the brainwashing to continue the social engineering to continue the propaganda coming out of the television and the Internet okay and we have to understand that we're not any as a society anywhere closer to really truly freeing our minds and getting it out of what the control class how the control class wants us to think okay no we're closer to doing that than we were a decade ago more than a decade ago I think we were in a better position then technology has advanced the the reach of media through the internet has advanced and most people are still connected you know their minds are still connected to these sorcerers worldview okay and they have us on their strings like puppets and we have to break that chain those chains we have to break that connection okay shut off that signal and delve really into powerful works that can help us to understand deep moral philosophy okay we have to understand natural law and a far deeper deeper level there's so many moral relativists the amount of moral relativism is mind-numbing its spirit its spiritual cancer as I like to call moral relativism you know so many people think oh we get to make up what right and wrong are and it's perfectly fine if something's perfectly okay to do in one place and in another place you could be thrown in a cage for doing the same behavior I mean this is utter sheer nonsense that people have to get their heads out of the muck and believe that we make up rights human beings make up rights this is what actual people in the so-called freedom movement believe and they think they're going to free themselves up as a result of continuing to think in the gutter in the gutter this is its spiritual gutter cancer okay you might as well go lay in a sewer okay rather than think like that because that's exactly what it is the equivalent of doing okay and who continues to propagate this worldview the media the so-called mainstream media the established media that are the they are the enforcement arm in the mental sense of the sorcerer control class that's what's depicted here by there's there's this one hand controlling the media talking head and he's he's controlling everybody else like a puppet but that sorcerer that you don't see is behind the scenes who's really really directing what's going on to get that information that poison information out there to the public and you know look so many people still don't get this you know there are people are going to be listening today or like yeah we get this mark not a lot of people really get this in society there most people still trust the media okay we're not you know we are not as advanced as we think we are because a lot of us talk to each other about this you know so many people believe that the media is doing their best to try to bring the truth to us I was actually in a pub with a friend and we got into a discussion about whether people are waking up or not and I asked her I'm not gonna mention any names I don't know whether anybody wants to name public but I asked this person please go around to people in this pub right now and just you know if you if you want to do it if you want to do a little social experiment and she said yeah I'm willing to do it so just ask him do you think the people who were members of the mainstream media are really doing their best to try to bring truth to the American public by their broadcasts and what they put on the air she went around to everybody in this pub and every person said yes they believe that they are trying to do their best to get the word out about what's really going on to the American public can you believe it that's where we're at in consciousness that's exactly where humanity is at in consciousness if you don't think so you are exercising a skewed perspective because you know that that's not really true and most of the friends that you hang out with know that it's true that it's not true okay so we have to stop trying to ascribe our level of consciousness to other people or the the bulk of humanity okay because we're never going to be able to put our thumb accurately on the pulse of where humanity is really at and be honest with ourselves and have an accurate understanding if we're going to gauge this dynamic by how we ourselves who already understand a little bit about what's going on in the world and our friends our circle of friends that we choose to be around currently think because we're either all the way awoken or partially awoken and you know the average body of humanity is nowhere near that state of consciousness and that's what the great work is to do is to help to wake those people okay it's not just about waking ourselves up and helping our own consciousness and our own condition but it's about reaching out to other people with knowledge and helping them to understand what we have come to understand and we do that most effectively when we gather that knowledge in its complete form so you know what's happening now is as a small group of people are waking up in the aggregate sense and they are basically positioning themselves as potential maven mavens to reach out to other people and to help change their consciousness through what they put out on social media and on video sharing sites and on web sites in general we are seeing a push back by the established mainstream media and the established technological giants in the tech tech sector we're seeing a effort to censor the free flow of truth and this is a very dangerous dangerous game that's being played folks okay and look I don't care why people think they're doing it for political reasons or silence Trump supporters or whatever you know to silence people who want to you know buy into this left/right nonsense worldview that I'm gonna talk about okay I could care less about the political aspects of it okay because it's all bunk nonsense politics is slavery government is slavery okay you know we need to stop you from izing it and call it what it is slick human slavery okay so people need to know right up front from people who may be new listeners to the show I support no politicians I support no aspects of government I am a radical spiritual anarchist and anarchy means no masters no slaves I am against the dynamic of slavery in all of its forms because slavery is an abomination unto creation I stand for freewill above all else and I stand for freewill in alignment with the laws of morality of creation which it which is what natural law is okay that's what spiritual anarchy is about ok natural law based spiritual anarchy that's the natural condition of humanity not the artificially inspired condition of government slavery that we are put in through completely erroneous dogmatic worldviews and beliefs ok so what's happening right now is to try to suppress and keep a lid on top of the emerging worldview of true spiritual anarchy and not just that just even like anything that conflicts with the established power hierarchies political power and worldview that they want to propagate out to the world they are trying to literally censor the free flow of thought by shutting people's social media sites down YouTube channels down websites etc ok and let me tell you something folks once it gets to the point where speech is starting to be shut down hot war is right around the corner and if you don't think so just start to look at where human history has taken us to this point and I'm telling you this is one of the most dangerous things that could possibly be done by technological giants by the social engineers by these tech companies themselves they don't understand the can of worms the Pandora's Box that they are opening up that will not what they make pop out of that box will never be able to put be put back in now I'm telling you it's not going to cause anything but chaos suffering and death for Humanity ok it's like we need to really champion the idea of freedom of speech and let the ideas flow freely so that we can have engaged discourse about this stuff ok and you know that doesn't mean just let people bully people and like you know say you're gonna live under our worldview in our political paradigm whether you want to or not you know we have to have a discourse about what real free will is we have to have a discourse about what a real voluntary society is and would look like and and show people that that is the better way of living in the world and it is the better it is the right way of living in the world it's not just better it's the right correct moral way of living in the world it's the only moral way of living in the world okay so you know the the censorship thing makes me probably the most upset and borderline you know violent slash ultra angry than almost anything else because it's like that's the point where I say it may need to go hot when you start taking for people's freedom of speech to communicate ideas that can change consciousness away then you're leaving only one option and that's physical rebellion and that should never be taken off the table and ruled out either we have to always keep that self defensive option on the table when it comes to tyranny of government you know when people's who think that that's not possible could never happen you're also delusional and kidding yourself we went into a whole section on the psychological fear of self defense and rebellion in former episodes and we may revisit that again in future episodes but let me tell you something one thing I do know is the thing that's going to bring that negative eventualities which I'm trying to avoid by doing explain to people how you can do this in consciousness okay and how you could do this in your care based emotions for truth okay your care for truth and then getting that out there to other people that's one of the highest forms of love that you can put out into the world okay but if it's not done that way and we make it impossible and and you know technology and and the people who are controlling that and you know the people who are in the mainstream media and the people who control them try to make that change impossible as Kennedy said before he was assassinated those who make peaceful revolutions impossible will make violent revolutions inevitable and that's what I absolutely see as a potentiality if this censorship continues and grows worse so you know the people who want to open up that can of worms I'm telling you it's not going to end well you know and we have to really push back against that by putting more speech out there and one of the best ways we could do this is to become technologically literate we have to understand how technology she works far too few people can do anything like what we're doing here on the airwaves today far too few people understand how to even make their own webpage you know the internet used to be an eclectic grouping of web pages with all different world views and now it got compressed and compressed and compressed where we're herded into what is referred to now as internet ghettos okay where we're fighting with you know other strangers and trying to convince them of you know that they should think like us instead of just putting the information out there you know I want I want a lot of people to just put information out there into the world publish publish your findings and your understanding that's what people who engage in science do you know you do your experimentation you have you formulate a hypothesis you do your experimentation and then you publish your results okay this is what we need we need more internet publishing okay we need to become our own content creators you know if you don't like the way somebody else is doing something don't complain about it go do something yourself you know and you need technical competency in order to do that and that's the problem with the so-called freedom movement we have too many armchair quarterbacks we have too many backseat drivers we don't have enough actual content creators doing the great work themselves you know stop doing this start doing this what are you gonna do about it how are you gonna help make that change happen you know become technologically literate and get your voice out to thousands there were millions of people and the way to do that is to understand how to publish on the Internet alright so I'm gonna be doing a whole series on that called how to become the new media it might be a webinar series separate from the one on earth is happening video broadcast we're gonna see how we're gonna work that in future should and you know in the future but I have a whole seminar plan called how to become the new media where I'm going to teach people software I'm gonna teach people how to do stuff like this okay and you know when you become technically competent than the power of publishing and the power of you know creatively getting your ideas out there to other people is entirely in your hands okay you know I look at Facebook and YouTube as like these are canvases that these people have handed you and said as soon as you paint something on the canvas that we don't like we're gonna pull the canvas away from you okay a website is a little bit different than that your personal website or your personal domain it's your canvas you're paying for the service you could publish you know essentially whatever you want up there and nobody has any say about what what's what content is published there okay so you know it's a lot freer of a vehicle of expression when you know how to publish yourself on your own website that's what I would love to see a lot more of rather than the Facebook commandos that I'm gonna talk about okay so another deep aspect of my work that I want to re-emphasize - I'm going to be getting into and that is to know the self and know the enemy and the other is going to be what is the process of initiation okay so this is a quote from sons zoos a book the art of war he said if you know the enemy and know yourself you need not fear the result of a hundred battles if you know yourself but not the enemy for every victory gained you will also suffer a defeat if you know neither the enemy nor yourself you will succumb in every battle brilliant words regardless of what you think of the individual who wrote them regardless of what you think the purpose of what the writing was about that's not what I'm here to discuss in this slide I'm discussing the idea of that real victory in any battle particularly a spiritual battle that we are engaged in now comes from deep knowledge of who we are and deep knowledge of the factors that we are up against okay and often they're really one in the same because this the the the the enemy is just a reflection of the negative aspects of what's really going in on inside of each one of us at the aggregate level when it all comes together and is all taken into account okay the more we work upon that those shadow and dark negative so-called negative aspects of ourselves and bring those to the surface and and really understand what are the driving factors behind them through shadow work we are going to understand ourselves better and as a result we're going to understand what we are up against the enemy the so-called enemy much better okay and you know what what he's saying here is if you only have half the picture right you're gonna lose at least half the time okay so in the spiritualist communities the new so-called New Age communities right they only have half the picture the picture that they have is they do have a pretty decent understanding of self right they understand consciousness and a an accurate enough level okay they could go further in that and understand really what the real paradigm shift the aspects of the real paradigm shift that need to take place are okay but what they don't understand is who the enemy is you know you go to some spiritualist communities you go to you know like maybe a New Age Expo let's say you ask people oh are you politically engaged do you believe in the democratic or republican parties and they'll tell you yeah they believe in politics they believe in government you know they don't understand who the external enemy is they don't understand that there is a cult sorcerers that are driving the whole political dynamics and that really are entrenched in power behind the scenes behind the deep state you know they don't get that the world is run by this religious priests class they only understand the spiritual aspects of it so they don't know who the enemy is okay now not just that the enemy is those who are ignorant of how that power dynamic really works that's the real enemy ignorance is that real enemy and they're they're not even aware of how ignorant they are of those factors and they think it doesn't matter in many cases so they only have half the picture if that okay and therefore they're gonna succumb half the time in battle and spiritual battle then you have the other side the other aspect so I'm gonna get into this a little bit in my Anika poco talk my main presentation is going to be anarchy and the occult part to religion versus initiation okay so I'm gonna get into this dynamic in this where the people in the anarchist community or in the freedom community in general they have the other half of the equation they tend to know more about the you know conspiratorial aspects of reality if you will okay they tend to know more about there's people behind the scenes of entrenched politics that are trying to make the world build the world in their own image and likeness okay and become gods and rule everybody okay they get that power aspect of things but what they lack in a very big way in a very pronounced way is they lack the spiritual understanding they lack the understanding of self they may know a lot of aspects of who or what the enemy is but they have a different aspect of ignorance which is the real enemy and their ignorance is in their spiritual understanding of self and consciousness and the underlying causal factors regarding natural law and how that brings to us the consequences of our behavior the spiritualist community understands that a little bit better than the anarchist community or the politically engaged freedom movement okay we have to blend these and merge the two so that we take the left brain anarchists and their understanding of the 3d aspects of what's going on and bring them together with the right brain a spiritual community that has an understanding of you know the consciousness aspects of what's going on and bring that all together in a holistic way so that we truly know the self and the enemy when we do that then we're gonna make some headway into creating a world based in true voluntary interaction and true freedom but not until because we only have half the picture or the other okay and some of us have none the bulk of humanity doesn't know who they are or who the enemy is okay I'm only talking about the halfway awakened you know collective groups that have some somehow taken a collective identity and called themselves you know anarchists or the freedom movement or the spiritualist movement or the New Age community etc okay halfway and their understanding at the very best and that's not going to get it done it's never gonna get it done okay so again this is part of what the arc helps with this is part of what my podcast series helps with and you know obviously I'm not the be all and end of it you got to research all these other researchers that I point people toward you know and develop a very eclectic holistic understanding from a clutch acknowledged electic sources that's what the key to effective research and understanding is all about so moving on to the next slide another hallmark of this understanding that we have to develop and the process that we have to go through to get there is another thing that this whole what on earth is happening series of information it really focuses on as a central theme and that is actually initiating ourselves into deeper levels of knowledge okay what I call here on this slide a cult initiation or truly beginning the spiritual journey initiation just means starting something you've initiated it you've you've put it forth you've set it into motion in the world you have started you have begun one of the things that I said I told people in the past from my work in the dark occult again for people who do not know that background my personal background I was involved with some of these sorcerers with some of these mind controllers with some of these Satanists and dark Oh cultists okay who are really running the show behind the scenes in the true entrenched aspects of power not the visible ones that they let you see on the TV screen okay and during my time with them one of the phrases that they called humanity in addition to referring to humanity as simply the dead yes that is what they called people they don't call them the masses the sheep you know the hordes of humanity they refer to human beings as the dead is one of the phrases that they use believe it or not okay and as horrible as that may seem it is largely accurate because they see consciousness as a threefold manifestation of our thoughts our emotions and our actions and if you aren't building a an ability to think okay then and you're dwelling in total ignorance well the thought aspect of consciousness is largely destroyed or inactive and if you're not truly feeling from a heart based level you know and an understanding you know that what we are doing or not doing is actually affecting other people in their lives and creating suffering then then you're not really using your emotions to care enough about the truth and what's going on and so you're you're dead at a heart level and certainly most of the people who engage in the dynamics of ignorance and apathy like that aren't doing anything to create real-world change and so they are in a state of laziness and cowardice often the two states combined and therefore their their actions aren't really present and so when all of those aspects of consciousness are not active or deadened they look at it like you're not really alive you're you're a being that has actually undergone spiritual death so they call them the dead that is their actual rationale we're not doing anything to actual people these aren't even people these are dead they're dead husks their shelves you know that that had the potential for the development of a soul but didn't utilize any of that potential and have just let themselves wither and die before they've physically died you know and you know folks I wish I could say it weren't true you know I wish I could say when I heard their rationale for this I couldn't just go you're completely and utterly wrong that's not humanity that's not where we're at because it is where we're at and what would the first step of initiation is what I'm going to talk about here is don't lie to yourself be honest stop lying to yourself this is why people hate my message in many cases that's why they can't really hear what I'm saying they they hear the physical tones of my voice but they can't really incorporate the understanding of it because what I say because it is dark and ugly they feel it cannot be true okay so they're not really looking for the veracity in the statement they want to react emotionally have a visceral emotional reaction but not really hear what's being said okay this is the state where humanity is really at unfortunately and I wish I could say different but I don't want to blow smoke up your ass and lie to you and that's why I don't lie to myself about it can it change yes possibility and potential is always there will change that's up to the human will okay that's up to what will we do about it and that's what I'm trying to inspire so again I'm trying to tread this medium or you know this you know balance point between being honest with you and that is ugly versus saying we're actually still today in a position where we can actually change this and do something about it otherwise I want to come back on the air well if I thought nothing could be done I would just shut up and let the chips fall where they may we can still drive this evolutionary progress forward if we engage ourselves and enact our will okay so this is done through what I refer to as a cult initiation and these were thought it was a five-fold process and this was done in conjunction with the five senses and then the three elements of the Trivium knowledge understanding and wisdom and then the four elements of the quadrivium which was arithmetic geometry music and astronomy the quantifications of the the Trivium of the ability to actually quantify knowledge and and measure it and gauge it and filter it etc process it so let's look at these steps of initiation very important I'm going to be covering this in my workshop at Anika poco as well the first step stop lying now this means stop lying to others but first and foremost above all other forms of lying stop lying to yourself you have to be honest with yourself about where you are and not be necessarily ashamed of that if it falls short of where you want to be and could be and that's how you set a direction you are honest with where you are at okay so let's say you have health to work upon you know you're not where you want to be physically there's always of the ability to say here's where I'm at I'm gonna be honest and I'm gonna get to here I'm gonna work on that then you could say I'm gonna psychologically improve upon myself and you have to know where you're at there and be honest with your assessment and then you can move forward from that point but you can't move forward from any point if you're lying to yourself first and foremost okay you can't tell the truth to others you're lying to yourself okay about where you are at and where Humanity is at and that's why a lot of the things I say on the show upset people but that's where real care and love come in you will say things that are upsetting to people if they are true you will not hold back from the potential injury of their feelings to lie to them this is what the mainstream media does they want to talk to you in sweet Pleasant tones of their voice dress all super professional in their three-piece suit and then they're gonna just absolutely lie every word that comes out of their mouth tell you things that are not true that are gonna totally confuse you and bring you into a worldview that could never possibly lead to freedom but they'll do it with the most pleasant tones of voice imaginable okay what I'm here to do is shake you and take you out of that trance and say it doesn't matter absolutely doesn't matter how someone says a message to you that's emotional mind control if you think so all that matters is whether the person is telling you the truth you have to gauge the veracity not how it sounds not what they look like not how it makes you feel because you're not comfortable with it that's mind control if you respond like that you are undermined control if you respond like that and that's why a lot of the people who say they can't I can't handle past the ayah I don't like the way he delivers the message well that's emotional mind control you know I can listen to people that are so boring and dry and repetitive and monotone I can listen to people who are saying things in sweet Pleasant tones I can listen to people who are angry the whole time they talk you know I tried it again try to balance and be honest emotionally with people all right all right but I could hear it anyway and all I'm listening for is is it accurate is it true you know and then I'm gonna take what I can use from what's being said that's real logical processing of information okay and that's what we have to learn to do as adult human beings we have to teach that skill to our children so and then they can grow up to be human beings that engage that true dynamic of truth discovery all right so the second step of the initiative processes stop dreaming this means stop engaging in cognitive dissonance so like the first thing lying that's saying that the world is some other way than it actually is right this second step is stop believing that the world is the way you think it is and look at it for as it actually is okay so dreaming means that you are seeing the world as you want it to be instead of actually how it is and this is what a lot of people do they think that the world is exactly how they envisioned it to be versus looking at it from an objective viewpoint an objective perception okay and they want to see it as they feel that it is instead of actually how it really is and that's holding these two contradictory ideas in your mind at the same time your perception of how something is even though it's inaccurate versus the reality of how it is and then that are completely at odds with each other and yet you hold those viewpoints simultaneously that is dreaming it's called magical thinking magical thinking believing the world to be what you want it to be versus and or instead of how it actually is it's all it's been called in Psychological communities cognitive dissonance is the term for it so we have to stop engaging in cognitive dissonance the third aspect of occult initiation or becoming someone who has started truly in earnest started the spiritual journey is to learn how to think and as simple as that term may be there's so much involved in it okay this means how to really logically engage in the process of truth discovery and this is done through the eclectic gathering of information that is the knowledge step of the Trivium process the three-way path to truth is what Trivium means then processing that data and coming to an accurate understanding of what it means which is the understanding process okay and then outputting that back into the world to teach others okay that is the wisdom process it is what we do with what we know and doing the right thing with what we have come to know and understand okay so that is the wisdom aspect of the Trivium process knowledge understanding and wisdom okay and this is the process of truth discovery that was taught in the ancient mystery traditions in the ancient world that come to us today through what is known as the classical liberal arts education methodology as opposed to the new communist based and socialist based outcome based educational system method which is taught in public schools throughout the world today okay so learning how to think not being taught what to think but actually learning how to come to through actual logical thinking processes to come to an understanding of how we discover what reality really is so this is a an ontological process of an epistemological process I should say okay so moving to the next step of a cult initiation live in the present moment and this is a very powerful one I did an entire show in the past on present moment awareness it means start from where you are at don't jump ahead don't necessarily live in the past okay understand the past from a perspective of how it will help you to understand what's going on in the present but live and work upon yourself and others in the present okay we have to engage with what's taking place right now in the here and now and the present moment in the present moment there is power okay we can't live in shame or anxiety over what occurred in the past otherwise I'd be being myself up 24 hours a day with what the mistakes I made in the past mistakes are there to learn from we learn from them we pick ourselves up we move on okay and we do that in the present moment and then we are going to try to accurately gauge how the situation is right now in our world in the here and now not looking to some external Savior not looking to some future time or past time but being honest about what is taking place right now and working from that moment and in there is empowerment in that present moment centering we empower ourselves very powerful concept even in the spiritualist community you will find this concept if it is taught properly and I would suggest to you that in the true occult teachings in many different traditions this actual being present in the present moment and working from that point is made very clear and you could gain an accurate understanding by studying occult wisdom studying that aspect of it the fifth and final step of the initiatory process is to activate the physical body activation of the physical body because it will be necessary it is not to be shunned the physical is not inferior to the spiritual nor is the spiritual inferior to the material and physical they are one in the same in their importance and necessity so we need to take care of our physical selves we need to eat right we need to exercise we need to engage in the dynamic of understanding the importance of self-defense and preparedness okay and when we do that then we are truly prepared and activated physically as well as mentally and spiritually and emotionally okay so incredibly powerful tools for the people who are starting on the spiritual journey that the tradition of mystery school initiation or occult initiation gave to their beginning learners and you know folks I talk about this all the time but you know how we value knowledge today is so degraded from how we valued it in the past how many people valued it in the past I mean there were trials and tribulations I'm gonna talk about in the third show back when I talk about the arc Drive that initiates had to endure that would almost cost them their lives or could cost them their lives if they failed at these trials to just to get into the mystery school to gain the knowledge of the occult and now today you know people just throw books in the you know and just ignore reality at will you know and and are just proud to live in the ignorance that they are living in unfortunately but we have to get back to that reverence for knowledge okay we have to get back to that deep hunger for knowing ourselves and knowing our situation and knowing what the real enemy is and you know when we develop that care for truth and that reverence for truth then again I feel them that's when a real paradigm shift or a true change in consciousness is going to take place so the the the real meat of what I want to talk about today is that we're nowhere near that we are nowhere near that development of care and knowledge in our world okay and then certainly nowhere near acting rightly upon it we are still in a state where we are controlled by the puppet masters of the world we are still in a state where we believe politics is real we actually believe that it matters who we vote for whether we vote for one master over another master okay when we're all enslaved by the system called government okay and the system called a thought the belief in authority you know we're all puppets on the string following the dictates of the Masters and if we don't obey then the Masters send their henchmen to punish us in whatever ways they see fit and that's not freedom you know voting for that certainly isn't freedom okay it's a belief system and what it really is folks is a religion as I'm going to talk about that this is a religious worldview that you know left and right hands are not connected to the same body okay that they're you know that we somehow are engaging some true freedom of choice picking a political master and folks they have us right where they want us these social engineers they've done a better job as I'm going to give you actual numbers to prove of politically polarizing people through this dialectical process of giving people a false choice which is what dialectics is it's advancing a predetermined agenda by presenting people with false choices that they get to choose from but no matter which choice they make the predetermined agenda advanced that's what the Hegelian dialectic in particular is and that's what I call polarization dialectics you're creating a false war between people but in no matter who comes out you no matter what choice is made the actual slavery system advances in its march toward totalitarianism and people still don't understand this you know how many people are still so-called politically engaged or thinking that voting for somebody is gonna change something never has never will because you're not voting to abolish slavery you're voting to put a new slave master into that position of power so called power they're not even the person in power they're being held by a an oligarchical group of occult priest class slave masters that sits behind them at a higher hierarchical level than than those who are at the same political level or are at in the whole system of control so what I want to look at today is how bad this political polarization has gotten in the modern world okay so the polarization dialectics are driven largely by political polarization or what has traditionally been referred to as the left-right political paradigm or the left versus right political paradigm in other words you have conservative liberal versus conservative Democrat versus Republican okay and you know we need to stop just even calling this politics we need to even stop calling it left versus right you know polarization between the political parties you know I call it a cult polarization because you're really choosing between the donkey cult and the elephant cult these are just cults okay they're religious cults that's all they are they're not based on anything that is actually existing inherently in reality they are belief systems that are driven by religious thought and the religious thought that underlies it all is the belief in human authority that some people are masters and others are slaves which I'm going to analyze and break down and the people who actually engage in these system that are simply cult members that's all they are they are members of religious cults that's what politics is okay and they have to give you two because they have to mirror the abandonment issues that are the deeply underlying psychological occult factors of why people are drawn to one political party or the other the left or the you know so-called liberal I would refer to it as the neoliberal party okay is all about the motherly abandonment issues so what does it want government to provide okay in this nested deep you know subconscious psychological driven factor of having mommy issues okay or having motherly abandonment issues the this aspect of the the cult of government always wants their political masters to provide for them provide something that is lacking take care of us be the nurturer be the one who gives us things for free out of concern and love okay not to teach us to do for ourselves okay but say you know demand obedience to their aspect their definition of morality and and you know contribution to other people don't do that through charity do that through you know actually passing violent driven political laws under man's law okay the the point here is this is a motherly abandonment issue dynamic that is going on deep in the nested often subconscious or unconscious aspects of the psychology and then we project that into the external domain and then we want government to become the mother that was either lacking or absent okay that we found lacking in our own developmental lives were absent in our developmental lives okay then the opposite side of the spectrum is the Republican you know or the conservative aspect and this is the people who identify with this largely have the daddy issues okay and this is the fatherly abandonment issue so what do the people project and want from this side of the political class they want protection they wanted to be this strong father figure to go out and police the rest of the world and everybody safe which is the traditional masculine role okay and you you see that that's why there always have to be just two because they are proxy parents psychologically see this is what people never get to with the with the whole political paradigm they never get to that occult understanding of what it is when when you hit people with this and they really get it and they see it as true which it is okay then they're like their mind is blown and they're like whoa I never thought about it that way you know but yet the occult controllers did that's why they set this system up this way they very deeply know what's going on in the mass human psychology and the bulk of the people do not and that's why easy prey very easy price a child's game for them actually okay and you know they're not concerned about me you know they're not gonna take a hit or a SWAT at me not gonna happen they've already told me as such in so many words okay now I'm not important enough because so few people understand this at a mass level that what I'm doing is not gonna make that big of a dent in it unless way way more people start paying attention to what I'm saying okay and getting it at a deep level and then not just getting and not just understanding it but then acting upon it that's when they'll become concerned they're not concerned right now folks you know the people say why are they let passio talk about this because they are completely unconcerned with the reach of my voice at this time that's the reason they'll let me continue to talk and talk endlessly they're laughing at what I do the Satanists and occultists have told me this it is a comedy show this is a comedy show to them okay because they know how far away from this understanding humanity really is and you know that they know that even out of the potential viewing audience there are people who are saying I'm completely wrong and I don't know what

I'm talking about even though I've been on the inside of this power structure and control system okay and I've been on the inside of their religion and yet there are people who will insist no you don't know what the hell you're talking about I know better than you even though I've never been anywhere near it okay it's like I liken it to trying to describe what living inside of a city is like even though you've never been there and then telling somebody who's lived there in their entire life exactly what the city lane live in their entire life is like when you've never even visited okay and that's where a lot of people are at when it comes to my work so folks I don't care what you call I either of these cult beliefs doesn't make a difference to me because I call it what it really is slavery okay that's what all politics that's what all government is doesn't matter what kind of government it's it's all driven by violence it's slavery okay we need to stop euphemized things and calling it what they want us to call it in slave language okay stop using their slave language that they've given to us to use euphemistically and start calling it what it really is government is slavery okay I'm gonna open and close all the shows with that phrase to hammer it into the human consciousness as much as I can government is slavery okay there's another tagline for the show get as offended as you like government is slavery okay this is what we need to understand and a deep philosophical level is when we strip it all away it's not backed by anything by violence it's not under it doesn't it isn't under lied by deep philosophy or truth or morality it's under lied by by commands of compliance that there are punishments for not complying with whether those those commands happen to be in keeping with real morality or not because in one place they could gauge a behavior as moral and in another place they could lock you in a cage for doing the exact same thing which is the definition of moral relativism okay so I want to show people some charts of political polarization throughout the years and how bad it's gotten okay and to give proper credit here okay I do want to show people briefly before I go into this section where I got this data okay because in my presentations I'm not giving those parameters okay so I just want to do that outside of the presentation slides I'm going to very briefly switch over to my to my web browser in a moment I'll tell you when to switch to that yes you can switch over to that okay and this is a website called Pew Research Center and it's a political research center for United States politics so this is a particularly specifically dealing with US politics okay and this is a page that dealt with the results of their studies in political polarization from the years 1994 through the years 2017 so you can look this up yourself I just basically to get to this typed into any given search engine I particularly have been using DuckDuckGo lately which doesn't track you to the extent that other search engines like Google do and I typed in a political polarization charts that's it and this was my first result that came back for me and you know knowing that I was going to talk about this dynamic this site gives you some nice visual charts for polarization and you could choose the year here and then it will switch and show you how that dynamic of polarization between the two political parties Democrat and Republican change in that time frame okay so you know and you could also look at politically engaged versus the general public and see how those dynamics differ there as well okay so what I'm gonna do is just switch back to my my presentation and I'm just gonna show people you know how these are this political polarization changed throughout the last couple of decades and how it's grown far worse okay so let me go back into the presentation and continue here so this is 1994 and again I'm using the general public this isn't the politically engaged aspect just the general public and how they identified in their views as to whether they came down on the left or right side of believing in the political left or the political right though or the Democrat or Republican the line displays the median which is the very middle of the bell curve kind of okay numbers wise so in 1994 look at how much overlap there was between the political parties and and that the dark blue area is showing where they overlapped in their viewpoints okay and then you have that that middle line that was where the average person was look at how close to the center it is very slightly right-of-center meaning the country was a little bit more toward the conservative side of things back in 1994 but in general there were you know obviously extremists on both sides regarding their cult views but you know you have this pretty close central gage there in the median lines okay so well the country was more centrist politically and was not really we weren't like at war between the two polarized political dynamics this is what I'm trying to show people is that things have gotten worse not better as you will see as we go forward in these slides if they were to get better you know people would generally one stop believing in government altogether but two you would see more overlap in in the in the parties because they would generally not be thinking politically polarized things they would not be able to be divided dialectically and when you divide a public dialectically they're ripe for conquer that's what the whole divide and conquer strategy is all about okay so moving to the year 1999 you see that the median shifted a little bit toward the left okay now we're a little bit maybe slightly left of center but we have a pretty big mixed you know viewpoint in the center where you had a lot of political overlap and not a lot of polarization between the parties back in 99 okay so I'm moving to the next slide which is 2004 now you see again it's still slightly left of center but lots of overlap okay so we're not even even azov you know when Bush was still president okay we're still seeing a pretty centrist of view politically now we're gonna see it start to really change here during the Obama administration okay and now we have political polarization happen happening where you can see there's less overlap we're getting more of a median left-of-centre for Democrats and more of a median right of Center and those median lines are separating now okay and that's 2011 and now you're going to see in the last few years how bad it has really gotten and this is proof the mind control the propaganda okay the mainstream media polarization divide and conquer it's working it's actually more efficient then it was in the past okay look at 2014 okay still Obama president okay but look at how wide that gap has gotten now between the political medians okay and this left-right paradigm is being enforced and it is being is growing in the general minds the minds of the general population okay and now they're seeing each other as we're completely separate you know we're at war with each other ideologically okay now look at it grows a little bit even more as we go further into the Year 2015 and now look at the divide as of less than two years ago and this obviously is the Trump era okay and this is a result of how far politically left the left is going as a reaction to Trump coming in you know you don't see a lot of movement with the median Republican although it has shifted from back in 94 a little bit right of center but look at the median Democrat now if you put the politically engaged aspects of this chart that I showed you on it's even worse than this you know and there's even less of a mix between the two polar polarized political parties world views okay so this is proof right here from actual you know gathered data from society how far in the political polarization we have gone particularly in the Trump era which is you know created this idea of Trump derangement syndrome and you know I don't even know how people can take whoever is president seriously and actually believe that there are people in power and making these decisions I mean you have to be a naive child to really believe that the whole political polarization worldview okay it's just there to get people to continue to choose a slave master that's all it's there for so what I want to show people is what I call the real political spectrum I covered this in you know my earlier podcast format and this is what I call the political spectrum or the so-called political spectrum as a function of consciousness so this isn't really a political spectrum okay it's taking what people consider the political spectrum and graphing it against consciousness and control in society what we're really gauging here is how much control externally is imposed upon society through violence and coercion of government okay versus how much consciousness there is in society or how enlightened the mass population is so a mathematical function means there's only going to be one result on the graph in between the two axes okay there can't be two values when we when we plot points on the chart okay that's the definition of a mathematical function so you see the line goes up and then it comes back down and there's never two points where you know there's different values so the bottom axis has its zero point in the center okay and I did this deliberately to show how freedom is a precarious position it's a it's a very narrow straight to tread okay it is like teetering on the point of a pin okay not even the head of a pin but the point of a pin okay and when we go away from true moral philosophy it's a very steep slope downward on both sides whether you come down on the left or the right of the illusory political spectrum okay so where you have totalitarian rule is on the outsides of that bottom axis okay where it says total external government control based on coercion and violence or coercion and control external government based on coercion and control so you would have totalitarianism in the form of either communism if you're looking at this from the you know traditional or established leftist point of view versus fascism on the far right okay but you know it doesn't really matter oh you can mirror this about the horizontal axis and understand the same thing from the chart okay that there's totalitarian control when there's an unconscious population that does not understand true self-government and it still believes in the traditional political spectrum or believes in the cult called government so as you know we go slightly inward toward the zero point which represents freedom and no externalize imposition of violence and control through government we have you know socialism and what I would call crony capitalism or what other people would just simply refer to as capitalism in the left and right side so you're having slightly more you know less control and it's like a mask of of totalitarianism you're just masking the fact that the society is enslaved as you go a little bit further in toward the center of the graph then you come to what work traditional republics kind of like what the United States was originally founded upon Constitution a constitutional republic and they could be based on the ideas of classical liberalism and menarche ism or classical conservatism the the right wing form of a limited form of republican government okay republic meaning a government that is the people gets to decide what the the powers of the government will be but it still Institute's government then as you get closer to the top you have what would be either a slightly left-leaning libertarianism or slightly right-leaning libertarianism as you get a little bit more conscious okay but it's still menarche ism we're still not going all the way to the truth of true anarchy meaning no imposed rulers meaning true freedom for all from a spiritual point of view in harmony with natural law and bringing our behaviors into alignment with the moral laws of creation meaning that we know what rights are and what they are not we know what true property is versus what it is not and we choose wilfully through conscience through the knowledge of the objective difference between right and wrong to engage in right behavior over wrong behavior that is what true freedom is okay so this is the real political spectrum not the false political polarization that we saw in the chart in the former section okay and I think if people study this graph they'll gain a lot from understanding you know how I've set this up to help people to understand where we really need to go in consciousness and what that will create externally in society as a whole so moving to the next slide how close are we to that state in the aggregate human condition do people understand that that's how these dynamics work and are driven I would say we are certainly not moving in the direction of knowledge but we are moving deeper and deeper into the levels of ignorance and proud ignorant I might say there are people who are very comfortable to have their head in the sand and ignoring the reality that we are really living in and when you bring it up to them they consider it it's such an uncomfortable topic that they don't even want to talk about it okay they don't even want to engage in it at all they want it they want to be comfortable in their ignorance and live in a bubble and again I've said before on the show to be in this position to have your head in the sand you have to have your ass in the air and then we know what happens next okay not to be joking about it but you know it's it's a very good little allegorical thing that happens to just be the case okay and this is where most of society is at okay and it's said it's it's very sad and the reason it's sad and what I'm gonna start to get into here a little bit is um you know how I feel about the human condition right now and where I think why I'm sad angry and outraged and bitter about it okay and it's because it doesn't need to be this way this is a choice especially in society today this is a choice it's a huge choice okay because we have the freewill to edify ourselves and to come to the understanding of truth it's all out there it's all there the apocalypse has happened folks it's all revealed it's been revealed for many many years we let we lived through apocalyptic times see people think apocalypse means destruction it does not it comes from the Greek oppo meaning to were to take away and khalipa time meaning to hide or to conceal similar to how local tari and latin means to hide her to conceal so Oppo clipton means to take away the veil to remove the veil or to reveal that which has been hidden its the revealing of the what has been occult 'add and that has happened the past tense has occurred we are in post-apocalyptic times and yet this is still the human condition ignoring the truth when when a society as a whole on a planet living in the universe says - truth go F yourself I want no part of you the path that lies ahead is going to be not only a treacherous one it is going to be what I call the way of maximum pain and that's where we're headed as a species folks and I wish I could tell you differently I wish I could say that it's some way that is different than that but there's no indicators that allow me to say with any positivity or confidence that we're heading in the right direction because I don't see it around me and I it's not just that I don't see it around me I don't see it no matter where I go geographically in the world I could travel anywhere and you know and little pockets conferences tiny little pockets that are trying to get the word out to people that are there despairing disparagingly puny okay the tiny little pockets of people really get it and understand but then you have them drowning in the ignorant hordes of humanity everywhere you know and I just I try to gauge the consciousness dynamic from a stepping back and looking at it as it really is not what I want it to be because it's very easy to try to see it from where you want it to be versus what it where it really is I try not to go the opposite I try not to say I'm gonna just look at this from a totally dark negative perspective I try to be a realist when it comes to it based on what I know the requirements are regarding where we have to get in consciousness and then you could see that gap is just I mean I can't put my arm high enough to visually display that gap can't be done okay the gap is tremendous and there's no signs of it closing there are signs of it widening all right I don't want it to be like that I'm not saying that to discourage anybody I'm trying to accurately tell the viewing audience what our work together is to do that's what that's my goal here is to inspire you to get involved in doing what I've been doing for the last 11 going on 12 years of my life okay then maybe if more people really engage their will to do it we'd make some headway maybe you know but a lot of people want to just Pat people on the back Oh pat you on the back great job mark hey can you help me out go after yourself can't be bothered I got my own life to live can't be bothered to help you with what you're doing to try to enlighten humanity help to enlighten humanity No I'm gonna live my life in the selfish way I want to live it because that's what's comfortable for me you know I'll pat you on the back and tell you how how well you're doing I'm not interested in that folks never have been not interested you know I don't want praise I don't do this for praise I don't do this to make friends obviously okay I'm trying to be real with people tell them where we're really at what's coming if we don't turn this around okay and get them to be engaged through their an act of their understanding in their will all right human beings are still mentally attached to completely false axiomatic premises okay so this is the condition of humanity totally wrapped up in their own minds and their own illusions totally controlled by the social engineers all right continuing to march in a lobotomized state toward total enslavement and that's not fear-mongering that's not what people call fear porn that's an accurate assessment of the human condition based on and very thorough analysis of the human condition and if you don't come to that conclusion I would say your data set is skewed it's off your perception is skewed and off and you're not looking at things from a detached non-emotional objective point of view if you haven't come to that same conclusion you know again not saying that to discourage anybody explaining what are the causal factors that are really leading to humanity to be where it's at and to continue down that path of enslavement so what is an axiom you know this is a word that I've kicked around in the past and never really really given people a good definition of I don't think so this is where people are stuck in their in their mind control okay this is where they're stuck in their perception their perceptual capabilities they have accepted false axioms an axiom is a fundamental belief that is widely accepted as true because it is perceived to be either self-evident or particularly useful to those who have accepted it okay and this is where we run into trouble axioms can be true or they can be false okay if an axiom is true that means you are basing your higher level mathematics upon the axiom that one plus one equals two in arithmetic and two plus two equals four in arithmetic if you base your fundamental axiom that one plus one equals five in arithmetic and two plus two equals ten in arithmetic you are going to run into very high-level problems as you go into more advanced mathematics such as algebra or calculus or you know doing differential equations or you know probability and statistics etc or then then into higher-level physics you are not going to have accurate results if your fundamental axioms are based on untruths and this is what's going on in society we are basing our fundamental axiomatic belief systems upon things which are not true and when we when we build bigger structures and bigger aspects of society based on things that aren't true what do we get we get nonsense we get chaos we get destruction we get too order we get death okay that's where we're at as a society which is eventually going to lead to an imbalance physically in nature and the planet and we're gonna get shrugged off of it like fleas off the back of a dog and that that eventualities will occur at some point if we don't change and the main fundamental axiom that has to change is the belief in authority okay this is the main underlying fundamental false axiom that comprises a religion and ultimately comprises a cult the belief or the axiom that it is based upon is the belief in human authority Authority is an illusion of a diseased psyche based entirely in violence and built upon the erroneous and dogmatic belief that some people are masters who have the moral right quote-unquote to rule others while others are slaves who have a moral obligation quote unquote to obey the so-called masters that is what government actually is that is what Authority is and government is based entirely upon it in the mean here it says imagine being forced into a religion that you cannot opt out of its called government it exists and it's called government and this is what I call the world's most dangerous religion Larkin Rose wrote a book called the world's most dangerous superstition which is about this belief in authority I highly recommend it I call it the world's most dangerous religion or simply the world's most dangerous cult because that's what this is a cult belief system and if our axiomatic beliefs are based in a cult belief system that's based in violence and completely based on uh something that is completely not true and does not actually exist in the inherent realm of nature which is what is absolutely the truth regarding Authority it is not something that is true or based in the realm of nature it is a construction idea that exists in a diseased mind we are going to build all kinds of things on top of that false belief system that are going to do exactly what we say we do not want to happen in our society and we are going to get a result that we we do not want there's going to be the polar opposite what we say we want our society to look like and be like moving to the next slide we don't have people in our society today folks that are really deeply trying to do anything about this okay we have people who say they want to do things about this say they want to make it different I call them the keyboard commandos the keyboard warriors they have arrived to fight the Facebook war they're gonna go and get them on Facebook okay instead of actually really creating creative content and putting it out there with your name your face your voice on it okay and doing it in a way that is visually appealing that really explains the conceptual ideas in a deep way and helps people to gain an accurate fundamental understanding of them no just go out and shout at people on Facebook you know you're not changed in anybody's mind you're not changed they're not changing yours okay all it is is a verbal masturbation contest and that's what most people are doing thinking that they're going to affect change let me tell you something folks let me burst your bubble let me offend you right here you are not gonna make any change posting anything on Facebook ever it's not gonna happen it's not a powerful or effective enough medium and you have so many people that are so highly ignorant that no no part of this you you and you're in too much noise there's there's not enough room for the signal to get through now I'm streaming this on Facebook to try to get people to look at my work that I've put up on my website okay that means you leave the internet ghetto city that's been constructed for you okay there is a controlled paradigm it's a controlled Pigpen is what it really is okay and then you go to a palace that someone has constructed to help you to gain or it's a school it's an elaborate school that someone has constructed with meticulous craftsmanship and precision sorry to toot my own horn a little bit there folks but I think I've done have I think I've done a job that is far better than almost just about everybody else in gaining helping people to gain a full world view understanding of what's really taking place okay through what on earth is happening calm I see very few websites that are anything like it whatsoever okay and I see far too few people trying to do something that is akin to what I've done with this website okay which is put out creative individual tailored content for viewing and listening audience to really truly edify themselves and come to an accurate understanding of the dynamics that are taking place in our world and that's why it's called what on earth is happening without a question mark okay so the Facebook keyboard command knows you're not gonna make that much progress and this is what it makes me feel like you know it makes me feel like my god we're doomed you know and then people will like you know get angry at me and be like you know I hope Mark isn't going to be super harsh toward people you know but you have to put yourself in my shoes right yeah you have to imagine you're doing this for 12 years now and not only aren't you seeing a change but you're seeing it get worse as I've just proven to you not not my perception or my just belief I've just proven to you that the political polarization is worse than it ever has been okay that ignorance is at an all-time high okay the war between men and women is at an all-time high okay absolutely ridiculous radical neo feminism is rampant okay which is driving that war between the sexes even further into the ground okay and you know people are still so super identified with their political beliefs they don't even understand that the entire system is slavery you know we were making a lot more headway back in 2004 or 5 & 6 as far as I'm concerned before I even started doing this so you have to understand my bitterness comes from a realistic perspective okay it's not just me wanting to shout at people okay it's me looking at the dynamics of human consciousness from an honest and detached perspective and being horrified by it horrified by it and then looking at what I've chosen to dedicate my life to doing okay and we're gonna get to your calls folks I'm gonna wrap up soon okay but I think this is very important and then we'll go to your calls on discord you have to understand and basically giving up just about every other aspect of your life what you wanted to do what travel would travel where I wanted to go places I wanted to see and activities I want to engage and all had to be put to the wayside to do this you know and this is what I do full-time now you know I don't have another job okay any income that I have to make to live you know and it's not income it's just generous donations by people who want to help me to do this work and still live in the 3d world okay that's the that's the only place that I bring in those resources so that's why I want to tell people if you can please donate it what on earth is happening calm slash donate okay because you know the the paltry amount of money that I make compared to the IT career that I gave up to do this is it's it's a negligible thing it's like 1/3 less than 1/3 okay of what I used to make it my regular quote job okay this is the true great work but that's how much it's valued you have to understand if that's how much it's valued compared to an employer what they will actually pay me to go and do services for them what the great work doing the great work is valued you know compared to what a football player how he's valued or a baseball player house he house he he is valued to play at a child's game okay this is worth barely anything to people in the aggregate which is why you know the the people who have contributed I hold them at a at a dear place in my heart and thank them from the bottom of my heart for for helping because you're helping me to be able to do this you know on a regular basis and you know the people who donated equipment to make this happen I really want to especially thank you because you know this is about being technologically literate and being able to reach out to people with this knowledge and you know who you are okay and you know that I mean that from the bottom of my heart so going back to you know what I'm talking about in the presentation here I people will hear the bitterness and I'll tell them I'm better over this I'm just because I approach it from that initiatory perspective I'm just gonna be honest with you okay I don't feel like being Dishonored with people serves the many purpose it doesn't do anything for any kind of a accurate communication of information nor does it inspire trust which is why I'm coming here I'm dressing like I do on an everyday basis I'm talking you with my regular voice I'm gonna get angry at times I'm gonna yell at times okay I'm gonna be bitter at times now I'm being Who I am that's it I'm starting I'm doing this from where I am okay that's honesty okay so just wanted to say that I want to wrap up this with helping people to understand one of the ways that we really can get out of this condition of slavery and that's by developing true relationships with each other and it's something that I really haven't talked much about the relationship dynamic between human beings and I'm gonna really make the show a little bit more about this hopefully in the future because it is about how you can really make a connection between other other people but we have this view of relationship it's all askew in our understanding it's it's very inaccurate of what we think a relationship is okay and this is what people think a relationship is it's like this one-on-one direct close connection between two individuals and I call this relationship in double quotes okay this is what I would consider an illusory relationship it's a nice image it can convey some you know spiritual connection maybe between people but there's something absent or missing as far as I am concerned okay and in the next slide I want to show you what I feel is missing when we look at a relationship is only this dynamic between two people okay so when we go to the next slide I feel like this connection to source or truth is largely absent especially in what the average human being in the world today considers a relationship between two people there has to be this unity that is connecting them like a circuit and that is truth okay we have to care for truth and we have to live truth in our personal lives and in society okay if that connection to truth isn't made first the relationship between the two individuals is ultimately a false one or it is ultimately a weak one that is not going to sustain okay and that's what we have in society we have this connection is largely absent and we have people trying to establish just interpersonal connections and relationships that don't have this connection to truth first and foremost as their underlying first principles okay we have to make the connection to those underlying first principles first and here's a better way to look at it I did a little animation it's kind of crude okay but well this is what I consider a genuine relationship between two individuals okay when we have this connection to truth and I wanted to portray it even better because there's not really to you know separate connections we're all making we're all making a connection to the same thing so I've made a little crude animation here that goes like this we could leave that fullscreen why do it and there's what it really looks like there's only really that one source of all and there's only that one ultimate connection to truth that everybody needs to make and then we can you know connect to everybody else in society through that connection to truth and that's what I consider a true genuine relationship to be and is the first time I kind of visually displayed this and talked about it at a deep level like that I see this as one of the fundamental solutions in society for how we really relate to people and you know where you have to start with that you have to start with being honest to yourself being honest with yourself when you be can be honest with yourself and make that connection to truth then you're in a position to make a genuine relationship with others and that's what's going to help heal our society and move us toward a future that is based in true human freedom together and that is the world that is in our hands that is exactly the world that is in our hands as we speak it is up to us nobody's coming to save us from our own ignorance nobody's come to save us from our apathy from our inaction okay we have to do it because the whole idea here is what are we doing this for right are we just doing it for ourselves are we doing it for humanity and I feel like the answer is neither of those things we have to do this for truth itself that's why I consider myself a servant of truth I'm not a servant of humanity okay humanity may benefit from the that I can help to convey but ultimately Who am I the servant of on the servant of the truth itself that higher source itself okay and when we all make that connection then we take the world into our own hands and we move it forward by an act of our will and we will take it to a positive and empowering place and that ladies and gentlemen is what the true great work really is that is what the one great work the true great work really is and hence that is the you know the symbolism of the all-seeing eye the awakened consciousness you know that has gotten this bad rap in a bad explanation of what that symbology really means on the pyramid an all-seeing eye on the back of the dollar bill as I've broken down before the true meaning of that is awakened consciousness and a deep connection to the source to truth to the Creator and that is what it is all altum Utley for truth love and freedom so with that that concludes the presentation slides for today's show and the topic for today's show and we can go back to the main interface thank you and let's uh let's go to some callers let's take some calls on discord now this is the first time we're doing this so if there's technical issues please bear with us I think it's going to go smoothly though I'm gonna put I have to put another headset on to take calls okay because of the way things are technologically set up here which shouldn't be an issue and now when I do this I want to first of all let people know how this works okay so let me let me get to the discord room real quick okay Wow there are a lot of people in here I'm very surprised and pleasantly surprised okay so what I want to let people know is um when I call on you there's no screening you'll be live okay and I don't know who got here first I'm not watching the room as we go and unfortunately to the best of my knowledge there is no way to put the callers in the order that they entered the room they always appear in alphabetical order so what I'm going to try to do to make it somewhat fair is to skip around a little bit okay and I apologize if you don't make it in okay it's just it's going to be what it is you could try again when whenever you feel like at a future show but let's just try to keep a flow going and I'm sure we're gonna have some great calls so you know let's go to and you should have your mic unmuted because I can mute everybody from the server end so that only one person at a time will be able to be heard okay so if you're going to want to speak you want to unmute your microphone and then I will unmute you from the server end so let's go to Bruno Cardoso Bruno Cardozo you are live on what on earth is happening welcome to the show what do you have for us today you want to unmute your microphone bruno Cardoso you are live on what on earth is happening are you there you need to unmute your mic okay I'm not able to hear your audio so let's uh oh I see Ivan from phoenixes is in the room so I'm gonna go to Ivan Ivan from Phoenix welcome to the show you're a first caller on the new water on earth is happening video show Ivan all right we're having a technical problem with calls I'm unable to hear Ivan give me a moment if anybody can let me know if they can hear me in the discord room that would be great can hear you I'm looking here settings for the room here you it looks like we're having some technical difficulties with being able to take calls in the room for everybody the there is a little mute icon on the bottom okay so if you could just unmute Ivan you're still unmuted from the server end but I'm still not able to hear you let's see if we can go to someone else let's go to let's go to Kailyn Kailyn you're live on what on earth is happening are you there now I'm still not able to hear them well folks what we might have to do is just go back to more content and I'll just keep going and we'll work out the issues with the call how about I'm gonna quit discord I'm gonna quit my copy of discord and try to get back to it and check my audio settings real quickly maybe unplug and replug my headset and I do apologize for this we tested this before the show and it was working so bear with me we'll just try a couple of things here very quickly take a second I think my voice is still coming out over the main microphone so I'll just try to you know there we go I think I found the problem folks I believe I have found the issue and looks like it was a setting let me reopen discord and I think we'll be okay alright I'm coming back into the room now people should in the room be able to hear me now if everything went smoothly with that and let's go back to let's go back to Ivan from Phoenix Ivan you're live on what on earth is happening are you there that's I'm here can you hear me there we have you okay sorry about that I knew there would be some glitches and hiccups in the first episode probably we will work all of this stuff out and make sure that it is definitely working more smoothly so Ivan welcome to the show it's been a while since I spoke with you on the airwaves we did do that interview too people be aware of you know what I was trying to do on guy next door speaks you were one of the people who really helped me get the help that I need to do this new format so I want to thank you personally for giving me that platform and now you're on the one earth is happening platform to share whatever you have or to ask any questions you'd like oh well yeah that was almost a year ago now with all that interview for the conference having you out here and everything so yeah just doing my part and like you always say everything many hands make light work so I'm glad to have done my little part to help bring this into fruition let me tell you something that conference that you hosted outside of Phoenix was one of the better conferences that I've ever attended and spoke at Ivan put together the truth mind reality conference and he did it all himself with help help of local volunteers in his area that also did a phenomenal job in the organization of it and I just want to say that's what the great work is all about it's about getting your hands actually in and and doing something you know by way of your own effort and this this man right here is no better example of that so Ivan I want to thank you for you know actually engaging in the great work to change human consciousness and people can take example from what Ivan here has done thanks for that mark and you know listening to your show today it I feel like you feel like yeah we've done quite a lot and yet it feels like not much has been done where things are still going backwards you know so yeah it's it is a matter of many hands you know getting in there like I I had to bust my butt you know for quite a few months to generate the funds to pay for the conference myself I didn't want any outside you know influences and anything but look at all that work it took for me just to put a one-day event see so that's part of the problem it's all these mechanisms out there to get this going you know it has it's like you money is the resistance in the system so in order for us to get the truth out there it takes all this money out because yes technology we gotta pay for four rooms and and lodging and and all this stuff whereas the controllers they have a you know they're putting this money out of their rear ends like nothing my control is easy for them to put out there for the common regular people like us to you know put out the truth you know it takes so much look at your work it took you over a year or so to get this going you know just to beyond for three hours on a Sunday so you know that's again part of looking at reality the world of you know that really how it is and yet people want to condone all the capitalism and money and always not a problem all it's part of the tools that's keeping the rest of us enslaved without a doubt that's a big part of it and you know what it really comes down to is how much do people want to put their own resources behind something that is really trying to inspire and create change if they're not doing it themselves you know what I mean so I say like you don't want to do it yourself at least help those who are doing it be a support system for those people who are doing this type of work you know if you don't want to do that get in there and do something yourself don't complain about what other people are doing another dynamic I want to speak to about what you said briefly is um you know how little change we have really seen okay even doing this for this long that that is also part of what I want to say that the that won't necessarily just make people you know despondent about that is when you are trying to change the direction of a physical item in the world that is already moving in a certain direction there's the law of inertia that objects in motion tend to remain in the same type of motion that they're already moving in unless they're acted upon by a force okay so but when you act upon them by whatever force you're going to use to try to change their direction it's always the hardest at the very beginning to try to change the momentum of that object you have to exert the most force in the in the initial step then when you finally get it moving in the other direct less forces required to keep it moving in that direction because again the law of inertia is mu is working with you as you do it in that direction so you know that we may be at that point where this incredible amount of effort and force is going to be required at the initial stages and as more and more people get involved in the work as I've said and as you have said many hands will make for light work and you know that's what we are calling for here we are calling for more people to get involved this isn't just about what you know this is about what you do with what you know it's about taking real-world action to create real world change that's what real care is caring enough to do that and perhaps sacrificing what you wanted to do perhaps sacrificing resources that you wanted to put elsewhere I mean I think about this all the time you know how much time I've spent on this that I could have been doing other things that I wanted I like playing music I like creating art you know I sacrificed a lot of that you know I wanted to travel to different places I sacrificed a lot of that to do this work you know it's like we only have a limited amount of time resources you know places that we could put our attention and I try to focus my cell phone doing this kind of work and getting the message out there to the people in a way that is readily understandable and I just want to say again thank you to the people that made this new format possible because I'm really loving how it has been kicked off I love the response how many people seem to be interested and wanting to you know get involved so Ivan thank you really so much for what you have done and thank you so much for the call today really great to speak with you again my friend let's move on to another caller I'm gonna try once again Bruno Cardozo you're live on what on earth is happening are you there sir doesn't look like let's try let's try Kailen Kailen you're live on what on earth is happening welcome people seem to be having problems with their audio for some reason I know that we're definitely live again so let's go to let's go to juror Jeremy Jeremy Nicholas I believe if I'm saying it correctly let's go to German Nicholas you're live what do you have for us all right hello there he goes yeah yes it appears that people are maybe possibly not unmuting themselves from the bottom left-hand corner of this chord right next to your name on the list underneath where it says what on earth is happening where you see the list of people in the calling room you first have to click the call in room and then underneath that where you see your handle your name that you use for discord there will be a microphone that will have a slash through it okay what you guys want to do is unmute all of your microphones and when they are unmuted that means that I can then unser ver mute you because everybody is automatically muted from the server level so that only who I unmute from the server level can actually then speak in the room and be heard on the air so please make sure that your own mics are unmuted so that when I call upon you you're ready to go with your own microphone audio thank you so uh yes German Nicholas what do you have for us can you hear yes I can I hope I'm saying that right yeah pretty much it's Germanic least Germanic lists it's it's kind of like a hybrid of Nicholas and German but um I know and people are allowed to use their own Internet handles or aliases on this so you know they could pretty much remain anonymous I'll basically do my best in in calling them as closely as possible to their handle name so just to let people know I'm doing pretty well I'm very happy about how are the new show format has been launched in his going you know a little bit of a hiccup there at the beginning of taking the calls but you know it's to be expected we're working with you know some technology that it requires requires a little bit of you know setting up and and and and polishing if you will so but other than that great yeah I'm really excited for the new format and actually I this is my first time with discord I got it just for this show it sounded pretty good as far as I can tell I hope it's going out over the internet stream clearly but in my headset at least I think the voice sounds fantastic so so what do you have for us regarding any comments or questions or anything that you'd like to bring up regarding what's taking place well would you like to hear some predictions or okay I mean I agree with you in the state of things that it's it's pretty it's pretty dire things are not improving it's it's on the decline you know you see the political turmoil in the states and it's obviously echoing across to the to Europe to Canada to Australia New Zealand because obviously in the Anglo sphere it's all centralized and connected so it's top-down right I agree but it what's very depressing is as much as people are waking up there they're not they're still like far off it's almost like two steps or no one step forward two steps back so to speak yeah and that comes from that knowledge gap they they don't have full knowledge in other words like they're they're starting to try to process the world right when they don't have all the building blocks of knowledge that they need for that processing it's like not having a big enough data set to put through the computer processor to really understand any aspect of what that data set is telling us so that they're putting the processing and the rhetoric the behavior before the knowledge gathering and and in the Trivium process the knowledge gathering has to be full you have to do that in its fullness okay and that's where that disconnect I believe is coming in app so continue well what's very concerning is a lot of these people are waking up to the decay of liberalism it's definitely starting to set in and you know become very obvious and what I'm seeing though is is this revival of people going back to Christianity and going back into the church and it's like running right back into the arms of the Luciferians right well there's definitely certain resurgent pockets of resurgence of religious thought from the traditional you know what I call the cultural religions and that is because you see people that don't have a accurate enough framework and knowledge once again that they will go to religious thought because they think well the world's being taken over by evil and you know running to you know a saviour ideology is what's ultimately going to help us achieve some type of redemption and again I consider myself what you might call an esoteric Christian but certainly not one from an exoteric point of view so I look at the golden rule the teachings of original Christianity from a deep perspective and you know look at like yes this is perhaps this the best way that we should be living in relationship with each other and from a point of view is don't cause harm to others you know treat others as you would prefer to be treated yourself if you don't want your your own rights to be violated or your own self to be harmed don't do that to other people that is an esoteric Christian perspective but I don't buy into the trappings of organized religion so I don't see any religion as the solution but many people who think in a very unit dimensional way or cannot think in terms of true causal factors and true you know hidden knowledge of how things really work we'll run to religion as sort of a blanket of protection or a crutch and it's very easy to do when things get really bad you know they they go to that perspective that religious perspective and I I agree we are seeing a lot of that particularly from the Christian point of view now again I think that Christians if they really deeply look at the works of true Christianity as opposed to what I call fake-ass Christianity you know the the the obfuscation of the genuine Christian ideals and principles they will they will be able to apply those effectively in the world but if they are looking at it from the church perspective and point of view you know it's it's not going to be any kind of a solution and unfortunately that's where too too many people are at well I find that they're not going back far enough they go back maybe 50 years tops right maybe a hundred and they don't go back to the I guess you would say that the pre pagan era where obviously the cult essentially is right it's essentially all the persecuted pagans that were you know massacred from this planet and they've sequestered the the universal truths that existed in all those cultures and now they have it as you know free-range with it there's no there's no like like even no we're still like like we're in a predominantly liberal culture that's you know kind of like looks at Christianity as old or outdated and and you know there's a lot of hatred towards it they still use Christian nomenclatures to describe what essentially is a psychology or or basically like yeah I guess yeah psychology cuz what would you call paganism cuz I I hate that word because it almost has a negative what does right it's like it's like headon right yeah I mean I would say these are beliefs that came out of a you know a drive to understand the natural world in the ancient past and they eventually became what were called the cults of the ancient world particularly the a shrew theological cults of the ancient world namely the stellar cult the lunar cult and the solar cult which then morphed into becoming the three major world religions which I call the desert sky God religions because we're really talking about astral astronomical objects in the heavens you have the Stars which are you know the stars and planets the smaller lights of the heavens and they that became the stellar cult eventually morphed into Judaism and the symbol for Judaism is a star okay and then you had the lunar cult which was of course dedicated to the moon okay that morphed into the Muslim religion okay morphed into Islam okay and that the symbol of Islam is the moon and then of course you had the solar cult morph into the Christian religion the the main symbol is the son of God on the cross of the zodiac in which the the Sun travels during the course of the year so I've described all of these religious aspects in earlier aspects of what on earth is happening in earlier episodes people can go back and check out my work on Astro theology as a basis for religion that's where I think most of paganism came out of and I think that you know we have to take religion for what it is it is a esoteric watering down regardless of what the religion happens to be of principles of truth to try to make them a little bit more palatable and or digestible to the masses of humanity but when we do that we take core first principles away and make them diluted and harder for Humanity to understand because we're thinking like they can't get the undiluted pure message we have to water it down for their simple understand minds to understand treating people like that and expecting that to work to really elevate consciousness is a pipe dream okay which is why we have to go right for the heart and soul of first moral principles that are supposed to underlie ostensibly are supposed to underlie all religious traditions so I'm German German Occulus I want to thank you for the questions and comments are very on point and again I would highly recommend going to my work on Astro theology and many other researchers work on asteroid theology such as Manley P Hall and Jordan Maxwell and Michael - sorry on to go even deeper into that topic and to understand the origins of religion so let's try let's go to Jonathan / Bay you're live on what on earth is happening welcome trying to make sure your mic is unmuted down at the bottom okay I'm gonna move on if I don't hear you respond I'm gonna move on so let's try my buddy karma tinfoil welcome hello how are you sir I'm not bad I'm glad you can hear me okay I'll be here this is Kevin he used to have a podcast as well that I appeared on you know it's been a while since we've spoken so good to hear your voice yeah thank you it's strange as it is it's been about three years since you've been doing your show and three years that I was living up in like the Lehigh Valley region and believe it or not I'm actually down in this area now once again in Philly so a synchronicity would have it your show is starting again so I couldn't help but make sure that I was here for the first one and to call in and say hi and wish you luck on your new journey restarting here and I'll be doing pretty much the same thing in my own rights nothing like yeah my son Max he's actually a couple things down from me he's large Mac on there so he wants to speak to you as well but I could even just hand over the headset to him if he'd like me to so that he can speak with you also sure after you go with your question or comment you could put him on sure well I guess my closest thing that I'd really like to like pick your brain about is the the Yellow Jackets over in France as what you think there's their situation and how things are going well I kind of almost look at them as very similar to the Occupy movement from that we started in New York City where they have somewhat of an understanding of some of the manifested problems but again when you delve a little bit deeper into the mindset that underlies the movement it lacks deep knowledge of causal factors and you know when you really if you are really to penetrate into talking with them about like what they know about what's really going on behind the extensible people in in positions of power they don't know a lot about it they don't know a lot about the occult they certainly don't know a lot about deep human psychology or occult psychology and when you when you get down to it it's still that same factor that there is a disconnect between gathering the knowledge correctly first and then accurately processing it to come to a true understanding of what it means and doing that before actually acting ok and that they're they're taking this into the realm of action before they have that deep knowledge base built under their feet and when when we do that long term we may see a little bit of results short term and get some news coverage etc but it's not going to change anything in the long term you know I wouldn't necessarily say it's a PSYOP just like I wouldn't say you know occupy was necessarily a PSYOP but it's a it's a movement that can easily be misguided and directed where the social engineers wanted to know because it's comprised of people that don't have a deep enough level of awareness and knowledge and consciousness and the occult and so they can ultimately be basically moved as pawns on the chessboard as the chess masters see fit I know some people will agree with that there were others who will take exception to that analysis that's my take on it and I don't see any indication when I see indication of a real movement of knowledge ok that really deeply understands first principles of morality okay and self-defense moving to end the violence that we call government I'll be the first person to tell you that's a genuine movement there is no such thing in the world doesn't exist there are pockets of true anarchists that exists in paltry few numbers that are trying to get the word out about the true moral philosophy of real freedom and real anarchy and they are scattered to the four winds of the earth and those who actually do a good job conveying that knowledge are even fewer you know so I don't have a very positive take on how many people have that deep level of knowledge and a deep commitment to convey it and get other people to really deeply understand it but I'm gonna keep plugging away you know and doing what I can because again I do this for truths sake not necessarily just for me or other people I try to take the human equation almost out of it and I do this for much much deeper spiritual reasons and that's why I'll be here doing this you know in this lifetime and then if I come back here if reincarnation is a true thing and I'm back here on earth I'm coming back over and over and over again till slavery's ended on this mf'er okay you know you get maurice-africa yeah much a story the bodhisattva title i kid that you know like the parties in nirvana but well you know we gotta get everybody else in there it's not going to be much fun that's right what's the point of going to some space of bliss if slavery is still happening here you know that means you're just ignoring you know all the harm and violence that's being done here and not trying to do anything about it as long as you're okay this is the problem that we have right down here on the earth you know people saying as long as I'm good I don't really care what happens all these other people if they lose their freedom and meanwhile what is done to one is done to all as one loses their freedom all lose their freedom so let's all have a mark thank you very much yeah so again great to hear from you glad that you're doing pretty well and you know good to hear your voice again so if you want to put your son on for him to answer your question or make these comments let me just give you the headphone and then you can use this quick hello hey how you doing very good how are you I'm well yeah just just relax take your time and you know make your comment or question it's it's all okay you're just you're talking to a friend yeah yeah yeah well what I would like to talk to you about is like what's what's been recently going on on YouTube I mean yes it's it's like very it's a very popular topic but it's important nonetheless and I think that if okay ever since the big old WCG noir sickie became the CEO of YouTube it's been like a complete down downward spiral I mean YouTube used to be a place where you could have like free expression of mind and like you could broadcast herself you could you could become popular out of nowhere I mean Fred used to be a there was a youtuber named Fred he's be like small then he got into a movie now nowadays people are just like like like this the smaller like like little like little people that are like in there like trying their damnedest to like get onto the bigger the bigger enterprise are just like being just just like shunned ad for like for basically no reason I mean I'm pretty I'm pretty sure you haven't heard about monkey monkey Jones his channel got taken down for basically no basically like no reason at all right I I think I basically get the gist of what you are saying regarding what's taking place on YouTube and I actually I fully agree with your assessment that the that the company has gone way downhill because of the authoritarian control measures that are enacted by Google really okay who owns it a YouTube is a subsidiary of Google now and basically you know what you're seeing is a centralized form of control being enacted on this video sharing platform and my advice would be not to put all of your eggs in that basket so in other words like we are live-streaming simulcasting on YouTube okay but you know that's not gonna be the the only platform for delivery here okay we're gonna we're gonna spread this through all different types of video sharing sites and one of the other things is like I think people have to take charge of their own media and not put it on other people's platforms right if you're gonna put it on other people's platforms distributed right we need distributed information sharing right so if it gets hit on one platform and taken down that's not the be-all end-all of it and it's out in five six other places okay so what I'm gonna do with this podcast actually this is kind of a good segue your question and comment regarding YouTube is a good segue for how I'm going to share this podcast okay and it may take a day or two we'll be working on it over the next couple days but it's not only going to be uploaded in its full resolution to YouTube it's going to be uploaded in its full resolution to Vimeo it'll be uploaded in its full resolution to bit shoot it will go up to D tube and therefore connected with and uploaded to steam it okay and we're gonna also put it on brighty on which used to be real video so right off the bat it's gonna be shared on like six different media platforms okay and Facebook okay and my own website so that's like eight different sites that you will be able to find the the shows vidcasts okay you know podcast vidcast whatever you want to call it and what that's gonna make possible is it's gonna make it very difficult for anybody just to attack what on earth is happening in one place and and get it knocked you know off the internet airwaves so to speak it will shareable for many different places I always recommend to people though my best advice to you is really try to understand how to make your own content driven site that is the best way you can get out there and promote your own views and material without being dependent on someone else the idea here is independence okay we want you know to get away from total dependence on these tech giants that we already know our censorship engines their data gathering and collection engines for the public and their censorship engines okay they want all of the knowledge there that they can control okay and if they don't like again it's like can't I described it as you're saying please give me a canvas so that I can paint what I want on the canvas and show it to other people and they say okay here's the canvas but as soon as you paint one thing on there that we don't like we're pulling the canvas away from you you're not painting anything it's certainly not showing it to anybody if the first thing is is that where you want to be is that who you want to be dependent on right so the first thing is we have to stop seeing these big video platforms like YouTube or big social media platforms like Facebook as this is our only way of getting this data out there okay that's dependency we have to stop propping them up on pedestals okay I'm saying this while I'm broadcasting on these platforms if you think I care whether they censor me or knock me you know my channel off I could care less you're not gonna slow me down or stop me no matter what you do I will have it up in eight different other video platforms and sharing and getting it out to just as many people okay the whole point is even as they do this censorship they're showing their desperation in trying to make this information not spread as rapidly as it could or should so they're showing that they have no argument against it that all they want to do is sensor as so that people can't learn it right and as soon as you do that you're already you're already not you're you're showing to people that you have nothing better as far as an argument based on principles at all okay so you're showing that you're morally bankrupt and you're showing that all you can do is Nash your teeth and pound your fists on the desk and say I have to silence your voice because my argument is crap and you might reach other people with this good one with this good argument and that might change the world for the better and then alko's our control and profit okay so first of all my first you know a piece of advice is stop looking at these guys as like they're the be-all and end-all they're not they don't have as much influence and powers we think that they do we're giving them that by continuing to use them exclusively so stop using them exclusively and put your content in multiple places too the second piece of advice the best way to get information out to the general public is one first have the information very deeply in your own mind studied okay get all your grammar together okay second have your own platform okay why have I been doing the work that I've been doing on what on earth is happening dot-com my own domain why why would I not put all my eggs in the YouTube basket and only ever do YouTube video or upload my audio to YouTube and only keep it there you want to know why because I realize that's not mine that's somebody else's platform that they are allowing me to use okay now I don't believe that doesn't mean I believe censorship is morally right okay because that's what it is you're telling people this is a venue like a public forum for freedom of speech and freedom of expression but then when days you say something they don't like you saying because it conflicts with their political paradigm okay then suddenly they want to silence your voice okay that censorship having your own forum for expression like what on earth is happening means you control what content gets put there and you could post freely there that means you either use some free hosting service or maybe you pay a little bit of money to get a website hosted you understand content management systems you you look into you just look into that term okay content management system all right and there's tons of them to choose from what this is this enables you to put a database on your website and free software that runs with some sort of a scripting language usually PHP okay and what you're doing through that content management system is you're able to post a blog articles videos etc okay and then you control the content you could decide to have a forum there with other people to post comments or not personally I don't like that because I think it dilutes my message when people with an inaccurate understanding or an incomplete understanding come in and just go blah blah blah and spout nonsense all over I want my message to be received as undiluted as possible okay but that's why I do things like like this like have a call in you know because I want some feedback from people and to see where their consciousness is at who's getting it etc okay the best way you can do this is learn how to actually publish content on the internet for yourself okay this is what the young people of the world really need to do okay stop using all these just see part of what they've done and I I'm sorry I neglected to remember your name a Kevin son okay part of what they have done if they've taken the true computing horsepower out of the individuals hands by dissuading people from using powerful personal computers that you have to spend a little bit more money to acquire okay and they've told you that this device here the cell phone is the be-all and end-all of how you want to communicate with the world and I'm telling you this is the biggest poison pill that has ever been introduced to human society right here do I have one there's one in my hand this is my cell phone I have one okay do I use this to create one aspect of any of my content you'd have to be joking if you think this is a creative tool for me okay I sit down at a powerful desktop computer which is how real creative content is made I don't bother with phones tablets or anything else I have a tablet sitting here in front of me it's like a two-in-one tablet you know what use it for my show notes to look at a brief outline of what I want to talk about and keep myself on point during the show and that's what it's for and I also use it as a teleprompter screen okay well if I do a video where I need some teleprompting you know for example my upcoming natural law seminar which I'm going to talk about next week sorry my upcoming natural law documentary a full-length feature documentary which I'll be talking a little bit about next week but anyway that's what I that's - pretty much the extent I use this tablet for right okay I'm delivering my slides on a powerful laptop okay that is designed for the purpose of creating media and delivering media right we need to get away from the thought that this is going to help us change the world this is this is a consumer device tablets or consumer device they're specifically designed so that you're not actually creating actual content driven data on this you're taking it in and consuming it from people who are creating that content okay we need to get away from thinking here's how we're going to change the world I'm gonna point this at me I'm gonna hit YouTube live you're not nobody's gonna change the world like that you have to have a structured place for content creation and delivery and the only way the most effective way it's not the only way but the most effective way of doing that is learning how the web really works okay it's learning date a little bit about databases because that's where your content is coming from a database it's a database driven website and learning a little bit about content management and delivery systems okay so there's tons of content managers you can learn WordPress it's pretty easy and introductory you want to take a step up from there learn Joomla you want to take a step up from there and learn like an enterprise level Content Manager that can interact with like even heavier weight databases then you learn Drupal or something akin to that alright so there's and there's many many more you know there's e-commerce content management systems like magneto or you know cube cart or other ones okay so what you have to do is you have to research open source software for the web and specifically content management systems right and you could start learning how to build your own website and this is what I encourage people to do you know you drop the keyboard and face Facebook commando rap okay and and and YouTube warrior and get your own site where you can effectively deliver your own message and your own content that's the number one thing that I recommend to people who are interested in putting the truth out stop depending on these big tech giants nonsense because they're control freak authoritarian totalitarians okay and largely they're communists okay there are Nazis and communists on these platforms okay and I mean that from a real deep-seated religious cult point of view is what they are okay so we need to drop our dependency on those platforms and really try to deliver on our own content through our own mediums and that's what the web was supposed to be the web was supposed to be an eclectic you know idea tank so to speak where we can go to all these different websites and get a whole bunch of different perspectives but that's what they've tried to shut down you know and they're enter continuing to do learn content management systems publish your own content make your own website that's my best advice to anybody who wants to have their voice out on the airwaves okay let's move on let's go - lets go - paddy lager paddy another old friend welcome - what on earth is happening what do you have for us today okay make sure your mic is unmuted at the bottom paddy are you there also people should be aware that it's possible that their microphones are in use by another program possibly that is a potential with discord so I'll try to come back to you if there's time let's go to a cult fan a cult fan you're live on what on earth is happening welcome hey Mark can you hear me yes I can welcome hey thank you so much for calling on me here um you might remember me we met it for your mind 3 in Pennsylvania I helped you carry your gear after your talk there I believe so generally vaguely I remember that happening I unfortunately I don't remember your name but that's ok ok it's good to hear you I'm glad that you're back thank you to quickly start with a quote here from the Buddha since the boat is thoughtful was mentioned it says do not dwell in the past do not dream of the future concentrate the mind on the present moment beautiful I think yeah I figured you'd appreciate that given that was one of the five occult initiations that you thought that's right I'm gonna keep this really quick I actually have some notes that I've written down and off the top I want to give a shout out to Richard grows autonomy class that he's running I think that people would really appreciate that I like groves material a lot absolutely he's the reason I found out about you awesome yeah so let me get my question out quickly because I know you have a few more people you'll probably want to get to time's running down sure um doo doo doo so yeah basically um so see I'm gonna think of your courage and doing the great work here my question for you you've spoken about having a full picture like you use the sons you quote and it's very obvious that a causal events occur just like um tin foil karma there or what a karma tin foil mentioned he's like oh what a synchronicity so I'm wondering if you could speak to the importance of synchronicity in working for freedom as well as the importance of recognizing thought-forms egregores and addition higher dimensional entities to finish the account so shows could be done on just one of those topics but right council societies have talked about them and like tool in the Sun PI up day Awad so do you feel that there's a need to comprehend this level of existence and to master this realm and was it the freedom to occur I'll speak to synchronicity first and a synchronicity can basically come in the form of what has been called in some of the alternative research circles synchro mysticism okay but I still yeah this is um basically where something takes on a very profound meaning almost accidentally through the creative process where we're seeing correspondences happen and it's like the actual act of creativity itself is driving that synchronistic process that's why I feel it's so important for us to become content creators to engage in creative process right part of what helps with the dissemination of the knowledge of what I talked about with what on earth is happening is it's it's also about the aesthetics behind it it's about you know designing things to promote it's about the look of things it's about the the flow of ideas and information but it's like how are you putting that together in a creative way you could do that with music you could do that with motion graphics with video with presentations you know you see the amount of time that I put into the visual aspect of this I don't take that lightly the part of that is the actual creative process and then through that that creates synchronicity that you see it's we're driving that and nature's giving it to us like a feedback mechanism okay this is why it comes forward in movies there's some of the biggest creative projects that mankind has kind of undertaken it's the new art form you know San Lee Kubrick was alluding to that the movie itself the movie screen itself as the black monolith would be the thing that drives humanity forward to become the Starchild you know move that movie 2001 a Space Odyssey is just so profound learn the greatest movies of all time we're definitely coming down to the end of the show so what I want to say is - I want to say thank you for all the people who called great callers as always I mean what on earth is happening has always had the best calls an internet radio no different moving to the internet TV or video realm so I want to thank everybody for calling in it's been an awesome show we'll be here every Sunday from 3 to 6 p.m. Eastern Time ladies and gentlemen you've been watching the first edition of the new format for what on earth is happening I'm your host mark passio government is slavery thank you everyone for watching we'll see you right here next week [Music] [Applause] [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #198

Topics: *Mark Passio's projects during his hiatus from live broadcasting, the Great Work and the commitment, persistence and sacrifice it takes to do it, Mark's separation from his former partner and his subsequent three physical moves, critics who do nothing themselves toward the Great Work, Natural Law as the One True Solution to the Human Condition of Slavery, the Apophatic nature of the Solution to Slavery, Mark's hardcore-punk band The Founders, What On Earth Is Happening Donation Gifts, the upcoming One Great Work Network, the A.R.K. Drive, the importance of donations in the support of What On Earth Is Happening, Occult Traditions, Kabbalah, the indoctrination system of public "education," the inculcation of the human masses into the mindset of Satanism, allegorical content in popular films*

freedom man that's what it's all about [Music] you've got the groove on freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] I'm your host mark passio my website what on earth is happening calm ladies and gentlemen government is slavery we're coming at you live today streaming live on what on earth is happening calm slash show simulcasting on Facebook YouTube and Vimeo live today is January 27th 2019 the show is live every Sunday from 3 p.m. to 6 p.m. Eastern Time and we have a great show lined up for you here today I'm actually going to be getting into the reasons for my hiatus from live broadcasting and talking about what I have been doing during the so called the quote-unquote downtime during my hiatus from live broadcasting the projects that I have been up to this is probably going to be really the first water on earth is happening live broadcast that is entirely or you know mostly or entirely about me and I'm doing this to show people that for me the great work never stops and it did not stop during my hiatus from broadcasting so you know I want to explain to people like the type of commitment that this type of a lifestyle takes and how it's like never something that you put down permanently even if certain mitigating circumstances led me to had have to put live podcasting you know live radio broadcasting and podcasting down temporarily and you know during the interim I stayed very very active and very very busy so we're going to be getting into that today also I'm going to be showing people the donation gifts area of my website a little bit later on I'm gonna be also showing them the the donate page on what on earth is happening because I want people really to fully understand that like you know support is what keeps me doing this and it's what keeps this show running and on the air you know so many people were so generous during you know my hiatus for helping me to establish the the living conditions that I have and for helping me to get this show up off the ground with very generous donations both monetarily and technological donations so I emphasize that a little bit later on in the show before we go off the air before we actually take your calls in the third hour of the show I'll be taking calls an hour number three calls of course will be taken on discord you can get that information on what on earth is happening dot-com slash show so before I start getting into the topic for today which is what have I been doing during my hiatus from live broadcasting I want to let everybody know that I will be speaking in an ER Kappa at Anika poco 2019 in Acapulco Mexico so the conference is February 14th through 17 2019 I will be giving my workshop one day earlier than the main kickoff of the conference on February 13th so I did finalize my title card for my main stage presentation if we can cut over to the laptop view my presentation at Anika poco 2019 is entitled anarchy and the occult part two this is a continuation of the presentation that I gave last year in 2018 which was called anarchy and the occult this year it is subtitled religion versus initiation so I'm very excited to be presenting on the main stage with other great speakers such as David Icke max Egan many others you could check it all out at an arc apoco calm and I will also as I said be giving a one-time-only special exclusive workshop at Anika poco 2019 this will be a culmination of a lot of the research and former presentations that I've given regarding the occult specifically occult traditions throughout time and specifically how occultism in general is all attempting to teach natural law to the initiative the tradition if it is properly understood and used correctly used in a moral capacity again there is such a thing as dark occult ism in which this knowledge is not used to uplift humanity but to subvert and control humanity but it is all an understanding of the same body of knowledge so this is going to be called demystifying the occult revisited initiation into the mysteries okay an exclusive one-time-only workshop and it's taking place February 13th from 9:00 a.m. to 6:00 p.m. this is an all-day event as a breakout area from an orca poco it's going to be $140 to attend there will be two four-hour sessions 9 a.m. to 1 p.m. then a lunch break from 1 p.m. to 2 p.m. and then from 2 p.m. to 6 p.m. will be the second four hours section so you can get more information on the entire conference and my specific workshop at an orca poco calm and you can click into that the tickets area through what on earth is happening calm right at the top of what on earth is happening calm there is a link with the an ARCA poco banner and you can click that and folks I just want to emphasize the importance of my workshop this is my main source of any type of donations or income for the conference ok so really nothing else is coming in and any other capacity for me going out there so if you are so inclined to want to receive this information or simply to support my work please do if you're at a dark apoco come out and attend the demystifying the occult revisited workshop I guarantee you I will certainly make it worth your while with a tremendous amount of information on occult knowledge presented at that workshop so those are my main announcements I think we'll jump right into the material because there's gonna be a lot to cover today ok you know I want to not only tell people what I've been doing but I want to show them some things I may even get into you know showing people the founders website my anarchist hardcore punk band talked about a little bit about you know the shows that we've done and maybe even play some of the music of the founders live on the show today so you know a lot to do so let's jump right in so this this broadcast is as I've already said is going to be largely about me if not entirely about me but again we have to take that in context because you have to understand that this is a job that you never really step away from once you start doing it and I think that's why a lot of people are disconcerted into getting involved in the grey work they know it's a lifetime commitment they know that really this is a you know as opposed to getting involved in the occult whereas there is an out to that if you don't know quote-unquote where the bodies are buried you know and you haven't gone deeply enough into it there is a getting out of it there is a walking away from it not so much with the great work with doing the true great work the one great work it is something that follows you no matter where you go because you cannot unlearn what you know once you know it you know you have a moral responsibility to convey it that work never leaves your life that is always there for you to do and so you know during my hiatus I there were reasons that I needed to take the break and I did do some things to get myself in a better position personally however um you know doing the great work never stopped so you know this is a a image of me like very very shortly before I went off the air okay this was actually taken during a promo that I was doing for a conference that I spoke out for your mind for at WMMR studios here in Philadelphia I was interviewed for the conference and this is what I've been using is my biopic you know in recent years since this was taken and you know I think it conveys like the the essence of what I do I get on the air in front of a microphone and I speak to people about what I have come to learn from a point of moral obligation to help people to understand what's really going on in our world and I do so unapologetically and I do it in a way that a lot of people take offense to because I don't sugarcoat my words and and never going to this is always going to be my presentation style because this is how I really am in real life and if you don't believe that ask people who know me personally and they'll tell you pretty much my presentation on the airwaves is how I am in real life how I speak and dress etc except I've really kind of have been tone it down a little bit on the airwaves for people believe it or not and I the people who know me in real life will testify to that so let's move on to the next slide you know I stayed very active in and the activism community here in Philadelphia you know this is a shot of me taken at a monthly they do bimonthly meetings now meeting of liberty on the rocks philadelphia my friend john host this event and it's always great getting out there and talking to people who are concerned citizens and understand that you know freedom is under attack you know the name liberty on the rocks is kind of a double entendre meaning that you know liberty isn't a lot of trouble it's on the rocks and you know it's a play we usually meet at pubs or bars you know and talk over a drink so you know there you have you know talking about liberty over the rocks like with a drink you know so you know clever name great activist group I gave my second amendment part two presentation actually both second amendment presentations part one and two at meetings of Liberty on the rocks Philadelphia definitely check them out if you're in the area great activist group I've stayed involved in personal activities that I like to do myself so that includes shooting you know here's a picture of me with a rifle down at a local gun range you know tried to stay you know keep my skills sharp in marksmanship you don't get an opportunity to go out to outdoor ranges as much as I would like to certainly that would help a lot more used to go shooting a lot with my buddy Walt at outdoor ranges haven't made a lot of time for that recently kind of been doing it in the city when I can and try again trying to keep physical skills sharp in addition to mental spiritual understanding you know we have to keep the body in order this is part of the initiatory steps of the mystery school traditions of the the traditions of the initiate into the occult now part of it is activating the physical body I can't emphasize that enough probably going to do a whole show on holistic health coming up in a future broadcast of what on earth is happening so you know I'm moving on to the next slide part of the physical activity is martial arts and I was very active in martial arts prior to leaving the airwaves during my hiatus prior to my hiatus and you know I stayed involved in the martial arts and martial arts community here in Afiya during the hiatus here doing some JKD which is G kundo the system that Bruce Lee pioneered and essentially invented with a couple of local activists and local martial arts practitioners here out in a park in South Philadelphia here's another shot doing some martial arts with just some younger individuals who kind of joined in to the session that some of some of us in the the group were we're having they saw us doing martial arts practice and came over wanted to join us and we were like sure you know come over and we'll teach you a few things so this was kind of like an organic you know coming together of younger people from the local neighborhood you know we were just out on a nice sunny day you know doing some martial arts in the park and you know people took notice and we're interested and came over and that's the kind of stuff that we try to do as much as possible of course you know the great work takes precedence and it you know a lot of time there's not as much time as I would like for these activities but I try to you know do it whenever I can people don't know this but I'm going to show you something that I'm somewhat proud of you know I'm a pretty decent bowler I you know don't usually toot my horn about this but you know I could probably have been a professional bowler if I wanted to okay and I love bowling I love it as an activity I love it as a sport I love it as a activity to get my head in a certain space in the zone so to speak it's a relaxing activity to me and I enjoy it and I enjoy doing it with friends or I enjoy going out to the alley alone and just rolling and you know trying to get better and I don't practice this nearly as much as I could or should and this is a score the last time I went bowling basically or you know maybe a couple times before the last time but you know that's a pretty impressive score I choked there in the ninth frame as you can see but you know not not a bad effort there it's probably a score most professional bowlers roll even on a good day so you know again I I mentioned this not to even brag but I mention this because I want people to understand I have given up a lot of what I want to be doing with my time to do this educational outreach and what I'm trying to convey here to people is yes this will take you away from what you want to do personally okay the great work will take you away from tasks that you want to do for yourself for your own personal enjoyment okay and that's the compromise that's the sacrifice that has to be made if you really want to convey truth to people if you really want to convey what real freedom is to people in a wider way okay so moving back to the slide presentation this is an image of me sitting at my old desk in my old apartment that I shared with a friend during my hiatus from live broadcasting where I'm you know basically making material for my gift store some great gifts they're given to me by Brandon Martin the t-shirt and hat from skatopia and you know I'm basically making you know material for the gifts area of my website here and you know this was a difficult time period I wasn't in a physical space that was optimal for me and I moved three times during my hiatus physically moved living space three times okay that is and still made the time to do all the other things that I did that I'm going to show you so that's an impressive task in and of itself people will understand how stressful moving can be and to do it three times and basically a year and a half period was no fun task for me and you know that took up a lot of the time during the hiatus as well but again as I'm saying the great work never stopped okay this is me talking with people on stage at my fake ask Christians seminar that I gave here in Philadelphia and you know being on the microphone in front of people has always been something that I grab naturally toward I've been in bands since I was about 15 years of age okay singing on stage in in bands as lead vocalist and you know it's something that I think a lot of people don't do this work because they're very self-conscious of their own talking voice their speaking voice and being in front of people publicly public speaking is like one of the things that people fear more than death believe it or not you know studies have shown you know psychological studies show people fear this more than that almost any other activity including the process of dying they're not as afraid of as getting up in front of people and speaking their mind you know and this I think is culturally instilled you know we have to lose that fear and we have to you know basically step into doing the right thing no matter how much it makes us uncomfortable this is part of why so few people do the great work you know they're still worried about what other people think about them they're still in this fear-based mindset of oh what if people don't agree what if people you know don't like how I presented or what I say you have to shed all those fears if I let that stuff control me okay I wouldn't do any work you know I would just constantly be worried about what other people think now I am gonna say some critiques of people who do complain about other people's work who are actually doing something while they're not doing anything it's something that I want to revisit today because that goes on all the time and it should be addressed by the actual activist community who are really taking measures to reach out to people and do things okay you know I think you get entitled and have a right to really start to complain once you're doing a certain amount you know and people can take exception to that and say they don't agree with that that's how I view it personally I mean I think you know I look at where the the comment or critique is coming from as much as I listen to what it's saying okay I I try to see if it has merit based on what the person is actually saying first and foremost then I look at like where are they what have they been doing you know and 99.9 percent of the time you'll do an internet search for the person who has a complaint and says you should do it differently and they're doing nothing themselves absolutely zero nothing whatsoever you know so you know that this presentation here today is really about how much work I have done in a time when other people many other people have said where's mark at he's not doing anything no I wasn't doing live broadcasts it's not that I wasn't doing anything you'll see how much work I've actually been doing okay and this is like downtime for me where it's probably the least productive that I've been during my my public speaking career okay and it's still a formidable amount of work it much more than most people are ever doing in their entire lives let alone just during a hiatus from live broadcasting okay so moving on to the next slide back just as I was pretty much going off the airwaves I had conceived of getting involved in a new musical project and I always like I've always liked hard and heavy music I've never really been a fan of like you know pop top 40 you know adult contemporary type stuff like I like old-school heavy metal you know I like old-school punk rock I like I used to like death metal a lot I mean I still listen to some of it but you know I like anything that's heavy guitar driven you know so stoner rock do metal Punk fast punk hardcore punk etc okay this is the type of stuff I grew up on okay to be you know quite honest okay a lot of people don't gravitate toward that kind of music and that's fine it's it's a taste there is no truth about whether it's good or not it's it's subjective taste okay so back in when I went off the air in 2016 a little bit before then I had come up with the idea to form a hardcore punk band you know just like some fast punk heavy riffs a little bit of a metal edge to it that would talk about issues of freedom okay and do it in a very in-your-face way much more so than I would do on what on earth is happening like getting up in people's face about it and just speaking the truth plainly and openly in street language okay and this morphed into the founders the name is obviously an homage to the founding fathers of America but it's way more than that if Founders doesn't mean that you've found something that you have discovered something it means you've established something it means that you have laid a foundation for something to come in the future so this is about the new founders of a new society of a new world if you will okay one that is based in true freedom one that is based in voluntary cooperation one that is based in true spirituality one that is based in anarchy in true anarchy okay no masters no slaves form of anarchy okay so you could check out the founders at the founders not us okay I'm gonna be going to that website a little bit later and I'll be showing you some photos of live performances maybe play a live video maybe a play some studio recordings okay we'll do that in a little bit so uh the the band was formed during the hiatus and we did a lot of playing I mean we played a lot of shows okay this I'm gonna be going through the presentations that I did live either here in Philadelphia or at other events okay so shortly after I went off the air my first presentation demystifying the occult part to Satanism and the dark occult so I gave this at the ethical Society of Philadelphia it was given February 26th 2016 right here in Philadelphia Pennsylvania Jay Parker my friend and fellow researcher on topics of occultism opened up this day it was a full day event and he gave a presentation there as well so it went really great and you know you can watch all of these presentations on what on earth is happening calm you can go to the videos section there you can go to my YouTube channel and you can watch all of this for free all of my information is always eventually comes out for free on my website okay former shows that I do are always in the podcast section that's the archive okay I know a lot of people don't like the word podcast because it came out of Apple and the iPod it's a colloquialism that has come into general usage and people know what it means you know it's it's a broadcast that you could watch after it was originally aired and it's archived digitally online usually in an XML feed etc okay an RSS feed it we have to just accept this is what it has become called whether it's audio or video you know people can say arc show archived vidcast whatever you want to call it is fine I'm not basically going to change what I've had up on my website forever just to name a different terminology I call it the water earth is happening comm podcast okay what on earth is happening podcast you can go up to the podcast page on the website to get archives of this broadcast okay so you know that was the first presentation back do you miss to find the occult part - Satanism in the dark occult you can go - what on earth is happening and you can watch that for free again all my my video presentations okay after they're edited and there they're made available on the gifts area of my website first usually exclusively up there for about three months or so maybe a little bit longer and then it goes to the YouTube channel and my website for free okay I'm also going to be archiving things on some other video platforms namely Vimeo bit shoot and D tube right now those are the platforms that I've chosen to to mirror content to in addition to YouTube because YouTube under the Satanic direction of Google have become extraordinarily draconian and are actively involved in censorship so I don't want to put all my eggs in the basket of YouTube I want to start mirroring content to other video sites and I started that with the first podcast last week it was mirrored to not only YouTube but Facebook Vimeo bitch shoot and D tube and that will continue into the foreseeable future it's moving to the next slide at for your mind for I gave the presentation over two days the unholy feminine neo feminism and the Satanic epi eugenics agenda I think this clocked in at around six hours total close to six hours maybe even long I'm not exactly sure it was about six hours I think and you know this is one that was received extremely well and I've gotten so many good reviews and feedback from this Taoiseach nan neo feminism as being a part of the Satanic agenda to basically breed out the characteristics of human beings that the elite ruling class do not want in human beings moving forward to the next generations and I'll tell you who gave me the the best positive feedback on this presentation women women have written to me in emails and just said thank you so much for doing this work in explaining the specific social engineering and mind control tactics that are directly targeted toward women and directed against their psyches their spirituality their mindset so women have actually been leveling the the greatest praise for the unholy feminine presentation again available on water on earth is happening calm in the gifts area now see the theme that I'm bringing up here is you have to understand how much work I did during the interim okay and just compare it to what other people do which in many cases is nothing but they have they complain a lot and you know to the next slide is going to talk about you know the 14-year relationship that I had with my former life partner barb which we separated during this time that took place in early 2016 as well and you know it was a very difficult life event happening for me you know I don't really get into my personal life very much on what on earth is happening that's not what the show is about okay but you know to basically have a relationship and you know as far as you know the romantic part of the relationship as a life partner is is stunning you know it's it's it's a very striking thing that that happens to you you don't expect it and you know it was for the most part of mutual decision but in general I'm not gonna get into the underlying reasons because this is very personal for me and but what I do want to say is after a time period the the friendship was intact and we have still stayed very good friends you know barb supported me in my work like almost no other and made it possible for me to do this work in the early years of me doing it full-time okay so you know we have remained friends I was just actually hanging out with Barb last night she'll probably come over and hang out with us and the crew after the show ends today okay so you know it's a it's a it's a difficult process of going through when you're separating from a relationship that you become very accustomed to and used to and also deciding to physically move okay to a location that you know was not my home for the last many many years over 14 years okay so you know this is uh basically really all I want to say about the the breakup but just say that we did resolve our issues regarding our friendship and we are still very good friends to this day and that being said I also am still very active in the lives of my fur children my two little chihuahuas that me and Barb have as our life friends if you switch over to the to the slide there is a law and cheddar you know and they're just tremendous you know my love of animals has been something that has always been there and you know persists through whatever life events happen to happen so you know these guys are still a big part of my life as well so after the the break-up I really wanted to try to move things into the area of helping to get physical items into people's hands and helping to support my work by doing this okay because I had really only been depending on just donations up to this point and you know I wanted to try to step the effort up to bring in some resources so that I can move this to the next level it was about at this time that I conceived of the wall north is happening video platform okay obviously I was looking into software to do it and I was looking into the feasibility of me being able to do it myself just like I did when I broadcast an audio-only I did test episode with a friend with actually Tim Smith who I'm going to talk about a moment who basically came up with and and organized the free mind fest in Philadelphia and um the episode that I did with Tim I never aired I I scratched it because the the production quality was not where I wanted it and upon realizing that I wouldn't just be able to continue broadcasting and doing the show live myself with the production values that I wanted to uphold I just decided to take a hiatus get some bring in some resources and and donation money to help fund it the way that I wanted to do it because see I operate under a pretty simple life strategy and life strategy that I try to operate under is if it's worth doing do it right do it all the way do it up all the way okay don't do it half-ass do it right make it look good make it aesthetic deliver it properly okay and I think that's a thing that a lot of people don't do especially live broadcasters they hit they hit the broadcast button they point the camera at themselves whether it's a webcam or a telephone cam and they go I'm just going to talk off the cuff okay they don't they do very little in the way of preparation they do very little in the way of pre-production okay and it comes off that way you see it in the end result quality okay and I think that we would be a lot better at delivering the message and getting it across the people if we become technologically literate I've talked about this it's going to be an ongoing theme to technological literacy really understanding how to do something understanding how to do it with best practices in other words the right way this is part of learning in technology you learn what's called best practices okay so I I think this is something I want to cover in future episodes and again as I said last week maybe even a future seminar that people can attend and you will get actual you know learning and practice with technological programs from me having done it in my own experience over many years and I think that's one of the things that you know we could really teach people more than anything if you have knowledge through direct experience you know that's that's so important to convey to other people especially if they can use it as a life skill to get the message of the great workout so with that being said one of the things I wanted to do is build a secondary site that would be something that showcases all of the works that I've done okay DVDs flash drives t-shirts for promotion okay stickers etc for promotion and other items where people can go from all over the world and make a donation okay you're it's not purchasing something because I don't have a merchant account all I do for what on earth is happening is accept donations there is no commerce happening on any area of my work I don't even monetize my youtube channel and people hear this and they're like horrified why don't you monetize your YouTube channel I don't want any text money going into the government and control system and pedophiles that are behind all of that okay I try to avoid taxation the theft of taxation the slavery of Taxation to the extent that it was it that is within my power to be quite honest okay and I don't care who who knows it who hears it whatever okay I am not contributing to child molestation murder sacrifice etc I know this is going on I don't think I know what's going on I know it's going on okay so I'm not contributing my energy to that to the extent that I am that is within my power okay so that being said the all I do with what on earth is happening is accept personal donations from individual to individual I don't do business as I have no limited liability corporation I have no tax-exempt corporation or status or foundation okay there is none of that it is mark passio accepting personal donations from other individuals at the end okay there is no organizational donation you cannot write a check to what on earth is happening okay all you can do is send funds as a personal don't to me that is how I take in all of the resources that I do for what on earth is happening and all that's all I ever have done okay contrary to what other people will tell you okay so donation gifts I used some open source shopping cart software and modified it because it's free and open and that's what free and open software means that you're free to modify it for your own personal usage even if you want to redistribute it you can do it like that I can even maybe show some other activists in the freedom community how I did these small modifications to this open source code and basically turned it into being able to accept personal donations instead of sending it to a merchant account system instead of linking it into some type of a merchant account payment gateway okay and it's been working quite well it doesn't work like a normal ecommerce site because it's not and I'm gonna take people through that later on in the show but donation gifts has been very successful people have been very generous and have really said that they're very happy with the quality of the items that they get from here and it helps to get the word out you know you cannot imagine how many copies of presentations I have sent all over the world every country in the world okay and getting the word out to people that I never would have met otherwise that I never would have known okay it's this is a reach out effort donation gifts okay you can go to gift stop what on earth is happening calm but i really suggest instead of even just typing that and just click the gifts tab on the website or hit the gifts button because it's gonna give you a little caveat at the beginning as i'm gonna show you later that you have to have a paypal account or you have to have a bitcoin wallet to donate these are the only ways i accept personal donations PayPal dot me and Bitcoin so you know if people know how Bitcoin works it's pretty easy to make a donation they're my Bitcoin wallet address is right on the donate page I'm going to show people that later but you have to have one of these too okay I don't accept direct credit card I don't accept direct bank transfer okay you could do indirectly through PayPal but you need the PayPal account first so I just want people to understand that and I'll show you the how the whole process works later on in the show during the hiatus I also very shortly after I set up what on earth is happening donation gifts I helped a friend start a little side business that he wanted to begin with t-shirts and some health items and some concealed carry items firearms concealed carry that it's called 1776 gear my buddy Steven started this and we basically put up a website where you can get t-shirts and you can also we have affiliate programs set up where you could do some concealed carry gear and some health items very rudimentary shopping website for some Patriot apparel you know some freedom loving people apparel is in so far as t-shirts go pretty simple only a few items might be expanding it in the future it will have to you know talk to my buddy and see where we want to go with it but if you're inclined to check it out you can go to 1776 gear dot US and check that project out that I helped get up off the ground during the broadcasting hiatus also as I mentioned before I spoke at an or an event that my friend Tim Smith set up which was called free mind Fest this happened at one art community Center in Philadelphia which is a kind of in West Philly and a great place great people good outdoor venue this was like a music festival with speakers from the freedom activists freedom community speaking during the day and then they had bands play all night into the night so this was a September of 2016 in late September and was pretty successful great participants some good music they had a vegan truck run by Vinnie who you know debuted his vegan cooking truck at the event and it was a semi-decent turnout you know I think it needed a little bit more promotion but in general it was a very fun time there you see the one art community center with the great artwork I think that's Jordan page on stage playing for some folks I'm not sure if it is I think it is and you know great event for a first-time event and I gave this I'm sorry I'm gonna go back for a moment I didn't put the slide there because I gave the full presentation at a later time but I gave an abridged version of duress dissidents and deadly force at this event free mind fest unfortunately I couldn't do with with my slides because they didn't have a projector that was bright enough lumen wise to cut through the direct sunlight during the day and the stage just was not dark enough for that so not having slides I just gave a you know a speech and it didn't have the same type of effect as my normal slide presentations do so I didn't really release that I weary formulated direst dissonance and deadly force into a longer format presentation and I delivered that later at iván colás event truth mine reality which I'm going to talk about so that was free mind fest in the summer of 2016 and then after that this is when the founders really started playing a lot more shows okay we got into a live performance a lot only played it a few venues it's very difficult here in Philadelphia for music that's outside of the the normal paradigm of popular culture and popular music here in Philadelphia I would I would go so far as to say that the Philadelphia music scene slash community is actually very close minded I would actually go so far as to say that okay it's close minded and not very inventive it's not very innovative at all okay it's a lot of rehashed stuff it involves a lot of status quo thought okay and it involves a lot of nihilistic thought quite frankly okay the founders we come out of left field with a message real freedom and real anarchy and people do not know what to make of us here in this city because this city is a leftist stronghold of communism and socialism ok so when we come out you know projecting ideas of true anarchy and true freedom like people are like deer in the headlights you know syndrome ok so you know only a few places would even like have us at the venues to play because they're so scared of the message ok and you know here's a shot of us playing on stage live at a local venue called Connie's rickrack went pretty successfully we debuted our as I'm going to talk about our debut album our debut EP I should say demo EP a little bit later actually earlier the next year in 2017 so I'll be getting more into that here's Austin in the studio okay I'm cutting my vocal tracks there and this is the EP that we released and it was entitled no masters no slaves this was a six-song EP we put this out in January of 2017 we uh we recorded it in January of 2017 we released it I believe it was April of 2017 and we released that in Philadelphia it was a big debut release show that a lot of people who were at the free mind for your mind 5 conference came out to see the debut and watch the to see the debut of no masters no slaves and watch our performance and a lot of great people turned out it was a really fun time so you know following that I gave in June of 2017 the fake-ass Christians presentation that this had been in in the works really almost since the time that I stopped broadcasting it was a very long format presentation that really talked about all of the aspects of Christianity so-called Christianity which have been co-opted by the church by occult traditions by people who are just fake Christians that they are Christians in name only and I went very deeply into all of these topics it was given at rubra Club a club that is in North Philadelphia that this was where for your mind one took place actually the for the first ever free or mind conference back when I was actually involved in the organization of the conference I of course was the organizer of freer mind one and two handed it off to other organizers as of three four and five and you know have laid my involvement down with it since then but this was done at the building where for your mind one was hosted rubra Club and it went very successfully over a hundred people turned out my friend Tracy organized this at rubra did a great job in doing so and the people who turned out like were very highly interested in the true great work and I'm still friends with many of them to this day I consider it very successful it's of course available for free on what on earth is happening calm so you're seeing you know my presentations did not really stop or slow down okay they kept going and they continue to keep going I'm still not only doing this show but I'm planning on future presentations as well that I'll be delivering here live in Philadelphia so at fake ask Christians I made a public challenge to Pope Francis to fight me in mixed martial arts match okay tongue-in-cheek obviously but you know not really so much like if he accepted I'd take them up on it okay and you know I did this because I said God knows that you would never be able to defeat me philosophically you know you don't you don't have a philosophical leg to stand on pun intended and you know so I challenge them I said I'll give you a fighting chance literally to beat me at something so let's get in the Octagon and do an MMA fight and here's a you know a picture of me doing an eye jab toward him and uh you know sorry to say I'm sorry to disappoint the listening of the viewing audience folks but it's a it's a sad truth that Pope Francis did not take me up on my offer to fight me directly in an MMA belt so you know it doesn't look like that's gonna happen it will not be on pay-per-view okay I was really looking forward to getting in there and grappling I'm taking him down to the ground doing some ground-and-pound but it doesn't look like it's gonna happen you know so the offer still open ended anytime you're ready I'll be here you come into filling next time you're in Philly you know the offer is right on the table for you this absolute communist Satanist and pedophile protector okay the offers still on the table there buddy okay anytime you're ready all right so that was fake ask Christians you know and as I said I moved three times folks three moves it's huge you know a life event to move and I move three times okay during the hiatus I'm finally in a place where I feel like I can really do some real work and this place was not in good shape when I came here it had work to be done upon it and people helped me get that work done by making very generous donations so I could actually get the place in order so I could start working and put this whole show together okay and you know here's me you know all beaten up you know working on the house tool box you know looking for some some stuff in the old toolbox but paint all over me you know caulk all over me breathing masks on you know it was a rough time okay I had to do a lot to get this place livable and I want to thank the people who made that possible through their generosity so this was let's see this was what this was the fall of 2017 so that's when I renovated this place fall of 2017 and it's if it came together very nice I could say it's very comfortable for me and I have a space that I can do my work I would love it if I had one more room you know I'd make it a studio okay we have to break this place down I'm in my bedroom right now right now I'm sitting in my bedroom I says I'm sitting on the floor space where my bed is usually over where I actually sleep at night that's where I'm sitting right now I don't even have an for room to set a studio up to do this live broadcast okay I don't live in a big place I live in a half row home in South Philadelphia you know an old partially dilapidated half row home I don't even live in a full row home okay so imagine that kind of limited space that you have to make it work you have to make it so that you could do what you need to do within that space and that's what the setup crew comes and helps with everyday they convert my bedroom into a little makeshift TV studio this is something that people can do you know it's doable all you got to do is learn the software you know spend a little bit of money on the streaming account you know it's possible okay I'm gonna talk about a network that I'm trying to put together okay a little bit later that is all about learning how to use some technology to do the great work so then February 2018 okay last year I spoke for the first time at Attica poco okay so I gave anarchy and the occult what anarchists ignore is killing them was the subtitle highly successful presentation a lot of interest that a narco poco a lot of great people attending my workshop there the workshop was on symbolism and sovereignty I think it was a turkey in the occult sovereignty and symbolism was what it was called had over a hundred attendees just great people a lot of great questions I'm gonna do the same format this year for the workshop it's one of the few times and places that I felt that the the room was right to have questions be taken during the workshop so not at the end as I went through material I took questions on the material that I just presented live and it went great it was done very respectfully by the attendees and I expect no different this year so that's how we're gonna run the workshop in 2019 when I give demystifying the occult revisited so this is me on stage and Anika poco 2018 speaking in Acapulco Mexico here's me addressing the crowd they had about sixteen hundred total attendees okay I'll bet you there was a probably close to a thousand people in the room when I spoke so very happy with the turnout Jeff Berwick who hosts the event should be proud of the work that he's done putting it together and getting the word out and getting a lot of attendees there he's saying there's gonna be like 3,000 people there this year I mean that's tremendous if it does work out to be that number so you know if you're there come on out to my workshop I guarantee you will enjoy it and gain a lot of information from it so that's me at the actual speaker podium there okay and moving on I met some great people at Attica poco I met G Gordon yeah G Edward Griffin there's me hanging out with him in our hotel room great guy shared a cab ride with him as I got off the plane in Acton Acapulco this year I'm taking trains and buses to Acapulco Mexico ground travel it's gonna be a lot of fun I think a lot of people would you know grimace at that you know going that that far of a distance by ground but I'm actually looking forward to it because I hate flying so there's me with Giro Griffin who wrote the creature from Jekyll Island and has done countless awesome work over the years here's me sitting and talking at lunch with max Eagan another one of my favorite individuals if people aren't familiar with max Eagan you should be and you should get out there and listen to all of his work so where some of us are hanging out there and talking with max and listening to some of his wisdom at a lunch break here's me talking to Derek Bros okay Derek just spoke here in Philadelphia great guy really active doing the great work here's him interviewing me backstage at Erica poco 2018 here's me hanging out with some other people from Anika poco some good friends and you know we're just chillin in the backstage area and I had a photo opportunity okay so then it was shortly after I came back from Acapulco I traveled out to the Phoenix area for my friend Ivan Aeolus conference truth mine reality this was his first conference that he hosted along with other local activists in the Phoenix area and friends of Ivan's and they did a fantastic job this was one of my favorite conferences I've ever attended actually this happened March 10th in Phoenix Arizona it was a one-day event great speakers and organized the right way is what I will say organized correctly best practices were used less I'll say that okay and here's an alternative poster for it which was done by an artist in I believe the Phoenix area as well and you know he's got all the names of the speakers on there so Lenin honor spoke Sonja Barrett spoke mark Devlin many others just it was it was an awesome event okay if Ivan does it again I highly recommend people check it out and go out to Phoenix to attend because this was a great event so right outside of Phoenix I think was in the Glendale area is actually in Glendale but it's it's a hop skip and a jump from Phoenix is like right next door so at Phoenix I'm sorry at this Glendale conference truth mine reality I delivered the presentation called duress dissidents and deadly force this is the one I had originally given at free mind Fest the year before however I you know really got the presentation in much better order with my slides and you know added a lot of content that time did not allow for at the free mind fest variant of it when I delivered it initially so I went into a lot of detail here again you can check out this presentation either on my website YouTube or Ivan's website at truth mine reality okay there's Ivan oil we've got a shot together okay the Contin the main conference organizer we put together a tremendous team as well so thank you to everybody for organizing this one okay this is me actually delivering the direst dissidents and death for presentation at truth mine reality and I want to stop at this slide and say a few things okay on the back on the presentation board back there it has a image of my natural law presentation my natural law seminar and it talks about natural law as being the only true solution okay so what I want to talk about is the people who will attack my work by saying mark doesn't present any solutions he doesn't talk about solutions he is only talking about what's wrong your heads up your ass okay you make yourself look and sound like a jackass I don't know how much more I could possibly say in simple terms okay when people say that that's what you sound like that's what it makes you look like okay I spent 65 shows on what on earth is happening talking about solutions you know what this proves to me to the souks some of some of the so-called viewing audience or listening audience that you don't know how to pay attention or listen you don't know how to take in information and you certainly don't know how to go into the fullness of the information that you are attempting to discover or to discern this is the concept of a little learning is a dangerous thing okay people do not they skirt the periphery they do not delve into the deep waters of knowledge in most cases okay not a blanket statement some do but it is a generalized statement that this is true most of the time okay for most people and another part of it is everybody wants so-called affirmative solutions right they want you to say what other people should be doing what should you be doing what should you be inventing okay I am NOT here to tell you what you should be doing or inventing or coming up with as potential affirmative or positive solutions to any given problem of humanity the entirety of my work is about the apophatic solution to the human condition of slavery and apophatic means defined in the negative it doesn't mean that I am telling people what they should be doing actively I am explaining to people that we are enslaved because of what we are currently doing that we have no rights under natural law to continue to do the solution that I have presented ad infinitum to the point of nausea okay ad nauseam okay repeating myself endlessly over and over like a broken goddamn record okay is that the solution is to cease and desist in behaviors that we have no right to continue to take because they are in opposition to moral law ladies and gentlemen that is the solution I'm sorry if you don't like it but that's the solution to the human condition of slavery we need not do one other task we need to stop doing and condoning the tests which we already are performing on a daily basis that have absolutely no bearing in right which we have no right to continue to perform it is an apathetic or negative solution the solution lies in what we must stop doing and people hate that they hate that answer and the reason they hate it is because their ego is so overinflated that they believe they know the solution and its fullness better and it's all these things that run through their mind like endless chatter it's an endless chatter brain of but what about this the zip-up above and we can do this this isn't that Nana stop the chatter of the mind what my work has prepared and help people to do if they're really listening is get your mind and body in a place where you are able to receive from the living dynamic intelligence of the cosmos itself the real answer to solving the human condition of slavery and getting out of slavery and being in a world that is actually in a state of true freedom or true anarchy and that is what my work has already done the solution is revealed it is out there and it is out there in a way that no one else delivers to the fullness and to the completeness and in the way that I do it unapologetically I cannot find anybody else that does it to that extent and that's it's horrifying to me I want people to know that's a horrifying speculation to a realization to make okay I wish there were a thousand ten thousand a million people doing this better than me it's one of the reasons I need to cut needed to come back on the airwaves okay just if you want to call that egotism go ahead you can call that arrogance I don't care I'm not interested in what you think of me or what I'm doing you're not taking me off my mission boys and girls you ain't taking me off my mission okay you could say whatever the hell you want to say about me or how I'd do anything I'm doing it I'm continuing to doing it and you're not taking me off my mission okay I was sidelined for a little bit I had to get my act and my work together okay as far as living space is concerned as far as resources are concerned to be able to do something with better production values and find a team of people I could trust to help me launch this new platform that's the only thing that stopped temporarily but you're not stopping me and you're not gonna stop me from speaking and you're not gonna take me off point in my mission which is to convey the understanding of natural law to people as the solution to the human condition of slavery and I've done it and I've done it better than anybody else much better than anybody else quite frankly okay and I'm not afraid to say that because it's true I don't want that to be true I wish so many other people would step up a do the great work and show me how it should be done okay so put your action where your mouth is the people that want to talk trash okay that's my suggestion so I have offered solutions endlessly sixty-five whole damn shows of them on the podcast alone so when I hear blabber mouths that there are no nothing's talk crap okay and as soon as they say something like this I could tell you haven't been listening you haven't listened to the podcast you exercise no discernment you exercise no true judgment you're just talking out your ass and making yourself look like one at the same time okay so you know my whole work is solution-oriented that the totality of my work is solution-oriented here's me sitting at a dinner get-together prior to the truth mine reality conference there's Ivan there's Len and honor in the background there's Keith Knight there on the left I believe I believe I'm not sure if that Sonya Barrett in the foreground there but there's Irene pie and some other friends you know I mean this was just a great event I've done just tremendously well okay I can't emphasize that enough now that's that's what people who want to talk should be doing you know get involved get boots on the ground and start being a foot soldier and the great work and do the work you know put your money in your time and your attention where your mouth normally is and actually do something all right so in the downtime I've been starting the production of a documentary of a full-length documentary called Mark passio and the science of natural law it's gonna briefly be a little bit about my speaking career and it's gonna then get into what natural law is as an actual knowable science and how natural law really works okay and what the understanding of it is and what would happen in the world if we truly understood it and applied it and lived it lived according to it so this was originally started to be worked on in the summer of 2018 I believe like around May we started this we started at the Art Institute of Philadelphia which a an art school that is unfortunately closing down my good friend Craig d'Ovidio is somebody who taught there and he brought me on into the into the space to work with the students to start putting the documentary together as a kind of a public service to the community and to help these students get some some work under their belt in their art portfolios as video students so this is where it started and now the project has been handed off to some of the members of the team of state of anarchy Carmen and Pat are we're actively working on this project now with me and it's coming along great okay we're taking our time with it it will not be finished any time soon I'm hoping by the end of the year there's that's probably you know realistic okay because I'm traveling and then I have some other projects I'm gonna be doing mid and late later in the year that I'll get into but I'm gonna project we can get get this we can knock this documentary out in the editing phase and get it out there by the end of 2019 that's my goal anyway for it okay so be on the lookout for the documentary full-length documentary called mark passio and the science of natural law it's actively in the works just to very briefly talk about the book project I had started it is still in the editing phase I still do want to release that okay maybe by sometime in 2020 I mean I know it's been on the backburner I am NOT a writer by quote trade I can write I'm very effective when I write I don't enjoy it okay I don't certainly don't enjoy editing writing okay I do have people who are volunteering help on that project and have done a tremendous amount of work already it is timeless information so I could release it in 2025 and it would still be relevant okay but that's on the backburner right now I'm trying to make time for it when I can and hopefully I will still complete the book which I was simply going to call what on earth is happening or at least one water on earth is happening Volume one okay so you know a lot of people asking about the update on that there it is it's not really good because it's not close to being finished so maybe in the near future okay writing is something that I need a fire lit under my ass to do okay it's not something that comes naturally I prefer the spoken word okay that's what I prefer so I prefer talking on the microphone or getting in front of the camera and talking okay that's how I feel information is communicated most effectively and it's done with inflection and tone body language okay I contact etc all of that okay that's how I prefer to work that's the tradition that I learned the most from and gained the most from mouth to ear tradition okay and that's why that comes naturally to me I gravitate toward that media well I don't gravitate toward naturally as writing okay although again I do do it well and effectively but um you know it's on the back burner right now and that's all I'll say about that so then summer of 2018 I gave as part of Philadelphia Liberty on the rocks hosted by my friend John I gave the true meaning and purpose of the Second Amendment part to Arms needs and cowardice this one over great we pulled in like probably about 80 people into Adobe cafe for this short lecture it went a little bit longer than I thought a little over an hour and it came off beautifully I think some of the graphics in this one were some of the best that I've put together and you know a lot of people gained a lot of information about what the real dynamic of self-defense is all about and how far it extends okay so that again also available at water on earth is happening calm you can watch it in the video section if you want a hard copy of it you can go to gifts not water earth is happening calm and you could get that in the gifts area in DVD or flash drive here's me delivering the presentation you know we're recording it and you know delivering it on the screen there at Adobe cafe in their back room I plan on doing more events at this venue great people it's a good area if it's a small crowd we could do it in the downstairs room which is where I'm doing this right now can hold about a hundred people I think we had about 75 to 80 people there is my guess I think about 80 and then um you know they have an upstairs room that's like a ballroom that could fit like 250 people this old-school style dance ballroom you know like for family events you know like weddings and whatnot and and family reunions and it's like really cool old-school ballroom type venue and I'm planning on renting that out for larger presentations here in Philadelphia so you know look for events coming out in the future at Adobe cafe right here in South Philadelphia okay so then I tabled at the MUFON national symposium July 2018 this was this past summer Here I am at the table were many great researchers and speakers presented information at the National MUFON symposium I had all my DVDs and flash drives out there coasters you know talked to a lot of great people a lot of great conversations happen at this one met a lot of people from the UFO community you know the disclosure community etc had a good time so thank you to the event organizers for that one here's me and my assistant Leah Boone tabling at the event on the next day and you know just it was an overall very positive event and you know if I'm invited back to do that again I would do do that again I spoke at a MUFON event at a local statewide conference before that was hosted by my friend Jennifer and you know I've stayed somewhat active in the whole research community when it comes to extraterrestrial intelligence and uh you know the whole disclosure effort so you know this was a fun time and I got to meet and greet with a lot of cool people at that event as well Here I am talking to one of my favorite researchers Travis Walton not just a researcher but an experiencer and here he is holding my natural law seminar DVD at the National MUFON MUFON symposium so you know great overall pause of event I've continued to work with the Tesla Science Foundation this was the event I just gave just before coming back on the air January 12th okay the show debuted on the 20th so this is eight days before the debut of the new show format in New York City at the Nikola Tesla conference that was at The New Yorker Hotel where Tesla lived for his last many years of his life in and eventually passed away right in that building so it was called Tesla and humanity's missing paradigm shift and I want to thank the Tesla Science Foundation for hosting this event this went over really great The New Yorker is a beautiful venue to do a conference at Nick launch our did a great job in organizing it a lot of great speakers and presenters Here I am on stage delivering my Tesla and humanity's missing paradigm shift presentation and on the slide there it's talking about a dynamic a lot of people don't want to talk about or discuss you know that we have to internally change we can't just say that we want change externally and talk about it and wish for it to happen we have to be the change that we want to see and you know when people ask people who wants change everybody once change they put their hand who I want things to change but they don't want to look at the requirements for that change to take place and the main requirement for that change to take place is you yourself must think differently about the world and yourself and other people than you are currently thinking change starts with mental change all physical manifested real world change starts with mental change and spiritual change and then when the person who's saying well you know we all want to see these things change but who wants to change themselves then all the hands go down all the heads go down and you could hear the flies buzzing in the room and the crickets chirping okay so you know people have to understand none of these solutions are affirmative or positive solutions they are all apophatic or negative solutions meaning that we have to stop doing the things that we are doing so I came to the Tesla conference to tell the Tesla enthusiast one of the hardest things that you could tell this community of people good supportive people who want to see Tesla's work come to fruition but they don't understand you can't bring free energy into manifestation in a society that's enslaved you have to end slavery first you're not gonna have free energy in it in a slave state okay so I was telling him free energy cannot be manifested as long as the people of Earth continue to believe in and condone humanity's current immoral institutions which are based entirely in violence coercion deception ignorance greed usury and exploitation and that amounts to a society that is based upon slavery that's what it is okay so you know this is what I try to explain to people I don't I'm not here to make friends with people okay my work is saying the people the horrors of what is art is going on on this planet you know I have jokingly said but not so jokingly that maybe the show should be called what in hell is happening because that's where we're at collectively we're in hell okay that's what this whole place has become and it doesn't have to be hell but right now it is hell we've converted it into a hell alright so you know I get up there and I tell people the things they don't want to hear you know if I wanted to be showered in gifts and adulation ladies and gentlemen I would get up here and blow smoke up your ass and tell you exactly what you want to hear hey that's what all the New Age teachers do right oh it's all peace love and happiness and it's like you could just dream it and we'll magically come true you know we can cover our eyes with our our fairy glasses and suddenly the world becomes a loving wonderful spiritually active and advanced place well it doesn't work like that you know if I wanted to like tell you things that aren't true just be so you we could all feel good and have a big love fest and then you could shower me with donations because I made you feel good well you know that'd be really easy to do that it would be very simple to do it and most people would buy it they most people would go for it because people want to hear what what they want to hear you know I try to explain to people one of the reasons you'll know that I'm for real so I'm not telling you what you want to hear I'm telling you extremely hard things to hear hard pills to swallow is what I'm pumping out there okay I'm doing it looking you straight in the face and telling you you don't understand how it works you don't understand what the real solution is and I have come to understand it and I'm not bragging I'm not putting myself up on a pedestal I'm attempting to be as honest as possible with my listening audience and say if you come to understand the dynamics that I have come to understand the world will make sense to you you all understand the solution and this is what people write to me when they've been through the entirety of my material see it's a tapestry of knowledge you can't listen to a clip on YouTube no my YouTube channel okay you can go to youtube.com slash one on Earth 93 that's the mark pacion what on earth is happening YouTube channel but if you just take clips that other people have taken from my presentations in YouTube and listen to the middle out of context you're not gonna get what my work is about at all you're not gonna understand it at all you can understand little disparate pieces of it that's not how to get the fullness of anything okay now here I am tabling there is my assistant Leah who helped with the table did a great job as she always does you know we're at The New Yorker out in the foyer there where they had all the tables the vending tables set up and you know we had a lot of great conversations with people at this event as well a lot of good people turned out that really want to see the real change the real positive change toward a true free society happen in the world and that's good to see at an event like like this because again in in New Tech right in the new tech sector just like in some times in the UFO sector the the you know non-human intelligence area of research you don't know we see people that understand freedom you know they can understand their little niche and corner of the research they're studying but they don't get the totality of the picture of the big picture in many case well at the Tesla event I saw a lot more of that than I had ever seen before so the message is getting out there you know to select people but you know we need to grow it a lot lot more but it was good to talk with some people that really did get it at that event and here's some of the crew that I was running with during that day you know out at the Tesla event we stopped and got some lunch at a local place in New York had a pretty good time while we were out there okay so you know the hiatus ended but you know during the hiatus you know we practiced extensively to do this broadcast I know this will get a kick a little rise out of all the people on the set of crew and production crew cuz a lot of them didn't understand how much we were gonna practice to pull this off okay we practiced for like months okay months in advance of this show and I would say like we we really did like almost like quote dress rehearsal practices for like a full four months before we really started broadcasting live okay and that's typical of how I proceed I want to see the the value be brought forward for people in a way that is done with good production values and you know I'm sure we could probably advance it in the future and get it even better right now here this is what I conceived of this is the whole aesthetic of it you know the format is working I think beautifully I want to thank again the production and setup crew because they're just doing an absolutely astounding job okay and thank God they came to my assistance okay you know I'm very appreciative of that you know because I would not be able to do this myself okay the great work is about coming together and cooperating okay so you know going back to the slides here we we put together this new great format and it's it's been going off without a hitch and I hope that will continue indefinitely into the future I think people are gaining a lot from it okay so you know again this is a lot of pre-production planning and work sitting here week after week doing the whole set up running the show is if we you know the live-streaming just running it like we would and seeing what the quality comes out like and you know tweaking it making technological adjustments you know making different little setup adjustments this is a labor of love okay and this was all done in the months leading up to me coming back on the air okay here's another member of the crew Tom you know you know come we're contemplating some stuff how we're gonna do certain things and you can see yeah this is just my bedroom folks you know we make it look like a little makeshift TV studio but we're just in the place where I sleep every night okay and we that because that's I would love to have just a little bit bigger of a place to have like a studio or even like a basement that I can convert into a studio we just have to move things out of the way and get it done in the space we're at you know all right this is how the room is today okay this was last week as we were setting up and and trying to like you know get lighting and everything right you know and you there you see my bed pushed up against the wall on that side of the room you know just things taken out of the way so we could you know have enough set up space and floor space to do this and this is how you could do things on even a shoestring budget okay you don't need a big multi-billion dollar studio okay and be nice be great a if you have that those kind of resources go for it that's what this is all about is advanced your effort you know build upon your previous effort move things forward you know grow your project you know that's what everybody should be trying to do okay that's what this is all about that's how you reach more people okay but you know this is done on a shoestring of a budget as it can be done and you know this is what people are coming to my assistance to make happen okay so you know just uh it's just um you know it's humbling it's it's it's a humbling thing because again to realize that the you know the vision that I came up with I recognized I could not do alone and then upon you know asking for help it was tough to get people who really were committed and wanted to do it and volunteered their time and effort but when they did come the right people showed up okay and they're really getting it done so you know the that's the early stage of the the rebroadcast okay of coming back on to the air back into broadcasting we did a little celebratory party last week after the first the launch of the first show here's us hanging out a local pub that my buddy Mike works out with a bunch of friends and it was a great time and in the downtime I've been staying close with other researchers and there's a reason for that you know because I'm getting ready to launch a network at some point probably this summer I want to say that cautiously if everything goes as planned but here's me hanging out at a local restaurant with Jay Parker and Fritz Spring Meyer you know and you know this work has brought me in touch with some of the best people out there who are really trying to put the word out about what's really going on in our reality you know and I thank all those types of researchers for their efforts here I am hanging out with Fritz and Bill Church we went to City Tavern it's not the greatest of photographs I tried to clean it up as much as possible it was a little bit of distortion on it but we hung out at City Tavern which was like a rebuilt version of the tavern that the founding fathers actually gathered at during Revolutionary War era period here in Philadelphia and we went there you know during their their stay here in Philly and here we are hanging out outside of where Thomas Paine basically produced and distributed that pamphlet common sense which was one of the things that led to popular support for the American Revolution so you know really uh you know staying in touch with friends and researchers has been a big part of what I am doing coming up in the future as well and this is the logo for the work that I have planned which is called the one great work network okay what this is going to be is a collection of researchers that I personally like their work that I trust that I think are doing good work to try to bring the truth forward to people in the ways that they do it okay it's not gonna be just mirroring mark Paseos stuff it's gonna be an eclectic variety of other researchers that I feel are doing are making a valued contribution to the great work okay in the way that they can and you know I want to launch it basically as like a to section network right now we've launched this just as a Facebook group a Facebook page I should say okay and we're doing that just to keep people abreast of some of the people and their work who are gonna be on the network okay so you could go onto Facebook and you know type in one great work network and that will lead you to the place where we're basically setting up as like in just a an introductory area we launched this as an introduction to the network okay this is eventually going to be a full-fledged subscription-based web site where we have a ton of free content and then we have for subscribers that wish to give a donation to the effort of all of the researchers we have a premium section that will require subscription okay and essentially then the other a host of the network will also have a way of actually making bringing in resources through the people that subscribe so that they can make something for their contributions to the work okay so this is going to basically help put resources put money into the hands of the contributors of the network okay that's what this is for okay so it's gonna be called one great work Network it is the page is up okay please ladies and gentlemen it's a shell okay it is all that was is up there as a shell the content is not up there the subscribe subscriptions while it will lead you to the place to make donations just don't do it now until we actually start the network okay so it's one great work network calm that's going to be the site okay we're going to be building this out over the next few months okay as we bring content creators on board with the project okay and then we will start taking donations I'm gonna say later in the summer okay that's my projection about when this will be ready okay so right now do not subscribe yet I will let you know when we have officially launched but that will be the the website I finally have gotten some interest in getting this built out by a webmaster who is more likely than not going to start that that effort okay so one great work network be on the lookout now continuously during the entire hiatus here's what I've been doing okay working on the what on earth is happening website building those presentations delivering those presentations okay building the whole gifts area right so doing the work to package up that stuff and mail it out making inventory my friend Michael comes over on a weekly basis and helps me make inventory does a phenomenal job with it okay you know this is the kind of effort that's ongoing and ongoing constantly since in my downtime and even previously to that is disseminating the ark the ark drive is something I didn't really you know prop up or like do a lot of promotional effort for it was sort of a quiet offer but I've started advertising the ark because I think it's so important to get the totality of knowledge into people's hands and what the Ark is is it's a hard drive that you send to me and so you you get a one you buy a one terabyte hard drive from wherever you want to purchase it from as long as it has one terabyte of free space on it you mail it to me there are specific rigid mailing instructions which I'm gonna go over next week and there's very valid reasons for those because I've been through all kinds of permutations of what people send me sometimes they come damaged and that's the thing I hate the most that kills me because somebody's spent all this time and effort to get the drive put it together and then they send it and they they don't know how to package it up right and then it comes destroyed and I have to send him back and destroyed hard drive that's that kills me okay and that's why I don't want to see that happen and has happened not an extreme number of times but too many times okay so I've made some pretty stringent shipping instructions that I would like follow it out of respect for the offer here's what the offer is I fill up from my personal research library eighteen video files onto this drive 8,000 digital books and about 20,000 digital audio files in the form of lectures and presentations and I put all of this in a structured way structured into folders onto the one terabyte drive that you provide to me and then I ship it back to you and you can research offline essentially until the day you die okay you still won't go through it all okay you'd have to practically be a superhuman to do that okay it's not impossible but more likely than not this will keep you busy during the whole time you're alive you know and hopefully we will achieve a state of human freedom by that point not insured not guaranteed but you know guaranteed up to the point when that happens or the point when you pass from the 3d realm into wherever we go next you will still be having data to look into in this drive that would still be there okay so this is what the arc offer is you can look more about it you can research all the details about what this is at what on earth is happening dot-com / arc okay there's a form at the bottom of that page after the offer is explained that you could fill out upon filling out that form you will in your web browser you will not get an email sent to you but in your web browser you will get a link that you can click on and get the shipping instructions as a PDF document you could either download that or print it and then you could follow the instructions from there to receive the arc okay so that's what I have been doing in the meantime here's an example of the arc you know this in a hard drive the size of smaller than most people cell phones about the size of a small pack of cigarettes a pack a thin cigarettes okay that's how big one of these USB bus powered hard drives are and it has basically everything you would ever possibly need to know to become awakened and to understand the world as it really is okay so you know it's an it's an amazing time that we live in when you can carry that type of knowledge around in your pocket but that's what the art drive is and that's what it makes available so that's what I've been doing during the downtime the quote downtime right where's mark been he's not doing anything you know I mean this is what people actually say in their ignorance after I've just shown you what I've done during the whole downtime now compare that to what you have done to advance the great work compare that to what most people have done to advance the understanding of natural law of true human freedom of true anarchy now that's all I'm saying I'm not saying this makes me any kind of a better or such a superhuman person okay what I'm saying is let's compare our dynamic of drive and will to accomplish this end that we both say we want and then let's look at who's putting more effort and force toward it who's actually engaged in the behavior of doing the great work effectively that's all I'm saying I want people to consider that and if that's my down time okay and now I'm back imagine where this is gonna go that's what I've been doing during my hiatus okay so with that having been been said I think I've shown people what I've been doing now the question becomes what are you going to do that's the question that you need to answer what are you going to do okay let me come out of my full-screen presentation and I'm gonna switch over to my web browser now and I'm going to show people a few things okay so in this section of the quote presentation for today the show for today I want to show you some new things that I've added to the water on earth is happening website during the hiatus I want to show you the founders page briefly if possible I want to show you very briefly the 1776 gear page and then I'm going to take you through the gifts air yeah okay I think it's highly important for me to take you through the gifts area to show you what that's all about and how it works okay and what not to do all right and then I'm gonna take calls after that and then I'm gonna I'm gonna go through the call procedure too cuz there's a little bit of confusion about it I want to clear that off this is what we're doing in this like you can consider this like a soft launch to the show in a way okay cuz I want to catch people up on how things work on all this back-end stuff that we have set up so then this way when people do call in it's a smooth process okay we're there as last week there was a little bit of a hiccup and a confusion regarding it okay so on the show I have added the show on the web page okay of what on earth is happening calm I've added the show tab okay and I've added the show button now clicking either this button right here that says weekly video show or show will take you to the live show page okay so I'm not gonna do that because you know it will scream what we're actually actively streaming right now but basically that's how you get to the show page now on there there's the calling link okay so if you want to call in live you can get discord and from the link that I provide there and then there's the call in to link to actually get into the server the callin server okay then underneath that I've even put an archive link and all the archive is is the podcast page so people always are asking well where is the show after you record it after you do it live okay the show page is not going to have the previous show oh it's going to show you is next week's show that isn't scheduled okay after we go off the air today alright so if you want to get the any of the former week show you have to click the podcast tab on the website okay click the podcast tab you can also click the podcast button that's down here but this will take you to the archive and it's just the same running archive in reverse chronological order new shows first you want to go back to the old shows just going to show you this so at the top here here's podcast number 197 you can click play okay and I'll just I will hit play and I'll skip to a little bit later and you'll hear to the American public can you believe it that's where we're at in consciousness that's exactly where humanity is at in consciousness if you don't think so you are exercising a skewed perspective because you know that that's not really true okay so you got you guys get the idea you can play the embedded shows right here on the podcast page and then underneath there is a description okay I give the date the description of the topics that were talked about during that particular show and then related images and/or documents are going to be included in a zip archive from now on okay because I don't really want people playing the show and then bringing up images on top that are actually really there in real time so if you want the images to browse them on your own computer they're available to download with that link on each underneath each show it'll say download the zip archive okay and then of course if you want to go back to older shows you would scroll backwards I'm gonna scroll all the way down to the bottom of this page right now I'm gonna show you that at the bottom there are other pages of the podcast so I'll wait until the lower third is removed and then I'm gonna show you if you wanted to go back to page number four that's where show one is that right now there will be 50 podcasts on each page as long as the page continues to support that as far as the way it's handled in the web browser I may eventually take that down the less but right now it's handling it okay and here's show number one at the bottom okay so you can then click that and listen in order you would go up you know you get it okay you can see how this is organized here all right so that's the podcast okay so I want to once again direct you to the ARC page okay you could read all about the arc on this page you can also click the button on the left there's the forum that I talked about okay you can fill this out okay I just asked for your full name your email address your phone number so in case anything does go wrong when you do send the drive you know you have the shipping instructions and if something does go wrong I can contact you very easily okay and that won't get lost okay so I want to show people the founders okay I talked about that let's let's go to the founders website this is the founder dot us okay and there we are performing at an Early Show and the tagline no masters no slaves in the middle of the image okay the basic website you know it's a simple WordPress website where you know I introduced the band I talked about what our whole mentality and our whole philosophy is we've released we have some social media links that you click there for Facebook YouTube SoundCloud and Instagram and then you know I talked about the EP that we have released okay the about page we're going to eventually put BIOS up we have a bio for the band but essentially you know for BIOS will be eventually forthcoming for the band members so the these these are band member BIOS okay now here's what I really want to show you I want to show you the releases page and I want to show you the show the photos page because I want you to see some of our live-action shots and again some people will be into this kind of music some people won't it's a personal taste preference okay so here's our the no masters no slaves EP and we have the six tracks embedded we have the intro track the animating contest you could get you could read lyrics okay so if you here's track number two a nation of sheep okay you can click that and then there's lyrics and you can blow these up a little bit so they're easier to see and there's the lyrics for the song a nation of sheep okay so I'll play a track from the EP this EP is available on the gifts area of what on earth is happening I'm going to play let me go back down to normal size here okay and I'm gonna play let's play stand and fight and I'll open up a new tab and we could follow along with the lyrics for stand and fight so let's bring that up and I will play the song here we go this is the founders from our debut EP no masters no slaves attract number three on the EP entitled stand and fight [Music] [Music] [Music] both you reckon drink [Music] [Music] [Music] [Applause] [Music] [Music] [Music] [Applause] [Music] [Music] [Music] [Music] [Music] [Music] [Music] [Music] [Music] there you have it folks there's a track from the founders debut EP and I know it won't be for everybody but some people will dig it you know some people understand kind of what I'm going for there if you're familiar with older punk especially some fast punk hardcore punk a little bit of an oil influence a little bit of a metal influence so you know if if people aren't into it that's your take that's your opinion I get it I know that like heavy music isn't for everybody you know but there's a there's a certain dynamic of people that it attracts there are people who understand the angst that is involved in it this is a cathartic thing for me personally okay and you know I think for what we do were effectively putting out a message of freedom in a genre that would not ordinarily have this type of a philosophy interjected into it so it's a very interesting a blending of worlds you could say so let's continue by so for people who want to check more out about the founders you could listen to our whole EP there okay so I'll just show you some photos let's see some photos from our early shows okay I'll roll through a few of these you know some of them are better than others because live action photos can tend to blur you know but basically you know you see us on the stage playing you know you could go through the whole gallery here it's pretty nicely set up guitarist Mike older bass player John who's moved on to a different project there's our rhythm guitarist Kerry in the background or former drummer Jared our drummer now is Dan and there's our other guitarist DJ and he has now moved over to bass so just an example of us hitting the stage I'll move on to another show let's look at some photos from 2017 there's not many here this is the debut of the EP the show that we did here in Philadelphia you guys get the idea you know okay if you want to read the lyrics that's on the lyrics page there's also live videos there's a couple you could check those out okay so the founders dot us I think it's been a fun project to do it's kind of right on hiatus right now because I've been you know doing the work with what on earth is happening and getting ready to go out to Mexico so I'll be picking this up after we come back from Mexico and hopefully we'll get a full-length album out as soon as possible that's another project I want to happen in the very near future so that's the founders okay 1776 gear this is the site that again I built with a friend here in Philadelphia very simple website it's a simple ecommerce site you could check out the t-shirts we have and then there are other sections which are concealed carry gear for men and women and then there is a section of health products and some of these health products are pretty good I take them myself not all of them but a few and you can check those out again we're affiliates with those we don't sell those directly and there's some preparedness products again preparedness and readiness is something that I also highly recommend so you know that's something that I'll probably be doing a show on in the future as well I know that my friend Fernando came to talk about water purification before I'd like to maybe at some point bring him back on to get more into preparedness and that's very poignant it's something that is very apropos to what is going on in our world okay so finally before we we go to some calls I want to take people through not only the donation gifts website and show you how this works but I want to show you the donation page on what on earth is happening and I want to show you how you can make a personal donation to the effort of the show because I think it's so highly important for people to understand that researchers like myself and people who are involved in this work can't continue to just do it on our own without any support whatsoever okay and I feel like not only myself but the other people who are actively engaged and involved in doing the great work deserve to be supported in doing this work if other people aren't going to get involved and do the work directly at least ancillary support the work by either whatever type of donation that you can afford to make or through donating technologies I'm going to show you that we've set up a way to do that okay so let's cut back to the laptop so I could show people this is gifts thought what on earth is happening calm and I just want to show you how I got into this page I'm going to close that down for a second and I'm gonna click on donation gifts this button right here will get you there or this tab right here right next to the donate tab which is gifts okay but I'll click the button okay now I used to take people directly into the page but I wanted to put this caveat page up here this introduction page to explain to people that you do need a certain type of account to use gifts the donation gifts area of what on earth is happening so it says here before using what on earth is happening donation gifts you should know that you can only donate for gift items from this site using a

PayPal account or a Bitcoin wallet credit cards debit cards and bank transfers cannot be used directly they can however be used through your existing PayPal account only if they are set up in advance as a PayPal payment method so what this means is if you want to use a credit card or a debit card for example to donate through donation gifts for whatever items that you want to get there you have to set up PayPal first and then you have to link your credit card to your PayPal account because PayPal and Bitcoin are the only options that are accepted on gifts so it says click one of these I'll click one of the following buttons to continue I understand I must have either a PayPal or Bitcoin wallet and I currently do have one of these options if you click that you currently don't have these options it just takes you to a page that says you you need one of these so you can go and set up a PayPal account by clicking either one of these links or you can learn more about how Bitcoin works and how to set up a Bitcoin wallet by clicking on those link that link okay so I'm gonna go back and I'm gonna click the green button now that will open up the gift site in a new browser tab or window okay and this is the donation gifts area of what on earth is happening comm gifts thought what on earth is happening calm okay so you see we have a slider on the page okay and you can you can pause that and you could look at the images here you can click through it manually okay if you like something that you see in that slider you can click it and then it will show you the product page for that actual product okay we have very clear crisp product images so if you hover over that as you see it will show you the details and if I click it it will make it a very large image on the screen okay where you could see all the detail of the product what it looks like okay so I'm going to show you all of the products not all of them but I'm gonna go through like the product pages but what I want to show you is this red link here okay which is talking about please read the instructions for the site first it's it's very easy how to use this site people over complicate things in their mind and and it leads the confusion it's so simple to use this site okay it's a normal shopping basket like you would see on any other e-commerce website but this is not an e-commerce website this is a donation website okay the only difference is when it when you go to quote pay in this case you're donating for the OP for the object or items that you want okay you are not being connected to a payment processor because I don't have a merchant account to connect to a payment processor okay all I am doing is tabulating the result of what you want and saying for a donation of this amount you will get these items as a gift okay for donating that amount to what on earth is happening to the cause of what on earth is happening okay and then I send you to the place where I accept donations and in that field it will be prefilled out the amount to donate for those items actually so simple it's almost stupid that more people don't do this okay very simple yet people over complicated in their mind largely because they don't understand that I don't take credit cards and payment and debit cards directly you have to have PayPal to do that that's all simple okay so here's the basic point if you don't have PayPal or Bitcoin just don't even bother to use donation gifts you can't order anything through it if you don't have PayPal or Bitcoin it's very simple and people just need to understand that first okay so if you click this it will explain all of that to you okay it shows you this website does not work like a normal online store okay it gives you the shipping rates if you're in the United States shipping is a flat rate five six dollars and 93 cents of it if you're in Canada it's a flat rate if you're in the rest of the world it's a flat rate so the shipping rates are there you know whatever your order is that is going to get tacked on as shipping okay so whatever your order is if you're in the US six ninety three additional if you're in Canada 1593 if you're anywhere else in the world 2390 93 okay so there's only two donation methods accepted PayPal and Bitcoin okay if you want to use a credit card or debit card or a bank transfer you have to set that up in advance through PayPal that's all this page basically explains to you you can read the full instructions if you want I ask people I to show people this because if you put in an order by hitting the checkout button just hitting the checkout button puts the order through on the backend that's just how this cart works I ask people respectfully just don't hit the checkout button unless you're definitely going to make a donation so you know I just don't want the additional work of sorting through orders that were paid for versus not paid and just put in and then abandon respectfully do not abandon the cart if you're going to use the site follow through with the donation once you choose the items that you want so I'm going to take take people through this real quick all right won't even take them through it I'm just going to show you some of the items so we have the men's t-shirts so let's click that and this shows you all the men's t-shirts we have we have what has been called the natural law t-shirt or the Lex Rex t-shirt we have them in a palette of colors seven colors or six colors and black okay and then we have the one great work t-shirts okay with the the logo for one great work what on earth is happening on the front okay and then I'll show you the backs of these in a moment but we have those in seven a seven color palette and then we have two colors black and a dark heathered grey for the new water on earth is happening design I'm probably going to redesign this shirt and offer it only in black but in a multicolored design where I'm going to call her in the elements of the shirt and offer that as a specialty item in the future so let me go to natural law t-shirts here on the left and let's click on the black version of the shirt okay you get four different images down here in the image gallery okay you could switch between them so this is the front okay you could hover to get detail or you can click it and you're seeing the full image of the shirt there okay and then here's the back okay I'll actually bring that on the large image this is the back of the natural law design it says the slavery of humanity is the problem and living according to natural law is the solution and then you could see this on models as well so it's on a male model there it's the men's shirt and here's the back of it also a male model alright excellent so again they're in a multitude of colors this is the color palette I'm offering right now so you could see for any shirt you'll basically get the same thing okay one great work t-shirt there's our color palette of shirts same thing when you click on an item okay and the water on earth is happening new design ok vectorized variant of the logo looks pretty good alright then there's women's t-shirts and I'll just show you that we all are only are offering them in black and dark gray and there's the one the natural law the one great work and the water on earth is happening designs okay so let's move on to flash drives and DVDs every one of my titles is available on this site as a flash drive okay so for example here's fake-ass Christians which we talked about earlier again same thing you could hover over it and see what the product actually looks like okay and that's the flash drive page all of my titles are available here on flash drive okay going to DVDs same thing every title that I've ever put out is available in DVD format whether it be a one disc DVD or whether it be a two three or four disc set okay so here's the rest dissidents and deadly force okay you can click that and there's the DVD let's say I want to order that okay you hit Add to basket right here all right let's say I want a t-shirt I'll say I want a natural law let's say I'll go with the green and I'll add they'll select my size over there right now the way they were available in three sizes they're only available in two I sold out of extra larges so I generally wear a large I'll select that add it to the basket okay we have coasters we have keychains we have buttons and stickers hey some nice wood burn coasters okay let's say I want a founder's coaster set there's six coasters and these nice beautiful wood burn boxes okay I'll put one of those in the basket okay there's the actual cork coaster there's six of these in in these nicely artistically done boxes okay let's say I want a button okay I'll pick a purple one great work button okay I'll add that to the basket let's say I want a couple stickers all right I'll order some founder stickers this is a three sticker set and I'll order some what on earth is happening yes I want five of these okay so there's my there's my subtotal okay I can click view basket okay it's going to show you all the items it's going to also tell you what the shipping will be depending on where you live and I just ask people don't hit the checkout button till you're actually ready to donate that's all very simple respectfully asking that okay so you know when you hit that okay you can fill in all your information what it will do it will take you to either PayPal dot me or it will show you my Bitcoin address to donate to if you choose PayPal okay it will take you to my PayPal dot me and it will put the total of the order in where you donate through PayPal and that's it then you do that through your PayPal account send it and then I will get the order right out to you okay and if you have Bitcoin you could do it the same way it will give you my Bitcoin address you just use your wallet to send the amount in Bitcoin to me that's it okay very simple use people overcomplicate things because they don't understand it's not a traditional e-commerce website and it's just gonna tabulate the donation value when you finish making your cart selection and then it is gonna send you to make the donation okay so people have been very generous in using this site and it's been working very well and it's something that I hope people will continue because these are great items to give to friends relatives family members okay to help get them awake to help explain what is really taking place in our world you know you'll learn everything from occult symbolism to what real Anarchy is to free energy technologies that have been suppressed and like a host more things okay so donation gifts you can get there by clicking the gifts tab or button or going directly to gift stop what on earth is happening dot-com okay so next I want to go back to the web browser and I want to show you the donation page okay so this is something I also built out quite a bit during the hiatus because I think I was very lacks on telling people about donations for this broadcast okay when I did start promoting it a little bit more came it's the idea of if you want to receive you must ask okay and I would not have been able to do this broadcast or even really put even close to coming together into manifested reality without first of all interested donors that said I'm gonna help make this happen for you and some people you know we're they're they're they're private they want to remain private and they were very super generous everybody who has done this knows who they are and other people they made small contributions through the donation gifts area of the site or directly from the direct donation page this is what on earth is happening calm slash donate okay and I'm gonna take you through because I offer a bunch of different ways to donate there's nine methods of donation now for what on earth is happening before you can only send a donation through PayPal now I have eight additional methods okay so here's the PayPal link right here okay you could donate with paypal okay this will take you to my PayPal dot me page it's the same page that is used for donation gifts I'm actually gonna click this and show you what it looks like because it's a very very simple interface this is PayPal dot me it shows you that this is my PayPal page I'll make this a little bit bigger so folks can see it a little bit better okay and you could just put a dollar value in here okay now for donation gifts always make sure this is on US dollar okay so let's say you want to donate twenty dollars you would type in twenty dollars you hit the next button and then it'll send that from you to me via PayPal it's that simple to donate to what on earth is happening okay so that's PayPal the next five methods are crypto currencies okay so this is a little bit more for more the more technically advanced even though crypto is not that technically advanced to get into really I would highly recommend just downloading the exodus wallet okay you could use an exchange if you want to buy Bitcoin and you know basically convert a Bitcoin and into something else or sell it okay there's different exchanges to do that but I recommend a personal desktop wallet where you control all of the private encryption keys okay I like the Exodus wallet there are other good ones but I would just recommend exodus the people for cryptocurrency for getting started you could open up those and you know from a friend who might already have some crypto give them some cash and say can you put some this amount into my Bitcoin wallet to let me get started learning how crypto works how crypto currency works okay so I accept five different crypto currencies right now that might might be expanded in the future and we're going to get to your calls I just want to take a little bit more to explain this to people I think it's very important calls are coming next okay I accept Bitcoin Bitcoin cash aetherium and all of these are right on the site ok the address is right there you could also use your phone if you want to scan the QR codes that are given here these these are black and white boxes with these lines ok these are called QR codes you scan them and it'll take you right to your Bitcoin wallet and and basically put my wallet address out as who you're sending to and then you could fill in the amount ok so you could do Bitcoin Bitcoin cash aetherium litecoin and - those are the five kryptos that i got in early on in you know understanding and using cryptocurrency and I feel that they're some of the more reputable ones so therefore I accept donations in in those you can also do it the old-fashioned way by sending a personal check or money order if you click this link here it will open your email client and send you could send an email to me to request the mailing address for the donations and I'll get you generally I get back to people within a day ok and then this is the big important okay so that so there's PayPal five Kryptos okay that takes you up to six then there's personal check personal money order or postal money order personal check or postal money order that takes us up to eight okay the ninth method is what I feel is one of the most effective and it shows you what you are actually contributing okay because the all the other ways I basically am deciding what am I going to put this to what do I need right now okay this I set up as an Amazon wishlist now I know people have their take on Amazon as being this huge you know retail giant that is you know put a lot of other businesses out of business and the retail space because everybody shops online it makes it easy to put a simple technological wish list out to people okay and for people that want to donate supplies okay that are very much needed to keep the operation running I made this wish list you can click on it so if we go back to the browser I'll show you this is called the water on earth is happening tech needs list okay and you can click either this link here in green or this button above it and when you click that it will show you the items that I currently require to keep water on earth is happening running okay so sometimes it's office supplies sometimes it's actual technological equipment okay so I need some toner for the office ink and the ink that I use to print you know DVD covers etc alright I use a color laser printer here it's one of the printers that I use and people can help out by purchasing some toner also I need some backup drives for particular purposes okay someone was just very generous there was a backup Drive that I needed that's a bare Drive there is a 12 terabyte bare internal drive that I need to make an off-site backup somebody just purchased that for me this week I don't even know who it was sometimes they come with a mention of who purchased it and I generally try to send a thank-you note directly to them I don't know yet who did that but I thank them for in advance having seen that they did purchase that for what on earth is happening it's very you know I'm trying to make a backup off-site here and give it to a friend to put in their personal safe okay so the data that is done what is recorded here and all the work that I've done cannot be destroyed locally okay so thank you to whoever made that generous donation there's a couple of backup hard drives here I need two of these Seagate Slim's two terabyte I am using some of these USB see dock adapters right now we've seen a little bit of quirkiness from the ones that I am currently using that I purchased a while back and there's a couple of new ones that are out there that I think are a little bit better technologically so I'm trying to upgrade that for the laptop that I use on my desk here there's another for the further the tablet that I use I'm looking to get another USB see hub because I have some devices that I generally hook up to this as well and I'm running out of space for that so this hub will make it a much more productive device for me and of course thumb drives I'm trying to move up to USB 3 some drives instead of USB 2 to give people a little bit more value and it looks like in bulk these cushioned ones were seemed to work pretty good and I've gotten some good reviews so that's what's up there right now on the tech list the tech needs list ok so if you are so inclined and so generous take a look at possibly making a donation of tech items through this wish list so thank you to everyone who has donated it has made this new format possible and it continues to support me personally in my journey in doing the great work ok so I think that covers the topics that I wanted to talk about for today and shows people some of the new things that I have been working on during the hiatus and also shows you how you can directly support the effort here at what on earth is happening so I thank everyone for in any way that they donated or made it possible for me to continue to do the great work I highly encourage them to get involved in the work themselves for those who for whatever reasons cannot do that please do help support those of us who are doing that work by making a donation thank you so much and let's start to go to the phone lines I'm gonna get my headset on and get my software together here and we will start to take your calls about anything that you want to talk about regarding what on earth is happening or anything that's relevant to what's taking place in our world today so let me switch over to discord Wow there is a lot of people in the the calling room so let's see okay I'm gonna unmute my mic now let me go through some I'm gonna on me up my mic so now everybody in the discord room should be able to hear me and I going to ask for your patience because I want to go through what how this room works okay there's some confusion about this okay so this isn't a chat room first and foremost I deliberately did not create a chat room for this incarnation of the water on earth is happening broadcast I feel that the chat room does pretty much very little in helping to support an understanding of the topics what I feel it does is it gives people who are for some people they do discuss it legitimately they discuss the topics and they're respectful there's a lot of people who use chat rooms to put use it as their little personal sounding board platform okay and they post their links about nonsense that they think people should know about and then there's a lot there's a lot of trolling that goes on in them okay there's a lot of infighting that goes on in them what it comes down to is it's my website it's my show and it's my choice that's all it comes down to it doesn't come down to anything else I'm not censoring anybody censorship would be me trying to control you on your space of the Internet okay this is like you trying to tell me what to do in my home or my car by saying you must have this or that it's my choice okay this is my area of the internet that I am broadcasting through I am going to set it up how I want this is my server the the discord server I have set up is my little area of discord okay so that's like telling people what on their Facebook page or what they have on their web page okay it's my decision okay so I feel that a chatroom or even having cross talk within a room among members is distracting to the topics of conversation that I want to cover that's not what this is was not intended to be set up like that I didn't fail or accidentally not do it I deliberately set it up like this okay so it is for the call people who want to talk to me to wait in this area to be called upon by me and you're live on the air when I call on you now the second thing to understand is there is a delay okay so you should not be listening to the show in a web browser or in Facebook if you're waiting to talk to me in discord you're going to hear things possibly as late as twenty seconds ago okay you are hearing live you're hearing me live in the discord room okay so you don't want to listen to the stream or you are going to miss me calling on you okay so if you listen in the stream in a web browser somewhere or on your phone you're gonna miss me calling on you on discord when you're in the room you should be listening actively in discord for my voice in the third hour of the show okay I want to go through a little bit more of the preparation once you get in here okay so don't stay in this room unless you're into you intend to actually go on the air live with a comment or question okay this isn't a hangout okay you are here because you want to talk to me live on the air okay I highly recommend to use the discord desktop app that's the best way of using this if you want to use the discord mobile app that's probably the second best way okay and the web browser option whether on the desktop or in the mobile is your worst option it will probably work but there's no guarantee I think the desktop app is really your best bet if you really want good voice quality desktop app with a headset like this optimum okay then you're in really in business and you're gonna have very good call quality okay so you have to click on to where it says calling room to to hear okay and and to be actually in the place where you're waiting to have your call taken okay and then you want to make sure that all of your devices that can emit sound your phone your laptop your television whatever you're listening to the live stream through mute muted you you don't want any feedback in the room things can that can create a feedback loop okay so just like when you call into talk radio you have to turn your radio off okay you want to have silence in your room other than your voice okay so what you during your call you're not gonna be on the air on your camera okay we're not putting your image on the airwaves ever it's only your voice that's coming through in the call okay so quit other programs that might use your microphone or your headset okay like Skype or something like that just quit all of that you only want one it's optimum if you just have this cord running and no other apps running to be quite honest okay so quit any other things that might use your your microphone or your your headphones you must use headphones or ear bud headphones okay because this is the reason is if you have a speaker okay then it's creating sound in the room it's coming back through the mic and you're gonna get echo and feedback and if I hear that I'm probably just going to let your call go I'm gonna drop it okay so you want a headset of some kind on either your earphone headset or earbuds okay I'm gonna determine the calls I again I talked about this last week I wish I had the option to like show it in order of who joins the room first cuz then I just go in order but it's for now it shows an alphabetical order I'm sorry about that guys we're trying to figure out a solution for that right now I'm just gonna call upon who I want to talk to okay who I see and seems interesting okay when I call on you live there's no screening we don't screen calls here when I call on you live be ready have your mic unmuted everybody is muted from the server end okay so I will unmute your microphone I control whose microphone gets unmuted okay so just have your mic unmuted in the settings and be ready to go with your comments or okay so sorry my producer is asking me to just cut my mic one second yeah okay I was I was told that my mic was creating a little bit of distortion let let me try to correct that momentarily and then I'm going to go right into your calls so I think it sounds ok now let me just make sure that's coming through okay everybody should be able to hear my volume and let's go to let's see let's go to Jonathan Jonathan you are live on what honor Jonathan 666 you're live on a 777 I'm sorry you're live on what on earth is happening welcome Jonathan are you there all right let's go to taco Roo 92 taco Ruhr you la are you there you're live on what on earth is happening yes hello okay how you doing I I just wanted to say thank you for introducing me to a courtesan oh thank you you're very welcome I'm glad that you took it seriously as a topic and looked into it yes well everybody else Muslim was passing the same like the same old New Age rhetoric on raising your vibration by simply making up of course you were the only person you open my eyes to the true nature of spirituality so I wanted to thank you but yeah but on to my question and my question is a what is your opinion on sacred geometry and proportioning relates to relationship architecture I think it's a very very powerful area of study to undertake I think this is the this is the geometry that underlies all form in creation and that's a very powerful statement right there in and of itself and when we study it if we really look deeply into it as something that is like the building blocks of everything that we experience it teaches us a lot about ourselves okay because that kind of proportion and design underlies everything that is all around us it opens us I think the study of sacred geometry opens us up mentally and spiritually to wonder okay that's what it did for me at least and so I think it's a very valuable study to undertake and when you see these proportions in nature you start to become aware that there is ZERO possibility as a you know potential that this is accidental you know that you understand that there is an underlying intelligence that is at work in everything and every form that we see all around us and that is a powerful revelation as far as I'm concerned that's what's sacred the study of sacred geometry helped me to understand and I think if people take it up as a study they'll see the value in it in a big way I agree I agree yes so um and if you have anything else for us anything else you want to comment yes it's just a term like this makes you wonder about um the current state of him like mainly in modern Western society with the pooling that we inhabits and what an architecture I guess I don't I don't know about you or this is like maybe in subjective but I find modern architecture so so incredibly a doe and an ugly and it just has no significance to me it's almost bereft of any type of spirit you know it's it's almost bereft of any kind of real value aesthetic you know aesthetic of any value whatsoever it's sad that that's the direction that in design and building we are moving compared to some of the wonders that our ancestors and those who came before them made yeah I agree I couldn't agree with you more all you have to do is like take a trip down to Washington DC walk around there for a little while if you want to get really depressed you'll you'll see our architecture that is devoid of any soul you know yeah definitely I mean I've been looking to I've been lucky enough to travel to I'm calling me okay but I've been rapping lucky I have been lucky you know to travel and so Western so it's a Mediterranean so I've been up into Italy and have a pincer and like very man I've seen like the ancient terms churches on it is hazard like upon witnessing it the first time it is it just grab you it is I don't know it's it's just a really amazing feeling you just miss you want like how how will a how will I able to build such magnificent structures sure I mean they they took it upon themselves as a labor of love and it was to communicate what was possible and convey you know the power of the imagination to create you know we don't even see building them the same way as that today so it's a lost art form you know and it's something that really has a deep affect energetically you know in the in the field of energy around us it has a very very profound and deep effect to those of us who are walking around amongst it and this is what a lot of people don't see you know they don't see that you know there's a connection not only to between us as human beings and the connection between us and other life forms and all the animals and the animal kingdom around us but there's a connection just with our environment in general whether it be part of a natural environment or part of the environment that we build you know through whatever building architecture and and styles styles that we want to bring into the the world of creating man-made structures that all has an effect on the energy around us continually and again that's a very deliberate thing that a lot of the engineers of our society use to put us into a certain mind frame you know a certain state of mind because they understand this energetic interaction between our bodies and even the architecture around us in our environment so very great points that you bring up regarding architecture and our sacred geometry and aesthetics in general I couldn't agree more so let's go to some other callers let's all let's hear from Lex Rex Lex 93 Rex I should say sorry Lex 93 Rex you're live on what on earth is happening welcome hello mark can you hear me there he goes yes I can welcome to the show all right great uh well it's a pleasure to talk to you mark thank you yeah my name is Diego I'm from Minneapolis okay and I had a couple things I wanted to say today on the show um the first thing being with natural law so with um you know my in my life I kind of experience natural law firsthand kind of like you so when I heard the natural law seminar was really uh it was just really enlightening to say the least I appreciate that mm-hmm and and I had a revelation recently and I was and because for some people it's hard to uh it's hard to get their head around natural law in general right so for most I would say it is you know it takes a certain level of what I will consider some innate intelligence from a simple holistic intelligence perspective to really accept how certain laws of creation function you know there are people who just want reality to be the way they believe or want it to be but they don't want to do any kind of real introspection or deep penetrating analysis onto how it actually functions or how it actually is they would just prefer to you know see it as they want to see it and that is uh that's salsa's amor that's uh you know it's wishful thinking it's magical thinking it's it's dreaming in a bad way okay it's it's not using the imagination to create something that could be better it's saying I imagine I want to imagine things that aren't as they really are and when we do that the danger in doing it is you don't if you don't understand where we are you don't understand what is going to be required to get from here to there to get to your destination your stated destination you need a coordinate system a coordinate system to understand where you're at in order to get to where you say you want to be and if you're not looking at honestly at where we're at very difficult to get to where you say you want to be yes and recently I've been telling people like so there's laws that govern all parts of our lives all studies all physical things and then all whatever you know in physics there's all the laws and stuff so I've been telling people why would you think that there wouldn't be laws that govern over this spiritual realm that's right down to think about it down to every last subatomic element in the physical domain people will accept from the the Newtonian worldview position that every one of those particles unwaveringly follows the physical laws of dynamics and quantum mechanics however we are made up of those same particles although all the matter of our bodies and brains made up of those same particles yet somehow our behavior is the one thing that escapes the laws of creation there is no nothing that governs that nothing that brings to us the the consequences in the experiences that we undergo what we have done no we're exempt okay that doesn't affect us okay because our will is the highest thing in creation there's nothing that could possibly govern our personal will to behave however we want you know that's what people believe that's how in ego they are they're so deeply entrenched in ego and this is why I'll reiterate why in the mystery traditions of old of the ancient world if you told the teachers as a potential initiate entering the school that you did not accept that there was something of higher order intelligence and power than man you were not admitted into the mystery tradition in any tradition on earth of of occultism of of mystery school thinking and the communication of the type of knowledge that was held by these schools and teachers you would not be admitted and to this day most of them that are still in operation like Freemasonry Rosicrucianism thalamic schools they will not take someone in who does not acknowledge that there is a higher power than man because their ego would be so large to deny that every other aspect of creation is governed by law except mankind words were just exempt the the level of ego that one would have to be in to accept that totally erroneous position is so colossal that they would be considered practically unteachable and they would basically say the only thing that we cannot help you we cannot take you out of that condition the only thing that can is for you to suffer enough that is how they would be dismissed that's how they'd be shown the door okay out to the out the door out to the porch down the steps and away you go and maybe if you suffer enough in life you will come to realize that your position is completely erroneous and untenable and I would say most people who work themselves into that condition most people die in that condition sadly not all but some people come out of it but the people who eventually come out of that position do so because they've suffered so tremendously that they've been taken right to the brink of the passage between life and death and somehow some force nudge them to the side of life and said you have to reevaluate your position and your mindset and the whole state of your mind and heart in general the state of your soul and they did enough work to get nudged into that place where they can then start to open up and receive the the knowledge in a deeper way so great call I want to thank you for that let's move on to liberty or death Liberty or death you're live on what on earth is happening welcome hey Mark can you hear me yes I can loud and clear oh wow I just got to say it's an honor to be able to finally speak with you pleasure is mine what do you have for us today um I'd like to just give some insight of sort of what I've observed is someone who's studying natural law mind control while also being a student within depression outcome based education model okay it's got a tough it's got to be a tough position to find yourself in in the modern dog man trust me it is like people think reading is it something embarrassing Wow sorry I can just a little nervous okay just take your time I call yes so what has been your experience I'll tell us a little bit about well something I've noticed it seems like what they're doing is presenting these watered-down versions of the satanic tenets under the guise of objective signs interesting and I'm like are you seeing a lot of like moral relativism in that sense selfishness moral relativism even perhaps eugenics yeah exactly like as like an anecdote like in my social studies class we had to do this activity where we were essentially you create your own government do like this mock auction where you bid on what the rights of your citizens would be like raise your hand if you want your citizens to have the right to free speech or or the right to put a certain substance into their body like they're propagating these ideas of moral relativism like as if it's just a consensus thing and it's like if you think that that should happen then it's a good idea you know or it's somehow acceptable to just be the arbiters of those rights is that what you're saying exactly so when it was my turn my turn to present I just said rights are inherent in nature and they cannot be delegated or revoked by man and that's where I got an F of course you got an F for saying that rights don't come from human beings and human beings cannot grant rights or revoke rights that exist naturally you were failed in your ethnic mark I was surprised but not really surprised well this is where this is where we're headed we're headed into an induction an initiation into Satanism that's what is really taking place in the modern world particularly in the university system that it's unbelievable III that's I really feel for you in that sense it's it's unbelievable that this is actually happening in modern education systems which are nothing but government indoctrination camps you know that's where it's like this this whole occult concept of man becoming God and then creating the masses within his own image that's right the only way they can create this new world order or this dark new world order as you've said before is if they sell us the watered-down versions of their own belief systems exam that's exactly what they're doing in this school system oh well phenomenal call I thank you for making me you know aware that that is taking place to that extent that is that is very disconcerting and outright frightening I mean if you really hear what that caller just said you know they are literally teaching the value system of Satanism in modern schools in the so-called modern education system and the the moral relativism that they are making their students indoctrinated into is rampant rampant moral relativism and telling them human beings get to decide what rights are they don't exist there's no natural component of Rights it's not like the behavior exists in nature and therefore the qualities of the behavior also exist in nature so if they cause harm to someone else that is a naturally occurring event in the natural world and that is why rights are actions that don't cause harm to other sentient beings okay this simple logical definition of right is being ruled out in favor of putting emotions on a pedestal above logic reason and the natural world you know and that's what this all ultimately is this is this is in your mind wanting to become God and become the arbiter of reality not looking at reality as it actually again the distinction between the real or the natural and the artificial or construction okay and they are supporting and propping up the constructional and artificial over the real the natural that is which is actually inherent to the universe to creation it's it is Satanism this is a lower level form of Satanism and again as the caller said very rightly what the real controlling quote elite class I say we shouldn't be calling them the elite they're not the elite of anything but the bottom of a damn trash can the slime that gathers on the bottom of a trash can is what they're the elite of ok but you know this the existing entrenched global ruling powers have to in inculcate people into a lower-level variant of the Satanic religion of the Satanic mindset in order to control them and that's what they're doing through the university system so I'm sorry that that has been your experience but it's a very telling about what's really happening in the realm of so-called education let's move on to let's go to Josh let me see if I can get the name right Josh good thar good scoop jar Josh cookies are yeah it's good char good to me yes I can welcome to what on earth is happening oh wow it's uh I just want to say it's an honor to be talking with you I've been listening to you for about like two years now so exhales various I didn't think I'd have a chance to be able to speak with you today but um well I'm trying to randomize call calls as much as possible you know so people I'm gonna be surprised when I just get to them because I'm just pretty much doing it randomly to try to just shuffle it around a bit right right so I watched your seminar on natural law and another one on the tarot cards yes and I had a question of I've been reading the Tarot for about like six months now and I've been studying a lot more okay and I think it's been able to show me more on natural law and how like things really do work in this world and my question was is like now I've been able to see a lot more of like the issues in our society and in the world with how people are asleep and they don't generally understand common sense right with us though right and do you think that everyone will be called to the truth either in this life or the next like do you think eventually it's going to happen where we're all gonna wake up in the form of like consciousness and this isn't how it's going to be forever right well I I would say that most definitely there is going to be a call to quote truth at some point for all individuals because it doesn't matter nobody is going to live forever in this domain in the physical body everything that lives one day passes away and dies and is recycled into the fabric of creation and you know that process goes on and on so at some point all of us are going to reunite with source however way you want to look at that so we're all going to eventually get it quote unquote the question is whether we will get it in the physical domain here on earth okay as a people and be able to move our species to a higher level of awareness in consciousness and then eventually inform in the 3d realm that's what I think our birthright is that's what that's the birthright that's being withheld from us by the sorcerer priests class that is basically has us under their thumb right now okay so will we accomplish the goal of creating a true free society as a human species and then moving to the next level as a species so what we're not even a type one civilization on the Kardashev scale that measures a civilization development okay we're a type zero which means that we basically get our energy from you know burning things and exploding things okay type one civilization will have harnessed true free energy and will start to use their their the geothermal energy of their planet and harnessing the energy that comes to the planet from its star our Sun and then we'll move on from there and become intermediate between type 1 and 2 where we'll start exploring the solar system and eventually become at some point a type two civilization which is much more advanced you know some people have speculated that maybe a type two civilizations what's really controlling our type zero okay that maybe how advanced they are you know whether you want to see it as advanced human beings advanced in ancient occult psychology or possibly potentially an extraterrestrial civilization that is of a much higher order of technological intelligence than us it doesn't matter you know it doesn't make a difference which one is controlling our civilization the solution is always the same non-compliance with the evil by stopping doing behaviors that we don't have the right to do which is what aligning our behavior with natural law is all about they cannot get this control done without our compliance so you know a really great call you know that it's it's the whole thing is all about how we ultimately have to change our mindset if we don't change our mindset nothing in the external domain is going to change okay and this is what I continuously r.e.m ffice eyes with my work we have to do the work upon ourselves through the study of whatever system of correspondences we're using you alluded to Tarot there are many others you can study Rosicrucianism and its symbols you can study Freemasonry and its symbols you can study Kabbalah which is considered one of the roots or if not the root of the Western mystery traditions and these systems of correspondences are ultimately designed to do is to bombard the mind and the brain with all of these correspondences and symbols and allegories to a point where your left brain chatter of do this do that oh don't listen here and I'll go over here boom at some point it says stop don't completely shut off but stop the chatter you know this is this is what I talked about when I talked about the modalities of thought okay concentration for linear focus then meditation for being able to stop the mind from the chatter then contemplation the daydreaming state where we put it all together and we go into a truly imaginative creative process okay we have to engage in all of those when we have a system of correspondences allegories and symbols to combine those modalities of consciousness with then it becomes a powerful tool it's it's a system that it operates as a tool upon the mind to focus the mind to allow the mind to empty when it's required to be still and allow new things to come in and then to be imaginative and creative and daydream and play with different thoughts okay if all of these modalities are necessary and required none should be placed as upon a pedestal upon the other and this is what we've we've lost these modalities of thought some people can't focus some people can't stop the mind some people can't be imaginative and creative and daydream we have in some ways or another we're so out of balance that we cannot engage in these modalities of thoughts as a holistic cohesive unit which is what our mind is supposed to be we're fractured we are we are segmented within ourselves okay and the the the processes that I'm talking about when you really study the occult when you really study the psychology of self it's all there to bring that all back together you know so that are all functions cohesively and when we do that then we're in the proper modality for reset reception of truth that's what the root of the Western mysteries is about okay the Western mystery traditions as opposed to the Eastern traditions which were more about going deeper into self and an awareness and pure consciousness they are to be able to put the body and mind in a state of reception of truth okay and then focus it even more after the reception of the truth to be able to then put the truth out there for others to receive to focus in and hone it even more and put it in a way that is easily receivable and understandable and then help to disseminate it okay so that's what the the root system Kabbalah actually means as a word okay I'm gonna be talking about this and demystifying the occult revisited in Anika poco the Kabbalistic tradition one of the most powerful very misunderstood by many people okay as is most of all if not all of the occult is completely misunderstood and what we have to understand is that it means literally that the the word Kabbalah literally means and in its correct connotation it means to receive properly it doesn't just mean to receive it means to properly receive to be in the state of mind that is optimal for the reception of truth is what the Kabbalah actually helps us to do and that's also Tarot as part of that tradition it grows out of that tradition Freemasonry Rosicrucianism they all grow out of that tradition even Thelema okay so this is I'm very glad that you have gained a good understanding of some of the world of the occult and I highly recommend people to study that and make that one of the the endeavors that they want to personally move into a deeper understanding of in their own time so thank you for that call patty lager patty welcome to what on earth is happening hey can you hear me how you doing yes I can I called on last week I think there was a tech Lich haven't heard from you in a very long time I met her when I gave my streetwise spiritual' lecture out in st. Louis back in 2014 have you been I have been wonderful and I'm glad that you've been doing well very busy and we are so happy that you're back thank you for sharing your wisdom I wanted to say a couple of things first of all the collar that you had that is at the University and received the F it breaks my heart I am a college professor and you know that there's so much at the college level that I see and I'm ready to be fired for something really good you know that comes my way when I actually speak back to the administration because they're really coming down on this mind control agenda and you know with one of the big themes and universities is diversity they're really pushing this diversity agenda trying to promote what is diverse thought but they're limiting what that is so you can be diverse but only to a certain extent and if you don't fall into the box of what they consider to be diverse then you know would they ever accept the diverse thought that we bring forth as an artist or as ethical vegans I mean is that a diverse thing that is accepted I don't think so yeah I mean their whole system is designed to limit thought not encourage more diversification of thought it is there as a boundary condition to help put consciousness in a prison to put it in a box and say only that which we have determined is on limits for consumption and exploration is that which you may take in but if we've determined this is off limits for human consumption and integration into their mindset then they're going to VM Italy and in a very regimented way attack anything that goes against their their paradigm that they are trying to instill in people and see that's the opposite of education education means to lead out to lead out of darkness toward the light and if you are saying I'm going to shelter you from any particular system of knowledge that is out there or even opinions or out there then you are limiting consciousness and putting it in a box okay now that isn't to say that you can't take the position this isn't correct or you know I'm not going to support this okay but to say you can't even think it you can't even express it will fire you or throw you out or fail you for even expressing something that is antithetical to what they're trying to teach her to say is is just going into that realm of total censorship you know III don't want anybody censored I would rather have more speech where people are saying here you're wrong but I'm gonna tell you why you're wrong and then you could debate it and talk about it okay but when you know certain things that I think are done deliberately just to make researchers look like you know complete asinine and silly they're out there for SIOP reasons to you know so there are things that I would say you know people should be very careful in their discernment about to learn how to understand that this is a sigh up or that this is not really the case or true we can't just believe everything that other people say either it works both ways you know these people are closed-minded and don't especially the left that doesn't they only want to have the dialogue okay you know regardless of what you think of certain researchers they're sitting down with people and saying even if you're on the left or even if you're in these systems these university systems will you even have engage in a dialogue with us you know with people who don't share your worldview okay either as people who are on the quote political right if you won't even look at this ridiculous left-right paradigm or with people who are actual real anarchists who look at this from a purely moral perspective they don't even want to have a discussion about it there that's what a religion is a religion is saying I don't even want to talk about it I don't want the discussion to take place okay and my belief is correct even though I can't really even lay it out in a logical reasonable way with reason and logic and thought I engage in it in a purely emotional perspective and anybody that opposes that I'm gonna look at as the enemy I mean that's not teaching that's not educating you know that's not leading anybody out of darkness and explaining to them why something works the way that it does and proving that through examples and repetition and you know proving it through observation repeatedly being able to observe the way something works you know that's just that's just spouting a religious thought you know what I mean and then expecting other people to graft onto it and integrate it into their mindset and then don't ever oppose it I mean that there can be no better definition of religion and that's what our universities and school systems are turning into they are turning into cults religious cults they're not places of real learning is that what you're experiencing in the university system as well yes I really am and I teach a lot of students going into medicine into allopathic medicine and I myself have actually started my own college course of anatomy and physiology and I'm doing a weekly podcast for people going into natural healing and I'm trying to put forth this true health agenda and helping people see that simplicity and truth are really where health is these these allopathic doctors and I did go to medical school and I was in that system and I saw just how insane it was just how dangerous it was that people are given chemotherapy and radiation for innocuous disorders I mean it's it's it's harming people more than it's helping and so a lot of my students are going into this system but I'm really trying to get them to think critically for instance I just had one of my students email me about the necessity of removing lymph nodes during cancer treatment and they do that with the thought that they're going to get the cancer out of them more quickly but really the lymph nodes contain the immune cells that are actually killing the cancer cells so by removing all of these it means lymph nodes you're creating more of a problem and that's what's very more commonly in medicine but anyway I'm trying to put that for and that's that's really fantastic news that you're actually engaged in the great work by putting this out in a podcast I I want to give you opportunity to plug your work tell people your website or where your podcast can be found because I I trust that you know I I know you your whole mindset and I know that you're putting out good trustworthy information so feel free to go ahead and plug it well well thank you very much my website is patty lager PA ttyl a nd for naturopathic doctor dot-com and you got cut off a little bit there it's patty lager m n d PG t y la ger a dot n d.com is that correct that is correct and I'm doing this I do Facebook live I'm doing it now on Sunday evenings I specifically change the time so I'm doing it at podcast because I don't want to miss this one and I started 7:00 p.m. Central Time a p.m. Eastern great and it's Facebook live they can you guys can get to my Facebook channel it's the same name fantastic patty thank you so much for the call and thank you for doing the work and putting information out there for others that's what this is all about folks it's about engaging it's about getting involved all right we're running short on time let's go on I'm gonna go to Ivan from Phoenix Ivan welcome to water and earth is happening what do you have for us this week hey Mark can you hear me yes I can loud and clear alright as usually I have a couple of quick notes here and I'm glad to see last week you did on one of the other slides you put government on there and you did put a distinction between external government and internal government that's why this conversation before that right yeah it's implied when we say government and my control that we're talking about external institutions now however or some of the initiates yeah we do need to distinguish because then they think oh governments back women's bad well wait my control you want to control your own mind so you do want internal govern that's all I wanted to remind people of that and true internal government means if there is no externally imposed government we are ultimately controlling the things that we are allowed to control our own thoughts our own emotions our own actions okay and if we have that kind of internal composed self-government all external government is completely unnecessary okay therefore you know we have to work upon ourselves to do that great work of coming into monarchy as an individual one ruler of the kingdom of self okay so yes these terms can be used interchangeably like that when we talk about government being slavery of course of course we're referring to externalized imposed coercive violent government okay but yes the word government in and of itself can apply to internal government again if we choose not to govern ourselves in the in the right way according to natural law principles there are always going to be external forces that are going to swoop in and and externally impose their form of coercive and violent government upon us and that's why it's so important to do the work upon the self that's what the great work that's the beginning of the great work exactly all right and then my usual thing you know I'm movies last week we were gonna maybe talk about glass but I wanted to put that out there for those who haven't seen that that's the third part the end trilogy for M night Shyamalan so unbreakable split and now glass that has a lot of spoilers so if people haven't seen that yet get out there and see it because there are quite a few twists at the end that bring up a lot of things that we as a do coaches are very familiar about I'm glad to see it in theaters they brought a tear to the eye and a lot of people either like Shyamalan films when they get it and a lot of people don't like it and another film came out this weekend serenity that a spoiler for that is kind of like a matrix kind of movie because the trailers do not give you any idea of what actually is going on and there's a very excellent quote in that movie that I wrote down real quick that it's truth for us it goes everybody knows everything but nobody knows what's going on that was so profound yes we have all the Facebook's the Twitter's that YouTube's you you sneezed at a certain time and it's caught on video everybody knows what's you know everything but no one knows what's actually going on and then really quick taking it back to last year if everyone seen the Avengers infinity war there was a caller that mentioned something about architecture and the energies and highway things bland and all that sure and that that brought to mind the movie Avengers infinity war because of the external energies I think that film was almost a sequel to like 9/11 because I were coming down we're coming down to the end of the show I think your allegorical analysis of movies in in the modern world is so on point I would have to talk to you about maybe coming onto the one great network and doing a whole segment or a some type of a live stream there about allegorical movie breakdowns I think you would be phenomenal at it I think it's something that we have to talk about and I want to see if you're willing to consider doing that when you bring the network online that's all the time we have for this edition of what on earth is happening ladies and gentlemen the right here next week thanks for listening government is slavery [Music] [Applause] [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #199

Topics: *The Super Bowl of Knowledge, What is the A.R.K.?, the Amazing Repository of Knowledge, Requirements for the manifestation of True Freedom, the Role of Knowledge in our lives, the Occult, what knowledge Dark Occultists hide and why they hide it, Nescience vs. Ignorance, Reality Manifestation 101, the REAL Law of Attraction, how we collectively co-create our shared experience of Reality, Natural Law, the Law of Freedom, the Depth of Knowledge that is required to create real-world change, the A.R.K. Drive offer, Shipping Instructions for the A.R.K. Drive offer, what true Respect means, Karma and it's relationship to Conscience and Natural Law, the Trivium Process of Truth discovery, Consciousness and Self-Knowledge as Solutions, the Occult Initiation process, Classical Liberal Arts education methodology, the importance of language conveyance and Conscious Parenting*

freedom mat that's what it's all about [Music] you've got the groove on freedom [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery we got a great show lined up for you here today today is Sunday February 3rd 2019 work streaming live from what on earth is happening calm we're also simulcasting on YouTube Facebook and Vimeo live today's show is going to be called the Superbowl of knowledge ladies and gentlemen who needs the big game when you have water on earth this happen and coming at you're on Super Bowl Sunday listen we're gonna get into that depth of knowledge that is really required to solve the human condition of slavery on today's show and today's show is all going to be about the Ark Drive and what it is and what is on it and what it can do for your mind and your consciousness so that's what's coming up on today's edition of what on earth is happening what on earth is happening is live every Sunday from 3 p.m. to 6 p.m. East Coast time that is noon to 3 p.m. Pacific time we'll be taking your calls in the third hour of the show on the discord app the link is right there on the show page at what on earth is happening dot-com slash show ok so before we get into the material for today's show because there is a whole lot of ground to cover I want to go through a couple of quick announcements I'm going to be speaking at a Newark apoco 2019 the big conference down in Acapulco Mexico big anarchist conference being thrown down there so I'm gonna be giving a presentation this year entitled anarchy and the occult part to religion versus initiation that's the subtitle for this one you can go to my website at what on earth is happening calm if we switch over to my laptop I'll show you the there's an event banner right up at the top you click this banner to get tickets that's for the Anika poco event also I'm beginning a workshop called demystifying the occult revisited initiation into the mysteries so this is the poster for that workshop and if you're going down to the Anika poco conference please ladies and gentlemen come on out to my workshop that's where the real meat of of the matter is going to be presented regarding the occult and the knowledge that it contains and you know natural law and you know what we can really do to turn this situation around so check it check it out at Anika poco comm and you can get the full event details there by clicking on that that banner or that poster okay so another quick announcement I want to let everybody know that things have been going great here at what on earth is happening as far as you know other all the production we got like really great people working on all of the the live stuff the the live show that we're doing and the people who really needed to come forward really showed up and have done a phenomenal job and I thank them and I'll continue to thank them so that being said there are still some positions that we could really use some help with here at what on earth is happening and you know I we have to ask you know that's how you get people to come on board and become involved you have to put the word out and you have to ask so I want to let people know a couple of positions that we are still trying to fill at least for now on a volunteer basis but at some point you know we want to bring in enough resources to get people paid to do this work because the people deserve payment to do this work right now it's all on a volunteer basis until we can start bringing in some more resources doing this it's very difficult but I want to let people know about some team positions okay that we're still looking for help with I'm trying to build out the one great work network and to do that I need a permanent webmaster who knows content management systems very well including Joomla WordPress and Drupal PHP knowledge is absolutely critical so if you know the PHP scripting language and how to work with my sequel databases of course the prerequisites you would have to know html5 CSS JavaScript the basic developer stack for webmaster so um if you are a person who lives in the area now all of these things can be done remotely but we still have to meet here at the offices of what on earth is happening because you know we have to have light team meetings and get on the same page with with projects so you know it these positions require people to be able to come to Philadelphia or who live in the area but work can be done you know in your own time from home as well I also need a permanent video editor we've been giving jobs out as people can basically do them if they have the time and resources but I really kind of need a permanent video editor if someone is really good with Final Cut Pro that would be great I mean if you use a different editing system like premiere that's also fine you know there's many different good ones but we have a position open for a non-linear video editor also a photoshop person someone who's really good with compositing graphics and in the program adobe photoshop and basically what the details for that is i'm really looking for someone on a permanent basis to make some art for the show namely podcast art okay so i also could use a technical support specialist i mean this is what i used to do but it takes time away from me actually putting together material for the show and doing presentations if i have to troubleshoot things so if someone is also a good technical support specialist looking for someone to just come over and troubleshoot problems when they arise also for the actual video show i'm looking for someone who can help to upload the video of the show after the final broadcast is is finalized each week and to upload them to different video sharing platforms like youtube vimeo bitch shoot d tube etc okay so if you can if you have a decent internet connection optimally at least a gigabit connection to the net up and down would be optimal but you know if you have a really good internet connection a solid connection get in touch with us for that for any of these positions please send email to my assistant Leah Boone Leah at what on earth is happening calm and she is going to handle you know directing whoever has interest in filling those positions here at what on earth is happening so that being said I think that pretty much covers the event announcements that I have for this week and you know the general announcements so let's jump right into the material because we have a whole lot to cover okay so if we switch back to the laptop view I'll start the presentation for this week okay here we go so again this is my title card for the anarchy in the occult part two religion versus an initiation presentation that I'm going to be giving at an arc apoco 2019 working to finish up this presentation it's going to be a great one it's going to cover so much that the people at the conference really need to see hear and understand regarding a lot of the stumbling blocks that modern anarchists have and don't really see some of their positions that they hold as religious positions that are really holding us back from getting to where we say we want to go that's mainly what this presentation is going to be about looking forward to delivering it at Attica poco 2019 again this is my workshop presentation demystifying the occult revisited it's gonna be a all-day event okay so it's gonna be given from 9 a.m. to 6 p.m. on February 13th that's one day before the event $140 attendance fee and it's gonna be given in two parts two four-hour sessions nine to one we're gonna take a lunch break from 1 to 2 and then from 2 to 6 there will also be a question-and-answer within the workshop so it's not going to be at the end I'm gonna actually be fielding questions while I'm delivering content that worked out beautifully last year and I'm going to continue that format this year so if you're going to an arco poco please be sure to attend demystifying the occult revisited my all-day workshop you will not be sorry that you did all right so today's episode and folks let me tell you this is one of the most important things that I think anybody can do in the called truth movement or the so called freedom movement because folks we're not even close to being where we need to be okay and the reason largely for that is people only have halfway understanding because they only have halfway knowledge and they're not taking the action that needs to be taken because their knowledge set is incomplete so again I kind of tongue-in-cheek titled this show the Super Bowl of knowledge as we're broadcasting live here on Super Bowl Sunday and this show is all about the Ark Drive now arc AR K that's the acronym that stands for amazing repository of knowledge and what the Ark is is what we're gonna go over here on the show today we're gonna go over how you can get one we're gonna go over the shipping instructions to clarify this see what this show is really going to be about focuses it's this is an instruction manual and what to do to get the ark okay because I've noticed something that in addition to people not having enough knowledge about the causal factors that have led to the human condition of slavery one of the main things that I think a lot of people lack is one technological knowledge okay we - I've talked about this on every show back so far is that we are in a state of technological illiteracy it is literally like not being able to read or write you know a hundred years ago okay now when people don't know how to build the content when they don't know actually how to do any kind of legitimate content creation on their own computing devices and again last week I got into that a little bit that this capacity has been diminished because of the whole mobile arena the mobile device arena okay and it is a circus this mobile device arena okay you know putting cell phones and tablets into people's hands people took this as oh it's gonna be so much more convenient we're gonna have our data on the go but really all it does is it takes a powerful creative machine out of one's hands in the form of a desktop computer and it replaces it with something that you can't really be nearly as creative on that is just a consumer device and that's why I highly encourage people to really start delving into how to make their own car and you need a desktop computer to really be able to do that effectively and to put some content out on a wide scale that's why we have to get back into buying powerful desktop machines and powerful laptops and understanding how to use that technology to reach out to people so this show is gonna be about the arc Drive it is a hard drive that is a 1 terabyte of data one terabyte of downloaded material from all over the internet that I have put together since really I have been online since I have been connected to the Internet ok and I've been archiving data in much larger amounts and I've condensed all the best information and put it onto one hard drive for people and what it is is basically you send me a hard drive I'll fill it up with the data that I have downloaded over the years the most important of that data and then ship it back to you that's really the essence of the offer we're gonna go over all the details here today now before I get into everything about the archive I want to reiterate some things that I covered in my natural law presentation ok and the reason that this is important is because first of all this is the most occulted and hidden material on the earth ok the knowledge of natural law the knowledge of the real objective definitive difference between right and wrong behavior is ultimately what is going to really reverse the human condition of slavery and put us on a path toward real freedom now I gave this presentation I believe it was back in 2013 and it might've been earlier than that but basically this was given up in Connecticut ok hosted by my friend art up there and it was really one of the most important if not the most important pieces of information that I've ever publicly put forward ok this is the hallmark of my material and where I started what I started in this presentation covering was you know what are the the really basics that we need to understand before we even get into the actual knowledge and the biggest part of that is we have to understand what the role of knowledge is in our lives okay and this is what the ark drive is all about okay the ark drive is all about getting a wider swath of knowledge and information into your hands for your personal study and edification okay that's what this is all about because a lot of people don't know how to search the internet effectively okay they get they get onto a search engine start typing things and they just they don't know what they're doing they don't know how to effectively narrow things down and to weed through a lot of the garbage that is out there on the internet because there's a lot of that believe me okay so what the ark lets people do is it isn't I'm sorry folks I need a little bit of water apologize for that that rarely happens to me but what the art drive enables people to do is to study all of this material offline you have it on the drive so you don't even need to connect to the Internet to look for things it puts it all in a repository for you that you could hook up to any computer no matter what type of operating system it is and you'll have that data permanently offline okay so you don't need an internet connection to study the material that's on the Ark okay it's right there for offline browsing what at your at your leisure okay so going back to the slide presentation one of the main things that I covered in the natural law seminar was the the requirements for changing the situation that we currently find ourselves in okay you need to change your mindset to do that and to do that you have to have the correct information you have to have all the knowledge the grammar of the three-step process of the Trivium grammar logic and rhetoric grammar is the knowledge base okay then logic means you're doing a filtration system upon all of that knowledge and you're coming to an accurate understanding of what it means and then finally in the rhetoric stage you're outputting it into the world you are sharing it with other people so that they can come to understand what you have come to understand so the role of knowledge plays such an important part in this process as we're going to see here today in this presentation leading up to the arc offer okay so we're acquirements for changing the human condition human beings always say that they want certain conditions to be present both for themselves and their species as a whole such as happiness health peace freedom prosperity etc okay you know we pay lip service to all of these things we say we want freedom we say we want Anarchy we say we don't want the oppression of government okay we say we want equality under natural law but how many people really understand the conditions that are necessary to bring that about in the manifested 3d world how many people have that knowledge okay specific requirements exist for human bringing beings to bring those conditions into the realm of manifestation it doesn't just happen automatically and if the requirements for obtaining those conditions are not met those conditions don't just manifest by magical means to think that it works like that is called magical thinking ladies and gentlemen okay and that's why we have to understand the causal factors that have led to the human condition without that knowledge we are not in an empowered position to create the change that we say we want to see and this is what too few people do you know they describe the prison they describe all the problems they say they want it to be different they say it should be different but then they don't really understand how to make that come about they don't understand the causal factors that have brought us to the place that we are and they don't understand the requirements for changing these conditions and when they hear the answer they often reject it when you tell them the requirements here you have to change your mind and then you have to help other people to change their minds okay this is about doing the actual great alchemical work of internal change and that's what people don't want to hear they want to hear oh I just need to rearrange the system I just need to reform this part of Education or this part of government or this part of the monetary system well it doesn't work like that folks these are all symptoms of an underlying psychological condition in the human mind and heart you know and the requirements for making them changes that change the self and then help other people on an individual basis to change their own consciousness and that's the last solution people want to hear you know they want you to say we need to invent some new device that's gonna make the world a perfect place and there is no such thing okay this is hard internal shadow work that needs to be done upon the self and then we need to reach out to others and help them to go through that same alchemical self transformation that we went through and that's what what on earth is happening is all about that's what the great work is all about moving on to the next slide this is all about hidden knowledge occult knowledge again the occult has been a focal theme of my work since day one okay this is hidden knowledge that is held by only a few people an oligarchical group of what I call sorcerers mind-control sorcerers people who are understand everything there is to know about the human condition and psychology and they have the knowledge of how it all works okay and from that position of loftiness and their knowledge they're creating a power differential in the world because knowledge applied is power okay and they wield that knowledge over the ignorance of the masses that know nothing about how the human psychology are the laws of nature work okay so the word occult derived from the Latin ocultist meaning hidden and that occultus is that adjective comes from the Latin verb oklet re which means to hide to conceal or to keep secret that's all the word occult means it never has meant anything else you know if you just even look it up in in Spanish you know a cult it means to hide okay or hidden very very simple definition people associate it with evil however and therefore they get the wrong idea of what studying the occult means it can be used for the enslavement of humanity if you use it as a weapon if you use that knowledge as a weapon against other people's ignorance but if you use it to uplift humanity and bring them up to the same level of knowledge as you then you are using it for the right reason so it is just a tool and the way that it is used determines what the the actual effect is whether it is used for good or evil occult knowledge constitutes both the knowledge of human consciousness and how it operates and the knowledge of natural law the unn Sene universal spiritual laws which govern the consequences of human behavior okay and as I've said natural law governs the consequences of beings with the capacity for holistic intelligence meaning the capacity for understanding the difference between right and wrong behavior this is why natural law the laws of behavioral consequence do not apply to the animal kingdom except for human beings it applies to human beings and those with at least as complexified of a central nervous system and brain as human beings and those that are more advanced than us because of course anything more advanced will also be able to understand the principles of the difference between right and wrong behavior okay so that's when the occult is hiding okay and this knowledge is not commonly known because it has been deliberately hidden away by the sorcerers of the world if you will the mind controllers the social engineers whatever name you want to give them it's people who know this and know that other people don't know it okay and they do that in order to create and maintain a power differential between themselves those who hold this information and those who don't have this information those who remain ignorant of it okay now I'm going to talk a little bit later about the difference between nations and ignorance okay because we have to understand that distinction and we have to understand we're not a nation' population we're an ignorant population of beings and that's why we're going in to tyranny and enslavement the knowledge of natural law and its operations constitutes the most deeply occulted information on earth which the powers that be seek to keep hidden from the people of Earth at all costs because it's understanding would quote-unquote level the playing field and put an end to the currently entrenched systems of control and slavery on this planet okay that is why they have to keep this information to the extent that is within their ability to do so under wraps and hidden okay but it's not really hidden folks you know this is just an excuse that people make you know it's not them doing it to us it's us doing it to us okay it's the choice to ignore the information of the occult it's the choice to ignore the objective difference between right and wrong behavior and just do whatever the hell we want because we think we can get away with it it's all the the burden rests squarely upon human beings shoulders and we should not try to defer it to anyone else you know in our attempt to justify our behavior and ignorance okay it lies firmly upon our shoulders and we need to accept that and accept that responsibility for changing it okay and when human beings make the decision that they want to become knowledgeable instead of remaining ignorant and they want to turn on a show like this instead of watching some dumb game with some people who are paid millions of dollars to throw a ball around a field and think that that's somehow gonna bring any type of improvement to their lives just because they want to mindlessly follow entertainment letting look folks I'm not saying have no entertainment or fun in your life you know what I mean don't twist my words and and and you know put words in my mouth and say tell people I'm saying things that I'm not okay we all have to have enjoyment we all have to have rest relaxation and rejuvenation in our lives that's not what I'm talking about here talking about the people that make this their personal identity and get all into it you know and like know all the stats and all the players it's like I couldn't tell you anything to happen in football baseball hockey anything I don't pay attention to sports in that way I don't follow it okay I kind of like and appreciate you know sport in general okay I personally like to engage in martial arts in bowling you know I used to play baseball in my youth you know people some people don't know this about me form of entertainment I indulge in as I watch professional wrestling here and there and you know it's like everybody needs some form of outlet for some type of entertainment in their lives I'm not begrudging anybody that what I am saying is most people do that all the time and they get lost in it and they're not making time for true education in their lives they're not making the time the watch documentaries and read books you know and get something like the arc and pour through it and really get it get into it deeply and start studying the material in there okay so that's how we're going to level the playing field is by getting out of the ignorance of the causal factors of the human condition understanding the real causal factors for ourselves changing our own minds and our own lives and our own behaviors and then teaching that to other people that's the great work so nations versus ignorance the two forms of not knowing okay you cannot know something but there's two ways that you could not know it okay so this is this slide is all about from the natural law seminar called the context of not knowing okay so nations from the Latin verb neski are a it means to not know because knowledge was absent or unattainable so literally there was no data that you could actually get in your hands to put into your mind okay you could not obtain it it was not present it was not readily available ignorance on the other hand comes from the latin verb ignore ra which means to not know even though necessary information is present because that information has been willfully refused or disregarded that is the context of what ignorant means it means that the knowledge is present in your environment and you are capable of taking it in and absorbing it and understanding it but you have willfully chosen not to do so because you'd rather be doing other things and watch grown men in tights kick around a ball on on a field okay so that is what we the state that we are in that is the condition we are in we are not in national space the all the information is here ladies and gentlemen and always has been here believe it or not okay it's a matter of us wanting it of us desiring to take it into ourselves badly enough okay and I'm gonna talk about like how easy it is for us today to do this compared to how hard it was for our ancestors to for those who came before us who had the arduous arduous job of preserving this knowledge and attempting to proliferate in what little ways that they could in the ancient world when you understand how people went through trials and tribulations to obtain this knowledge from the ancient mystery tradition schools you know compared to what we need to like open up a device and type a couple of words into a search engine and we're off to the races knowing whatever we want you know it's amazingly easy compared to what it was in the past okay yet we willfully choose to continue to disregard or refuse this knowledge and let me tell you something that puts us in a way worse position karmically when the information is there and we're capable of understanding it and taking it in and we say now am I worried about that F truth okay you know I'm not interested you know I have a party to go to I have movies to watch I have games to watch and play you know not interested okay that's going to bring down heavy heavy consequences upon humanity in general and the individuals who take that mindset all right so moving out of the natural law seminar little sectional section there that I reiterated why is it so important why is this knowledge so important if you didn't get why it's so important just from the last little bit let me go over this I call this reality manifestation 101 this is the real law of attraction this is what the natural law seminar was all about ladies and gentlemen this is what the arc is all about okay see the control class the priests class of controllers whatever you want to call them okay the sorcerers of consciousness the powers that should not be in our world okay who currently have the reins of the human condition of slavery they they have us in an iron fist grip okay mentally and and in many cases spiritually and certainly physically through their order follower control controllers okay the reason that they can do this and that we can't get out of the condition is that they are controlling the game from the level of knowledge which is the baseline of the game folks okay if you don't have the building blocks for how reality works which is the knowledge phase okay everything that comes on top of that is going to be systemic Lee flawed okay and you'll see when I build this the slut this slide out okay what I mean by that now people who have seen my former work may be familiar with this but those who are not you will benefit greatly from this so really pay attention and attempt to understand what I'm laying out here okay so the first step is knowledge you have to gather all of the seemingly disparate pieces of information available to you from a wide and eclectic variety of sources so this is available information level of how reality is built so this constitutes all potential forms of data that may be gathered process understood and acted upon okay these are just the pieces the building blocks this is the first layer of the Trivium the first step of the Trivium process now on top of that we're going to build something else okay because what do you do with that knowledge okay you don't just let it sit around collecting dust you gather it then you have to do something with it so let's move back to the slides the next step of this process of manifesting reality is you have to come to an understanding of what all of that knowledge means through decision-making processes in your mind so the process of processing of available information which takes place within the human mind and becomes the life choices of each individual okay we base everything that we do in our lives on the knowledge that we have taken in or haven't taken in so the decision-making processes that we go through in our mind are either going to be very sharp and on point and in keeping with reality okay our perceptions are going to align to the natural world and to natural law or our decision-making process are going to be wildly off-kilter and inaccurate because we have holes in our knowledge base and that's why they have to control reality from the knowledge level by dissuading you from looking into it or as is within the limit of their power do so to actually hide that information and keep it out of people's hands now the third step of this process is what do we do with it once we have it and then we have come to an understanding of what it means then we have to apply it in our lives and we apply in our lives through our behavior and each individual's behavior is in turn based upon the quality of their decision making processes in step two and that is in turn based upon the quality of the available information that they have taken in so this is the wisdom step of the Trivium the middle step was understanding the wisdom step the third level is what do you do with it are you acting rightly upon it so we either have developed through develop it through the gathering of the knowledge and the processing and understanding of it do we develop wisdom or do we have a lack of wisdom in our lives are we engaging in right behavior or are we not engaging in right behavior because we don't understand and we don't have the knowledge that we need to come to the correct understanding now finally we get a result that is generated in our lives and the result is the consequence that is then delivered to us through the natural laws of spiritual morality through the spiritual laws of morality and this gives us the consequence of what we actually experience in our day-to-day lives and it comes in the form of either order or chaos freedom or slavery okay so the manifested reality means the quality of the condition which manifests in any society is based upon the aggregate quality of behavior within that society this is the law of freedom ladies and gentlemen okay you're gonna get the condition based on the aggregate behavior was the aggregate behavior of the society moral well then you're going to be delivered the consequence of freedom was the aggregate behavior of the society amoral well then you're going to be delivered the consequence of slavery it works unwaveringly flawlessly like that in all times and places for all eternity and if we don't understand that we do not understand how reality is actually built and manifested in our lives this ladies and gentlemen is the real law of attraction the real laws of how creation delivers to us the consequences that we must live within based upon the quality of our collective or aggregate behavior you what you are seeing in this very one slide is that practically the totality of how the entire control of this planet works because the control system the control class the sorcerer's of consciousness the mind controllers the social engineers all work from the limiting of that very bottom base block down there called knowledge they have to keep the knowledge of how things really work out of the human mind to the extent that is within their capability to do so and they don't even have to work that hard at doing it folks because most of us are just willfully ignoring it we're not striving for it a bit we're not making the time to do it in our lives okay most of us couldn't be bothered okay and that's why we remain enslaved in the aggregate the condition of humanity is still slavery because people don't understand what I laid out there in that last slide and don't align their behavior to that understanding okay so that's the real law of attraction that's not some New Age bullshit variant that they're teaching you in all these all you know spirituality classes where oh let's just meditate our way to Nirvana okay you know and uh like Yoga is about like you know just putting the body in good shape etc okay all New Age nonsense this is the real law of attraction not the secret version of the law of attraction this is a real true secret in the form of oak halted version of the law of attraction that's how our reality is really manifested okay so that being said let's get into what the Ark is all about okay and why it's important it's important because the depth of our knowledge is what is acquired not just skirting the periphery or delving into the shallow water the depth of knowledge that is required to repair the human condition is ultra considerable okay it's this isn't something that you're going to like study in two hours and get and understand deeply you have to study this for years okay and you have to arm yourself with the correct information it's not about how many books you read it so about whether you read the right ones you know it's about gathering the sources of knowledge that you need from the right sources okay and most people don't know how to do that that's why I've helped people take a shortcut in this regard that doesn't mean I can understand it for you I can't process it and understand it for you you have to do that but the shortcut that I'm allowing you to take is at least I'm helping you to gather the information that you need to understand all right so a quote that really very very well describes the human condition right now okay was by the British poet Alexander Pope in his essay on criticism he said a little learning is a dangerous thing drink deep or taste not the perience spring their shallow drafts intoxicate the brain and drinking largely Sobers us again fired at first sight with what the muse in parts in fearless youth we tempt the heights of Arts while from the bounded level of our mind short views we take nor see the lens behind but more advanced behold with strange surprise new distant scenes of endless science rise absolutely magnificent poetry first of all okay secondly what he's saying is so ultra profound okay because he's saying if you're going to just skirt the periphery and drink of the shallow drafts of the of the spring of knowledge the perience spring don't bother at all why bother just just you know your only going to do yourself and humanity a disservice because you're not going to have proper understanding by just taking in a little bit of knowledge a little bit of learning okay you have to go deeply into it to understand it in all of its detail and complexity okay you know and you have to get all of the data that you need you have to assemble it all not just little bits of it because then there's holes and gaps in your knowledge and you're not gonna understand what it really means or how it really works okay and he's saying when we're in our youth you know we tempt the heights of the Arts you know we think we're gonna reach the height of knowledge okay but really we're operating from a bounded level of mind with with short sighted views we don't see how far we need to go to really get the knowledge that we need okay but when we go to those more advanced levels when we go those more advanced vistas of knowledge then a whole new scene of endless science opens up for our eyes it's absolutely amazing and totally on point with what I'm trying to convey that the Ark Drive makes available okay and when people tell me when they ask me mark what is the one thing that you know you think people could do to really you know really change things well first of all it's understanding natural law secondly it's really deeply understanding the occult and one of the ways that you can do that is by getting the art drive okay the one of the things I tell people that is so lacking is completeness of the picture okay this is the thing that I think is lacking more than anything else I see all these researchers I see all these people who say that they want to make things better and their knowledge base is always lacking in some form or another they haven't gone deeply enough to understand how things really work and whatever given area of expertise that they're delving into okay the Ark drive will help to you know level that playing field so to speak it will help you to get what you need as far as the knowledge is concerned to really understand in a deeper way and you have to invest the time folks this is again a themes coming up on these first three shows back ok desire drive or absolute persistence okay tenacious --mess okay and then sacrifice time and sacrifice are going to be required okay we have to put the time and effort in this isn't something that just is an automated magical process now what will happen that seems automated is you start delving into this stuff you are going to practically be thrown from one topic to another almost automatically okay you're gonna understand one thing and then the next thing that you're gonna say well what do I need to understand next and it's gonna be revealed on - it's gonna be shown you practically in a synchronistic fashion okay this is how it happens for almost everybody that goes really deeply down the path of knowledge okay and you can't get you know just to reiterate here you can't get stuck in the knowledge okay it's not about just taking in more and more and more and more and more endlessly this is where I got stuck at a point in my life okay I was stuck just taking in all of this knowledge not doing anything with it you know thinking oh I just have to do is keep learning more I'll learn more I'll refine my knowledge and understanding and I'll just keep learning more and more and more and more and I was driven to do that because of the place that I had just been involved in namely the dark occult that I had gotten involved in myself you know when I understood this is what was really controlling the world at a base level you know it drove me into almost an obsession of seeking knowledge about how the world was really run you know and what were the solutions to fixing it and then I almost got stuck in that knowledge and and he's almost forgot this isn't about just taking in a knowledge it's about what we do with it you know taking in the knowledge is only the first step we have to understand what it means in a deep way so that we can then put the word out to other people and help them to understand you know that's what this is all about it's helping other people come up it's not just you being up here and everybody else being down there that's what the sorcerers of the world are doing okay we need to be up here in our knowledge with where they're at but then help other people to come up there as well so then nobody can use this knowledge as a weapon that can all people with it so Alexander Pope brilliant brilliant you know allegorical poem here about how you really have to go deep into learning or don't bother at all you know and that takes time that takes persistence that takes patience that takes sacrifice in many cases ok so this is a great poster for the Ark Drive they my friend Brett made and it's a the amazing repository of knowledge get the whole picture that's what this is about folks it's about developing the whole picture with no holes in your knowledge base so here's what the Ark comprar is comprised of 1,800 video files 8,000 digital books and over 20,000 audio files from my own personal archive of research and data ok it goes on a 1 terabyte hard drive one terabyte or larger I'm gonna go over all the specs I'm gonna show you an arc okay we're gonna plug one in and you know show you what's on it ok so you can get more details at what on earth is happening calm slash Ark that is the website that is the page to go to on my website I'm gonna show it to you okay let me come out of the presentation briefly you can keep it on the you don't have to exit out you can keep it on the laptop and let's go to the arc okay so there's a tab on the website arc right here okay you could either click that or you can click this button here on the left hand side that says get the arc get the whole picture okay I'll click the tab up here and this is gonna describe the arc to you okay so you ship a one terabyte hard drive to me I felt with information and ship it back to you it's that easy okay then you'll have at your fingertips all the information you need to understand what is happening in our world all in one place no need to endlessly search the Internet okay so my friend Mike his actual name is Mihai he went by the Americanized version of Mike back when I met him but my friend Mihai from Romania now lives in the United States said to me at one point mark I would really like to go through some of the research that led you to understand all that you have come to understand because I recognize you as a knowledgeable individual and I respect you for that and he said would you be willing to take my hard drive here that's empty it's a one terabyte hard drive that he had just recently purchased I think this was back in 2009 they were pretty expensive back then now I'll show you that they've dropped down to about $45 you know even under in some cases $45 back then they were at least a couple hundred dollars to get a terabyte USB connection arc USB 2 or 3 and he had a drive he gave it to me and he said you could just fill this up with what you think I need to understand the best information that you've gathered like you know since you've been doing this type of work and I said yeah sure you know I said you have to give me a couple months you know and that's how long it took I literally sit sat down I'll probably show people one day I have archived all of the data that I've been downloading since I've been online onto like DVDs and blu-ray discs ok and I have like 20 bags filled with data literally like disk bags that hold like you know 200 discs each like the bags I have like 20 bags of those filled with data ok and so I went through all of them you know put one disc at a time into the end of the computer into the DVD drive or the blu-ray drive and just went through them and you know started taking things off and you know putting them on this 1 terabyte hard drive and then you know organizing it into categories it took me like something like three months you know I just sat in the basement of my old place for like day after day just you know loading up this one terabyte hard drive and being selective about it trying to pick some of the best material that I had downloaded you know choosing ok I'll put this on no I won't put this on that's just you know secondary or ancillary you know and I went through you know everything that I thought was the most important material filled it up to the brim gave it back to him and you know he was just you know amazed you know and then he's like why don't you do this for some people you know and I considered and I'm like yeah that's not a bad idea you know maybe other people would want this so I made a copy of it for myself and held on to it and I started asking people would you be interested in something like this and some people said yeah I want that took me up on it and that's how the Ark offer came to be okay so to get this to start the process I'm gonna actually do it right now okay there's this form under here that you just fill out that's all you really need to do to get started and then you could print it out or save it to your hard drive okay so it says here to read the section completely before you use the form please do so don't give me a hard drive in person this isn't an in-person offer okay you need to do this through the mail from wherever you're from through not the mail but through a private carrier as you'll see okay from wherever you are from it can only be received by following my shipping instructions now look I've been doing this for like ten years folks okay so I've learned just about everything not to do you name the thing that could possibly go wrong with sending a hard drive back and forth through a carrier service okay and it has occurred it has happened okay so everything that I'm going to tell you from here forward I'm speaking from direct first-hand personal experience not conjecture okay and there's so this is why I want to help people to understand there's a reason for everything that I'm going to show you here and I want people to see this video as an instruction manual when people ask me what should i do what should I not do I'm gonna refer them to this video and show you how simple it is you know people have complicated this in every way imaginable folks they have done every possible thing that can be done wrong wrong hard drives have arrived completely destroyed and that is what I don't want to see happen because that's that's money that's time that's effort all wasted all down the drain you know we have we have better things to do than waste our time okay you have better things into the waste your time and I certainly have better things to do - what then - waste mine so the there's some pretty strict shipping instructions that I want to go over and I have all the material I'm going to show you an arc Drive okay I'm gonna show you what you need to pack it up I'm gonna show you the right way to pack it okay and people may find this boring they may find it superfluous that's okay you know this is also about taking the time to do something right okay so like Alexander Pope's quote about like if you're not going to bother with going deep into the knowledge don't bother at all right you know I want to go to another thing that like a couple of people in my life helped me to understand and they kind of almost gave me my my work ethic you could say and one of them helped me to really develop a deep appreciation for knowledge in my youth okay before we even continue with the instructions here with this form I want to briefly tell a couple of anecdotes about this the first is my biological grandfather on my mother's side Louis okay he once said to me take your time and do things right because if something is worth doing it's worth doing right okay so don't rush when you're doing something focus focus in on it okay so he was a mail carrier for the Postal Service later and he was a carpenter also a veteran etc okay and he was a phenomenal individual like probably like the person who had probably the most impact on my youth growing up okay a great masculine father figure male figure in my life couldn't ask for any better and his whole thing that he instilled in me that I took away from my relationship with him is if something is worth doing do it right and do it to the best of your ability okay he tried to instill that in me from when I was young okay and I carry that with me to this day right don't just do it to rug go through the motions try to make it the best that you can make it I think people see that in the quality of my work or at least I hope they do okay I don't just skirt the periphery of things I try to do them nicely I try to do them with a good aesthetic I try to do them well and completely and I try to do them in a way that people will appreciate and understand okay so I think the same respect should be given back both ways in for this offer I'm offering something that I did over you know to take a laborious effort to do and it still does each week you know I have to take these drop boxes unbox them you know connect them to my personal computers use their resources to copy the data that box everything backup nobody else does this for me folks I don't have a team doing this for me it's not like we have that many people here okay people come help with the show my assistant helps me with other things a preparatory work and it's all highly invaluable that help that I get from them but it's like a lot of technical help is not what I have here a lot of the technical work falls to me okay and I do all of this personally with my own time every week okay and I go and take them I walk the packages down to the shipping office and go and take them okay so that's why I I want to help people to understand part of what I do each week to do this work okay and I I would like there to be some mutual respect for the offer you know now another individual as a little continuation of this anecdote that really instilled something precious in me when I was young was one of my teachers okay now I don't know if he wants his name said because I you know I I haven't kept in touch with him but he was I was admitted into a program when I was young because of teachers early on in my grade school years saw that I was heavily heavily bored in school that the things that they taught came very quickly to me and then I got bored very quickly and I didn't really act up or act out but I just I I i sat there without attention and it like even if I was called on I'm like yeah I know that and I answered and they just knew I was horribly bored okay you know it's not like that for everybody I'm very blessed in that regard to be gifted with a mind that works like that okay and one of my teachers called my mother into the office into the school office and my mother was like aw is my son in trouble is he acting up or something she's like no your son's very much more advanced than the rest of the class as far as learning and I think he's very bored and doesn't really want to be here because he picks up this stuff like so fast that then he sits there bored for the rest of the time and I'm gonna recommend him for a more advanced program that is takes place out of this school it's a it's a state-run program that is for more advanced students who get bored with the regular curricula and they want to take them in and teach them some other things and this was a great program okay one day a week I went to a different school every week from when I was in first grade through eighth grade and this other program which was called program for mentally gifted students was a critical thinking class believe it or not I attribute a lot of how I learned and later think by the taking of this this course okay and one of the teachers I had I won't say his last name his first name was Theodore or Ted okay and he just like really really helped instilled what I would consider a reverence for knowledge in me I remember one day he taught computer early computer science and like we learned basic and logo and things like that early computing languages it was really fun okay we like to learn how to write our own little choose-your-own-adventure stories things like that like what you're seeing today with like some of the Netflix movies okay so you know in one of the classes somebody had written some computer computer program and it was on a disk and you know another kid was like writing something on a piece of paper and you remember those old floppy disks the big five and a quarter inch square you know floppies and had the little disk inside and like it had an area like if you touched that disk or like you you poked it the data was destroyed on the desk you know the old floppy disk I mean this is a five and a quarter inch floppies you know I'm telling my age here okay but anyway you know one kid had his loose-leaf paper and he's writing something and he didn't realize there was a floppy drive underneath where he was writing and it wasn't protected and he right through the paper and onto the his pen hit the the the disc the exposed part of the disc in the hole and that disc was shot you know and he didn't like you know the teacher didn't like go nuts on him or anything he just took the disc he showed people what happened because he was a little careless and he said just try not to do that again because you know somebody had written something out of their own creative effort on to this disc and that's a piece of knowledge that's now lost you know and he and just in doing that just in in showing his care for the knowledge that was on that disc like it made an impression upon me you know and he was explaining like we've come such a long way and how we preserve data like you could have a book on this disc practically okay you know they didn't hold that much back then compared to what drives hold now you know I just got somebody just sent me on the tech needs list a 12 terabyte hard drive I want to thank the person who sent that out it was so needed I've just made a backup myself of everything all the material here for what on earth is happening it's gonna be put in a safe at a heavy weight safe at a remote location and the person who got that from me made that possible so thank you because I don't have an off-site backup and this is the first time I'm doing that and that's what that drive was for you know we have 14 16 terabyte hard drives now you know imagine how much data that is you know that's a lifetime of learning and more it's multiple lifetimes of learning okay a one terabyte drive is more than a lifetime of learning so you know my a former teacher Ted you know thank you for helping instill that that you know sanctity of knowledge I would call it in me and the other students that he taught I'll never forget him and never forget you know that he taught me to be like that when it comes to knowledge okay so just continuing with this the the arc instructions aren't negotiable okay I have to be hard lined about this folks I'm sorry but you have to understand my time is extraordinarily tight and it's it's very valuable to me and I have to do things in a streamlined way or I can't do them at all okay so I know get all nuts about this mall mark is this and that and stick or for this it's like folks you got to understand it's just me and then there's thousands of other people who want to compete for my attention and time plus then I have actual work that I have to do on I'm on deadlines you know people don't understand this when they're not a public figure or speaker or don't do this type of work you know they're like oh yeah it has endless amounts of time he doesn't work you know work a regular job you don't understand how tight my time is okay and how much under pressure and deadlines that I often em okay so it's like this is about respect for other people's time that this offer is a lot about respect okay and I'm gonna go into that before I finish the presentation for today okay but there should be mutual respect I'm respecting the person who is taking me up on the offer and the person should be respectful of my offer okay so to get the shipping instructions we fill out this form I'm gonna do it here live okay so let's fill it out all right so I'm gonna put in okay Marquette what on earth is happening and I'll take my number out of there I have to put in a phone number I'll fill in a fake one it doesn't matter so here we go I'm gonna hit request arc shipping instructions okay so that takes you to this page alright and it says thank you for your interest in the arc drive your contact information has been successfully submitted no email will be sent to you okay very simple all that does is put your contact info in a little database so that you know if I need to contact you if anything goes wrong with your drive I have that easily available and retrievable for me okay then it says click here to download the arc Drive shipping instructions in PDF format I'm going to click that it's going to open up the arc Drive shipping instructions now we're going to go over this I have a local copy okay so now let me just explain to you what you could do here I'm using the Firefox browser I prefer it because it's open source free open source software okay I think it works fast I like the rendering engine compared to other web browsers so if you're using that generally you get this interface okay and basically you can do a couple of things here you could print a document from there this little icon right over here okay you could hit print and then you can click this one to download it that'll download it right to your hard drive okay and then you'll have it permanently you could open it up on your hard drive whenever you want so I've already done that okay and I'm gonna just move over to it so we can I can start to show you the instructions I am gonna go through this whole document okay so the first thing it says on the document is pay attention take your time and focus all right so I'm trying to put people in to an alert mode okay that be present present moment awareness okay be here now so important it's one of the steps of a cult initiation okay we have to focus on the task at hand if you want to do this and you think it's worth doing take the time and the focus to do it right okay so you put yourself in that mind mind frame okay read all the instructions completely and follow them exactly or you will not receive the arc data so a lot of people have been not a lot I would say a percentage of people have been disrespectful regarding the arc data not all of them but a smaller percentage has been okay and when you ask them respectfully and politely to do something the way that I want it done for my schedule okay and to protect their property okay because I can't tell you how many of these have been destroyed on shipment because people don't do it right okay I don't want to see your data destroyed I don't want to see your property destroyed okay you're shipping it something off in a very far distance and you know how like some of these carriers handle stuff man I mean let's be real okay a lot of these people they throw stuff they don't have respect some of them do some of them are very good people I know I found some family members of mine work in the shipping industry okay some of them really take pride in their job but then you have that you know element that are within these shipping companies that they just it's like this ain't my stuff I throw it you know who cares leave it out let it get stolen you know you get you got to realize you have all kinds of people in different levels of consciousness working in places like this okay so I'm trying to optimize your chances for having a smooth experience with getting the arc Drive I want to see you get it and I want to see you learn from it okay so I have extremely valid reasons for being so specific with the following instructions the foremost of which is per to protect your property so I ask you be respectful of my offer and follow these directions precisely please do not waste my time and yours by taking this offer and these direction please do not waste my time and yours by not taking this offer and these directions searly seriously these shipping instructions are not negotiable this shipment system when followed correctly works perfectly for me and for my schedule do not write to me to ask if you can receive the arc via any other means other than those specified in the below instructions it does not matter if you have problems getting your local shipping carrier to comply with these instructions these instructions stand no matter what and no exceptions will be made for any reason at least from me if you take me up and on this offer okay my offer is non-negotiable if you get the arc from someone else you're free to do so but if you request it from me I have specific ways that I want you to send your drive okay and again the reason is I've done this more times than anyone else and I know what works and what doesn't work and I've had people do it the wrong way and invariably it is met it gets messed up and their drive gets damaged or lost I've had people from the United States have their drive damaged and lost I've had people do everything you could possibly imagine I'm going to go through some of them okay of things not to do and you cannot imagine what people have done see part of why I want to emphasize this folks just as a brief aside okay is what the other thing that I wanted to tell people that a lot of people don't have not not just doesn't know they have completeness in their knowledge okay they don't have common everyday life skills not don't they have technical knowledge right on how to do things technologically they're technologically illiterate but they are very life skilled deficient I have seen this particularly with dealing with people who are trying to take me up on the art Drive offer a lot of inadequacies in general life skills like packing things for shipment or taking things to a carrier you know or dealing with people I mean it's like it's it's the the commentary on it is quite sad believe it or not okay and I'm not saying that to just insult everybody out there many people do this right and they're there they're arrogant about the way they go about it you could see the respect that they have you can see that they took the time in the effort to do it right okay and see part of this is like a little it's a little test part of it is like you know Who am I giving this to I want to know a little bit about who I'm giving this to and it's like part of it is can can you take something seriously enough to follow a little bit of instructions and do something right the way someone respectfully asked you to do it okay a lot of people can't most people can okay well you'd be surprised I mean I've gotten things I'm gonna tell you how I've gotten things and you would be shocked and appalled OK at how things have arrived here and again most of the time when when people do it wrong their property is damaged and again I don't want to see that's the last thing I want to see happen because these things aren't like super cheap you know you got to invest a little bit of money from your resources into getting this offer to you so I want to see that maximized I want that value maximized okay so I have to put in here I have to be hard-nosed about it if you request any alternative shipping instructions from me the Ark offer will be permanently revoked from you I'm not interested in you do suggesting to do it different I have asked to do it like this for very valid and specific reasons which I'll be getting into and I don't want suggestions on how to do it different don't ask me if you could do it different the answer is no not from me anyway you find someone else who wants to give you the data that's fine you could do it from them however you want you can negotiate don't negotiate with me about how to do it I'm too busy for that okay I have to have the the directions that I have meticulously laid out followed and then you'll get the arc from me okay if you do anything I've asked specifically asked you not to do in the section coming later entitled things not to do in these instructions your drive will definitely be sent back to you empty I've only had to do this a couple of times folks I thought people have only blatantly ignored instructions to the point where I felt that it was so disrespectful that I had to send a couple of hard drives back blank and say please follow the instructions and then I will put the data back on your drive and then I believe one out of the couple of people that I've had to do this with has sent back and done it right and one didn't bother okay it happened that rarely but I will do it if someone's that disrespectful toward the offer I will send back a black blank hard drive and I just I don't want to see that happen okay you know you got to be pretty bad about like specifically doing things that I asked you not to do to have that happen okay so let's continue here's the things you're going to need very very simple it looks like a big list it people overcomplicate this it's so simple it's almost stupid folks okay you need an external USB three hard drive ok I'm going to show you one right here ok this is a simple external USB 3 hard drive this is a very popular one that a lot of people use ok it's a wd ok there's the USB 3 connector all right I'm gonna show you all the components of of all of this stuff ok very simple there's your USB 3 connector ok that's about how big it is the knowledge that everybody needs to understand in the world fits on one of these puppies ok look at that that's it ok to show you comparison to a cell phone here's my cell phone here's an arc Drive smaller than the cell phone okay look at that a little bit wire but but smaller in the vertical direction okay that's it and this is a two terabyte that I have here I believe okay alright so you need the cable that came with the drive okay don't assume that I have the cable you include the USB 3 cable okay so here's the USB 3 cable okay very simple I'm gonna put it in the end of the drive okay there we go now I am gonna plug this drive in and I'm gonna show you what's on it okay but I'm gonna finish going through what you need all right plug it in right now actually okay so you need an appropriately-sized good quality heavyweight cardboard shipping box I just so happen to have one right here also I printed out these instructions for my reference okay I'm gonna keep them right here because I'm gonna need the last page okay now here is my shipping box now look at this so it's an appropriately sized shipping box I'll close the edges to just show you what this is gonna look like when it's all packed up okay so here here's the hard drive here's the box obviously the box is a bit bigger but it's a it's an appropriate size okay it's not like gigantic box I've gotten archives I swear to god folks I've gotten archives in boxes this big I'm not kidding I swear to God I have gotten archives wider than my body like two of my body wide okay that's that's where I've big art drives have shown up okay so you know you don't need anything bigger than this and when I say heavy weight cardboard let me show you the difference because okay it's gonna be like kind of a funny comedy section here okay this is cardboard okay look look at this look at this look at this sucker okay this is car this is a cardboard box take a look at it I know it's a you know very alien object here but this is like heavyweight cardboard look at the corrugation here okay it's a thick piece of cardboard that's that's not like cardstock you know this isn't like like heavy printer paper okay it's a car it's a cardboard box now let me explain why I'm going over that like so heavily okay apparently there is no such thing as cardboard in the entire continent of Europe anymore does not exist on the continent okay every box I get from Europe or just about any foreign country anymore they don't have this material anymore it doesn't exist anymore some hell okay this is part of agenda 2030 this is part of the Club of Rome eugenics agenda okay where oh those those damn pesky humans killing all the trees we can't have them making a sturdy cardboard box you know so here I swear people have sent look folks I'm gonna just grab this I keep these over here in case I have an allergy issue okay or go into any kind of a sneezing fit this is a tissue box this is a you know tissue paper okay all right tissues okay look at how thin this is okay this is like some thin garbage okay dense look at how easily it dents okay all right this isn't cardboard yet this is what people send me for the protection of a USB hard drive okay an external USB 3 hard drive okay your drive you send your drive in this it is going to be annihilated it is going to arrive to me destroyed completely if you send it in this quality of cardboard okay it's so-called cardboard this isn't cardboard this is cardstock okay this is cardboard this is cardboard okay so if you don't have access to actual cardboard because you live in the European Union okay go online and order from the United States or some other country where they still sell it a cardboard box okay because when I asked you to ship it in a heavyweight cardboard box I mean a heavyweight cardboard box I don't mean a tissue paper box okay so you need good quality bubble wrap for the padding of the box alright so let me show you what consider good quality bubble wrap the padding of the drive inside the box very simple this is all it is it's just it's just simple you know medium size bubble or small size bubble bubble wrap okay you don't you don't have to send it in the big huge thick bubble wrap okay with the big huge bubbles you can if you want no problem I'll take that okay this is a simple packing bubble wrap okay I ask that it be the only packing material and I'll get into that in a moment why okay so you get you got your box you got your bubble wrap okay you're gonna need two labels okay you're gonna need a prepaid shipping label to get your drive to me that's one of these and you're gonna need from the same carrier okay then and now this has to be from a private carrier service I don't accept the arc from the postal service from any country you can't send it through the US Postal Service you have to go through UPS FedEx DHL something like that okay a private insured carrier because I've had issues with the Postal Service especially when any kind of insurance claims have to be made they take forever and a year in doing that it's very bureaucratic and I don't want to deal with that okay and I've had problems dealing with that which is why I have discounted the Postal Service with the arc Drive because it's someone else's property I use the Postal Service when I send out items from the gift store because if it gets lost that that's that's on me and shipping and then I would just ship it again okay I don't want people's someone else's property getting lost and me having to fight the post office to get the insurance claim okay that's why all insurance claims are in the hands of the person who sends it all tracking is done by them we'll get into all of this okay so you need two labels two shipping labels one for the direction from you to me one for the direction back from me to you so you just reverse the addresses that's it okay and you're gonna put one on the outside of the box you're going to put one inside the box very simple okay nothing complicated alright if you're outside the United States so you need the two labels if you're outside the United States you do need to sign customs forms to get the the box into the United States and then you have to include in the box customs forms for me to put on the box to get the box back to you okay so you need returned customs forms if you're in a foreign country outside of the United States okay if you're in the u.s. you don't have to worry about customs okay so I asked for one sheet of paper with your all of your information printed on it and on that paper I want your I'll get into what that is but it's a personal information name address phone number email etc okay then there's a donation in the form of cash personal check money order okay in a separate secure envelope okay I've put a donation inside this envelope we'll put that in the box okay and then the last page of the arc Drive instructions which is a checklist which just goes through all of the items to make sure you did it all correctly and then you could check each box just say okay I absolutely did it all correctly I'm attesting to that I put it in in the box okay so we're gonna do all of this and show you how how this works okay that's all you need it's a very very simple process so the shipping directions and I'm going to show you what's on the arc okay as a matter of fact let's do that now and then we'll get into the shipping instructions okay I'm gonna switch out to the finder here and show you what's on the arc drive okay so I've plugged the arc drive in alright and let ya full screen would probably work well here okay so I'm gonna go into the arc and you see it's very neatly organized at the root level of the drive okay and it basically just has three folders okay and then a document that says recommended software so this just shows you the software that I recommend for viewing the files on the arc okay basically it's like VLC player for playing video I tunes for playing audio mp3 files and Adobe Reader for reading PDFs and Adobe Digital Editions for reading ePub documents so what I'm gonna do is go into each folder and just show you some of the contents that's on here so I'm gonna double-click into the audio folder and it'll take a moment to come up because there's a lot on it so these are all individual folders of people or shows ok or topics ok and there's audio files in all of these individual folders so I'm gonna scroll through and you're gonna see how extensive it is yep let's make it fullscreen here ok I'll minimize my dock also ok so you could see all of these are individual folders full of audio files ok so let's go into one that I think might have some good data on it ok here's um an old podcast called truth love freedom which I used to listen to ok and here's a bunch of the episodes of the podcast in mp3 format I'll switch to column mode you know so you can see that's just one folder of audio on here ok you know you could go in here here's a you know stuff by Ron Paul audiobooks here's the book and the Fed ok you could go into another folder let's say here's some of stuff and mama knows works and I only have a couple of things by him on there you know Stewart Swerdlow Sean David Morton Robert Bauval you know and basically there is just a ton of material here's interviews from Michael - sorry on you know letona those lectures from Manley P Hall you know just an absolute ton of Manley P Hall information I broke it down into further categories you know in some places there's the art for all of this you know you get the idea ok it's endless ok and this is just audio ok so what on earth is happening calm slash art that's the you are well you could sign up to get it right there you know you could fill in the form get the shipping instructions and you're off to the races okay so let's go into Books section okay again I'll show it by folder view here alright here's all of these are all topics ok topics and authors all right so let's for example I'll go into Oh show here alright here's a bunch of books and documents from Osho and these are all individual books ok so let's see how about how about if we go into Richard Wetherill this is a very great author on natural law that I highly recommend ok and I'll just show you these are all on many of these or complete books most of them are as a matter of fact here's his book be right or go wrong it's in PDF format that's gonna open in preview I'm on a Mac right now ok you can also if you have Adobe Reader you could open it in that or any other PDF you or you happen to like ok so and I'll just I'll just scroll through it a little bit okay this is the entirety of the book ok I'll bring it up in full screen here just to show you you could view it side by side like a book and page through it ok you I think people get the idea here it's it's a wealth of information ok so politics and conspiracy I mean tons and tons of books in this section you know all complete okay so here's even some by the enemy okay here's the grand chessboard by is a biz neeraj in ski who died last year okay we like that you know we have the enemies white papers and documents in here you know there's there's it's anything you could possibly imagine is on the ark okay and it's full books I mean look at this look at this book about you know globalism basically okay so let's open another one there are some ePub files not many because at the time I was collecting these you know PDF was really the main the main format you know there's some david icke material on there Eustace Mullins G Edward Griffin you know you you name it it's out there okay and you know it's all digital you know so you know a cult science dictatorship this is a pretty interesting book about mind control so you know and again a lot of these are whole books so 8,000 books total on the ark you know you could go through this forever basically okay so let's look at videos and maybe we could play a couple of these as well alright so there's about eighteen hundred videos on this okay it just scrolls and Scrolls and scrolls and scrolls and scrolls okay so let's see here's one called Food Matters open that up [Music] turn up the volume there and you know we could scrub through it [Music] symbol of the highest standard of living in this country today [Music] these products come from farms and ranches despite distance and season they are the result of a miraculous agriculture maintaining farm-fresh quality in two trials this doesn't mean to say that the drug company can't do lots of other trials in which show either general qualities published those more on here here's some things from the energy from the vacuum series which I found was a very enlightening series with Tom Bearden and again you know to even show you what is on here would take hours upon hours upon hours ok so this is an interview with Thomas Bearden about free energy and again we you know we have limited time to go through everything here so I'm just showing you basically some of the contents of it you know tons of 911 stuff you know there's some new-age stuff on there there's a lot of a cult stuff I have a couple of episodes of ancient aliens they're you know Arthur C Clarke's mysterious world you know I mean you name it you know it's it's on here here's some stuff by Carl Jung but over smaller resolution there of scales pretty well [Music] here's a great documentary called century of the self something I highly recommend people to check out we all have saw which we never knew we had they are too uncomfortable - incompatible with our and our self to be remembered yet they are often disturbing rambling under the surface nag lover in a volcano Riveter boom the president was felt that the Conservatives are quietly feeling good was was crucial because yeah they became persons so I think you guys get the idea you know I mean just look at how much these videos scroll and scroll and scroll and scroll and scroll okay so this is years upon years upon years of data gathering you know all on one drive okay broken down into categories and the audio in the book section and then all the videos in the in the video folder you know it's all searchable to you know you say you could search the drive for anything that you happen to be looking for okay you know you or you could just look by list you want to look for a cult information okay you could just go here occultism and esoteric knowledge and there's no end to the books that are in there alright so not to belabor this that's the art drive folks you know it's it's it's what I say that it is okay and that's what I'm making available because I think the best way of leveling the playing field is to proliferate this knowledge out there so that it's not something that remains hidden and it's not something that remains you know like this taboo these taboo subjects or topics we have to get it all into people's hands and then they need to research it voraciously so they can come to an understanding of it in their time you know this is part of why the world isn't hasn't woken up they haven't taken it in enough knowledge like this they certainly haven't built it into a you know aggregated databases like this okay and this is what I consider myself an information aggregator I bring it all together I assemble it I put the seemingly disparate pieces of the picture together for people this is one of the biggest compliments I always get okay is that I help people to connect the dots and to see the big picture and that's what the arc will help you to do okay I'm going to go back to the instructions okay so we have all the things we need assembled right here okay I'm gonna actually disconnect my drive cuz I'm gonna pack it up okay so let me get it disconnected from my computer all right okay so going back to the instructions okay so I'm gonna go through it and you're gonna watch me pack this up okay and I'll show you how to do this effectively so it gets to me safe and it gets back to you safe okay send me an external USB 3 hard drive with at least one terabyte of free storage space okay let's assume this is blank I believe it's a 2 terabyte drive okay the drive you send must have the ability to be attached to a computer via a USB 3 interface that's what this cable is you may send a standard hard drive hard disk drive an HDD or a solid-state drive an SSD as long as the drive you send is an external USB 3 drive people ask me about USB see this is the new format you can send a USB C Drive just make sure that you're sending me a cable that can plug into my computer via USB 3 okay so it could be USB C 2 USB 3 ok but this end you have to have on there this blue end this rectangular blue end that goes into my hub that I use the copy that drives okay so I'm not my computer's don't have the USB C they do but I don't use them for the arc because I copied the arcs on on a USB 3 hub so just send me if you do have a USB C Drive you can send that just give me the USB C 2 USB 3 connector cable we're good ok so include the cable the king with the drive don't assume I already have a cable that will work with your drive I will reformat all new hard drives to exFAT format now for people who don't know what exFAT is there's a it's very simple it's a format that covers all operating systems basically ok so you know Windows has NTFS Mac has a PFS and the older Mac Mac file system I can't remember what it was called I think was Mac OS extended okay so basically exFAT is just a format for all computers it will work on Windows it will work on Mac and it will work on Linux that's what this drive here is formatted to okay it has the exFAT format so you could plug this drive into a Windows machine and it'll work just like it did here you could plug this into a Linux machine and it will work just like it did here on my Mac on my desktop okay so I'll reformat all new hard drives the exFAT to be cross-platform with Windows Mac and Linux operating systems I will not reformat hard drives with any existing personal data on them so for example if you send me a two terabyte hard drive and you have about a terabyte of data that you have on the drive already I'm not gonna reformat that drive whatever you send it to me whether it be Mac Windows or Linux I will use that drive just as you send it to me cuz I'm not going to delete your data okay but if you send me a new hard drive with nothing written to it yet I mean I'm formatting it to exFAT okay your drive must be sent from your home address to my address via a private insured carrier service you cannot send the drive from anywhere else you've got to have the return address when you're sending it to me has to be from your home address okay so you have to send it through an insured carrier service such as UPS FedEx DHL or a similar company I will not accept any packages sent via the US Postal Service or any postal service the return address for the initial shipment must be your home address including your full name okay the external packaging for your entire shipment must be a good quality well padded heavyweight cardboard box not a bag or envelope now folks can I just show you something okay and I swear I'm not lying to you okay I'm gonna take my little donation that I had put in this drive out of it for a second okay this is the envelope I'm gonna use for the donation okay I have gotten hard drives like this in the past before I did these instructions I swear I've gotten a hard drive like this okay hard drive in a letter envelope licked it sealed it up and sent it to me with stay like this in the mailbox totally destroyed upon arrival DOA dead on arrival okay but yet this is what people thought was acceptable imagine this but like they thought that wasn't okay idea to put a hard drive like this in an envelope put some stamps on it and send it to me and that that would arrive safely yeah yeah okay you get where I'm coming from with what I deal with folks on a daily basis do you get where I'm coming from okay and I'm telling you people have done whack your shit than that okay but that's is one of the wackiest that's been done okay so you have to understand this is what I deal with all the time okay so you must pay for okay so you must use um let's go back here not a bag of them use an appropriately sized box we would cover that this means don't ship a small Drive in a gigantic box no need for a refrigerator boxes to ship a little USB hard drive okay you must use only good quality bubble wrap to pad the shipping box and the drive and and the reason for that folks is I just want to like make this clear to make you understand there is a reason okay paper doesn't really effectively Pat a box okay you need something that has cushion to it paper deforms people want to crumble up newspaper and throw it in there doesn't work as well never has never will okay the other thing people like to use is these cardboard styrofoam pieces in addition to being really terrible for the environment it's just it it always explodes everywhere okay I live in cramped quarters I live in a half row home in South Philadelphia I don't have a mansion I don't have a workspace I work in my bedroom I work in my living room I work in my little office that's like a small bedroom okay I don't want to open a box and have it shatter popcorn styrofoam pieces all over the place a lot of times when I'm working in cramped quarters I have fans on you know because it gets hot in here especially in the summer you know and then these pieces go all over the place they go under things I got to go hunting them down it's like I just want to keep it simple you know secondly this works better it's it's a statement of fact a bubble-wrap works better than any other padding material I don't care who disagrees with that that's it's the truth that's how it works okay you use this for a hard drive your hard drives coming and it's gonna be intact when it arrives and it's gonna be intact when it goes back so just get some good bubble wrap okay you must pay for both shipping and return shipping at the carrier's office at the time of your initial shipment okay so that means when you're getting your shipping labels together where did I put mine when you're going to the carrier's office right you're gonna tell them okay you're gonna just tell them I need you know here's all the stuff from my box I need you to print two of these right I need one with my return address and who it's going to and I need the other with their addresses reversed that's it it's not that complicated now let me tell you something everybody tells me oh this carrier can't do it this carrier can't do it they can all do it I've gotten drives from almost every country on earth from almost every carrier okay it can be done you probably just got an asshole at the shipping office that day that's probably what happened okay you might have to go to a different shipper you might have to go back to the same shipper on a different day when you know that asshole isn't working but let me tell you something it can be done okay a lot of people say you know what you're saying can't be done you can't they won't ship a return address label yes they will it can be done the right computers can be pressed on the computer that the carrier representative is working at and he can make it happen okay again most of the time there's you know people just don't want to do their damn jobs and they're assholes and they don't want to sit and listen that you want something that they don't get every day that they don't see every day that you want a return shipping label in the box and you want to put the one that's going to me on the outside it's not that difficult okay you just have to communicate that to the hardhead in the shipping office okay and a lot of times you again you might get draw the wrong person by a lot of the draw on that day okay and you may have to go somewhere else or you may have to go to there on a different day when that person is not working in a nicer person is working but I assure you it can be done okay so you pay for both the you you attach your initial shipment label directly to the shipping box itself and you include a prepaid return shipping label inside the shipping box I will attach the return label to the same box so you don't need a separate box inside of this box I'm gonna put send your drive back in the same box that you shipped it to me and I'm just gonna take the return label out of the box I'm gonna put it over the initial label that's all okay so this allows for shipping tracking and insurance to remain in your hands okay and any insurance claims should anything happen to your drive should they be necessary can be handled by you not me because you paid for both labels in both directions okay keep a record of your initial shipping and return shipping tracking numbers because you alone are responsible for all package tracking I do not keep any tracking numbers okay you can track and show where your shipping where your shipping box is at on the way to me and you could track it after I take it back to the carrier office on the way back to you I don't do any tracking or keeping of tracking numbers that's your responsibility if you live outside of the United States you will need to fill out the necessary customs declarations documents for shipping and return shipping and include the return shipping customs documents inside the shipping box we covered that include your name mailing address phone number and email address computer printed in a plain font on a piece of plain white paper inside the shipping package now I'm so specific about that because you have no idea how people have sent me their name address and phone number folks you know send an email address simple stuff but they have scribbled it literally on like like crumpled newspaper I swear to god people have taken crumpled newspaper and scribbled down probably as fast as they could their personal info and thrown it in the box and it looks like chicken scratch that is barely decipherable okay take your time just print a small thing with your name address email phone number that's it and set put it in the box okay and put it in a plain fun you know we don't need like you know calligraphy fonts that are you know I have to run through an interpreter to understand what the lettering is you know use times or Helvetica something simple okay alright so don't handwrite it for any reason I ask this because people's handwriting is sometimes unintelligible if you don't own a printer ask a local friend to print this information for you or print this information at a local copy center folks see I hope you don't get the wrong idea that I'm being like some stickler or demanding all this stuff this is called common sense this is called common sense life skills and unfortunately like like really look I don't want to insult anybody okay because like 95% of people do do this right okay but you get people who they're sheltered from the world like they've never sent anything in a box through a shipping service they've never wrapped something up in cardboard to protect it they've never printed something out of a printer like this is the year 2019 folks we're in the Year 2019 if you don't don't understand how to pack something up in a box and print a little bit of information out weren't a lot more trouble than I think okay we're in way more trouble than I think the worlds in it I think it's in pretty bad deep trouble okay but again this is about personal responsibility this is about getting involved doing something doing it right doing it respectfully okay that's all all right so include a personal donation from my time and effort you are not paying me for the ark the ark is not for sale this is a free offer of data that has been assembled over years through my you know internet downloading over the years okay and I'm just sharing information that's it freely alright what I asked for a donation for is for what on earth is happening that the effort that goes on here okay that's what the donation is for the effort is to keep me going so that I can get equipment so that I can eat so they could pay the bills here and the bills for what I do here okay so the donation can be in the form of US cash personal cheque or US dollars made to me because you can't make it out - what on earth is happening don't do that I will not be able to cash anything if you sent a check or money order you have to make it out to me mark passio is my full legal name okay you know regardless of what people think of that that is my birth name okay and the name that I can get a check cashed with or get a money order cashed with okay so you know and just put this in a regular secure envelope that you would mail any letter in okay which is what this is all right so I put a donation in there and the secure envelope just means it has some of this like you know pattern there so you can't see what's you can't see what's in there it's it looks Oh peg you can't look through it okay that's it alright so all donations are non-refundable one cent even if you fail to follow instructions and an auntie hard drive is returned to you so in other words just don't do it wrong take your time triple check everything do it right everything will work out smoothly print the ark Drive checklist which is the last page of the shipping instructions and that's that page that I showed you before okay check off each item on the checklist to ensure you've followed all the instructions and include the checklist inside of the shipping package if you don't have a printer ask a local friend to print the checklist for you or print the checklist at a local copy center okay now here's the important part all right we're going to get to your calls in about 15 minutes so I'm gonna wrap this up but things not to do read this very carefully if you do anything I specifically asked you not to do in this section your drives going to be sent back to you blank and we don't want that to happen don't send me these things an internal hard drive don't send me an internal or bare hard drive the hard drive has to be you know in one of these typed housings or enclosures okay with a USB 3 cable coming out the back of it okay that can connect out the back of it so don't send me an internal hard drive don't send me any flash drives or thumb drives okay they're not not big enough for the ark don't send me an as device a network attached storage for those that know what that is I don't accept them don't send them for the Ark offer okay don't send any hard drive with which lacks a direct USB 3 interface don't send any hard drive with less than one terabyte of free storage space and again that means you know if the hard drive says 999 whatever megabytes gigabytes you know formatted that's fine it's a one terabyte hard drive ok we know what that means it doesn't have to say in your computer interface that it's over one terabyte ok if it's a 1 terabyte drive that will be suited to the test I'm going to show you a drive that you should use ok so briefly I'm gonna come out of here and go into my web browser and I'm gonna go to Amazon and I'm gonna yeah I'm gonna type in here 1 terabyte external hard drive here we go 1 terabyte external hard drive ok look at Amazon's choice here it's a Toshiba I get these a lot I would say I get Western Digital the most I get Seagate second and I get Toshiba 3rd ok all of them are acceptable all of them work as long as it's one terabyte USB 3 look at this first Drive $47.99 $48 ok very very affordable this is probably the drive here that I get the most the my passport 1 terabyte from Western Digital ok it works very well ok here's a 2 terabyte for only $60 Seagate backup slim I get this very often for the ark $44.99 $45 hard drive ok works very well for the Ark even thinner than the one I have on my desk ok the Seagate expansion here works very well any of these will work as long as it's 1 terabyte external USB 3 that's all you have to know so any of those will work for the purpose of the Ark Drive ok I'm gonna go back to the shipping instructions ok so do not forget to include the US be three cable that came with your drive do not use the postal service to ship or return ship your drive only ship and return ship your drive via a private insured carrier service do not have a drive ship to me directly from a retail outlet or online store a lot of people want to do this especially if they're from Europe okay I get a lot of people who don't want to follow the instructions from Europe sadly Europe and Canada it's very difficult to get people from those locations to just respectfully go by the procedure that has been laid out because it's very convenient for me they want me to pander to their convenience often I notice that dynamic I'm sorry I have to say it I have to okay I'd be remiss in not saying this I don't know why that's the case maybe it's in the culture okay but I'm just saying this doesn't usually happen from people that I asked from the United States this is my offer I'm willing to do it this way please don't ask me to do it any other way because this works for my schedule okay and it keeps things simple and uncomplicated for me okay and most people from the US they hear that they hear what I'm saying they get there's a connect but when and maybe it's a language thing I don't know but I noticed that Canadians and Europeans are loath to just say okay man I'll do it your way you know they they want to persist in trying to get you to budge and accept it other ways and every time I've done that a problem has happened every time I budge on these instructions a problem happens I have to either spend hours trying to fix the problem myself or give it to my assistant Li who I need working on other things to help me okay so you are taking by not following this and you sending a drive you are taking me or my assistants here at what on earth is happening off work we need to be doing you got to understand how small of an operation this is this isn't some huge gigantic monolithic you know corporation this is all just individual volunteers that do the work here what on earth is happening okay we're not any kind of big company okay it's all done by me and personal assistants that's it all right so going back to the instructions don't ship a drive to me from anywhere other than your home address don't don't don't get your drive first and get everything together and then take it to a carrier office and ship it don't have a buy a drive and ship it to me from a retail outlet like Amazon or some something similar don't ship me a drive from anywhere other than your home address the return address for the initial shipment must be your home address you want me to send it anywhere else after that I really don't care that's on you but I need to know where it's coming from and your name has to be on the return address label I need I don't want to see some company name I want your name to be on the return address label when I get the drive okay I hope people understand that all right don't ship the drive in a bag envelope or cheap flimsy lightweight cardboard for any reason drives have arrived damaged by shipping them this way the external packaging for your entire shipment must be an appropriately sized good quality heavy weight cardboard box do not wrap the box in an external shipping bag for any reason I've noticed that this is some kind of a popular thing with these carriers they have these shipping bags I don't know what maybe it makes the shipping cheaper if it goes in one of their bags you know what happens ok the the the the item goes in the in the bag and then it gets jostle back and forth because somebody picks it up from this end and and it slides to this and then somebody picks up to this and boom it goes down to the bottom of the bag on this end and lateral jostling is the worst way the easiest way to damage a hard drive ok this hard drive right here will take a harder hit in in this direction or in this direction then it will from any of the sides you hit a hard drive from the sides hard enough you're gonna destroy the drive ok that's how the platters and the driver are aligned with the mechanical magnetic arm ok and when if you disalignment is going to be damaged or lost and you want to damage them real fast keep banging the act outside of the hard drive ok on the sides especially ok good because then that lateral jostling is eventually going to dislodge those platters or door miss line them and that's what happens when you put the drive in an external plastic shipping bag it goes back and forth as people pick it up from you know the side of the bag instead of actually lifting the box up with two hands like this okay that's why one only in a box okay again this is thought this is thought through I've thought it all through there's reasons for why I asked for specific details okay don't use any amount of paper or any amount of styrofoam popcorn piece at the pad the Box we went over that do not add any other packing material other than good quality bubble wrap to the shipping box such mature material may shift or deform causing the drive to be damaged you must use only good quality bubble wrap to pad the shipping box in the drive do not put any amount of tape on the bubble wrap padding your drive now I ask this because it's going in two directions so don't tape the bubble wrap when you send it to me I may tape it if I feel it necessary sending it back to you usually I don't even do that because if you do pack it right I don't have to I may put a piece of tape on there okay to send it back to you because that's the end of its journey okay it's going from you to me then back from me to you I don't want it done because when I get your drive and I open up the bubble wrap if I have to cut this with scissors or a razor blade then I destroy the bubble wrap and it's less effective packaging for the return trip okay that's the whole point so only use good quality Bob we wrap don't tape the bubble wrap don't send me away bill or order form okay this is like stuff that I have to stand in line to get processed you want a shipping label or document with the drive okay so you do not want to put a way bill or order form that I have to go get processed in a line at FedEx or UPS or DHL okay that that kills me okay because half the times these places are super busy and then I have to go in there and I have to wait for like an hour to get an actual shipping label for the box that's the last thing I want to spend my time doing I want to slap a label on the box and I want to take it to the office I want to say prepaid drop it on the counter and go okay and that's what I can do with this shipping method okay so it has to be able to be affixed to the box for immediate return shipment waybills and order forms require processing forces me to stand in long lines make sure you tell the company shipping representative I don't want to send away bill or or form I want a shipping label or a shipping document it can be affixed to the outside of the box for immediate return shipping which requires zero processing don't allow anybody else to pack the box for you including the shipping representative don't allow anyone else to pack add to or subtract from or seal the shipping box you have to do all of that yourself okay because I don't want an excuse oh this did wasn't done right the shipping guy did it I'm assuming you did it because I've asked you to do it okay you ship and seal the Box Pat pack and Pat and seal the Box yourself don't let anybody else do that because you're responsible for this okay don't handwrite the personal information I've requested that you print out okay don't leave any personal information out that I've specifically requested that you include a lot of people they don't want to put their email address or they don't want to put their phone number I'm telling you if you want this offer from me you need to fill out your full name your full home address your email address and your phone number if you aren't willing to share those pieces of personal information with me you cannot get the ark Drive from me okay don't send the Ark don't send non-us currency because I I can't go and get that exchange that's also takes a long time okay and often detracts from what is actually sent okay because they take a cut when when they do that so if you're gonna send cash for the donation part only send US dollars don't send euros pounds Canadian dollars or any other foreign currency and don't send money grams they're not very popular in this area of the country you can't you have to go like to the ends of the earth to get these things cashed it's been a nightmare when people have sent money grams I don't want them it's unnecessary a postal money order works beautifully a cache works beautifully and you know a personal check works beautifully so don't send money grams I don't want as donations okay so if you do anything I've specifically asked you not to do the drive will be sent back to you empty I do not want to have to send you a blank hard drive back that will kill my heart to have to do that okay as I've said I've only done it in some of the most you know in some of the situations where the person just didn't listen to what I was asking for okay so just triple check everything if you have questions you can write to me and it request clarification don't ask for any difference in shipping method but if you say I don't understand this can you clarify on this part and explain what this means fine no problem okay and I'll let you fill it out to get my actual address okay if you are your your drive we'll get back to you within two to three weeks often very much faster than that okay I usually don't mess around on this stuff I deal with it quickly okay here's the shipping checklist all of the things in there or are on there so you just check them off one at a time so now let's pack one up okay so I'm going to get the hard drive okay let's pack the actual drive first okay so I like to just wrap the drive like this very simply if you watch what I'm doing here I'm going to lay that lay it on the bubble wrap and just go around somewhat tight yeah I'll try not to hit my mic when doing this folks alright little tight here on the desk alright just wrap it give it a few wraps okay we want some thick padding on it okay when it's wrapped up it should just look like that okay that's not gonna go anywhere in a box this big okay so I'm gonna open up these flaps mm-hmm and I'm gonna turn this down a little bit like this and I'm just gonna shove this into here it's nice and tight toward the sides of the box okay so this can't go anywhere I'll show this to you that's not going anywhere all right look at that nice and tight to the outside of the box okay all right here's my return label here's my donation okay here's my personal info here's my shipping checklist all right got them all together folding them up that package is gonna look like this very simple put them right there on the top of the box okay I'm gonna get some other bubble wrap right so here's everything in there right I'm gonna get some other bubble wrap fold this put it right there on top so it's nice and tight I got some packing tape seal this bad boy up that's the last piece of tape okay well I'll do it one more okay here's my shipping label I'm putting it right on top here you put it on the side to side works good because then I could just cut the top of the box without having to cut through the label I've gotten pretty good with this shipping tape over the years folks I'm an expert with this stuff God knows I have sealed up enough boxes and envelopes Ark Drive ready to ship okay Ark drive ready to ship right there okay when I take this down to my local shipping office you know what I have to do I motion over the people prepaid drop it on the counter and I'm out the door that's how convenient that is for my schedule okay that's it you sent it to me like that I get it I send I fill it up put that return label on there take it to the office it's on the way back to you and I I don't dilly-dally with these folks I'm quick get in the mount people can attest to that who have gotten them okay so that's how easy it is I want to just go back to my slides very briefly to just go over a couple more quick things okay so that's the Ark offer okay let me hit play here you saw all the instructions and what it takes to do it it's very simple okay one of these has the knowledge of the world on it that you need to understand that everybody needs to understand okay it's probably nothing is more effective that you could do for really deeply getting that knowledge into your mind and getting one of these okay so to get it you go to what on earth is happening calm slash Ark or just hit the Ark button or tab at what on earth is happening calm okay and folks this is what this is ultimately about this offer is a mutual offer of respect because ultimately what's on this Drive isn't just external knowledge isn't just external information this is not this is all knowledge of self and that's what respect is all about it's about looking at the self the word respect comes from the Latin re the prefix meaning again and the verb SPECT re which means to look at okay or to see so this means to look at oneself again to take another look at oneself to discover what is really there okay that's what research is all about we are searching to find our true selves and let me tell you something if you really serious take this offer seriously and you take it with respect you will discover the true self and you will discover the truth about what is taking place in our world it is all about looking firmly in that device right there which is going to ultimately tell us everything that we need to know and the Ark is a total reflection of that in the realm of seemingly external knowledge so that is the presentation for today on the Ark drive folks I hope you have enjoyed it and I hope you will take me up on the Ark drive offer because I think it is one of the best things you could do and then you could look you could relive this to anybody you could give the Ark drive to anybody you want family members friends anybody that you talk to hey you're free to share it forward okay this is just all you know public info out there that has been assembled that I'm just making freely available for others to research that's all the art drive offer is and I think when people edify their minds with the kind of knowledge that is on this simple small device we will see the playing field get leveled and we will see things move toward the direction of real freedom and real anarchy in our world instead of dwelling in the ignorance that keeps us collectively enslaved so ladies and gentlemen thank you so much for listening and we're going to go to your calls next so very quickly I just want to say thank you to everyone who donated many donations came in and people like really helped with the technology this is so important I just want to reiterate this one more time before we go to the callers okay because if you go to what on earth is happening calm / donate you'll see there there's a technology needs list okay and this is one of the best ways I think for people to donate because you actually see what you're contributing you get the object from the wishlist and contribute that directly here to the office is here and then you know we can actually use that as soon as it arrives and I just want to thank everybody who donated technology this these past couple of weeks because you you have allowed things to become more streamlined with the show with the broadcast and with things that I do here and for that I am very grateful because that helps that takes it makes things happen faster okay where I don't have to take the time and the the laborious effort that is required when I don't have the right technology so I think it's one of the best ways I just wanted to reiterate that that people can contribute to the effort that takes place here at what on earth is happening is to take a look at the donation page especially the technology needs list because it is all put directly to work toward the true great work of truth love and freedom and spreading the message of true freedom to all so thank you so much to those who have already contributed okay let's go to calls okay and on anything that people want to talk about I particularly love to hear from people have gotten the ark from me and see what they think if anybody like that is available on the line okay so let me just get set up for the call in for discord and get my headset on to do that all right I'm gonna unmute myself in discord all the callers should be able to hear me right now okay and you can join in on discord at what on earth is happening dot-com slash show okay right underneath the player you will see a link that says click here to call in live so if you want to join us in the callin room you can click there to call in live so let's go to some callers here okay let's go to ethan strand ethan strand you are live on what on earth is happening welcome ethan are you with us hey Marc can you hear me Ethan I can loud and clear awesome yeah this is my first time using the platform so glad to hear that it's working correctly Honore let me ask you something real quick before you get to your question what do you think of the of discord as a calling platform I'd like to get some feedback from from people who are using it to call in because I think it's been working great so far we had a little bit of a snag just technologically on my computer well there on the first week but it generally seems to be a good way of taking calls and we could do it from anywhere in the world with no calling fees yeah well honestly I haven't used it yet so I don't really have any commentary on on that from personal experience so you just mostly just installed it just to call into the show you you're not familiar with the platform yeah yeah exactly I literally just installed it right at the beginning of the broadcast today so the experience was easy though right yeah it seemed relatively easy to me I mean I downloaded the thing and kind of spent some time going back and forth between your website and the app to get it all situated and it seems fine to me it wasn't that difficult okay just felt like asking so what do you have for us today well as somebody who just recently went through your process of receiving the arc I can say that you know the shipping instructions that you've lined out they appear pretty come not necessarily complex but seems like a lot when you look at the PDF document right right it's really quite simple you know yes as long as people follow your first note at the very top on the first page to pay attention and be focused then read through it thoroughly that's all there is a lot of elaboration but I feel like that language was necessary this was like a refinement process over a couple of years because as we learned more things that could go wrong in shipping a drive back and forth from anywhere in the world we are repeatedly refining the instructions to try to make the language as clear as humanly possible to anyone reading it what I did and did not want you see how quickly we packed one up you know it wasn't that difficult to you know follow the instructions it's not a lot it seems like more than it is in words but when you actually do it in the real world it's just a few things in a box that's all it is yep yeah yeah I actually I have to admit I haven't opened up the drive yet on my computer to make sure that everything was processed accurately I'm pretty sure I got not an empty drive back hopefully but I actually had it sent to I processed it through a different address currently I'm technically homeless and so I had it processed using my mother's address in Montana and she has it right now I'm gonna be going to visit her pretty soon but it did arrive back though yeah I I'm pretty sure I remember it and it was fine so when you do get it I'd be interested in getting some feedback from you via email if you want to let me know what you think a lot of people do that and a lot of people are astounded when they see what's on it you know they can't believe the amount how much it is so you know you know that's something that I'd like to hear back from people like you know what did you think of the arc how are you using it you know what did you think of the selection of data you know how has it helped you so far so if we encounter anybody that has gotten an arc today we'll we'll all ask them that so do you have anything else for us well sure you know I'd actually like to take the opportunity to just say thank you personally very much for doing the great work and if you don't mind me telling a little story sure I'll say you're welcome and I appreciate that thank you so I can go ahead and tell your story so I just a little over a year ago probably about a year and a half ago I was listening to max Egan show regularly still AM his body mates yeah yeah and that's how I got turned on to you he I watched his or listened to his interview with you and I think you'll really appreciate this so I want to tell the story I listened to that interview and initially I remember it very distinctly I was in the kitchen doing some stuff and listening and I almost kind of fell victim to the emotional mind control because I remember thinking to myself like wow this guy Marc is really intense and not sure how I feel about his delivery you know but I listened to what you were saying and you said one thing that just really struck me and I was like wow what was that that was that was profound I can't remember exactly what it was I'd have to go back to the interview and listened to it again to really pinpoint it but then I you know I kept listening and you said another thing and another thing that was just all really profound and it just I remember it striking me and thinking to myself wow like this guy is so on point and from that point on I just I initially from there I went on to checking out a couple of your presentations I think I did kind of the opposite of what you recommend people do in a sense I went right to your cosmic abandonment presentation I've already been you know it's more the end of the rabbit hole it's the bottom of it as opposed yeah got you didn't take the gentle entry approach not entirely but because of the the amount of research and study that I had already done through other researchers you know I was prepared for that and and from there then I went on to discovering your podcast and this actually works out pretty well for me synchronistically that you're just getting back into the live broadcasting game and I've recently about a month ago finished going through all previous 196 broadcasts or podcasts and so this is good timing for me but excellent I just wanted to tell you about the or arrived the Ark will arrive at a very fortuitous time then because this can take your knowledge base into a whole wider area yeah yeah I'm excited to check it out I'm a little concerned it might be overwhelming for me at first just the amount of data that's on there but I'll work through it Ethan thank you so much for the call I really appreciate it and yeah that it is overwhelming at first that's true because people don't know where to begin and what I'll say about that is I'll just jump into an entry point that you feel comfortable with and that you want to know more about that you already have an interest in trust me it will build and there will be other jumping-off points that will present themselves you will be synchronistically lead from one thing to the next to the next when you get in to delving into the archive I guarantee you that let's see who else can we go - let's go to Twin Cities anarchist Twin Cities anarchists you are live on a lot on earth is happening we have a lot of background noise happening if you could use hi can you hear me now yes I can what do you have for us today hey mark thank you for having me sure I just want to start by saying that you know I did get the chance of coming down - for your mind 5 yes come to see you and of course there was the you were off at Connie's rickrack I had picked up the ark I had a wonderful time to hang out with XXI again and dairy pros and all that so it worked out great that's great what do what did you think of the ark drive Oh I mean at first it was overwhelming the amount of information and then just attempting to digest it in a way that was applicable in the real world I struggled with at first but after a while it really started to make sense and so to that point I was really intrigued by your call to action and so I really wanted to take it out so you sliced Thanksgiving I took up a canoe a pastor about the fake-ass Christian thing and it went really well and one of the most effective arguments I used was you know it was that mean mainstream Christianity is trying to make you know God in an image of them and you know give all these human attributes to God like a vengeful God a happy God and all this and I said no no you're disrespecting the idea of God by putting these things on their God is law and that was really effective method for that that approach in in a way yes saying that you your idea that you know all these emotions and all these kind of human characteristics we try to give to God through the ancient Christian faith is you know we disrespectful towards their idea but um so I'll just be quick but I wanted to to talk about an issue I had so with the government so what we're searching for really is decentralized government which which is really governance right so in my household I have no government but I sure as hell have governance right so I have rules that I follow and I expect those to follow within my household and so the issue really for me wasn't government but if you take it one step further it's it's hierarchical institutions because that is really all government it's another hierarchical institution so actually writing a book yeah I'm gonna stop you there even institutions with hierarchy don't necessarily imply the authority that government assumes over other people so yes there is a characteristic of all the institutions of the world that they are built upon hierarchy and often compartmentalization but I think what makes government specifically a very bad fundamental axiom to accept and I'm talking about the externalize form of it of course not what we're saying we're seeking governance of ourselves through rules that are in alignment with natural law okay we're talking about behavioral rules that are actually set forth in creation that we need to understand and then align our behavior to that's not the institution of government that has this underlying axiomatic belief in authority that people have over other people such that that laws can be made that they can Institute and then force people to obey them even if it's based upon their opinion or whim so that's where I think it differs from other compartmentalizes or hierarchically based institutions but I wouldn't disagree with you that in general once you start organizing things like that you are going to get a corruption within them that is going to have people seeking power over others because they don't see people as having the same inherent natural rights as them now again that doesn't mean that in a company you can't set up you know well this person is the executive who is gonna make the major decisions like for example like you know what on earth is happening if I don't want something going out to the public it doesn't go out I make the final decision about what gets shared with the public because it has my name on it you know so I have to be responsible for that so is there a level of hierarchy there is but it's not authoritarian based it's not based on Authority so that's where I think you know it's slightly different from what you said there but in general I agree with you that once you start setting up everything in society based on hierarchy and compartmentalization where one group of people has no idea what the other are doing or for what purpose then you're going to go down the path of you know there's gonna be secrecy and there's going to be you know people trying to tell other people what to do as far as how to live and it's gonna descend into the whole you know power corrupts absolutely right exactly so through this centralization right that's my point is that through the centralization right because the the the zenith that the porters e-myth point of that pyramid is sought after by the psychopath who wishes to have power over the public in uses the institution as the vehicle surround usurping that power that is right so surely writing a book so yeah you know finally just start listing your podcast and just started writing and so this is my basic argument let me know what you think so hierarchical and therefore centralized institutions use labels to coerce the thoughts emotions and therefore actions of the individual to siphon power from the public to the institution there by using institution as a vehicle to usurp the right of every individual to live free of coercion my argument requires the reader accept that all individuals have the absolute right to live free of coercion right there living free of coercion is possible and that we as a public of a moral duty to live free of coercion right so it's through the labeling right because we accept these labels from the institutions and that allows us to so labels function they dehumanize the person in the same way institutions functioned to kind of remove the responsibility from the individual carrying out the act of the institution against the public right so a leader in this view someone with court leadership qualities is someone who is able to carry out the goals on the institution at all costs to the public and are therefore promoted within the hierarchy yeah that is why we have to make truth our number one priority we have to make morality and principles our priority even over profit or moving an agenda forward in any kind of an institution so I would I would certainly agree with that that that kind of compartmentalization and hierarchy puts people in more of a psychopathic frame of mind where they are just trying to put forward the goals of the institution for it the ends in and of themselves and they're not looking they don't know that it is it does dehumanize people over time look at what the tech giant's have done I mean there's the perfect example of what you've just laid out I mean they started Apple started as this upstart company saying we're gonna change the world you know we're gonna give people a voice we're gonna let them be creative through technology and see what they're gonna do to put out new ideas out there to people and now they've turned into a juggernaut of censorship you know and they're control freaks as far as how hard they lock down their software and hardware you know they're the the model of their of their app store to is so draconian and just locked down it's like you know I mean I have begun you know using technology on the Mac slash Apple side of things and I'm tied in some ways to the the OS the operating system Iran hackintosh is for years because I hated Apple so much that I was just building hacking Tosh's and running you know a Mac OS on that platform because I don't like Apple as a company you know it's it's a considerable amount of work that the average individual is not going to be able to to upkeep you know and it just became too complicated even for me it's just it's like I don't I don't want to deal with those type of complications you know and so through donations

I have actually started using a couple of Mac's again I'd like to move away from the platform but I don't really see many other options I want to do a whole show where I talk about open source software that I'm a big fan of I love free and open source software I think the model is beautiful however I want to talk about why it's so inadequate what why the community isn't taking off as it should and that's because it's not good enough quite frankly you know I know I'll just say plainly flatly out there to the whole open-source community and people who suggest alternatives to things like YouTube it's like half the platforms out there that are saying oh we're gonna be the new alternative they suck they suck bad they don't just suck a little bit they suck badly okay I mean they really are not up to par you know and people can't just think well we're gonna lay out this crappy thing and it's gonna like then become the new big thing it's not gonna work like that you have to draw people to it because you have the best thing out there you know and it's like that's where the open source community is lacking it doesn't have enough people involved it doesn't have enough resources behind it you know and this is what when we want to do something that's just free you get into the area of what's the motivation people have to have some motivation they're in the remote their consciousness level isn't high enough to say I'm gonna get involved in this to improve it because this is what we are here to do is improve the human condition and the human ability to create things okay if that's not the underlying motivation is the betterment of humanity through creativity and innovation as all innovations should be if that's not your driving motivation to create that new innovation you're doing it wrong you're not only doing it wrong you're doing it in adequately and some standardly okay so I need to do a whole show probably at some point maybe bring in some free and open source software advocates and you know talk about this dynamic and how we can improve upon it but anyway let's go to another caller let's see here let's go to Gary see Gary see you're live on what on earth is happening welcome thanks for having sure I just thank you for all the work you do I was turned on to your work many years ago I started out with the natural law seminars and then I jumped into your podcasts starting at number one gray and I just got my art drive a few months ago and I just I find it valuable I sent you a 2 terabyte drive yes and that way as I come across things I can add to it myself yes and and I mean it's just invaluable I have a long commute every day so I copy stuff onto thumb drives and I long you're doing it right yeah through my commute and I travel with it constantly any time we're on the road so much already I listen to when I had a job in central New Jersey and I commuted every day over an hour each way I would listen to so much audio that way it's such a great way of getting it into your mind you know uh mobile listening device this is what the phone should be used for you know you take that data off of that drive put some on the phone listen on your way to work and back home you know or during your lunch break you know that's what I did every day for years okay it's it's a great way of doing it and a Gary I just want to say it's like you're you're the third caller I've taken and each person has gotten an arc from me so I may be the topic drove a lot of people into the the calling room but it's amazing that you know each person that I've already taken a call from has gotten the archive sent thousands of these out probably by this point a couple thousand I would say yeah it was just something I mean I I last year I was listening to some of the podcasts and I I think there was a couple of the different podcasts where you mentioned it and then I went to that part of the website and I just said you know I need to get this I need to get this for myself that's great man when you were in Phoenix I I was so disappointed that I wasn't able to work my schedule around so that I could to join you and Ivan yes my reality I see Ivan was on the list anyway earlier I see him there and I I also want to thank I and everybody that's helping you out it is just invaluable to have this information at your fingertips I very much appreciate it thank you so much for the call thanks for you know attesting to you know the the transformative power of the art drive if you will for getting this information into people's hands and helping them to research on their own time that's what it is all about and our people like Gary who have taken me up on the offer you know they you know are seeing the value in it so and that's what I'm trying to bring to the people of the world through this offer that's what it is all about you know get them to add a higher level of awareness you know and get them on the spiritual battlefield if you will to do the work of helping others to go through that transformative process so let's see who else do we have here on the callin room let's go to Remy the sage you're live on waters what on earth is happening welcome Remy hey Mark can you hear me yes I can good good yeah first just wanted to you know thank you as I'm sure you're getting a lot more these days with the new Colin platform it seems like a lot of people are in there um because so I'm a musician I'm an educator I teach music primarily um but one thing that I that I found really of use recently is the Trivium method which is something that I actually implement into my use of like communicating music theory great so has this been working or changing things for you honestly it's it's almost like it kind of information sort of in a more intuitive sense like it seems like it kind of clicks with the students when I when I give them a you know I try to I try to lay it out to them in a way that that like studying or practicing is is the you know the whole process you know as you laid out the chronological process of you know it's like you take it in you internalize it so you understand really what what the music is within you and then you put it into action that's how you create really a harmonious relationship and I will often tell them you know that's the way life is and like you know the things that we do have to be really internalized and understood and acted upon in accordance so that it would be something that you know it that that is in true accordance with with the world around us and I like to slip in you know a little bit of the of the you know I I honestly tell them on a regular basis I'm like the government is not a necessary component of life insurer and the Trivium method can work for learning almost anything and teacher has anything you know it will apply to just about any human endeavor in any area of our lives you know we can apply it to health we can apply it to you know education methods we can apply it to you know cooking we could apply it to art we can apply it to technology you just about anything so you know I'm glad that you looked into the Trivium process in particular because that's I mean that's really what I laid out there in that whole reality you know manifestation 101 slide that's the Trivium right there knowledge understanding wisdom is another way of you know wording the Trivium threefold process and you know that's that's how we're creating what we create here on earth what are we taking in through information the quality of that information are we understanding what it all means when we bring it all together and are we applying that actively in our lives in the right way for the betterment of ourselves and others you know so and so in another garden for doing that work absolutely thank you for being an intro I had one question sort of in regards that is in relation to that it's something that I've that's kind of been on my mind a lot lately as far as like a lot of kind of like the modern what I would see like the more recent like what seem to be obvious IAP movements in regards to like the foot what is like to turn the flatters you know and and there's I'm sort of like taking myself back for a moment and I and I started to really look at this and I'm like okay well what do I really know about the realm that we live in and so I'm kind of at this point where like I haven't I'm trying to reapply my understanding of the physical world that we're in in regards to are we on a globe I mean I don't because the reason why I'm starting to really question this is like when you really look within like for example the the inconsistencies of of NASA's output of information and and in just in regards to what is you know what I've heard you term as scientism it's something that that I'm really trying to get getting to the point where I'm like I can't just accept it so I'm applying in a sense also applying like the apathetic approach to to re integrating an understanding of that and so I somewhat wanted to ask you it like what your perspective on that is in particular with those two but what are obvious to me are and it's an obvious dialectic it's like you either have flat earth or globe earth and I'm really mine I'm at at this point I'm like what if it's not exactly either what if what if what we're looking up at the sky isn't exactly oh this is this many billion light-years away because those are things that we just have to trust that sure you know that this person said because they had this inner vision of an understanding of a black hole and it's like okay well that's like a priest class kind of saying well this is what it is and that's what you have to accept it there certainly are elements to accepted science like that you know that a lot of people will take on faith however there are scientific methodologies that can help us to really discover how things do work and and the nature of them and that is what the Trivium process when you follow it will unfold it will unfold the ability to discern that truth and I I do happen to agree that the whole Flat Earth thing is a PSYOP I've talked about that on some interviews and the reason I came to that conclusion is because of applying scientific methodology through the Trivium process outside of what I would call scientism or the scientism community because nasa lies and because other scientific institutions lie doesn't necessarily mean that you throw the scientific methodology in the garbage bin so to speak okay there are methods of truth discovery okay that are you can look at these are a pistol logical approaches how do we know the things that we come to know what are the methodologies of discovery of truth discovery and upon the like examination of some of the claims and models you can certainly see that these are either outright fabrications or are just done through a limited understanding of scientific principles and methods that then people latch on to in their lack of understanding of how it really works and then say well if I don't really understand how it works no one else can or they're lying and I'll probably do a whole show on psyops I have a whole presentation planned called psyops that I'm going to probably deliver here in Philadelphia at some future point but I want to do some very simple experimentation that anybody can do that many other researchers have done to like lay the whole you know flat earth SIOP down I've basically been stalked by a lot of them in the digitally stalked literally to a point where I had to come out in a hard-nosed way and say you know if this is your approach I don't want to be associated with it you know you know I'm all for talking about things I am all for attempting to apply truth discovery methods to things and people should do that for themselves so if you're in a position where you're trying to discern the truth wonderful okay when somebody comes to me and says your conclusions and your methods that you've use are completely wrong just because someone else who has used them or claimed to use them is lying and that makes you some kind of a disinformation agent it's like Jack you don't know anything about me or Who I am at all you know it's like and then then they'll send send me bitter emails saying that if you don't talk about this I mean I got an email saying literally said fuck natural law as long as you don't talk about the truth about Flat Earth I mean that's that's where the mindset of some people are at you know that they're that you know religious when it comes to this and that it's it's a religious mindset really I just what I've discovered it to be I've through through my own delving into deeply this SIOP I have come to see that there's really only like two words that it all comes down to in the minds of the people that are rigid Flat Earth religionists and that's because God and again you could look into natural law and say I am I mark passio I am attributing natural law to a creative force in the universe or God and that is true okay but you know to say I need a model of our planet that you know contradicts you know observable scientific methodology just to say God exists is ridiculous I mean it's a religious it's something that I think a lot of religious people cling on to because they want to fight creationists and atheists with it that's why the SIOP has been so successful because there's a whole lot of religious people in the world and there's a whole lot of religious thinking in the world and when you approach people like that and say hey you want the ultimate checkmate that you could if you get people to believe in they automatically have to accept that God did it look into this Flat Earth stuff and because they don't have the scientific background to refute a lot of the claims of the models that are presented then they basically graft on to it because of their religious faith and then they make other legitimate researchers who are really trying to explain how mind control and the occult and methodologies of social manipulation and social engineering are really working in the world and just make them look bad you know it's a guilt by association complex that is applied this is the SIOP strategy and too many people are not sophisticated enough to understand it and I'm not going to make it a issue a big thing I'm answering your call your question about it but definitely not going to get into long-winded discussions and you know taking calls on this topic like a regular basis huh I will answer what I feel about it in a formalized way when I present my psyops presentation and I'll show you some basic very simple refutations of the Flat Earth model which we could do here on what on earth is happening one day - I was thinking - even asking Vinnie Eastwood who I just did a really awesome interview on wherever he has some really great pertinent questions about the great work and about the shadow work that we need to do upon ourselves to conduct the first part of the great work which is in getting ourselves into a good position to help others by confronting the unliked aspects of ourselves in this interview you know Vinnie's from New Zealand I think he's from Auckland New Zealand if I'm not mistaken and you know that's way down in the southern hemisphere so we could do some great experiments that a lot of flat-earthers in their model you know don't get around to doing because we're up here in the northern hemisphere and I think it would be very enlightening for people to see so maybe I'll approach him and ask him if he'd be interested in doing some of that and we can play some of the results here on what on earth is happening in in video format so maybe look for that in the future so great call I appreciate that let's let's go to another caller let's move to let's see tak Arun 90 to tak Arun 90 - you're live on what on earth is happening welcome hello yes hi okay my question is what is your opinion on karma or the principal sorry what is your opinion on Karma or divine right to receive retribution in relation to the principle of cause and effect yes and also the people you believe that I know it's a very simplistic way of saying world but you believe that eventually we'll eventually seek justice from God or natural law or whatever what you want to call it yes this is home this is everything that I talked about in natural law and natural law is karma so I accept karma as an existent law in the universe many people have called natural law karmic law or simply Karma it's an Eastern tradition word that basically you know comes from some of the Indus Valley traditions and the Far Eastern traditions that is about what consequences occur when we perform certain behaviors and kind of consequences are inescapable there are always consequences consequences happen upon our acting okay so we we take in information we make a judgment with our processing center of our mind and hopefully it's in a holistic way if we're gonna do it right and then we behave we come to a conclusion about what is correct or appropriate behavior and then we do our best to carry that out now if we do that work where our alignments our perceptions are in alignment with truth we will behave rightly we will behave within the laws of right and wrong meaning we will perform rites okay we will act in right which means that we do actions that do not cause harm to other sentient beings when we do that we'll have a consequence or a result in the world okay this is how natural law operates okay we're actually co-creating it in the aggregate sense meaning that as a whole society makes these correct judgments that either conform to natural law or go against it we will have a series of consequences that will be brought to us in our entire society and then the society will have to live in that state of being okay so what the the the proof of it the existence of this is the observability of the condition okay you are looking at the condition being a state of slavery so how did that condition get there it's not a natural state it's something that was created it's something that was generated the was generated by the behavior and this is how karma or natural law work and that's why it's so important to get the knowledge because what are you really the knowledge that you're acting upon is the knowledge of conscience conscience is knowledge con science means science the word science in English comes from the Latin verbs Keogh s CI o ski ra is the infinitive form okay so ski RA in Latin means to know or to understand and con is a prefix in Latin that means together or with okay so to know together to know with everyone else that's what conscience is it's common sense knowledge it's the common sense knowledge of what right and wrong are and unfortunately we don't have that common sense knowledge okay so this is my take on karma this is what I have understood natural law to be okay when we behave within common sense boundaries of right and wrong meaning we engage in rights and we do that in the aggregate of our whole society we become and remain free when we oppose natural law when we go against the laws of karma and we behaved wrongly meaning we are taking actions that do cause harm to other beings and we do that in the aggregate in any society we become and remain enslaved those are the laws of cause and effect those are the laws of karma those are the laws of consequence that is what natural law is and how it operates and that's the knowledge that we have to get out there into people's hands and get them to accept as being true and existing in the universe those laws exist they are extant in the universe they exist and are real and most people will deny their existence because they're not actually looking at the condition and then looking at the underlying causal factors of what generated it they believe that there is some you know none there's not a causal relationship there okay they want to look at this as an example that you know correlation does not equate to causality and in this case it does okay the the correlation of behavior whether it is in harmony or in opposition to natural law does correlate to the the causal it's the causal relationship of the effect that we get in the real world meaning are we enslaved or are we free okay and this is what people have to ultimately understand and this is the knowledge that I'm trying to get people to understand and share with people in the world because that's the only way we're gonna understand how an entire society experiences freedom or slavery that's how it works so thank you for that call on karma and I would just suggest if you're not already familiar with it watching my entire natural law seminar because that explains it in more detail all right let's see who else do we have let's go to Brandon last name is let me see Brandon bonanza you're live on what on earth is happening welcome Brandon hey Mark how you doing I'm doing well what do you have for us here today awesome I actually I came across you and all your work in the past couple weeks and it's just it's crazy how synchronous things are because in the past few years I've been deep I've been getting really deep into meditation and that's some of the Eastern religions and I I started to see how they're really related to Christianity and I started to see how the theme behind them was basically the same thing and on the other hand I've started to get in the past few years deep into basically like Anarchy like an and cap and now I kind of realized that it doesn't really matter once you achieve the anarchy things are just gonna happen the way they are so you don't have to add any hyphens to it yeah that's the state of existence that we need to get back to exactly I love it and so I I had these these thoughts permeating in my mind and I'm thinking to myself like how am I gonna get these and caps to think about spirituality and how am I gonna give these people who are nailing it spirituality to think about anarchy this is what my hair presentation and orca poco is gonna be on that's the entire premise of the presentation so it was so great to come across somebody because uhm quick background I mean I do I do stand-up comedy I've been doing it for about five years I have a podcast I have a blog I'm a DJ that's also I support myself so nice I've been trying to work this all into into a existence so seeing you is a great it's a great it's a really great I guess I could say so it gives me idea and then so I just want to say that that's great and though the question I have for you is so I just watched your waking up the cosmic cosmic abandonment Ozma commandement great work so I was thinking because I was always into ancient aliens and Graham Hancock specifically I got deep into his work and I love the idea of Balasa civilization so my question is do you think that it's possible that the Annunaki or the people who they were represented as a Anunnaki that it could actually have been just humans that were more advanced that we're living here before that may have survived another Cataclysm absolutely has information yes without a doubt that's a theory because if they became technologically advanced enough they could appear to us as visitors from elsewhere from the sky from other planets from other dimensions no doubt about it that I keep that in the realm of possibility and who knows they could have gone and seeded other planets they could have traveled to other planets and then returned from other planets you know or even dimensions you know or you know traveled through wormholes in space etc you know there are so many possibilities but as I've always said and my contention has always been it doesn't matter where who they are where they they're from the the way of stopping this slavery is the same it is not complying with their commands that are arbitrary commands of compliance of behavior when they don't have the authority to command us to behave in those ways you know we have to act rightly because it is the right way to behave and and stop thinking that we can create this system of violence and and enslavement called and calling it government euphemistically and you know just give people rights that they don't have to delegate rights you know to other people to do things that they don't have the right to do you know it's it's a nonsensical non logical way of operating in the world and the solution is the same no matter what it's not to comply with them no matter what they are capable of doing to us that's why there are states of being that are worse than death even if a civilization was so powerful that they could wipe out another civilization let's say from the orbit of the planet or something like that or from another planet even I I would say I would fear the consequences of living in total opposition to the laws of morality far more than I would by being destroyed by other beings personally like though those consequences are far beyond losing one's existence physically in the flesh as far as I'm concerned but most people because they haven't studied consciousness from any perspective really whether it be a Eastern tradition or more recent Western mystery tradition occult science you know that they don't they haven't lost that fear of death you know they are still in this existential doubt of what consciousness where the spirit is and that's why the spirituality component is so powerful it's why I started with that in my work my earliest work goes into consciousness pure and simple and who we are ultimately at the ultimate level of existence you know or you could say the the lowest level of existence that everything else is built upon and grows out out of and that's why I proposed that is the ultimate solution you have to know who you are before you know anything about the enemy the enemy you have to know about but you have to know who you are first and foremost you have to know you know where you ultimately come from and if you understand that from the universal spiritual perspective of consciousness then no one can control you at any level after that you know all they can do is destroy the flesh that you're that consciousness is it's a vehicle for so that's why I think studying consciousness studies and traditions are so powerful in getting us out of that existential fear of death because that's what gets us not to comply with these order followers and their or the order givers that are making you know telling them to go out and do these violent behaviors we will get out that fear of complying with them and just say no use the lost word and it doesn't matter what they do I mean at the same time I would say we also have the right to physically defend ourselves in the physical domain so we have that option on the table plus you know we we should understand that no matter what happens even if we are physically destroyed in this confrontation our consciousness is not destroyed and what happens here matters and that's the the spiritual component that's lacking in a lot of the anarchist community here right it's too bad it works the other way as well we're in the so-called new agent spiritual circles they don't get the anarchy part you know yeah they're too busy worried that Trump got elected and that's like choking up the whole thing they're crying about all these things and like hey guys people were dying before and after Trump was like them from Wars you know it's like that's right we need to get on board and the thing with the mind control I find that as soon as they could get you out of the present moment you know this conditioning from school from TV or whatever is it gets you on to the present moment and that's when their mind control really takes hold because if you're if you're lost in the past or if you're lost in the future they have you because you're lying to yourself you're just fantasizing and it's it's amazing it's something that breakthrough I've just had this week and I'm trying to annunciate it to some people I know it's telling me we're going to love anarchy in the occult part two because this these are the things I touch on unfortunately I only have about 45 minutes to deliver it so it'll be sort of a short to medium layout format presentation but at some point I'll probably maybe give an extended version of the whole Anarchy and the occult series may be here on what on earth is happening you know and do a longer 3-hour even multi-part series on it so you know that could be a future show as well and I think you'll really get a lot from it because it really talks about those methods of initiation that we really have to you know delve into to understand like what how does this work work how do we really do it upon ourselves you know what do this isn't a step wise procedure do we do we go in order do we do it do it all at the same time you know and the steps of a cult initiation are so powerful and important when it comes to that understanding like what these individuals who brought us these methodologies of discovery of self and shadow work and you know then truth discovery methods what they had to do to preserve that type of learning and knowledge I mean you know I just watched a pretty interesting allegorical movie called as above so below which is about alchemy and you know it showed in the movie something that they actually did do in the past in mystery tradition schools which it's very appropriate because we were talking about how much our ancestors had to go through to secure a lot of the knowledge that that we you will find on a device like the Ark you know and and proliferate into the world and preserve it even through exceedingly draconian times where they could have been killed for even having it or speaking about it but in this in this movie there's a scene where they have to swim underneath a stone passageway that is filled with water to get out to the other side where they then come up and can breathe the air again and it's like they actually did this in the ancient world you know they would have like a small wading pool or maybe even a medium-sized one and they put a stone lintel underneath you know like a like an archway in it you had to swim under that and then come out the other side you know to breathe and if you failed you could drown you know if you got got stuck or failed you know and didn't do it you could drown you know that's how much somebody wanted the knowledge of these mystery school traditions that they would put their life on the line to you know do this physical you know challenge to prove themselves prove how much they wanted it you know it's like that old adage that you you have to want it as much as you want air to breathe and your next breath you know if air were cut off from you and you were dying from lack of oxygen how much would you want air that's how much you need to want this knowledge because our our very life doesn't hinge upon it believe it or not alright let's see who else do we have um let's go to let's go to Joschka Joschka you're live on what on earth is happening hi mark can you hear me I can loud and clear so great so I think a theme of this show has been about literacy and reading and writing and passing on information that we learn absolutely so one big concern that I have is that in recent years I keep reading news about different school districts who are no longer teaching kids how to write in longhand so I think we're going to have generations of kids growing up who can't read the old texts in which was you know they're texting so much they're texting with them so it's gonna become like Greek to them it that's very disconcerting yeah that it that is that's extremely worrisome and I agree that that's the place that we may be in with how the short attention spans that cell phones you know induce that may be the path that they're putting on our young ones upon right but I think it's very important because doc you've great documents like the Constitution the Bill of Rights all those original texts that we can look at firsthand we can see what the founders wrote that's going going to be all unintelligible to future generations and they're going to need basically translators or scribes to tell them what those documents say certainly if we let their cell phones and tablets be their parents you know and that we continue to let the outcome based educational indoctrination system be their guide toward what what would be considered true education you know we have to get them to understand the Trivium method and get them back on to a classical liberal arts education methodology and that's something that is something that people need to do as part of conscious parenting Josh thank you so much for the call break all the callers phenomenal today that's all the time we have for this Misha states even watching what on earth is happening we'll be back February 24th Sunday February 24th under host mark Pascal and government is slavery decision [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #200

Topics: *Mark's personal recap of the Anarchapulco 2019 Conference, Mark ranting on the pure evil and immorality of ALL Order-Followers, the Unconsciousness of the people of Earth, Bad Parenting, the Garbage-In-Garbage-Out Mindset, how most "Anarchists" lack the understanding of Natural Law and the true causal factors of Human Slavery, the critical importance of the Self-Defense Principle, "There Is Nothing 'New' Under The Sun," Psychological and Spiritual Healing, Intentions vs. Actions, Anarchists vs. New Agers, the power of Money as a World-Wide Religion, IGNORE-ance vs. Nescience, the effect of Mark's work upon the Consciousness of those who have found it, Holistic Understanding and Solutions, Anarchadelphia (an event coming to Philadelphia), Order-Followers must OWN their actions as acts of their OWN Free Will and be SHAMED by others for CHOOSING doing them, the Buddhist teaching of Right Livelihood, what it means to be a TRULY GOOD person vs. the average PERCEPTION of what a "good person" is, the IMPOSSIBILITY for Government to care for or protect ANYONE, the difficulty in putting in the necessary Time and attention to do the Great Work, the Kybalion and other Occult teachings and their connection to the Trivium and Quadrivium*

freedom man that's what it's all about [Music] you have to groove on freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening to endeavour to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and right here on what on earth is happening we are ending slavery one mind at a time we got a great show lined up for you here today today is Sunday February 24th 2019 and today is the 200th episode of what on earth is happening that's right ladies and gentlemen 200 episodes into this endeavor it's been quite a journey and what we have planned for the show today is I'm fresh back in in Philadelphia from Acapulco Mexico I was at the a Newark apoco 2019 conference it went very successfully for me I'm gonna recap the events of the conference talk about what I experienced on the way there and back and while I was there and some of the great speakers that I got a chance to see and people that I got a chance to meet with while was out there and give people a little bit of a you know a finger on the pulse of the anarchist community and how its how the entire movement seems to be progressing so that's gonna be the first hour of the show and then we're gonna do two hours of your calls starting at 4:00 p.m. Eastern Time on discord you can go to what on earth is happening dot-com slash show in order to get the discord calling room link we take calls through discord it's an app similar to Skype with a lot more features and that's how you can call into the show live so starting at 4:00 p.m. Eastern Time we are going to go to your calls for two hours and you will make the content of the show from that point forward so let's jump into the topic for today which is an orca poco 2019 and my experience at this great event so if we switch over to my computer I will show people the again the title card of my presentation at this event this was my main talk on the main stage and and the occult part to religion versus initiation I'm gonna summarize what I got into in that presentation in a few moments but to start I want to just say thanks to the organizers of the event thank you to Jeff Berwick he did a great job in the organization Jessica Gill who was one of the main event organizers also did a great job in being responsive to my needs and was very professional helped set up all the travel arrangements for me so I want to say thank you to her as well you know everybody had different experiences at this event mine went pretty smoothly this year I'm happy to say you know for others that may or may not have been the case but in any event I know what a difficult job conference organization is and can be I was involved in it for several years and it's a lot more difficult than people make it out to be so have a you know a lot of respect for the people that and undertake such an endeavor and I want to say thank you to all of the organizational staff the people on the stage particularly did a very good event on the main stage at least that's where I spoke and you know the the the tech staff was very good and responsive as well so I want to thank them as well you know it's a big job to keep a lot of people happy and at an event this big you know because there's so many different needs and requirements for different people so just want to say that people seem to have really attempted to go out of their way to you know meet my requirements for this event and were very attentive in their job at doing that so I want to give a shout out to some of the other speakers that I felt really brought a lot of value to this event I'm going to talk a little bit about my presentation and workshop in a few moments but speakers that I got a chance to actually catch at the event while I was there you know first of all I traveled for 16 well I was away for 16 days and half of that was travel I traveled for eight days okay to and from this conference four days to get there and four days to get home because I traveled by ground because I don't fly and I want to talk a little bit later about the experiences in traveling because it really makes it such that I don't want to travel anymore at all and I want to talk a little bit about that and I want to talk about how far down into a police state we really are and how that has to be stopped you know and I mean actively stopped by whatever means necessary because it is getting worse and worse and worse okay so that's coming up as part of my experience which was you know partly good because I enjoyed traveling by ground but partly bad because of the scumbag order followers and the experiences that they put people through while they're just trying to travel from one place to another so I want to say that I think the people that really brought what I consider to be the most value to the event - Erica polka we're the people who really incorporated fundamental philosophical ideas and fundamental spiritual ideas to this conference and really talked about the holistic picture because there were many people and I'm not outright complaining about this I'm just saying this is the fact of the matter who do not have the holistic picture when it comes to Anarchy they have a very limited scope and this is what I was talking about you know before I left when I did the show on the arc Drive a lot of people have incomplete partial pictures of the entire situation regarding human freedom and we need to close that gap we need to narrow that chasm that divide in knowledge by helping people to get the bigger picture information because it's still not out there in a big enough way folks by any stretch of the human imagination okay and there's many people who think they have the total picture and think that they have all that they need and they're sorely mistaken and they'll they'll revel in their ignorance they will revel in thinking that they have it all figured out when in fact they're missing huge pieces of the puzzle in order to be able to see the big picture grasp what's really going on so I think the people that did an excellent job in bridging that divide and helping some of the quote unquote the double-quotes anarchists that were in the community there to start to develop eyewire worldview about the the scenarios and the the data that they really need to take into their mind in their worldview to really develop a deeper understanding of what's taking place and those were the people I went there to hear and those are the people who I feel we did shared work together at this event in bringing people further along in their understanding and that was of course David Icke who has been who I consider a personal mentor in many ways and he gave a phenomenal presentation a very long forum format in which he really went into detail about the entire big picture and talked about that dynamic that many people only see the pieces but they don't see the big picture they don't take a step back you know they can't see the forest for the trees and I think he did a very good job in explaining the wider picture to many people and I think a lot of people responded well to that and I want to thank him for being a part of the event max Egan is always a pleasure to be around as a man and he is just a phenomenal speaker he gave a speech with just it was a you know an on the fly right out of his mind very little in the way of pre preparation which I have so much respect for his ability to do to speak like that just direct from the heart you know without any actual prepared statements or prepared presentation and his speech was absolutely phenomenal at this event max is a guy whose presence you just have to be around and feel because it's he's an inspiration as far as I'm concerned and he was one of my favorites at the entire event Derek burrows did a fantastic job you know he gave his talk about all of the points of what holistic Anarchy is all about paired this to the spiritual system of you know the understanding of the chakras from the Vedic tradition and his speech he just knocked it out of the park you know III think that this is what we need more of we need more people bringing the holistic picture to the anarchist community and incorporating true spirituality into the understanding of what real anarchy anarchy is all about so thank you to Derrick Bruce Larkin Rose always does a fantastic job this was no exception he gave several talks I was able to catch his main stage presentation which was great he did a little skit at the event where he kind of dressed uh it was pretty cool he dressed like in a an outfit that he had everything split right down the middle like he had a shirt that had two different patterns on it and a hat that had two different patterns on it and then he was turning around from one side to the other to pretend to be two different people making making arguments one of course advocating for the nonsense and slavery of statism and then one person who was able to you know think logically and clearly and understood government to be nothing more than violence and coercion and he was advocating of course the the anarchist position and it was very well done I I got a chance to see his talk that someone recorded in the room on a guilt-free freedom which was also very good in one of the breakout rooms where a lot of the workshops took place and just Larkin is just absolutely brilliant in his ability to break things down and easy to digest ways and put it in very simple terms for people to understand he always does a great job with that and he did a great job at this conference as well Benny wills I mean what more can I say just absolutely gigantic heart on this guy incredible creative skills and ability to put into words and infuse comedy into a situation that is extremely profoundly serious yet Benny has such a way with words in his poetry you know and he did conscious poetry at the event laden with you know comedic al as well and it was just so creative and so well put together that you just have to check the guy out Benny wills from joy camp you know I mean if people aren't familiar with joy camp in this community you need to become familiar with them because it's an absolutely brilliant comic element in the anarchist community and I think people who are familiar with my work would love it so Benny wills and Sonja absolutely a pleasure being around them at the event and the the job that they did was just outstanding a person who I was not familiar with until attending this year who really made a profound impact on me was Gina car I was not familiar with her work on veganism and on animal rights and reducing the suffering that human beings do to animals and I just have to say the people at the event did not treat Gina well okay I just want to say that okay the room cleared out for her presentation on veganism and it was absolutely unacceptable as far as I'm concerned borderline disgraceful I I have to say that that was one thing that I felt was just not acceptable that I saw took place literally from almost a thousand people in the room down to like less than 50 people while she was speaking and that is was not cool at all okay first of all she is an absolutely eloquent speaker she is an impassioned speaker her information was so profound that it left me in tears literally okay while I was sitting there watching it if people aren't familiar with her you should be familiar with her information it just like hit me so deep you know emotionally that I I can't even say enough that's all say okay so Gina Carr brilliant was not familiar with her became familiar with her when I sat through her main stage presentation and she did a fantastic job the videos that she used were perf the images the imagery all of it can't say enough about it G Edward Griffin who I did get a chance to speak with on this year as well I I talked with him at more length last year he is just a spectacular person he gave a great presentation as well sort of advocate a little bit more from the men arcus position regarding government and you know I'm okay with that because he's helping move people along toward a deeper understanding of what's really taking place in the world you know especially regarding the monetary system which is what his focal work is all about so G Edward Griffin has been a cornerstone in the freedom community and he continues to be and just a tremendous amount of respect for that individual and just when you hang out with him and talk with him you can see he's a tremendous human being and just you know really has a way with people so I want to thank G Edward Griffin for being part of it mark Devlin you know all of his work with music and the dark occult you know if you're not familiar with musical truth his books I believe he has two volumes of his books now on musical truth you should be I actually gave a little blurb on Volume one that's I believe on the back cover of the book his work is fantastic and his music his DJ skills finally got a chance to hear that he showcased that at a pool party that I attended while I was out there and Mark Devlin is just an amazing DJ as well in addition to being a great freedom activist and author so we did also get a chance to hang out a little bit and talk and Mark is just a fantastic human being and his his DJing skills are just top-notch he played some conscious hip-hop and rap that was off the scale that I had never heard some of these artists and their incredible mastery of language and bringing it all together and putting it saying so much in so few words and yet doing it in a creative way and in a way that was you know just such musical craftsmanship ingenious and mark really helped expose me to some some new conscious rap and hip-hop so I thank him for that as well and then you know Chuck Williams he interviewed me there he has worked with - in the past he's big into the crypto community he interviewed me as part of the crypto show they had a bus out there that they were doing it live interviews the whole time so he brought me onto the show we also hung out him and his wife Melina we hung out on the beach at Anika poco did some body surfing and you know got in the ocean got some Sun I don't know if you could tell I'm a little bit sunburned it was a lot worse while I was there it's kind of moved into a light tan and it's not as bad as it was but you know I could still tell and feel it the Sun in Acapulco is not like it is up here in Philadelphia it is hot and I mean it is penetrating you know and part of that is you know the geo geographic location on the earth but part of it is what we're doing to the atmosphere ladies and gentlemen you know cuz we're killing the atmosphere you know we're order followers are killing it what they're spraying into it and you know the Sun is just it can take its toll on you if you're not careful I don't use chemical sunscreens or anything like that I stay away from all that stuff putting any of that on my skin I just try to take the Sun indirectly and just being outside you know with little shade I did overdo it a bit but you know part of it you know all the travel all the work delivering the presentation workshop which I'm going to talk about momentarily it takes its toll on you and you know you have to part of what I was trying to master and and juggle there is you know rejuvenating and getting a little bit of personal time to be in nature you know because it's like we forget that is all part of taking care of the physical body and activating the physical body so I not only got exercise I got you know a little bit of you know relaxation time while I was there as well and I have to remind myself a lot about how important that is because I don't do a lot of that so I did have a good time in the ocean and swimming in the pools at the princess hotel resort there I love the water you know I joke around that you know I'm a cat because I'm born under the sign Leo but I'm also a fish you know because I love the water I love to swim and it was always one of my favorite things to do growing up and I still am a huge fan of the water so I did get a chance to rejuvenate and hit both pools and and the ocean while I was there which was a great thing so I want to say thanks to also Carmen and Pat from the state of anarchy they also interviewed me out there did an interview after I came off my from my main stage presentation and that went really well we kind of had a little bit of a gathering outside their setup area out of the main the main speaker area the main stage and they interviewed me for a little over a half an hour I guess and they're also putting together an event called an arkadelphia which is going to be happening here in Philadelphia this fall I don't have the exact dates but if you look up on Arkadelphia I'm sure that you will find the event they actually former formally invited me to participate at an arkadelphia and I accepted so I will be part of that event I will be giving a presentation at a Newark Adelphia again that details on that will be forthcoming but I want to thank them for the work that they're doing all the other people that I hung out with Greg Mike Jason Rachel's so many others too many to name you know just made the experience so wonderful and I want to thank everybody you know for who was a part of it who attended and who are contributed to it because they all made it worthwhile so the actual event I can't say that I had any bad experiences I will say one thing did happen it's just a personal thing you know it would feel like I was not a lost item but I do feel like an item was personal item was stolen I'm not gonna really get into all the details of it it kind of bummed me out for a little bit because I feel like if you can't trust your stuff at an anarchist community you know that about supposed to know about the spiritual principle of not to steal then you know where can it people be really trusted and that kind of put a little bit of a small bomb out aspect on it and I'm gonna have to basically go through some things to you know replace the item that was taken nothing extraordinarily important that cannot be replaced but that's all say regarding that I did have a small piece of personal property what I feel was stolen not lost do the circumstances I know exactly where it was where it was placed and then it was gone upon me turning my back for a little while which you know you really shouldn't do it all but I figure you know if you're not gonna trust somebody at an anarchist conference you know where can you trust anyone so a little bit of a disappointment there I didn't let it ruin my time I tried to let it just you know go and you know continue to enjoy myself and do my work while I was there so you know that's all say about that the travel okay it was laborious it was long okay I enjoy traveling by train especially I hate airplanes people know that I get nauseous on airplanes I don't like the TSA so the traveling by train wasn't so bad it's just you know long so you know I was traveling two days by train to get there and then made transfers to buses after that so I traveled from Philadelphia to Longview Texas by train on Amtrak and then transferred over to buses from that point near you know to get to the Houston area and then down into Mexico down to Acapulco all on buses from there so going was two days of train travel plus an additional two days of bus travel the bus was much harder than the train obviously not as comfortable but you know generally went pretty smoothly funny story I did miss a bus connection which could have delayed my arrival by 12 hours or more maybe the better part of a day and I didn't want that to happen I was actually still putting some finishing touches both my presentation and my workshop so I really didn't want any more delays I wanted to get there on time so when I missed the one bus transfer that I had near the border at Laredo the people at the bus station said there's a border bridge that you can cross by foot and it's easy to cross it's only like three or four blocks from here just walk in this direction they pointed me to it they said you can go over to Nuevo Laredo and just get your next bus connection from there so that's basically what I did and I walked across the us-mexico border it's something that probably not many people I've ever done who are from here in the United States so I figured it's an interesting story to tell there's like a border bridge the cars are allowed across it it's a smaller one at Laredo there's - there's a huge one where most of the traffic goes through and then there's a smaller one that is a little bit west of the position of the main bridge it's on a street called convent street and I crossed that one on foot and when I went across and got to the Mexican side the border security agents really hardly did anything they made you put your luggage through a scanner just make sure there was no weaponry being carried across the border and after that they didn't even want to see my passport they didn't even take it didn't stamp it didn't ask me why I was in the country none of those traditional customs questions that you get harassed with okay they they just waved me right through I was like do you even want to see this and show them the passports were like no just go right through you know so it was like totally hardly any you know harassment or tightening of border security going into Mexico at all it was painless went in the wave of Laredo got my next bus connections and was on my way I was fine coming back was an utter disgrace and this is what I wanted to think topics I want to get into before I go into some of the things that I presented but folks this country is getting worse and worse and worse and worse when it comes to police state measures the people here who do a job that think that they're involved in some kind of security are utter fuckin garbage you are utter fucking immoral garbage I don't know how else it could be said all right you should be so embarrassed and ashamed for yourself your parents should be so fucking embarrassed that they are the kind of trash that they are and that they raised the kind of fucking amoral trash that you are that's all I have to say that's I mean that's all I have to say to the people that think that they're protecting or providing any security for people here you are a moral fucking garbage okay you are dirty Nazis and you are dirty fucking communists it doesn't matter what side of the left or right paradigm you think you're on you are totalitarian fucking scumbags okay and I would say it right to your face but strip away your nonsense of being part of some gang and then I'll say it right to your face man to man little boy sorry there would only be one man in that equation and that would be me you're a little fucking piece of trash boy whose mommy and daddy didn't pay enough attention to them when you were a little boy boy okay so coming back into this country was like a Nazi worse than Nazi Germany I guarantee you the German citizens of the Third Reich did not go through anything like this the actual German citizenry okay because they treated people worse than cattle barking orders now at the border it wasn't as bad it wasn't that bad I should say that the actual customs agents at the border not that not that bad similar to the Mexico situation where they they scan your bags took they did stamp the passport they didn't even ask any questions coming back in but then after that there is a there are security checkpoints that are set up by u.s. Border Patrol and these are the trash that I'm talking about this is the total fuck trash I'm talking about okay and I'm just gonna use plain street language to describe these pieces of shit scum okay because that's what they are and you are destroying America you're destroying America you're destroying America and you're selling your children into slavery you pieces of trash that's what you're doing you're selling your children into fucking slavery you pieces of scum all right and anybody that thinks that you're doing anything worthwhile the thinks you're doing anything so-called moral or to protect people or to provide security they're dumb pieces of dirt just like you all right I'm not gonna mince words I don't give a shit who agrees with me or disagrees with me it's because most people sit sheltered at home watching their imbecile TV don't pay attention to anything that's going on in this damn world and think they have some informed opinion when they have a brain full of liquid diarrhea okay that's really what they have you know and they deserve a smack in the face but unfortunately shit splatters you know what I'm talking about people you know what I'm saying okay that's what it really is that's how dumb people in this country are and how ill informed and uneducated they are and they're a disgrace a disgrace to what it means to actually supposed to mean to actually be American your own American pieces of fucking sewage all right so treating people like cattle making them literally get off the bus line up separate from your luggage taking your luggage off the bus line up put your luggage in of all in a line stand behind it have dogs sniffing all through everything you know going into the bus where people were sitting sniffing through all the seats and where all the luggage compartments were you know under gunpoint when they already big men you're big you're such big courageous men aren't you you little filthy pieces of trash boys little little baby boys is what you are all tough because everybody else has already disarmed you're so tough such tough guys your lowlife little wusses is what you are lowlife little wusses that you'd get cleaned up you'd get your ass handed to you in any confrontation with any real man in two seconds boy that's what happened to you son okay you know take off your cult outfit than other jerk-offs believe in and then face any real man and you'll get put down and put in the ground son that's what would happen to you all right you're trash and your parents are fucking trash that's what you are that's all you are that's all people who believe in your bullshit are okay so people didn't think it was gonna go like this on this show did they cuz I'm fired up from that all right I'm back I'm glad to be back in this country because I don't really want to travel anymore folks the the experience that I went through on the way back into this country not leaving it got coming back into this country makes me so embarrassed to have to say I'm even a citizen of this area of the world that I'm a citizen of this country whether you want to talk about what that means to be quote a citizen I'm not talking about the legal definition talking about that I live here and this is the kind of trash that the people of this country breed that's what I'm talking about that I'm embarrassed to say that I'm from here and I'm embarrassed that other people think this is what's necessary and required to be in place in this area in of this geographic region of the world you are utter garbage garbage okay get as offended about that as you want I couldn't give a shit alright so that's the the what the u.s. Border Patrol does they're just as big of pieces of trash as the US Park Service's as all the police of this country are cuz your authority rien garbage you're authoritarian garbage you're authoritarian garbage and the people who think what you're doing is in any way moral is just as much garbage and you're complicit with totalitarian you pieces of trash and the problem is not enough people are teaching actual morality to people not enough people are even bringing up the philosophical issue of morality and what it really is to do wrong to somebody else you have no right to do any of the things that you're doing none you just believe that you do cuz you're a little crap boy you're a little piece of crap boy who is raised by a little piece of crap mother and a little garbage piece of crap father that think you have these rights when you have no such right boy okay that's what you are and it's it's bad parenting it all comes down to bad parenting folks it all comes down to that every time trash amoral trash will beget immoral trash and that's what we have in this country we have a bunch of little children who are immoral trash than becoming parents and breeding more immoral that's what we have in the United States of American throughout the world you know folks it really doesn't matter where you go you know one thing in all my travels and all the travels that I've ever done in wherever I've gone in the world it's the same consciousness there is no difference no matter where you go and as a matter of fact believe it or not the the heart of America the actual people who live here are probably the most conscious people on earth as sad as that is to say with the dumb bags of shit walking around here okay but I'll tell you what it's probably even more conscience conscious than any other country on the face of the earth and that kills my heart to even have to say that but I'll tell you what it doesn't matter where you go it does not matter where you go it is the same immoral garbage the same worship of the cult of the state no matter where you go doesn't matter they have almost everybody's souls they not only have their minds they have their souls okay it's bad it's really bad and that's what this show is about I'm trying to tell my listening audience you're not getting the word out well enough because this is still how it is and there's millions and millions of people waiting in line to do these fucking jobs okay so let's gaze that is our effectiveness how effective have we been we're a piss in a pot that's what we are okay that's that's how effective getting the message of real morality out to the world has been I I have to just say it like that because if I didn't I'd be lying to myself and you and I'm telling you that's where we're at so so I traveled a total eight out of the 16 days that I was gone from Philadelphia that was brutal okay so it's good to be back and not on a moving platform anymore okay however I do prefer the moving land tubes to the moving sky tubes I have to say okay so at least um you know I love to travel by train okay I have to say that train travel was actually somewhat enjoyable you know cool experience if you've never gotten on a nice train and you know traveled somewhere cross you know even partially across this country do it it's worth it it's a good experience to get under your belt you know in your lifetime I would highly recommend taking the sleeper cars as well you know it's not really that crazy expensive to do your meals are included when you do it that way you get a nice little sleeper car it's nice cozy you know there's two bunks if you're traveling with someone you know they have their own bunk too but you know a little bit more roomy if you're only traveling alone and you know the Amtrak people try to do their best to accommodate people and be attentive to their needs while they're traveling I have to say they were very hospitable as well people down in Texas you hear about that Texas hospitality it's true people are pretty polite down there I have to say it's not like it is up here on the East Coast where it's like a hostile environment you know my experience in Texas was the people were very polite and I would imagine that is also because there are so many firearms there's so much firearms ownership and concealed carry that people are just polite because you don't know who's armed so you don't start garbage with other people you know so I have to say that dynamic that you hear about Texas in my experience at least is you know it's a true stereotype that you hear about that Texas hospitality and it is true at least in my experience so um you know what I want to talk about briefly before we get to calls and let me say this about calls well this is the 200th anniversary of this format first in audio now in video since 2010 so almost been doing this 10 years about nine years now for the show I would like to hear when we go to your calls in the next hour what has been your overall quality of change of your experience since listening since what for whenever you started okay so whether you started with the podcast whether you started watching my videos on YouTube however you got into it and you you now follow what on earth is happening the show what has it done in your life what what has been your experience of how you have changed how your life has changed how your relationships with other people I'd really like to hear about that I want to hear about your personal experience of change in your life regarding having taken in the material from what on earth is happening and what it has done transformative lis for you if anything that's up personally what I would like to hear you can bring up whatever you want to ask whatever questions you want if you have any questions do you want me to clarify anything I've talked about from day one that you're free to do that as well so you know but what I'm saying that I would like to hear about is how has this material helped you in any way now you know and how has it just changed the quality of your life in any way that you would like to share with the listening and watching audience so one of the things I do want to say is let's go back to the slides real quick I just want to show people a little bit about the art drive I'll go back to the other slides regarding the presentation cuz I do still want to talk about that and talk about the response for it but um you know I talked about the arc before I left and I put this ad up on on the show to have how to receive the arc I went through the whole process showed people how to box it up and I I just want to say to everybody who took me up on this offer in the last couple of weeks you guys did a fantastic job number one yeah very very very respectful in your taking me up on this offer and I thank you for that that's number one number two is the response was overwhelming I mean when I mean overwhelming I mean I'm going to ask live on the air for your patience in me fulfilling these requests for the ark information it's going to take me little while I'm telling you the response was overwhelming and they're still coming in okay so let me just show you a quick picture if we switch back to the presentation okay this is just some of the archives that I got okay this is what my desk looked like when I got back home okay please be patient folks I'm one person I do have a few computers here only a few ok so I it is going to take a bit to fulfill all of these requests and get them back out to you a little bit longer than I usually take usually I'm very on the ball quick with this okay you have to realize while I was away this is what occurred so just be patient with me I'm really the only one who does this okay I'll have a small amount of help in getting these to the the office in the neighborhood to ship them back out so I'm just saying just publicly please just be patient with me okay and I will get them fulfilled and out to you okay so I want to also let's see yeah I think that's pretty much all I wanted to cover I'm just looking at my notes here I want to talk about the presentations that I gave okay the main stage presentation I was trying to fit so much data into such a small relatively small period of time then I had to talk very quickly I had to move through my slides very quickly to get it all in so maybe at some future point when maybe this is out publicly I will give the whole presentation in an extended format maybe here's what I'll do I'll make this deal with everyone if you want to call it a deal I will after this presentation becomes public at a future in a future what on earth is happening show I'm going to do a full extended version all right here on the show of Anarchy in the occult part 1 & 2 so the whole series of Anarchy and the occult delivered at an arc apoco 2018 and 2019 I will do a full extended presentation series on right here on what on earth is happening that will be a couple of future shows okay maybe two or two or three shows it will take to do that all right so that's some future material for what on earth is happening but um delivering this live on stage was a great experience okay as rushed as it was I really needed like really about an hour and a half to properly unpack this I had half of that time I had 45 minutes I went over by maybe two minutes okay the next speaker who followed me was a lovely individual who was I had no issue with me going over by the couple of minutes that I did and I apologize for doing that and there was no problem but I usually try to be really respectful and keep it right on time if there's someone following me so I did go over by a little tiny bit but as I said I would really required a minimum of an hour and a half even to do this in a way that it wasn't rushed but I had to speak very quickly and when you see the video when it comes out you will notice I'm I'm moving very fast so that's number one number two is this was heavy esoteric information for a lot of people there and I want to say I by estimating I calculated how many actual chairs were in the main hall you you had about 2,000 chairs set up in that main hall in the main speaker hall at Erica poco 2019 they did a fantastic job with the setup and the stage I felt the stage maybe could have been a little bit brighter color wise it was a little on the darker stark side I don't have a problem with that I'm just saying like maybe just for pictures and things like that maybe they could just enhance the brightness and color aspect of the stage a little bit but it was very professionally done and again the audio and video people bang-up job I mean just great job I can't say enough about their their professionalism that's one thing that I had to I have to say that I saw personally again I'm not speaking for everyone everyone's experience will be different as a speaker or an attendee I experienced a lot of high level professionalism while I was there and I want to say thank you again for for treating me like that and having the the professionalism that was displayed so that part of the presentation was really on on point of the of the event I should say so um I counted approximately how many people were in attendance during my talk if I had to give a rough figure estimate I would say that the vast majority of those seats were filled with the exception of some toward the back I would say maybe three-quarters of the seats I'd asked to meet like 1500 people were in that room watching my presentation maybe a little bit less but I'm gonna say right around the number of 1500 people which is uh it's awesome you know to attend an event where there is that many people and they're very attentive in their in their paying attention and being respectful while you're delivering everything so I want to say thank you to the viewing audience that was in attendance for their respect I think that my presentation covered some areas that many people were did not think it was going to go into I think it was as was last year's presentation almost not shocking but it was a little bit of a much different experience than what many people expected it to be okay I'll say that and I think this it's because the type of information I bring to the table when I attend events like this and speak at them is so different from the general information that is presented by other speakers where many people are talking about the political and financial aspects I got into the spiritual aspects the aspects of consciousness and most of all and most importantly the aspects of morality and some few people too few people have put together the moral issues as being the underlying causal factors of the human condition of slavery which we are currently in and experiencing as a species there is still is not enough in the way of a direct understanding of the causal relationships between morality and freedom and that's one thing that I find very sad and lacking in this community of people they're pretty much willing to have an open mind and seek the truth however so I have to say that I think there were much more in the way of open-minded individuals there then closed minded individuals who just don't want to hear it that dynamic is also present though the closed-minded dynamic it is there okay the good news regarding at least this community is that the closed-minded dynamic was far outweighed by the open-minded dynamic and that's good that's heartening okay that is actually good to see so many people came up to me as they did last year and told me your information blew my mind I'm gonna be looking into your work thank you for being here thank you for doing what you're doing and presenting this especially to this type of a community that was told to me repeatedly after my main stage presentation so thank you for the people who expressed that kind of a sentiment to me personally and the people who weren't receptive to it obviously did not even say anything didn't come up to me there were no people who were you know like brutally Curtis critical criticizing what I got into and talked about I think just if they it didn't resonate with them they just ignored it or just you know did not engage me and that's fine okay not everybody's gonna be ready to hear what I have to say the way I say it either okay and there was a dynamic of I do want to say a few individuals who still don't understand me or my style and don't understand the righteous indignation as many people will hear the first part of this broadcast and not get why I'm angry about this so one individual I don't recall his name don't know whether he wants his name out there I'm not you know hammering on this person because of this I just want to bring it out as a dynamic that was called to my attention an individual stopped me while I was walking on one of the pathways there at the hotel and said mark why were you so seemingly so angry during your presentation first of all I didn't think I really was I thought I gave my presentation in a pretty tempered way personally I've raised my voice a couple of times you know and you you know it was given in a pretty straightforward you know stark way you know made a couple of little jokes but you know it wasn't like by any stretch of the imagination my most you know angrily delivered work certainly said nothing like I did it on this broadcast okay so I didn't think it was really that angry angrily delivered you know if you will but this one individual did think it was so I said well let me ask you this and I did it very politely and it's not again I'm not angry at the person for saying that I just said what dynamic if not the dynamic of the enslavement of our fellow brothers and sisters of human beings if that dynamic of enslavement of our very species would not create the emotion of anger within you what dynamic would ever make you angry you know I can't remember who said it right now off the top of my head but someone once said you can tell a lot about a human being by what makes them angry you can tell a lot about their character about why they get angry do they get angry over absolutely frivolous inane nonsense that shouldn't make anybody angry do they get angry over what the mainstream media tells them you should be outraged about this next forty-eight hour period that we're gonna be hammering it and then we're gonna switch to the next thing we think you should be angry about okay no I'm angry about my rights and the rates of my fellow human beings being taken away from them without the right to do so and if that isn't what you want to gauge yourself as an individual based upon if that dynamic of slavery will make you angry I think there's something profoundly broken in your constitution as a human being I think there's something profoundly missing in your psychological and emotional makeup as a human and I think that that has been taken from you without your really understanding that it has been taken from you okay and as such I have agreed by being asked by who's gonna be the promoter and organizer of the event Carmen from state of Anarchy to deliver the presentation that he knows because I speak to him personally that I have had in the works for several months haven't really fully you know worked it out all the details of what the presentation is going to contain but he has asked me at an arkadelphia in the fall to present the presentation that I have had on the back burner kind of you know waiting in line to deliver which is going to be called the sacred gift of anger I will be delivering at an arkadelphia in late 2019 a presentation in title I agreed to do this called the sacred gift of anger okay and let me tell you something folks that is exactly what righteous anger is it exists for a reason there is a very valid reason for the existence of this emotion it is not there to be shunned it is not there to be pushed all the way deep down and ignored you know so it later explodes in hideous ways like a bomb okay it is there to be felt and it is there for valid reasons and I would suggest that if those out there are incapable feeling anger then your own masters have done a more profoundly spectacular job at the total annihilation of your personal psychological and emotional makeup then you can possibly ever imagine you are broken at a level that may not be fixable that is how much of a head fuck they have done upon you that's the only way that I could stack I can't really say it any other way to people okay because if you don't know definitively in your heart mind and soul that there is a role for righteous anger in the world and that this is it this is the reason for it when people without absolutely any right whatsoever in nature in the universe come forward and attempt to make other people their slaves and put them under their duress coercion and violence if that's not the time to display the emotion of anger then what the goddamn hell is the time to display it ladies and gentlemen because if you can't understand that simple fact there is something profoundly broken at the soul level inside of you inside of you I don't really trust people that never display the emotion of anger I I don't trust them I I don't want to be friends with them okay I don't hang around with people who never get angry I don't do it okay I will ostracize you if I see that you never display that emotion and you're incapable of displaying it I know that you're really deeply psychologically fucked up it's not the other way around it's not that if you do display it for the right reasons now don't get me wrong folks I don't want to hang around totally toxic people that get angry about everything and stuff that they shouldn't be angry about but if you're not angry about the things that are human being absolutely sure death should be angry about okay let's emphasize that word greatly there is a time and a place that you should be angry about certain things okay if you cannot feel that emotion and then channel it and do something with it there's something profoundly broken inside of you and a psychological a mental and emotional and mostly at a spiritual and soul level and these are the dynamics that I'll explore more in depth when I deliver the presentation called the sacred gift of anger at an arkadelphia later this year so back to the main presentation you you could hear like a pin drop while I was delivering this people were I felt so attentive and practically on the edge of their seat they weren't like hungry for this knowledge which was a very very good thing to see okay so I have to say that I feel it was more well received than I would have anticipated and I went into some harder material for people this year than even the first year okay so I talked about how religion is the one and only problem erroneous belief systems that people put through their mind with very little psychological processing and then they accept the belief which becomes what's known as an axiom an axiom is a core widely accepted belief in society okay and then they act upon it and because the belief was incorrect and they took it in without enough proper filtration of the belief of the of the axiom the the underlying information then they're acting wrongly in the world as a result and then they get a chaotic result or a result that is not what they want in life this is what my main presentation was and it was talking about not just religion as cultural religion if there is government as a religion money is a religion okay moral relativism is a religion which was one of the big religions I was talking about that we have to erase this virus this is a mind-control virus okay it not only constitutes a false belief a false axiomatic belief it is a false religious belief so people have to understand first of all I'm talking about religion from a much wider world view than cultural religion of Christianity Judaism Islam etc it's not what I'm talking about as a religion you could look at you could put those in the grouping of religions but religion is a much wider field of endeavor to study because it's about false axiomatic beliefs and then what I got into a little bit later in the presentation was in order to purge this virus from the human psychological mental emotional and spiritual makeup we have to go through the process that was taught to the ancient mystery school tradition initiates through the process of occult initiation what and then I described what is the initiatory process this is why it was called religion versus initiation most anarchists are still in religious thought process they're not really in truth seeking methodological process they still have a lot of fundamental religious axioms in their mind that they haven't exercised the initiatic traditions of using a virus removal program to scrub away and remove those false axiomatic thought processes okay so the initiatory system helped to guide the initiate in the proper way of removing those mind viruses from one's psychological makeup and then I went into what that process is which was a five-fold process I added a sixth step actually you know I did that kind of with the seven hermetic principles and then the the principle of care which surrounds and binds them all together in my natural law seminar in this presentation I talked about the process was stop lying to yourself and to others stop dreaming or engaging in cognitive dissonance or magical thinking learn how to think through the Trivium and quadrivium truth discovery processes okay live in the present moment and stop infighting amongst ourselves because we understand what our actual situation is in here and now now we're at war and then activate the physical body because most anarchists aren't really eating and exercising right and engaging in the self-defense principle this is another big thing I want to talk about before we go to your calls the lack of understanding of the self-defense principle I'm going to do that when I get to my workshop segment okay and then I added to activate true care or true heart based intelligence in the understanding we have to activate within ourselves that we understand that as even one individual is suffering all our suffering let me just temper what I said earlier about the pieces of amoral garbage that are totalitarian scum working in the whole system of government here in the United States they do need healing okay these are brain sick individuals that have totally imbalanced brains because of the garbage food that they eat because of the garbage religious thought processes they were taught by their garbage parents and garbage school teachers garbage media people clergy etc okay they have total garbage for the mind so that their output and behavior is total garbage garbage goes in garbage comes out through behavior garbage goes into the mind and becomes a mind virus and then it goes out in the form of garbage behavior and then we get a garbage world which is what we have okay a world based in coercion violence and chaos that's what government is that's what slavery is they need healing okay part of my work is to help other people to see what the needs and requirements are for the change that we want to see expressed in our actual living experience no one person is going to be able to do all of that work impossible it is impossible for me to do all that for all the individual I cannot do that for anyone actually only they can do it all I can be as a way show or the other thing is you hear this dynamic by total fucking imbeciles all the time and I'm gonna say this directly to all the people who say this you are a total fucking imbecile because I directly make a point of directly engaging this dynamic in 90% of my presentations that I deliver there is no new and formation in any of the presentations that I deliver folks it's always been here in humanity among us since we have existed as a species okay the truth is eternal it has always been it will always be there is nothing new in the work of Mark passio if you believe you are going to discover any new colossal data or information or invention or system or you know some kind of a solution that is brand-spanking-new that no one has ever heard of just turn the fuckin show off right now and never listen again you're never getting that that's not what I'm here to do imbecile you know how directly do I have to say this do I need to go out with a megaphone and shout it in the fucking streets okay there is no new information here this is the I talked about eternal truth there will always be present because it is part of the dynamics of nature how thick and fucking boneheaded does someone have to be not to understand that when I've said it a billion fucking times I'm tired of repeating myself about this dynamic and this is all an imbecile who has obviously hasn't taken the four fucking seconds to listen to anything I've ever said well whilst spouts with verbal fucking diarrhea I'm sick of it I'm sick of it because I've said it a billion times and you're too dense to listen okay there's nothing new Under the Sun you're never going to get anything new these are eternal principles of truth that can never be destroyed that will always be present all I can do is help to describe them the people help people to understand them because they're they have mind viruses in the way of understanding them and so I do that in my way because this is this is how I want to do it I'm not interested in how you want me to do it or how you would do it that's the whole point you get out there and do it if you don't like how I do it who gives a shit certainly not me I could care less I've been doing this for too long to care about what anybody thinks of me or my work or how I do it I'm only interested that you develop an understanding in whatever way you're going - it doesn't have to be from me you don't like the way I do it turn to show the fuck off who cares okay go listen to somebody else who has the truth and learn from them I don't care where you get it but people have to become adults and understand you got to understand this because it's about your freedom and mine and everybody else's for that matter so I put it out there in the way I want to put it out there you want to do the work don't complain about how I do it not interested in your complaints okay I couldn't give a shit get out there and put it out there in the way you would if you're so smart and you're so great and you could do it so much better go and prove me wrong prove that it can be done a thousand times better than I can that's what I want honestly that's what I want out there folks I want it to be done a thousand times better than I could possibly ever dream of doing it so give me about a million teachers doing it that way and we make it a little bit of headway we'd be making a little bit of progress out of human slavery okay so that's the dynamic that I want to talk about not everybody is ready to hear the information that I delivered at an arc apoco there are still some people who are very resistant to it and you really see that when you look at anarchists you know social media that have all these retarded left brained religious worshippers of scientism of outdated completely erroneous and outdated Newtonian world view of what science actually is and contains and and how the scientific methodology actually works that has been disproven for about a hundred and fifty years and this is how far from the actual ketchup that when real discoveries are made in new scientific forms and new scientific discoveries are brought forward in the scientific community this is how wide the gap is before the public actually gets it we stay like clinging on to a dead corpse okay the vast majority of human beings when scientific discoveries have been completed former scientific discoveries have been completely disproven as false and a new emerging worldview comes forward in science it literally takes over 100 years over a century for the public to even beginning learning that what was printed in old textbooks is wrong and that's what you have in the so called anarchist community you have so so-called scientific Darwinian materialists that are scientism worshippers they're not they're not people who really want to go through a scientific process of truth discovery they are just worshippers at the altar of what is called science which I call scientism because it's a religion and that's what these pd's left-brain imbalanced smacked ass hats are because that's what they are you know call it an ad hominem attack all you want it's still true okay so those are the people who won't get this because I'm actually talking about them in the presentation they're the left brain imbalanced people who are stuck in a completely imbalanced worldview that is there to mind-control them into continuing to wear their chains they'll never get out of their chains in that imbalanced mindset in that imbalanced worldview there in the worldview schism there in the psychological schism they're broken at a brain level and at a soul level because they dismiss consciousness and spirituality they don't even understand that's the only solution the only solution is changing consciousness the only solution is coming into the knowledge of true spirituality that's it you're not working toward that great work you're not making any progress in creating a world that is based in Anarchy or true freedom get over it okay so that is what I want to say from my presentation next if we want to switch over to the computer view briefly to show people this was the poster for my workshop demystifying the occult revisited initiation into the mysteries this went on for nine hours I went over by about an hour okay I planned on an eight-hour workshop it went into a ninth hour folks this is probably I'm very proud of how this workshop turned out okay and I mean I worked hard on this to put this together in this way okay the people who attended were top-notch all right I want to thank everyone who attended the workshop you guys were so respectful your questions were incredible too in the question and answer session and it just went perfectly from beginning to end the room setup was done very well the projector that I had was great and the screen there was a little bit of a tech snag at the beginning I want to thank the tech staff for helping me work that out during the setup in the workshop room the people who attended gave me a lot of good feedback both at the workshop and after and said that this workshop helped them to understand such a wider picture of what is going on that they just had nothing but really great very nice respectful things to say to me after they came out of it and I've gotten much a lot of email I one of the things I want to do on a future show folks is I want to read some of the correspondents that I get from people to show you how powerful and profound it is to hear from people whose life this work has changed and that's what I want to do when you're in your calls as well which we're gonna get to in like a couple minutes so I want to thank everybody for sending feedback on both my presentation and my workshop at Attica poco because it is really heartfelt it mean it means a lot to me personally to hear what you have to say regarding that I try to go through my emails as best as I can you got to understand folks I get so many emails it's crazy okay so many were piled up when I got back I'm trying to take my time and go through them a little bit I have a lot of people I want to write to and thanked I'm gonna respond to some of the email feedback that I got regarding my presentation and workshop so I want to thank everybody for sending that feedback this presentation this workshop I feel was one of the more powerful pieces of knowledge that I put out in in one day in one day session to people and it was a conglomeration of other material that I put together no hugely new material but it was the way that it was put together and the order and the you know different elements of many different presentations that I actually totally incorporated into this that I think made it special and unique and that was harder to do than I thought it was going to be I was working on this really right up to the point where I had to go and deliver it believe it or not and you know that preparation in putting a nine hour workshop together it was like the preparation I had to do for the natural law seminar a whole lot of work that can be stressful because you have a deadline doing while traveling and wall away but I have to say it came together in a way that I was so very happy with and I just want to say a very special thanks to the people who contributed of their personal resources to attend this workshop because it you know wasn't an extra ticket separate from the main ticket from the main event and the people who attended helped to make the event a financially worthwhile for me to travel and attend another country for all of those days and without you the event would not have been and without you and contributing those resources and attending my workshop the event might not have been in any way financially viable for me to even do or participate in so I want to thank you guys from the bottom of my heart for being willing to contribute of your time attention and resources to attend the workshop that was for me the the biggest highlight of the entire time that I was down in Mexico was delivering this workshop I really really really feel that way so thank you again on that being said and again I you know the people that I want to say gave certain types of feedback in no way am i angry at anybody it's it's you're very welcome to give you know even negative feedback and not agree we don't have to agree on everything I want to just say where I feel like some of the anarchist community goes whereas the majority if I had to pinpoint what is an imbalance within the community it would certainly be that left brain scientific thought process which I consider a religion but there is also the opposite where you have two people who are two on the spiritual new-agey side a little bit more too much toward the new aging that do not understand yet deeply very definitively deeply the self-defense principle now thankfully I think most people do but there are some who still what I would say I would have to unfortunately label them to be pacifists who would not engage in the self-defense principle for any reason I also feel that that's a extreme psychological and spiritual imbalance I I have to say that to be honest with you and to be honest with myself so um you know I said some pretty extreme things at this workshop you know regarding what we have the right to do under duress like I did in out in Phoenix when I spoke and delivered duress dissidents and deadly force at Ivan's conference in Phoenix our truth mind reality you know the reality of our rights are very extreme things we have the right to perform deadly force upon those who are taking our rights away I'm not telling anybody that it would necessarily work out well to do that now but I'm not saying it's not a right you know it is a right when someone is kept under duress and prevented from exercising their rights they have a right to use self-defense of force up to and including deadly force that's the truth that's our natural right and people have to understand that they have to understand it it doesn't matter whether you don't like it that's either true or it's not true and I'm trying to explain to you it's true and it's a right and so you know you have people at even an event like this which is considered an anarchist event who still don't understand that aspect that there is a time when we have the right to take lives because of what those people are doing to take lives and rights away from people that they have no right because they initiated the harm see I have to refine the definition of a right it's not just who causes it's who initiates harm you know it matters who starts it because one can do harm to someone who has initiated harm without right that's called self defensive harm that you can conduct upon someone else if someone accost you on the street and pulls a weapon and says give me all of your possessions if you shoot them or if you beat them to a point where they're mobile you know you performed to right you didn't do anything wrong in that situation there's only one wrong and that was the initiation of the harm or duress or coercion and this is what people cyst off to psychologically understand they haven't gone all the way in their understanding of the self-defense principle and if you don't combine and marry together in sacred Union the self-defense principle with the Sacred Feminine principle of non-aggression okay you know that's what this hat that I'm wearing today is all about you know it says na PSD non-aggression principle principle of self-defense the principle is right in the middle the P okay so it's about combining these two forces together these two pillars of enlightenment or principles of enlightenment however way you want to consider it or look at it if you only have half you only have half the equation and that's not going to get it done okay so that's one dynamic I wanted to discuss a little regarding some of the people present Anika poco certainly not the majority but maybe they'll get there you know it's like they have to hear this right out in the open you that's why I do feel like the mincing words and trying to take people they're super tiny little piecemeal while worrying about all of their emotional considerations look there's no more time for that there's I don't have time for that maybe you want to do that and your personally I'm not telling you not to okay you do it you do the great work in whatever way you want to I'm just saying that's not my that's not my schtick folks okay that's not how I do things so if you want to complain go do it somewhere else don't don't complain about how I do it just get involved then do it how you would want to do it and show me how great that works out okay and then when you're converting hundreds of thousands or millions of people I will shake your hand I will pat you on the back and I would be like you did something I don't even have the patience to do maybe it should be done that way that's not my personality I don't feel like I have to do it any particular way okay as long as I'm speaking truth truth remains truth no matter how its communicated see this is part of taking people out of the mind control the mind control is truth is only truth if it's communicated a certain way wrong as wrong asks wrong ass okay no it is not truth is the truth whether it is scream than somebody's face okay or it is given in the most gentle peaceful terms imaginable because someone is so frail they can't handle being spoken out like an adult okay I'm not interested in that dynamic I want to confront the dynamic of why are you in the mode of saying just because you don't like the emotional delivery that you can't accept whether it's true or not all that matters is whether it's true nothing else matters except whether it's true this is piercing the mind control confronting it head on direct your under mind control if you can only hear things from an emotional point of view and you want to gauge the truthfulness of it based on how it makes you feel that's mind control let's look at it head-on correctly okay that's what I try to do with my work is make people aware of that dynamic because most of them aren't aware of that dynamic of mind control and how it works so the goal here is do get out there and do the work don't complain about how other people are doing it because we're in a situation where we are way deeper into a police state than we've ever been before and these jackasses in government want to make border security harder tighter for even American citizens coming back into this country they're a disgrace a disgrace your freedom is being affected by everyone's is and I'm telling you we have to turn it around folks we have to turn it around okay so I'm going to exit out of the I want to leave the the last slide on the main presentation by just showing the donate link okay if people have found value in what I've presented here during the years doing what on earth is happening please visit what on earth is happening com donate there are many ways to donate to help this show continue going and to help me in just being able to continue doing this work so thank now I just want to send a couple more thanks out to everybody who has helped before we go to the calls I personally want to thank everybody who accepted the ark offer and donated as part of sending their drive so appreciated you guys are you're the best you're so generous you're hungry for the knowledge I'm going to get do my best in not messing around and getting all these drives back out to everyone hopefully by the end of this week or maybe into next week a little bit but I'm gonna do my best in doing it as quickly as possible and it sa safe a way to get your property back to you safely as possible so thank you for all the people that donated as part of their taking me up on the ark offer and also tremendous thanks to all the people who donated technology not only just donated monetarily through the links that are on the donate page but who needed technology this takes a lot of pressure off now there's nothing on the wish list people actually purchased all those items for me I mean that that is that's that's profound from my heart really it really is because you know why that really helps take the pressure off of me and keep some things in the pipeline - you know when I need when I need extra toner or paper or discs or anything like that and it's there and I don't have to wait for it and you know it helps make the process of making inventory and getting things out there to people smooth and that's what this is all about is getting this information out there and because of the gifts area of the site and the donations page you guys are helping me get this information out to a much wider audience and I want to thank you from the bottom of my heart for helping with that task so I think that's all that I have in the way of any slides for today so let's jump in with your calls and the rest of the show will be you will make the content anything is fair game and I personally want to hear about what your experience in taking in the information of what on earth is happening how that has gone how it has been for you has changed the quality of your life and the quality of your relationships if you'd like to talk about that so let me get gerd up here with my headset okay and I'm gonna unmute myself and jump into the call room I think everybody in the waiting area in the call room on discord will be able to hear me and let's jump in so here we go let's hear from unabashed anarchist you're live on what on earth is happening episode number 200 are you able to hear me check looks like we're having a technical issue my mic is unmuted his mic is unmuted you uncheck the main link okay all right there you are we have you it looks like we solved that issue that I had push-to-talk turned on and I'm no worries I apologize folks it was a little bit we had a couple of technical snags setting up today I apologize for you know the little bit of tuck issues that are going on this is gonna happen we'll work through them so thanks for your patience so uh yeah thanks for being the first caller on the 200th episode and anything is fair game what do you have for us today well thanks for having me mark I've been following you for a long time I actually discovered your work first when you did an interview with a red ice radio Henrik Tom Graham yeah a long time ago I remember 12 2013 something like an individual who when I was a child I I actually independently derived the idea of political Anarchy and philosophical anarchy without having any input from outside and I was you know to shut down and told by so many people you know no no this isn't the way it is that would never work and yadda yadda yadda and so I just went off onto the Internet and you know from spiritual and political and all kinds of different explorations and you know when I heard your article and I believe here you're talking about how like you know well here's why democracy is actually like a million times worse than monarchy because you know when there's a monarch it's like that's the person to blame for everything that the government's doing when there's a democracy it's the whole SIOP of well we are the government this is what we are doing and you know that how insidious that actually is and the I's incorporated into democracy that the majority will rule the mob will rule you know and that means if there's an immoral population that believes that they could just make up whatever immoral things that they want to make up that that's perfectly fine and acceptable under that form of quote man's law well I see one of the one of the folks in chat has the name immortal technique and that's that's a rapper I'm very familiar with and he's one of his uh quotes that I took most of heart is uh you know universal truth is not stipulated by mass opinion that's awesome yeah yeah immortal immortal technique actually played at an arc apoco I did not get a chance to 10 but our friends of mine attended and said it was fantastic he's amazing we are working on finishing touches on on my work and was unable to actually attend at that point so but I heard it was very very well done awesome so mark there's one thing that I there are a couple things that I've written just jotted down trying to get on the calls for the past couple weeks one of them is you know and I'm big into like you know debate and argumentation not from like a hateful standpoint but just from like I've always looked through your work to see like is there something that you know I could like improve upon or like that I don't necessarily agree with 100% it's very hard because you're on point about a lot of stuff mark but I do I hate that I feel like the way that um you've communicated the idea of good and bad while it is no it's mostly very very on the up and up I think the one factor that you haven't really touched on - you know satisfy me is the idea of intent as being a part of the karmic formula the part of the common morality like - like well an action that causes harm is a wrong and an action that doesn't cause harm is a right true but true in the sense that you know the Sun rises in the West it's like yes okay sure well that's true from a certain perspective but from another perspective you have a man who has a random number generator that if it hits on a certain number it's gonna explode a nuclear bomb and it never hits that number and the bomb never explodes and so you know we can still see that he's done a moral wrong and then we have a man who's you know stone-cold sober car and perfect repair tooling down the road and hits on a nail or something he doesn't see and swerves and like kills a bunch of people and we can see that he's you know morally not as culpable for that act as the first individual would be for his act even though such action as armed people I would agree with that I don't really think that I have you know misrepresented that in any way in my world no there yeah but III think that you know I take the approach that intent isn't as meaningful because to many people I believe use that as an excuse and justification for behavior which initiates harm to other people because they'll say well they just didn't know right so the idea is that ignorant of natural law would be some sort of an excuse now you hear this all the time in man's law ignorant of the law is no excuse well that's a bogus argument nobody could actually possibly possibly know all of the statutes and all of the laws that are made up by man on a daily basis it would not even be a practical thing okay no one could take all that information in and no know it at any given time especially when it's in a constant state of flux and changing all the time because of the moral relativism that it is based upon but to say that there's no excuse for natural law for not knowing natural law I think does hold weight because you can have the intention of wanting to do good okay but in exercising something that is based upon coercion to perform so-called security and or trying to keep people safe which is always what all of the rights the the limitations and taking of Rights is always based upon we're gonna keep you safe because they're playing upon people's innate sense of morality by trying to say Oh what would you advocate be done if if this isn't done and how all this harm would come to people no one can keep us safe that's number one see part of her more people have to get into is there's a there's a few things that can never be done okay it is an impossibility for anyone else to actually really take care of all the aspects of your life that you need to have functioning and working to be a healthy adult human being only you can really do that you have to take the responsibility to do those things that's not to say we can't cooperate and work together okay but it is ultimately to say you cannot make someone else responsible for what you what is going on in your life okay you can't make someone else responsible for your health you can't make someone else responsible for your education you can't make someone else responsible for your relationships you can't make someone else responsible for the progress the progress of your spiritual understanding learning and growth you must be responsible for all those things so this not nullifies the nanny or the the left aspect of the political spectrum who they want government to be mommy nanny and take care of all those things no one can take care of all those things only you can be responsible to take care of those things for yourself the second part that nullifies all need of man's law and this intent of trying to do the right thing you know this is why they always have to portray government as being the good guy who's trying to do one of these two things or the others either provide and care for everybody or what's the other thing to protect and make everybody safe this is the daddy aspect of the whole you know aspect of government and this is the part that is all about coercion of other people okay and then we're gonna take your rights to make you more safe and keep you protected well here's the big axiomatic flaw in that thinking that's religious thinking because just like no one can ever care for all of your needs and what you need to develop in your life no one can ever protect you or keep you safe it is an impossibility for another to protect you or keep you safe now look in a situation we're like you know an attacker is trying to attack someone's wife or girlfriend obviously a man can help work off that kind of an attack individual or even a group of people it is possible to help contribute to helping to protect or keep an individual safe but there are no guarantees and they're not gonna be there who's going to be closer to the actual nature of a situation that could potentially harm you than you this is why self-defense and martial arts have to be part of our self-care a program okay you can't leave that to anyone else that's why you can't say I'm going to let the government protect me you have to learn martial arts self-defense and Firearms responsibly so that you can do this when the situation arises every your child should be practicing those things and you know mark I do have two children I've got a five and a seven year old and I've raised them both and I'm continuing to raise them both homeschooled teaching them study Aikido Taekwondo Shotokan hue teaching them all that you know when it when it comes time you know will teach them firearms as well but uh that's Conyers parenting right there that's one of the things that I think should be emphasized more the idea of teaching them about anarchy kind of openly and how to some people that was like oh my gosh I can't believe you're you're telling your kids this let them grow up and make their own minds up but it's like no there are people out there teaching their children about the legitimacy of the state or about you know if they don't follow all the church's rules they're gonna burn in hell and another really good way you are doing what you are doing there's you are properly morally educating your children which is what you're charged as a parent is to do so you're doing it the right way by morally bringing them up from a young age that's what we are supposed to do as parents you know there they are your words you are their steward and you are doing right by them and teaching them those true moral principles so thank you well thank you Mark and the last thing I really wanted to get across to you I know we use in the you know truth community the idea of chess as a concept of the light against dark there's a game that I'm not certain that you're aware of it's older than chess and it's it's called go or baddack or wait cheese the pendulum they have but I have heard of it but I do not know how to play it mark I know you're a busy guy but if you have a moment to learn that game I promise you that the the philosophical and spiritual truths that you will take away from learning that game will absolutely impact your view on how to argue how to debate how the truth movement should go about a lot of things because it is very much a game where it's also you know the it's it's absolutely worth the play anyways part of the truth community should check it out yes you are not the first person to tell me this my producer is actually smiling because he brought it up to me not too long ago and it's something that I am going to take time to familiarize myself with in the very near future so thank you great points see look folks these are the kind of calls that we get here okay I mean I just I've said it many times before I want to re-emphasize it again the callers to the shower like the best in the entire talk you know radio TV world it's it's truly inspiring it's like that this is something that like make does make me feel good that we get these types of calls so let's go to let's go to Brandon bonanza Brandon you are live on what on earth is happening episode number 200 welcome you are unmuted from my end if you can make sure that your own microphone is unmuted on your end Brandon are you there alright I'll give you another second or two the unmute is down in the lower left-hand corner of the discord interface you should unmute yourself when you come in because you will be server muted muted from the actual server end until I unmute you so Marc there he goes alright worked it out hey I was using my other laptop which I didn't have it okay no worries what do you have for us here today Brandon so that coming through my computer yeah you wanna you want to use headphones or and silence any other audio in the room from any device so if if you don't have headphones you're gonna hear an echo that's gonna create an issue so try it again I can hear you fine so just go ahead and risk your question or make your comment okay so um what I wanted to talk about was you wanted to know who was affected from you and I've came across you probably about mid December 2018 so it hasn't been that long Wow very recent okay so what does yeah what has been your experience or your impression of the information this fall I I actually talked to you recently I'm on your shows and my experience has been was at a point where I've been meditating for a few years and I was pretty good with the spiritual aspect and I've also been super into Ron Paul right to anarchism and enter capitalism but there's just something there I couldn't there was something that they couldn't give the spirituality that I was that I was trying to convey to most people and I understood that then I came across you and it kind of all fell into place that's where a very Brandan Wright very quickly a lot of people tell me one of the things I hear from many people is that whatever background that they were coming from prior to becoming privy to the information that I put out there for people is that they feel like they had an incomplete picture or a very disjointed picture of things where they could not see the relationship between them and they tell me that this weave that tapestry together and help it all come together and make sense that it was taken all of this was taking place from all of the different former perspective this seemed very disjointed before was that something like your experience cuz that's the thing I hear over and over again from people is that I helped connect the dots or put it all together for them yeah that's that's really true because I felt that on either side they weren't very accepting of each you know if you look at the spiritual community as far as their politics or you look at the anarchist community as far as their spirituality I agree there's what I liked about in my presentation on the main stage yeah anyway to see that and then so you're the way you break down natural law was very inspiring so thank you I've had this domain name that is anarchy means without rulers calm I bought it a while ago and I had been working on it right when I stumbled across all your stuff great name oh the way so it's basically just a landing page so if someone's talking to somebody and they're and because anytime someone hears Anarchy they always think about chaos well not people like us but the general public so I figured it'd be a nice place to point people to and then I came across you so I actually blinked in one of your videos about natural law and there so hope you don't mind no not at all I really appreciate when people spread the word like that and you know who knows how many people that might be new to this also they stumble across that for whatever reason and you know then they hit that and they're off to the races so I really love it when people share my material like that I encourage them to do so it's how that's exactly how I feel I kind of feel it's like I can throw rocks into people's shoes and then when their it just becomes an annoyance and then they kind of look into it because obviously we all know how hard it is to convey just this pure truth to people it's just really too strong for them they did the cognitive dissidence kicks in we're like oh we're like transformed we're able to take that raw electrical energy through this information like into ourselves but then we tend to have to step it down or hand it to other people who can step then step it down to give to people who aren't really strong enough to take it it is likely really throwing a weight to a person that has never worked out a day in their life or you know has very fragile bone structure and weak strength and they're not going to just take that lift and run with it they have to be helped to be built up first and again I'm not telling people not that that's not what needs to be done that is definitely what needs to be done you know it's just I have to try to give this information to the people who are capable who have the strength and motivate them to go then and help there's other people who have a little bit less strength than we do so it's it's important to keep in mind I'm not saying that that work doesn't need to be done I'm saying I'm the person who's gonna hand it to the other strong people first you know that we got to build that tight-knit community first then we can go on help disseminate it to the people who don't have that strength of character and will but Brennan I want to ask you something if I may after you you brought up the dynamic of the divide between the anarchist community and the spiritual community this is what was one of the cruxes of my presentation at Anika poco what do you think that we can do to bridge that divide or that gap in understanding and help anarchists to understand deep level spirituality a little bit more and help the spiritual people understand our key a whole lot more what do you think might be a method of doing that or just something that could help to bridge that divide and and help that understanding to flourish more oh I'm actually really glad that you asked me that because I recently wrote a blog post about knowing yourself that's what I titled it know thyself because they went watch the matrix your video about breaking it down and it had been awhile since I watched it a lot of things really clicked for me so I wrote this this easy article kind of breaking it down talking about like how religion is all basically trying to tell you the same thing all the religious figures and so that's that more laws more problems calm quick shadow so I wrote that and I tried sharing it around with some of the people a couple of people were pretty receptive I've gotten some stuff published on libertarian institute.org before but they weren't really interested in it and it didn't even I tried to cut out all the the the hippie dippie stuff and all the really religious stuff so that's something I tried and then another thing that I just been getting into recently is I don't know about with the libertarians but I've been getting into tarot cards because of the symbology it's a fanat it's an absolutely fascinating study I mean and it will open up a whole deep understanding of true spirituality and natural law and true freedom if one really deeply penetrates the the mysteries of the message of the Tarot it's something that I found find profoundly important and have covered a pretty decent amount in my work so I highly encourage you to look deeper into that tradition what have you found so far in studying it so you you were the one I had to credit with turning me on to it and then I've been looking into Michael to Zairian and his work and I found this book I'm not sure if it's recommended but it's called the ancient arrow and its symbolism by David Lemieux and they want like 300 hours on Amazon for but I found it some coal books are like that that the you'll pay a premium for them depending on how rare or out of print they are absolutely I mean it was pretty it was printed in like 84 but I ended up finding it for $20 on some used book site oh great and it just goes into the link between Hermes thoughts and the thoughts between connection with that and the meanings of the cards when it comes to that so I found that I think just with the symbology because if I could because I'm a podcaster and I want to start a video series I think if I could start to show people the symbology that they see in everyday life and the way it relates to the Tarot maybe this way mention because this way it's not really political or religious it's kind of a fun thing that we're doing and I'm just dropping in ideas as I do it it's are helping people to see a system of correspondences that were there to wordlessly teach profound life lessons that is what the Tarot was designed to do and I think people who aren't religious at all can see that if it's explained properly to them and I think that is pretty it's a pretty good and effective toolset for helping to bridge that divide that we're talking about because you know it understanding what the tarot cards truly represent in life does not require any religious belief it is just it's a it's a pictorial fable it's a collection of pictorial fables and life lessons it's one of the ways you can see the Tarot so I think that's definitely a good approach and a good introductory thing that maybe some of us can do and again we could do it in so many different ways folks it is it is doable from such a different considerable amount of perspectives the great work is not one thing it is many many many approaches that we should all use simultaneously from health to true education methodologies to you know understanding allegorical systems to teaching straight plane philosophical morality to people it can be done in so many ways you could do it through art through music through pictures through different occult traditions and you can choose you can decide the way that you want to go about doing it in in accordance with your strengths okay so that's what I encourage people to go ahead and do so let's see who else do we have here all right I'm gonna go to Ivan from Phoenix I see that he's in in there because I want to give you a little bit more time last time we spoke Ivan from Phoenix my friend how are you doing hey Mark can you hear me today absolutely sounding good oh really I was the last the first two times I called you on this show I was at home those nice quiet environment show synchronistically the first time I called you was from work noisy background from work oh I can hear a small bit of background noise but it's not very distracting I'm hearing you're fine through my headphones I hope it's coming through okay Andre live stream so go right ahead yeah very well it keeps kicking me out the hot spot onto my tablet and the tablet is what I'm attached to now listen alright yeah jump in alright so yesterday I attended here in Tempe nearby Phoenix an event called local to global justice interesting yeah it's I think what we would categorize like social justice kind of die and sure enough the panels were interesting and I only spoke twice asked two questions and two different workshops both times obviously I got that glazed so you wouldn't say they were a highly conscious community by any stretch right there as conscious as far as I think I threw this term at you before conspiracy tainment so as far as the universities and whatever the powers that should not be allowed think they know that's as far as they're going it's I did it's a box within a box so they cut me out of one box and falling into another box and such they think that these traps are set up I call them you know color the sacks before the gold mind can be truly developed you know they have on different nets or snags waiting for people if they break out of one they want to snag you in the next one before you can get to the finish line of understanding natural law so yeah that is how the the system sets up their their psychological control nets without a doubt right I know you can tell it's well-intentioned speakers hopefully and attendees however they're not ready to go there and the funny thing is is the subtitle for this event was called radical imaginations okay so they were talking all these problems with you know sex trade labor and all this stuff and I stood up and said okay I hear what you're talking about has anybody considered doing away with money altogether that is the thing that's keeping everything together it causes money lack of funding and all this stuff you have poverty you have wealth so if you get rid of that whole concept and do things that need to be done because they need to be done that can change things you just have very you just attack the very God of all creation there I mean you just attack the dynamic that actually created all of the matter and energy and laws of all the universe money right I mean that's what did it I'm an atheist mark oh my god yeah I mean that's deicide man I mean that's exactly what that is you just tried to kill their God amen I'm blaming you mark because you want to know what I learned from you there you go the one you told me about the one I so thanks mark now you made me you made life that much more but trouble for me because I'm amongst all these people in the matrix and attempting to wake them up to that they're in a matrix let alone get out of it I think when we depression regularly when we make headway in destroying the religion of authority then it will be easier for people to see side of the box of the religion of money it's gonna be very hard while government is still in place see I feel like if we do get out of this very deadly and chaotic situation that we are in with the slavery of government then we can make some progress in headway toward the end of the monetary system and moving toward it as a society where we're actually treating each other as a living dynamic human family of brothers and sisters that's going to take tremendous work and I don't think that we're gonna be able to do that while we're in slavery well I think we have to end the authoritarian religion first and then move to that higher level of conscious that will be the next round of this fight so to speak you know and you know while we're still in this system you know obviously people are going to have to acquire what the resources that are used within this system to just be able to live eat do what they do with technology put the word out you know some create physical items and send them all over the world if they can you know it's a it's it's an unfortunate thing that is quite frankly right now necessary insofar as because other people still believe in we unfortunately must continue to use it and employ in the best ways we have to transmute that illusion into truth by using it in the best ways that we can put it to work through through us in so I think that's the best way we can deal with the unnecessary monetary system that is in place right now until we move to a higher level of consciousness and get out of the the slavery of of the whole control system as far as government is concerned I think money will be around longer than government will if humanity moves in the right direction I think that will be the religion we will conquer after we conquer the religion of government personally Oh mark we can we butt heads mark Butthead I'm just saying they're there two heads of the same snake I agree this whole order followers and belief in authority they I'm not gonna do what you tell me well here's a hundred thousand no ok here's two hundred fifty thousand okay so they turn because if the order legal sorry yeah man-made legal order followers won't follow the orders then the contractors and mercenaries sure as well and Ivan I want to say something in addition to that as an addendum to that when we think of the morality and overall consciousness of the people even the people who are oppressed by the system of control how many people percentage-wise do we think if offered enough some of this you know illusory construct that we call money would not cave in and do something immoral if asked who for a certain amount of money you know I think the number would be exceedingly small I think we would be looking at less than five percent of all human beings to be honest again if I'm being honest with myself and others which I endeavor always to do I think we would be looking at about three to four percent of human beings would not cave in under the pressure of accepting tremendous amounts of wealth for themselves to do something immoral to another human being sadly you know part of what I learned from you then trying all this in with what you just said now I would say the that percentage that you threw out there maybe the other end of the spectrum of the true psychopath the true psychopathy you know the truth yeah everyone else will be secondary third for whatever your level of psychopaths that would give in not for a hundred thousand maybe for a million right the ones who won't that's that small one percenter feet opposite of not a trace of psychopathy in their system that's right and it shows you that's how little light there is in the world that's how true how small what a small amount of true spiritual light and enlightenment there is in the world and it does show us what our great work is to do you know we have to communicate these principles of true and morality to all who will will listen at any level and plant those seeds of understanding in them so that they can you know flourish at a later time possibly so Ivan thanks so much man your your calls are always fantastic do you have anything else I'll just throw out a few movies oh and I think barb had set a little something in my ear about bugging you may be doing a little segment yeah we could maybe bring on a show to talk about some allegories at some point you know through movies or I'd like to bring you on the one great work network when we get it started and you know you know you have a page on there where you could do allegorical breakdowns through you know videos or articles you know I think it would be great you know I want to sit down and talk about with you about making that happen at some future point the network is gonna take a little while to get up off the ground I still looking for more technical help folks briefly let me interrupt you very briefly Ivan I'll let you get back to your point and longer allegorically about movies because you always do a great job with that we we did mention last week that I'm still looking for some technical help I should have covered this and before going to the calls I want to take just a moment because I did say to either my assistant if you were in any of those positions to be able to contribute technological help to what on earth is happening but we didn't give her email address I just wanted to give her correct email address because her name isn't spelled like you might think that it is it's L e I H a at what on earth is happening calm Lea at what on earth is happening calm if you are in a position to be able to help technologically in the ways that I asked last week I'm looking for a webmaster with strong PHP skills skills in a you know my sequel database programming you know who can modify some open source software maybe even make you know a mobile app I'd like to love to do a mobile app at some point if you have any of those types of skills and also we were looking for video editors and Photoshop people so video and graphics send email to my assistant Lea at on earth is happening calm she has taken in everybody's requests to try to you know contribute and help with the team here and we are going through all of those and we have you know looked at everybody's skill set and we're going to be getting back to people so thank you to everyone so far who has responded and that is the email address there on your screen that you can send your your an example of your work and you know a resume and whatever skill sets that you have over in my assistant and you'll hear from her so thank you Ivan sorry for the interruption on that but it's something that I thought was important that I neglected to mention so you said you had a few movies that you think people should look out from an allegorical point of view and I know you're pretty good you haven't your finger on that pulse and seeing what Hollywood is doing whether it be for for good or ill you know you you you get out there like the messages that are being put out there through movies and popular entertainment so what do you have for us in that regard okay I believe so I have them all written down so I'm gonna start watching the ones that you've recommended to pick out the the allegorical content to content within them right okay yeah so this movie the yeah serenity it should still be out barely maybe in a handful of theaters Matthew McConaughey and Anne Hathaway the trailer has it you know just old couple you know she she's trying to have him get rid of her new husband yeah that's a total misdirection from what the movies about in essence it's almost like another Matrix movie spoiler alert because that reality that you're watching in the movie it's it's now it's like in a another world basically there's handlers manipulating what's happening there and it's a total mind game kind of thing watching that movie as it unravels so you know that's one serenity and then this weekend I did this new animated cartoon one called How to Train Your Dragon it's the third one the world okay right off the bat what stood out for me with that almost they sorry I got distracted here that it has references to America Trump and the wall in the conversations and Dragons over population of dragons and building something to keep them out I'm like okay that's interesting but they mess it up for me and I guess someone like great car would at the higher side chapter really like this he's all about the Hollow Earth and so we got the dragons or reptiles interacting with the human and they're trying to find a hidden world and when they do find it it's like in the middle of the ocean this hole in the ocean that goes to the center of the earth so Hollow Earth theory and that's where the dragons end up going and disappearing because they can't exist with humans yet because humans aren't evolved enough to live with the dragons with the reptiles so I was like fuck how much truth was dropped in there possibly or you know that's where the reptilians are at center of the earth but that's just a cartoon mark we're just conspiracy theorists right you know they're always dropping little subtle things and hints in there for in pop culture for us to consider and to look at it for conscious of them so Ivan I want to thank you for your call always bringing up great allegorical things in in pop culture especially movies again I think I'm gonna have to do a segment on what on earth is happening with you at some point and or you know work to get you on one great network and have your own page on that network at some future point so we'll talk about that absolutely but a great call as always let's move on to let's go - Ethan strong Ethan you're live on what on earth is happening welcome to the show Ethan strong you have to unmute your microphone from your end there you can you hear me now you just unmuted thank you yes I can okay excellent forgot about that little feature no worries so hey I'm glad to hear that you got down to that conference well and back safe it was at red here that things went well with that for you the travel was definitely safe it was definitely a truck it was a journey I've never done anything quite that extensive before through ground travel but it was an experience got to see a lot of this country and of Mexico both beautiful land masses I'm just you know nature is just so profoundly beautiful so it was good from that respect the human element you know on the travel not so much although you know the people just traveling and doing their job to you know make the travel comfortable on the the voluntary you know services we're very good and doing their job well not so much in the form of the government people who are trying to pretend that there's somehow helping or giving assistance or protecting that made it practically unbearable but other than that not too bad and you know I'm gonna have to consider whether I want to do anything like that again it makes me really not want to travel at all and just stay here until we destroy this system as it so very much needs to be destroyed but yeah go right ahead okay yeah can you hear me I just want to double-check and make sure that I'm coming through coming through loud and clear you sound pretty good okay excellent um and just a little know kind of a tech issue I'm noticing this happened last time I was on the call with you there's kind of a your transmission is broken a little bit especially when we're on the line together I don't know what's causing that but it's just something I noticed it happened last time and it's happening a little bit now too yeah I think I could try to clear that up by unplugging my headset and plugging it back in but I think part of it is that dis chords duplexing feature which means the ability of each person to hear each other while they're simultaneously speaking is not as advanced as some other chat programs duplexing functionality technologically so basically you kind of really have to have one-way conversation and the person has to pause and then the next person start to speak because if you're both speaking at the same time there can be a it's not a good it's not good to overlap like that and while I'm talking and you are not do i sound clear and okay though or is it glad that definitely it seems like what I just noticed there after you mentioned all that is that as soon as I'm done talking and you go into response mode there's a little bit of broken transmission on your part but then after maybe five seconds passes you start coming through clear unbroken yeah this is normal this is the the way that duplexing works in discord I'm sure that their developers their programmers will add improvement to the voice quality as they continue to refine it I feel like this program right now met all of the needs that I was looking for in a IP based voice program to let people call in without having to you know rack up fees internationally if they're calling from another country so this lets us all just communicate over the Internet and it had the features that I was looking for so some of those things that are just not totally refined will probably get there at some point we'll just you know work around them as we continue to use it but thanks for bringing that to my attention yeah no problem man I'm really just kind of glad that you're back on the live program and as I was mentioning last time we spoke the timing couldn't have been more perfect for me because personally I was just getting through all of your previous podcasts and as soon as I pretty much as soon as I finished the last 196 it was maybe two or three weeks that passed before you started this new version of the I've broadcast so I'm down just that your your back on on the stage here yeah you know me too I mean I I have to say that I was down for longer than I wanted to be and I it is good if he does feel good to be back and doing this it's something that has been an outlet for me it's almost cathartic for me to do and you know i I've said it before you know I know people will think this will sound egotistical but my perspective being absent and lacking in the community I don't think was a good thing because I think that that void was filled by a lot of noise let's just say being nice saying it like that but I really feel like I should keep my my voice on the airwaves and lend the perspectives that I'm bringing forward and bringing to the table to people to consider because I think it pushes the envelope of consciousness forward and that's what I'm here to do that's what my work is and when I am doing it and OnPoint doing it I think that that really helps my energy and my mental state so again it's cathartic for me yeah well that's a good segue for me to fulfill your request for Collins today I personally before I stumbled upon you and your work and your podcast and everything I had been taking in a lot of information and content from different sources eclectically like you recommend people do and I felt like there was something missing from much of it and you know I was putting together you know connecting the dots in my own time and consciousness you know over the course of you know maybe eight years or so and I don't know how it took me so long to come across your work because I I remember I mentioned this in the last show when I talked to you that I've discovered you through the interview you did with max Egan like however many a couple two or three years ago whenever that was and and I was just like wow stuff that you were saying really resonated with me and I had already kind of had a lot of those kind of thoughts that you were speaking to on my own and then you know got into your work and realized wow this guy is out there speaking about a lot of the stuff that I've kind of concluded on my own and just felt really grateful to come across your work and so you know for me I'll just say I'll leave it at this as far as how your work has impacted me personally as I said I've taken in a lot of information and content from other teachers you know that put out work along these lines that you do and I haven't felt more inspired by anybody else as I have through taking in content that you've put out there so that really means a lot that's how that's how it's impacted me now I think thank you yeah that means a lot I mean you know especially when I hear that you know you you came to the work a little while ago and you know you you found it and it helped to you know connect a lot of former material that you had taken in III find it interesting that a lot of people come to this to my work very almost late you know like that they don't discover it until they have so many of the other elements of the picture it would seem like this is almost like a final destination for a lot of people and or search algorithms of a lot of people's social media and or search engines that they were using are not you know basically taking people to my content or connecting them to it which you know who knows that could be deliberate it could be the way the algorithm is set up but you know it seems like it takes people a little while to get a lot of other knowledge under their belt and then when they do find it that's when they're not resistant to hearing it because they have the way has been sort of prepared for them a little bit more it's like if people aren't familiar with any of this and they just find me cold you know just out of the blue out of nowhere it's gonna be difficult it's gonna be hard for them to really get the truth of what I'm saying because they're not gonna have been psychologically mentally prepared and have looked into a lot of other material so that's what I find has been a pretty similar journey or experience for most people is that they kind of come to me last after they've you know really looked into a whole lot of other people's work and they're there they're there the barriers of psychological resistance have already been you know somewhat broken down and prepared to hear that some of the heavier information that I have to present yeah that's for sure that there's got to be some kind of foundation before sinking teeth into what you've put out there cuz it's like yeah it's like an atomic bomb going off otherwise so that's a great way of putting it descriptively yeah I don't want to take up too much swim because I know there's a bunch of other people and in the call list but I did I last time you were on air and we spoke prior to you taking calls you were talking about some stuff then that brought up a question to mine for me and I didn't get to ask it last time okay so right go right ahead that out there and prior to that actually I want to just let you know I plan to do my very best to get on these weekly broadcast live because I have a pretty extensive list of questions I want to ask you so anyway so this one came to mine last week you were talking about the difference between nations and ignorance as you've done a number of times and so I kind of wrote this down and I'm just gonna read it off the way I have it written okay so considering the phenomena that I've called divine inspiration or innate conscience which is the ability for an individual to tap into the infinite field of consciousness or the mind of God whatever you want to call it tap into that and receive knowledge insight information given that ability or this phenomenon how does that phenomenon fit into your discourse regarding the difference between nations and ignorance because if this phenomena is real as many individuals would claim it to be and I personally through personal experience know it to be true and real is there really such a thing as genuine essence because if all knowledge and information is available to us through this field of consciousness and information and individuals are not privy to it due to their neglect to exercise their ability to tap into that realm then can they still be considered truly nation I think that's kind of a lot but does that make sense yeah I mean I think in the 3d reality that we live in if you want to consider that quote the real we can still say that information can be sequestered from people or let's say they can be sequestered from their ability to receive it by being dissuaded you know by being having been really physically psychologically emotionally and spiritually suppressed and dumbed down so much so I mean it can be still I think a matter of really them never having encountered it but you are correct also in that even in the 3d world through books through podcasts through movies through allegories through you know writings interviews audio video you name it documentaries so many different eclectic variety of sources there right now there is so much information in the world we are drowning in a sea of information and yet we are in a an absolute desert of wisdom because it's the processing that input and processing of that data is so profoundly lacking and that's what ignorance really is it's not taking in what we should be taking in so that we are then not coming to an accurate understanding of what it means and then applying it in our lives in the right way in that sense I would say it I would consider it true that there really is no nations in our world we can live in a nation to environment that is just not the case for Humanity right now you know maybe you could say areas of North Korea China etc you know that are already much further down the totalitarian hole they really have had this information purged from their communities and then they have you know internet firewalls erected to keep it out you could say in certain extreme situations like that in humanity that yes in essence is present in all of Western civilization there is no situation like that and if we haven't taken it into ourselves at this point we are actively involved in the completely unspiritual practice and in the freedom murdering practice of actively ignoring truth or as I call it engaging in ignoring you know we have to just emphasize the ignorance means to ignore something that actually is present and that's what I would say is the condition of the wide majority of humanity not necessarily for everyone but for the overwhelming vast majority we're in a state of ignorance and not necess so thank you for bringing that up Ethan and thank you so much for the call let's move on we're gonna be taking your calls through the end of the show Frank from Italy Frank from Italy you are live on the 200th episode of what on earth is happening welcome I didn't come here yes I can hear you okay first of all first of all I want to apologize because my English language is not so so great it's no problem at all we can understand you fine and I want to thank you from calling from really really grateful that you I can speak with you today because there's been a long time that I'm listening to your walk great you want to meet 2015 okay June to July so you can even listening to my voice because I'm really really really grateful so I can speak with you because your work really transformed my life thank you so much originally from Cameroon okay and I'm living in Italy as an answering and seven so for me is quite a pleasure to speak with you because in your post cast you really raised metrio material thanks so much I mean that is that is really what this is all about helping people to just come up in consciousness see what's going on and then make informed decisions and then get involved in helping others to do the same thing so when I hear that my work has helped you in that process of spiritual discovery and growth that's what makes doing this worthwhile for me so do I discover you because I remember in 2015 I was doing a life signa talk about self had personal development because I have studied a walk of in Tony Robbins all those would all those guru or the New Age right I don't even remember his name but have studied will walk of new New Age people so I started to teach people about it and remember during my presentation that I took Nelson Mandela love forgiveness the two weeks after my presentation I saw a post on Facebook but Nelson Mandela was part of energy so there I say okay all these thing that I'm doing because I also learned a little about and be where they say you have two orders successful people you don't have to invent the hot water so just go and take me up on strategies and teach it to other people so you can make money that was my man said so I was only there because I wanted to study the walk of Antonio means Brian Tracy T Harv Eker so I can teach it to other people so I can make money right after my seminar when I've discovered that Nelson Mandela who I use as a model of forgiveness was part of that Illuminati so I asked myself this question when I'm doing this type of modeling don't fall for the force of goodness of the darkness say okay what does Illuminati is freemason I need to know them because if they had out there doing that dog walk I need to understand how they are working right and prevent myself from them so I went to my room in my room they checking on internet on YouTube Illuminati all those type of thing that's where I discovered that all my rock star like Rebecca Lee we had all the people I used to admire even a basketball player like Kobe Bryant I also have a chance of covering at home so I discovered that all of them were part of Illuminati a popular culture and especially the music industry is flooded with dark occultism without a doubt and discover them so I remain in my room for two weeks I didn't know where to go what to do anymore because I have my bath it was difficult to me do muck yeah I can hear you continue okay so when I discovered that all the pop culture do you need any players all the people that are applying kind of God you kind of got depressed at that point in in discovering that a lot of these people were not really on the side of really really depressed ever many my room for two weeks I didn't go out because I didn't know what to do anymore right and that's how I discover your walk Wow see so some people come to it from the dark side of things but it you know you you were involved in looking into what you had considered previously to be practices of spirituality but they were coming from a more ego driven perspective and there's many people who are very happy to teach it to people from that lower level perspective even principles that can actually be applied and work but they're only being done from that more ego driven selfish perspective you know and that's not a proper application of spirituality and occultism that's done from a very egoic position so some people come at it from that side where their intent was to look at the good side of it and then they discover that there's a dark element to it and then they want to know more about what that is very very interesting experience that you had there Frank and I'm very glad that I could help in a you know bridging that that knowledged gap there and helping you to understand a little bit more about those darker elements of the occult that are really controlling things behind the scenes in our world and really doing a number on you know the collective minds of humanity that keep them in this mindset of believing that this whole control system is somehow morally legitimate when it really is just based in coercion and violence so uh how long would you say it took you from the discovery of my work to really understanding you know the the moral principles and and changing you know your worldview okay you really like not too much time because I really have an open mind but in the beginning for me was difficult right when I first this thing I liked my brainwashing to the world like occultism so for me of course it was something back but when I take patient because I I was saying that and into my room so I can listen to a podcast is not that half Michelson are not part of some type of mystic group so little by little when I saw a presentation of natural law where you really explain your cultures in what it consists on the grid the module and Minor Arcana all those type of things so he started open my mind and I really granted the concept but for me is difficult because as you can see my English is not perfect but like when you used to say new grid will require the assistance that we used to do because you are presentation of the natural Samina I have made you transcribe of it with my poor English so it took me 2 weeks fantastic thanks for doing that and I just briefly want to say before you continue to anybody that wants to transcribe any of my presentations into other languages you don't need my permission just do it and redistribute it ok you don't even need to write to me and ask just if you want to put it in another language take the original English video make subtitle it make a transcription put redistribute it ok ma my information isn't copy written in that sense you know I wanted to remain intact I would like you not to take it out of context but absolutely if you want to translate it into other languages you don't need my permission to do that ok as long as you feel you're gonna do a good job in the translation and not change the context of things that I've said just please do translate it and put it back out there so that that is just something I wanted to say to the listening audience who may have experiences with other languages because we do need to get this out to everywhere in the world not just the english-speaking regions of the world so thank you for that Frank and continue my purpose when I mean it was good service for all it was is for really understand and reps all the concept so now I'm preparing myself because it took me like I said not too much time to really grab the concept of occultism and spiritual law like you see in one of your pod cause I can say that I really have the North Star for me was easy very difficult I used to have was to really go out and move myself from the of the culture of the Occidental culture because for me I was much more ego driven right and you know what this is what I hear this is what I hear from a lot of people Frank I hear that they had to actually have the time set aside somehow to actually sit with the material sit with the information it seems like part of how they really control us is by keeping us so busy and so focused only on survival and running that rat race and running that rat wheel that we never take a breath we never stand back from the situation and look at it with fresh eyes from a little bit far away from it that we're always wrapped up and ensconced in our own thoughts and in our own you know daily practices on a daily basis with work with you know family life etc and with frivolous things and entertainment that we never have the time to actually do that so well I want to say to you that I want to thank you for making that time in your life that we can all make that time even if it's a few hours a week we can make that time and spend it with quality information that we know that we need to take in and learn and understand it is a labor of love if we consider that we love ourselves and we love our family members and we love our children and we want to see better things happen for future generations that there is no excuse not to do that we have to make the time even if we have limited availability of time there are ways of making that time and engaging in time management to be able to take in pertinent knowledge so Frank I want to thank you for doing that I want to thank you for the call it's great it's very heartening to hear from people from non-english speaking countries and regions of the world I actually just got an arc Drive from Italy and you know it's like it's something that you don't see that often Italy is one of the regions that for whatever reason I guess it is mostly a language divide you don't see a lot of people you know getting the arc driver even data you know from the gifts area from Italy there are a few but more so in you know other areas of Europe like France and Germany etc you know a Sweden Switzerland etc there are many other places take me up on a lot of these offers but Italy seems to be reticent and I'm starting to see more people from Italy get involved and and really you know go down that true spiritual path of learning and and development and that's good to see because I'm you know that obviously it's a big religious stronghold of the world clearly you know with the Roman Catholic Church there and the Vatican so I think it's a good thing that more people from that area are coming online to this knowledge and working to take it into themselves and spread it so thank you so much Frank so let's move on to another caller let's hear from state of Anarchy state of an achievement your lives what on earth is happening you've been here background noise as well my headphones please mute because background or I'm going to have to let you go are you there stay oh there he goes Carmen how are you mark can you hear me yes I can so let me let me make this point because I don't think I've ever really fully made it so the best way of going into the call is you have to put on phone I'm gonna have to I'm gonna have for a moment to explain this okay and you want to listen in the room in the discord room don't listen to the live stream because that's gonna be delayed by between 10 and 20 seconds okay so please listen while the calls are active for you to be called inside the disc war room with headphones or earbuds on okay so let me go back to you Carmen and hopefully you can Mew that background and like I just make sure that you have some type of headphones or ear buds on because you don't want to be listening to my voice through speakers or it's gonna echo back in and then I'm not really gonna be able to take the call so let's try it again Carmen from state of Anarchy you're live on water and earth is happening are you there all right mark am i coming through you're coming through great now now it sounds good no worries awesome well I just wanted to say thanks for coming in Acapulco and and bringing the message down there to all those people because you know it is an anarcho-capitalist conference and we got to make sure that we don't get lost in that you know the hype and all the craziness around the crypto can't get lost in the hyphens not just the hype but the hyphens right yeah yeah yeah yeah and I hear all that stuff it's that's too much the infighting the division that's like that's the one thing I think the anarchists forget about that I really appreciate you bringing to the table because it's about the unity and the unity behind the truth that is what's really gonna make this sort of thing happen so let me ask you what do you think was the general mindset of the presentation that I brought to the table from people that you spoke to and you know intermingled with at the conference what was the put your finger on that pulse and give us some feedback of what you think most people at the conference thought about the work that I brought forward dude everybody just seems like that it's like yours is the complete picture like I feel like every other speaker sort of like specializes in one area or anyone well that was your take or did you feel that that was the community so that's that's there that was the take of everybody that talks to me it's like everybody has and even it's funny even the past couple of callers have been echoing this it's like people come to these conferences with like a certain like certain sort of like you know a couple different jars of knowledge and it's like once they see your work you spell it all out for them from wide why certain things inside of your like this to like what the actual causal factors are on a spiritual plane some people only have one or two of those awareness is and you bridge the gap which really allows people to sort of really ground themselves in a holistic understanding of what the problem is but more importantly what the solution is and that's what's really beneficial in my that so that's a high compliment and I really thank you for that and I'm happy to hear that that is kind of the way that the information is being received from that community from someone who's talking to a lot of people and kind of gauging you know reactions so thanks for that she'd battery oh yeah mark well guess what it's growing so fast that like now the state of hierarchy finds itself throwing a conference in Philadelphia and we're gonna be bringing a lot of people from an arc apoco there you know and I'm pretty sure you and I have talked are you going to be involved in this yes you put the offer out on the table while we were doing that interview outside of the main lecture hall and I'm I'm in you know if you if you want me to be part of it I'm in and I'll prepare that lecture that we talked about the sacred gift of anger so according one of the main organizers it's going to be happening here in Philadelphia in the fall yeah absolutely I'm totally down for doing it a mark you're the man dude well thank you again for traveling by land all the way to the Pacific coast of Mexico to give that much-needed presentation it was thank you yeah that's insane and then the crazy part is you spent four days coming back when did you get back I got back I got back into Philadelphia yesterday at 3 p.m. Eastern time and then I didn't even take a day off jump right into the show the next very next day that was the plan it almost didn't happen I I pushed through it and made it happen I'm glad I did so because the the show's been pretty on fire thus far and the callers have been great so you know it was long it was an arduous travel it was tiring I'm glad it was actually kind of glad to be back in Philly if it's weird to hear myself say that but I felt the same thing yeah I felt the same thing you know it's we have some kind of a community here it's not it's not you know maybe the greatest that we could possibly hope for but I'll tell you what it's like you know I'm not talking about the general population in the city I'm talking about there is a freedom community here that you know there are some people who do truly get it who are from this city and we're kind of like a small tight-knit unit a tight-knit community and I think some people are doing good work you know putting the message out there and I consider you one of them so thanks for what you're doing with state of anarchy and thanks for getting involved in conference organization it's a big job it's a heart it's hard work so you know get your you know feet wet in that and I wish you all the success in the world in putting the event together and I'm glad that you're inviting me to be part of it thank you for all your support thank you for inspiring me since like 2011 and dude I will be seeing you soon because me and you have a documentary we have to finish that's right Harmons helping me to edit the documentary on natural law that I'm making it's called mark passio and the science of natural law it's going to be a full-length documentary on the entire you know teachings of natural law that I've been putting forward and we're gonna put that into a very good visual format through video through a documentary video and Carmen is one of the chief editors on the project so we're actually gonna be turning that into high gear and my goal was I really want to get that finished polished and out by the end of the year maybe if we can get it done and polished in in the way that I really want to see it done maybe we could debut the documentary at an arkadelphia that's that would be that's great that would be a tremendous goal it's kind of a lofty goal you know to have it done and polished and ready to for release then but I think if we work on it pretty steadfastly we could get it done by then and and you know debut it at that completely agree mark and let's set that as our as ours goals I'd be happy if that happened you know I've got two ambitious enough timeline for me I'm more than that I think it's a great idea awesome all right mark well I'll get off the air I'll let you get some more callers thanks for having me on man appreciate it you got it brother thanks so much Carmen Carmen from state of anarchy ladies and gentlemen check out his youtube channel all right let's go to let's go to [Music] voluntary Asterius you are live on the 200th episode of what on earth is happening welcome to the show hey Mark appreciate it you can call me Chris by the way I I was a not aware that you attended in Acapulco by ground I thought figured you would have flown like most of the other folks I did last year I made an exception to my no-fly rule I haven't been feeling well so in 2005 but I I kind of was a little upset with myself that I broke that no fly rule and and flew out there last year I'm not a fan of air travel even if the TSA wasn't part of it it's nauseating to me the air quality and motion of a plane doesn't suit me well for some reason and I feel like I'm almost nauseous the entire trip which doesn't really happen with me when I travel by train and or car bus unless I really try to read a lot on the bus or car you know then I can get that feeling but it happens to me no matter what on a plane so that was kind of torturous taking the multiple planes last year and I just resolved I wasn't gonna do that anymore so I went with ground travel again tremendously different experience and very taxing also on the body but at least it didn't make me feel like I was gonna throw up the whole way there sure sure yeah it was kind of interesting the flight in I think I was the only one attending in arc poco this year going in and on the way back I think there were about 10 or so attendees from the event who were getting back on the plane but you know I I always feel disgusted with the TSA when we go through there but it's kind of interesting leaving we had to go through the the whole process with it wasn't TSA but oh no yeah was the

TSA when we hit dallas-fort worth from Mexico City and some of the anarchists that were with me in Lyon I was talking to them and they were saying they don't like going through that body scanner and I was like why are you going through the body scanner if these people are gonna violate you make it clear what they're doing right and they weren't even aware you can opt out and I always try to raise my voice and I said I'm opting out and sure enough 17 artists in a row opted out and I and I made a point I always do this when they're when they're doing this you know the TSA agents try to be so polite with you and they're like oh I'm you know I got to do this that and the other do you have any sensitive spots and I say yeah my penis I don't want you to touch my penis and they always tell me they say oh well I have to do that and I say well if you're gonna violate me go ahead I don't consent to you touching my penis and I don't want you to do it it's your decision and they always say well I have to do this and I tell them it's your decision I mean you can't get into a huge philosophical debate and that moment but I try to emphasize the fact that this is something that they are doing it is their choice to do it what what we're not told to these people is no you do not have to do it what you mean is you want the money that you receive to do this immoral behavior from the people who are paying you to do it that's what you are really saying that you will do something that is an immoral violation of someone else's natural rights because you want the money that comes from your masters as a reward for you doing this immoral action to another human being that is what they are really saying when they are saying I have to do it no you don't have to do anything you want the money that comes from doing it that you are paid need to act in that immoral capacity and that dynamic is exactly what makes every single one of these people immoral bad people and they need to be told just like that they need to be told like that by their friends and family members above all else but here's the problem their friends and family members are just as immoral as they are in most cases and would do the same thing for money this is the problem with most of the people of the earth is that they are just immoral people at their core foundational values in their in their the spiritual aspects of themselves they don't care about what's really right or wrong all they care about is how they will gain from the performance of the action and if they will gain from it they will do harm to somebody else and violate their rights and that's what Satanism is this is what I've been trying to explain to people for 12 years that that is what the religion called Satanism actually is it's not what people think it is it is being willing to do anything to your fellow human being if it means that you profit from it including violating their rights or their life and that person is a Satanist whether they understand or agree with that definition or not that is what the religion of Satanism actually is it doesn't matter whether they don't understand it by that very actual truthful definitively correct definition of Satanism that makes them in practice a de facto Satanist by their deeds oh yeah and it was even more even more obvious what was going on the the individual that was right behind me in line she had just learned that you could actually opt out of this full-body scanner right she was she was probably about six months pregnant I mean very she was very pregnant and she opted out and you know we were all speaking in very loud voices so everyone else around could see what was going on right and this guy was groping this pregnant lady and I said so you're going to feel up a pregnant lady and public you know this is your choice anyway I you would mention you went on ground travel and it just reminded me because I'm always furious every time I travel anywhere through the airport because I really hate those fucking TSA office no and you imagine imagine how many people will apply for those jobs how many hundreds of thousands of people nationwide and worldwide will go into that type of a job they don't even understand the concept of what Right Livelihood is people should look up this concept Right Livelihood it's part of the Buddhist tradition see part of the Buddhist tradition which there are aspects of true spirituality within other religions as well you know it's not that they are have every single thing wrong it's just they they do they don't get down to the real core truths of morality in many cases because it's wrapped up with so much dogma and other nonsense but in in the Buddhist tradition in the Far East it is taught that there is something called the right way of making a living the right way of making the money that your resource that you need to make to survive and live in in the 3d reality and if you are doing something that is a violation of other people's rights lives and freedom then that is wrong livelihood that you should not do that for any amount of money and if it does cause harm if it does initiate harm or aggression or coercion or violence or duress upon anyone that you should not engage in that behavior regardless of whether you will be paid for it okay and and this is what people have in these positions have to understand there is a right morally right way of bringing in resources for you and your family to survive as is currently needed unfortunately in the current monetary system we are living in and then there is a morally wrong way to do that okay we need to step away from the morally wrong ways of doing that and only do that in a capacity that is morally right and acceptable according to the laws of morality to do and unfortunately most people don't care they will just continue to go and violate other people's rights as long as they're receiving a paycheck to do it and we need to stop calling these people in any way good people they're not good well-intentioned people they're people who don't care they don't care about whose rights they're violating that makes them psychopathic they don't care they look you right in the face and go I care more about my paycheck than your rights or even mine see they're saying they don't care about their own rights you know I'm not talking about mine mark passio speaking as them they'll say to you I don't care about your rights and I don't care about my rights they don't care about human rights now what kind of a person doesn't care about human rights it's called being an amoral bad person we need to stop you from izing it and say oh well they're just trying to feed their family I don't really care that's not my that's not my issue or problem my issue or problem is are you violating people's rights to do that and you don't have any right to do that you know you only believe that you do you know personally I don't care you put a gun up against my head and tell me to go violate other people's rights I don't shoot me it doesn't matter to me it's not I'm not cooperating I'm not going to do the behaviors that are commanded to me to do for any amount of money or any amount of violence you know we have to get over that notion that you know it's okay just because they have children to feed no it's not that still makes them an immoral human being that still makes them a bad person you know we have this totally wrong idea of what a good person and a bad person are you know we have this soft definition of what it means to be a good person it's it's a way narrower path to truly being a good true moral human being than people think that it is and that's therein lies the problem is that most people have been given this soft euphemistic definition of what a good person is you know these aren't good people and that never were their parents couldn't have been good people to teach them or not teach them I should say any kind of true moral values they had to come from an immoral upbringing so-called upbringing they weren't really brought up or raised at all you know in any kind of true moral principles and you know their parents didn't provide that kind of a morale nurturing environment because they did probably didn't have it themselves and then the cycle gets perpetuated down the line to the next generation and the next and the next we have to break that cycle and we can do it by openly telling people that what you think of as being immoral or being good is not what it really means to be moral or good and those are bad people and we have to say it openly and plainly of them and and insult them right to their face by telling them you're just a bad person you're just an immoral person I'm not interested in what their sensibilities are you know I don't care whether they get offended by that get they could get as offended as they'd like it's still true and that's all that matters when it comes to this spiritual war all that matters is are you on the side of truth are you on the side of true goodness or not and this is what people on our side have to come to understand is that they have to stop mincing words they have to be more bold with people and they have to tell them right to their face you're an immoral person and it's not okay what you are doing oh yeah yeah I totally agree with you mark III did attend your workshop as well oh great thank you so much I appreciate that and just as my feedback I've I'm still following more your information I think I've followed you for about four years and I still haven't haven't consumed all of the content that you've put out there but my personal opinion about that particular workshop and I do hope that that makes it the video from that makes it online yeah I think that was very briefly very briefly before you give me your analysis of it um I did record it I am planning on getting that edited fully to release the entire 9 hour presentation workshop of demystifying the occult revisited it will take a little while to do that but I'm going to have the resources available to do that I have the raw material and that will be being done so rest assured at some future point maybe not right away we are going to release demystifying the occult revision workshop from Anika poco 2019 so go ahead continue Chris perfect yeah well I just want to let you know that information I would consider is probably the best put together presentation of this information that you have done to date it was absolutely fantastic thank you so and so I'm looking forward to having it come on come up again I know I think it was about five hours in before we took a lunch break yes and in from in that fourth hour to the fifth hour my focus kind of started to go away a little bit there so I do look forward to catching some of that information anyway I just wanna let you know I could definitely tell the amount of effort that you put into that it was absolutely the most refined presentation I would say it was it was more or less a summary of almost all of your content put into one presentation I'd have to agree that that was kind of where I was going with it I really wanted to give people their money's worth and hit them with a whole lot and I know it covered a lot of ground and that's why I did want to try to you know trying to strike a balance between putting a whole lot of info in and then maybe possibly losing people's focus and intention and attention because I know that that is a it's a tall order to sit there for that amount and take in deep esoteric material for that amount of time and I just want to say that like people like really did a fantastic job in like a tuning themselves to to really do that because that's that's no easy task I recognize how difficult that is to do I don't pretend that that's not you know a tall order to ask someone to focus their mind for that long a period of time so it shows you how you know does desiring to get that body of material into oneself that the people who attended that were and that's it's inspiring to me that there are people out there who do take that approach to it and I want to learn that that deeply and badly so uh thank you so much Chris for you know your analysis of that and for attending and helping me to you know get some resources as part of you know my entire journey down to Mexico and Britt you know convert that back into the to the great work here back in Philadelphia so Chris thanks so much for your call just a real a great feedback on the the event the seminar at the event in particular okay let's go to look we have a less than five minutes left total so let's see who else can we go - lets go - Roman Roman you are live on what on earth is happening episode number 200 welcome Roman are you there there you go hi can you hear me yes I can you just unmuted great can hear you well clear okay Wow I tried to contact you for years thank you yeah I tried through many many different ways and struggled because I can it was pretty hard to get you on so anyway just go directly to the topic so I'm just a little bit about my journey so I discovered something like six years ago a language based on arithmetic and mathematics and it actually took me quite a few years to actually realize that that knowledge was actually what you are explaining as the natural laws it's through the discovering of the key billion book that allow me to understand that what I was able to see in mathematics in numbers in arithmetic actually was actually what that key Balian structured in its way through the language of the shape of the numbers basically I discovered that secret language that is encoded that I couldn't understand I I initially downloaded that geometry that is actually challenging a little bit your explanations about very nature of numbers and nature of of geometry than the way you present it and and then after that I discovered your work okay so it expanded my approach and my understanding and I used a little bit of your material to the course that I did exam it's a profound whole work the Cavalli on and you know again geometry is one of the the methodologies of the quadrivium it's one of the quantification sciences of the quadrivium which is the adjunct to the Trivium method so it's all connected and you know I guess by looking at the natural laws the underlying principles of natural law that is contained within the Cavalli and then that somehow led online for you to discover my work in natural law is that correct so I downloaded a geometry I discovered something that it took me actually three years to understand it's based on so for people who would like to look at what it looks like it they just can go to Facebook on sacred arithmetic I think 25 23 thousand followers Facebook page called sacred arithmetic and they could actually see the symbol that I discovered and it actually took me years to understand what this symbol was and it's only when I dis read the key Balian that I realized oh wow I I see through this symbol those universal laws that's and that are explained in a key value and then then I taught to people but the problem is that people don't give a shit they don't understand they they don't get it I did a course to more than I don't know 50 80 people and I guess probably like 10% of them got it and but it requires so much work to be able to get that left brain only way of thinking out of the way that often comes through pure number and abstraction and arithmetic and you know the physical science is to connect deeply into not just get rid of it but to make it not be our only modality of processing information so that we can combine the head and the heart you know we can actually combine both aspects of the holistic aspects of higher thought function of the brain and combine that with true heart based intelligence you know and when we do that you know then we're going to make real progress in consciousness and we're going to make progress toward greater levels of human freedom but ladies and gentlemen that's really all the time that we have for edition of what on earth is happening it's been so good taking your calls and hearing from you and your experiences in discovering this show glad I got a chance to recap an orca poco for everybody that's all the time we have for this edition ladies and gentlemen we'll see you right here next Sunday 3:00 to 6:00 p.m. Eastern remember you've been watching what on earth is happening and the government is slavery we'll see right there next week thank you for watching [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #201

Topics: *Evil is more powerful than Good on Earth, the Human Condition is Slavery, the Law of Freedom, how most people see Good and Evil vs. what these conditions actually ARE, Natural Law Expressions, Love vs. Fear, the relationship between Human Consciousness and the Expressions of Natural Law, Entropy vs. Syntropy, how Dark Occultists control Human perception by controlling available information, how much easier it is to turn people toward the service and goals of Evil than toward the service and goals of Good because of their colossal ignorance, Ignorance is the root of all Evil, all human beings within Government are Bad People and so are those who condone Government, Nescience vs. Ignorance, the Truth is not really hidden, Humanity is in the time of cosmic Judgement, what does it mean to be a truly Good Person, the Objective difference between Right behavior and Wrong behavior, Moral Relativism is the Destroyer of ALL Freedom, Internal contradictions within Human Consciousness, most human beings are not truly Good People, Intention is ultimate meaningless and Action is ultimately all-important, the endless excuses people make for not learning Objective Morality and doing the Great Work, Complicity in Evil through Silence, Complicity in Evil through Cowardice, the Generative Principle of Care, the Great Work, Service to Truth, the Religious mindset of the left-brained Newtonian materialist worldview, free Will and Natural Law as the Random and Deterministic components of Creation, the necessity of Self-Respect and Courage to conquer Fear, the process of Internal Shadow Work, the Self-Defense Principle vs. Violence, the Law of One, Unity Consciousness, the Castration and domestication of European citizens and the increase in swiftness of the destruction of Human Rights in Europe, the Practice of Self-Defense, Terrain Theory, Diet, Exercise, Raw Food, Veganism vs. Militant Veganism, transitioning to Vegetarianism and Veganism, human Freedom and Veganism, Gematria, Sports Arenas as centers of ritualized focus of mass-consciousness, re-directing human energy from Sports to worthwhile pursuits, Synchromysticism*

freedom mat that's what it's all about [Music] you've got the groove on freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark passio [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening calm this show is live every Sunday from 3 to 6 p.m. East Coast time that's 12 noon to 3 p.m. Pacific time ladies and gentlemen government is slavery today is Sunday March 10th 2019 we have a great show lined up for you here today gonna be talking about a fairly controversial topic the topic for today's show is evil is a more powerful force at work in our world than is the force of good and a lot of people will take exception to that a lot of people will say mark how could you say something like that well I'm going to qualify all of that and explain exactly what I mean by that on today's show and hopefully I will let people understand how evil has really taken our world and how we're nowhere really near defeating it and if we are going to really defeat the forces of evil that have risen so prominently in our world we have to understand the material that I'm going to be presenting here we have to understand how it got this way we have to understand that we cannot be in denial of it that we cannot think just the the Hollywood eyes definition you know that we hear in stories and pop culture all the time that oh good is the most powerful force that there is because ladies and gentlemen evil can win and right now unfortunately evil is winning and if I said anything other than that I would be lying to yourself to you and to myself so I endeavor to tell the truth here on what on earth is happening and tell people what we are really up against so that's what's coming up on today's show I have a pretty extensive presentation lined up for today's show I was out sick last week I apologize for that feeling a lot better and ready to go with new material so we will be doing a extensive slideshow here today and then your calls in the third hour hopefully time will allow for that I might extend over a little bit into the third hour with the slide presentation but we'll see how that goes potentially the calls are set for 5:00 p.m. Eastern Time so you can join the call-in room by clicking on the link it'll take you to the discord app download that install that in your computer system and that is how we take calls on what on earth is happening a couple of very quick things actually just really one I will be appearing live on the Vinnie eastwood show this week I believe that's broadcast on American freedom radio and I will be in a roundtable discussion Vinnie will be interviewing myself max Egan and james corbett of the corbett report on this wednesday march 13th at 9 p.m. Eastern Time that's 6 p.m. Pacific time so tune in to the Vinnie eastwood show I'll be on that roundtable discussion I think of any picked a great triad of people to interview honored to be selected as part of that trio so that'll be coming up this Wednesday March 13th also I want to thank Brett Hatton for making the show podcast art doing a really great job and I want to thank him for that I also want to tell people that there is a new interview with me up on my website you can go to the news section or click the latest news on the left-hand side of the website and I was interviewed at Attica poco a couple weeks back by Carmen chironji of the state of anarchy so that interview has been posted and you could check it out on my website with that having been said I think you know we have so much to cover today I'm just going to jump right into the show material so we can switch over to the slides and let's get started so this is the podcast art for today's show again the title for today's podcast is evil is more powerful than good and you know that's kind of like a teaser title because of course I need to qualify this statement and explain what I actually mean by this and you know we tend to get triggered when we hear things and we tend to want to think you know we don't want to actually hear what the person is saying about it this is part of mind control this is part of not looking deeply enough into things which is allowed evil to overtake our planet okay what we have to do is set aside initial you know views of something that could be rash could be rashly judged and you know we were very quick to jump to a conclusion about what is meant just by a few words that's because we're conditioned by the mainstream media and by Hollywood to one the very quick soundbite version or definition of things but that's not how the real world works that's not how real knowledge or wisdom work okay we have to go deeply into something and flush it out in all of its details that's part of what's wrong with the modern world there's a low attention span and wanting the soundbite for everything you know people say oh you want me to listen to a Marc passio video Oh some of his videos are six seven eight nine hours long you know I don't have time for that well you don't have time for that then you aren't interested in real learning and you think you have everything figured out you think nobody can bring you new information that you weren't aware of you know until recently and you know then go right ahead and you know feel that you have everything that you need figured out figured out and nobody can bring anything new to the table for your consideration I think that's the height of ego I think that's the height of ignorance I think you know not wanting to look into things and then prejudge them before you've actually really gone deeply into them to determine what's being said is the height of hubris and ego personally you know when I try to look into things I try to look into things as deeply as I possibly can from as eclectic of a variety of source information as I possibly can to get a wide picture of that thing and only then do I make a determination of what that thing actually is because I have an accurate understanding of what's actually being said from a wide variety of people and sources that's how real research is done okay if you if we're being honest with ourselves a lot of people think that they're you know true researchers or true discoverers of truth when all they really want is the soundbite version you know they want to do something really quickly with the least amount of time effort invested in it time and effort invested and they think they're gonna come away with an accurate understanding and it just doesn't really work that way so let's jump into this topic and I'll talk more in detail about what I really mean by this statement so you know at the universal level of nature in the cosmos okay I would not make the statement that evil is more powerful than good I would make the statement that at this level at the cosmic universal level the absolute level of nature and consciousness that there is only the the force of love and consciousness and truth and goodness ultimately of something that is intelligent and wants to provide ever greater consciousness and complexity and freedom and morality okay that's what the whole journey of life and the whole journey of nature is really ultimately all about so at that level that's a non dual level of understanding quote good versus evil okay because there is no real polarity at that level there is only the thing the only thing that really is and that is consciousness and that is true love and true goodness okay so at that level of course good is more powerful than anything else and love is more powerful than anything else but that is not the level that I'm talking about here today I am NOT talking about the ultimate cosmic level of consciousness when I'm saying evil is more powerful than good I'm talking about right here in the local domain of the space-time continuum that we call planet Earth okay I just triggered all the flat-earthers with that one okay but what I'm talking about is the here and now I'm not talking about the ultimate level of creation the ultimate level of all consciousness I'm talking about what is taking place right here on the planet that we are all sharing together living on and undergoing a shared experience together upon okay so we are talking about what is happening right now in the year 2019 on the earth whenever you happen to think that realm is okay what is actually happening what is actually going on right now in the here and now in the physical world so that being qualified then you can see that my statement of evil is actually more powerful than good meaning right here on earth right now okay that's what I'm talking about that's where evil is currently more powerful than good and that is because we are living in a total control system we are living on a slave colony for the most part the human condition is slavery ladies and gentlemen we've talked about this endlessly on this show on this these series of broadcasts and if people haven't figured that out yet they're not paying attention they are living in a complete state of denial and fantasy and they are refusing to acknowledge that which is the human condition is in fact slavery we are living on what you can call a prison planet a prison colony a completely locked down society that in which people are not really free to exercise their sovereign natural rights and that is a condition of slavery and duress which is completely immoral and that is of course why evil is more powerful than good you can't possibly have that outcome you can't possibly have that condition in any society anywhere in the universe unless the people of that society who comprise it in the aggregate in the collective numbers are ultimately giving themselves over more to the forces that underlie the manifestation of evil then underlie the manifestation of good and free okay so if slavery is the manifested condition there has to be an underlying reason in consciousness as to why that is the case the causal factors and that is what natural law helps us to discover once we understand that it is in effect that is it is in operation and we are bound by those laws of the consequences of behavior so once we do understand what natural law is and that it is in effect we come to the understanding of something known as the law of freedom and it's something that I've talked about pretty endlessly on the what on earth is happening series and this is the key to all consciousness really this is the key to understanding what is happening here on the earth this is the key to the answer to the question why is the human condition slavery okay the understanding of the law of freedom which is part of natural law gets us to the answer as to why we are in an enslaved condition here on earth and why evil is winning okay so the natural law of freedom has a quantifiable effect right in the 3d domain right in our world we're not talking about the ultimate level of the cosmos of creation we're talking about manifested real world 3d effects in the physical domain here on earth that can be measured that can be observed that when we change the conditions and then the the manifestation or the result changes we can understand that this is a science this is a scientific effect that can be understood observed observed understood and ultimately it can be abided by we can understand how this law works so then we can abide by it we can live in harmony with it and therefore we can actually change the manifested conditions when we change the underlying causal behaviors that lead to the manifested condition so our aggregate freedom meaning our freedom as a people is directly proportional to the aggregate morality of the people that comprise that society any given society consequences will be manifested into the human condition as a direct result of the moral quality of the aggregate human behavior so as more and more people act morally there will be one consequence and as more and more people act in an amoral capacity there will be a different consequence and we have to understand that that morality is objective it is not set or determined by man anybody who still believes in moral relativism is going down a satanic path and does not understand how real morality works and people want to judge this all the time they want to say oh passio is trying to tell people how to think and what morality is no I'm trying to tell you that there's a truth about morality and it is possible to discover that truth and it is objective and it can be known and just because many people are now coming to an accurate understanding of what real morality is in in the actual physical domain and how aligning our behavior to those laws of morality will actually change the result in human condition and be able to usher in true freedom if we align our behavior to that natural morality that exists in nature just because more people understand that doesn't mean that they are quote following me that they are somehow you know being somehow controlled into the acceptance of this that is like saying that because somebody recognizes that the law of gravitation is in effect that the effects of gravitation are actually manifesting in the world and then we can measure how that those laws work that somehow that means that you believe the person who you know did the mathematical equations to understand those working operations it has nothing to do with belief it is a discoverable principle in nature that's all we have to understand about it so the people who are saying I have followers that are accepting this I tell people from day one number one don't accept this from me understand how it works to your own personal observation and your own personal study and to I'm not looking for followers never have been I am looking for other teachers to be who understand this at the level that I do that can teach it to other people so we can get out of our folly as a species and start aligning our behavior to actual wisdom so we can change the human condition and take it out of slavery and actually become free people which is our birthright okay and that's the only thing that will ever create true anarchy true freedom is the understanding of natural law so we change the condition through the behaviors through by changing the behavior we change the manifested result okay the underlying causal factor I should say is what we are looking to change and that's changing the behavior you can only change the behavior once you change the thoughts because they underlie the behavior okay people are going to behave as they think as they feel as they think that they understand something whether they really do or not so these laws don't care about whether you understand them or not it's up to us to come to an accurate understanding of them and we have to do that by using our mind using our thoughts and aligning that with also our heart based intelligence of what we know deep in our heart to be true and to be right okay and that's what our emotions are for their compasses for our direction as far as our behaviors are concerned we need to bring that into alignment with understanding and with a logical understanding that takes place within the brain as well so we have to develop that intelligence within the brain but also heart based intelligence and there needs to be a balance between those two dynamics ultimately the law of freedom is that we collectively reap as a species that which we collectively so as a species through our behavior in the aggregate so if you wanted to write it down as a mathematical equation if you're of that type of a left brain persuasion to want to look at it that way feel free to do so I write it down like this the sum of the freedom in any given society is directly proportional to the sum of the moral behavior of the people of that society so so a sum of freedom is directly proportional to the sum of morality or aggregate freedom is directly proportional to aggregate morality okay this is an eternally true principle in nature an eternally true law of nature I did not make this up I have understood that this is how it works that's all anyone is capable of doing with a law laws are not set into effect by man laws cannot be changed by anything that mankind does they are immutable unchangeable eternal principles that exist in the inherent realm of nature that's why it's called natural law non man-made and this is the part that people refuse to accept and that's why we're in the enslaved condition that we are in they refuse to accept that there is any power that can put a higher law that governs behavior into effect in creation other than man so most people are moral relativists that believe as long as you can get away with it you can do it that's really the case and that's why evil is kicking our ass in the world see this is how people usually envision the battle between good and evil I've shown this slide before on a former show and they usually view it like this like oh these do these cosmic forces at work they're moving us around like pieces on a chess board you know there's a big cosmic war going on between these higher forces in conjunction with humanity that operate in conjunction with humanity and like we're kind of like they're chess pieces because they're noncorporeal and we're actually living on the chessboard the earth you know and we're playing out this this drama you know this cosmic drama of these higher forces here on the physical domain but see I think this is an oversimplification of the battle between good and evil and first of all we have to define what good and evil really are we have to understand what they are first of all so I would rather look at good and evil currently as it's playing out it's certainly nothing like this like an evenly matched chess game it's absolutely nothing like this okay this is this is a poor representation of what is actually taking place on this planet because I would much rather really look at this as the real situation if you want to look at what is really going on between good and evil on the earth it's this okay it's a tiny little helpless baby a bunny rabbit okay in the rain holding an umbrella caught in a collapsed state facing like a dog that is like one of the heads of Cerberus of Hell okay and there is no match it's gonna get eaten in a quarter of a bite okay because it's not prepared it doesn't know what it's up against it doesn't know who the enemy is it's going into a situation that it's not ready to deal with because it's not ready psychologically and spiritually and it thinks it's gonna take on this monster with some you know collapsed umbrella you know in a total rainstorm completely unprepared for the enemy that it's actually up against that's a more accurate representation in my view of what the real state the real state of the conflict between good and evil as it is taking place on this planet actually is okay and you know people will get upset with that you know oh they think oh so good is almost just as powerful as evil there's this a evenly matched battle now you're full of okay to be honest with you if you think that you're lying to yourself and you're lying to other people because you don't want to be honest about how bad the situation actually is and that's all I want people to do I'm not trying to say any of this to discourage anyone see this is about boots on the ground spirituality this show for people who may be new to it okay it's about what we are really truly up against not lying to our self about that and then seeing where we really are in that battle how prepared we really are to fight that battle and looking at ourselves and honestly assessing our shortcomings see that's the first part of any real change the first part of any real change is you got to be able to confront your own you got to be able to say you know what here's where I'm at and where I'm at is nowhere near ready nowhere near powerful enough and I have a lot of work to do on myself that's where real spiritual change begins that's where the real spiritual journey actually takes place okay so what we have to ask ourself is the first question in in really trying to tackle this problem of good versus evil to see where we're at within it within this battle taking place here on earth we have to ask the question what actually is good because a lot of people have this completely ridiculous version of what good is in their mind you know they take the Hollywood variant of it again you know or the storybook variant of good okay or they take just the version that their teachers have told them that their parents have told them that their family members have told them that other people in society this is called conventional wisdom you know what conventional wisdom is a big crock of that's what conventional wisdom is a big crock of crap it always has been conventional wisdom has never proved to be right okay you know it traditionally goes against everything that is actually correct and right and even moral so if you're following what the vast majority of people think of as good witches can what conventional wisdom will tell you good is you have no idea what real good is you have a proxy variant of what good is that other people have served you on a plate because that's what they want you to accept that good actually is and good is so much more difficult to obtain than all of that you know they want people to believe oh you just you know go along to get along work hard be you know somewhat honest with other people okay you know have kids and try to bring them up the way Society tells you you should bring them up and somehow that makes you a good person or people think if you're just nice you're a good person you know niceness you know not having any rough around the edges aspect of your personality or even being potentially confrontation doesn't necessarily mean that you are good or bad okay these are just things that people can't get past in somebody's personality and there are characteristic traits that they display on a day to day basis has nothing to do with when there they're actually a good person or not you know so whether somebody rubs you the wrong way doesn't mean that they're bad okay and just because someone speaks to you and please Pleasant soft tones doesn't mean that they're good okay niceness doesn't it translate to good and evil behavior does okay actual behavior in what you do and what you condone being done in the world to other people okay or not be done to other people that's what will ultimately make you good or evil okay so to understand what good really is we need to look at the expressions of natural law now this is a review of material I've covered both here on what on earth is happening and in whole seminars that i've done on natural law for people who haven't seen my natural law seminar it's my most important work you really need to understand that you really need to watch it in its entirety to understand what natural law is but the expressions of natural law is what I want to talk about here to reinforce the real understanding of what good is at a fundamental level okay so we have to understand we're only ever creating with two polarities or forces in nature okay we are either creating with love which is the force that expands human consciousness and helps us to really understand to take in truth and to then act in right action and align our behavior to natural law principles and true objective morality and then we get a manifested result so good and evil are actually manifestations of consciousness in the the world in our 3d domain they are not the forces that exist truly in the natural world but they are manifestations that happen in the natural world okay the forces that are at work are love and fear and one could even make the argument as I do that there is actually only one force and that is love but there is a forgetting or a absence or a misunderstanding of it and that's when fear consciousness comes in when that happens we could say that is confounded confused it is misrepresented or it is quote-unquote absent it really never really is absent it is just we who are walled off from it like you know we put up a wall around us or an eggshell around us and then we're not able to receive that because we're creating a division or a separation that is actually an illusory one so this is all going back to the early material of what on earth is happening because there is nothing new there's the other thing I want to hammer on a few things I want to hammer on that people think that what I teach is somehow cultish ok I want to comment on some of that stuff that I'm hearing and I also want to hammer on the repeated and total technique to dissuade people from looking into my work which is obviously an obfuscation technique that I don't present anything new yeah no crap no I don't present anything new truth is eternal and universal it exists at all times and places no one can ever create any new truth it's just what is it's what has always been and will always be when we're talking about eternal principles like this I can't ever creating anything new within it that's what the phrase there's nothing new Under the Sun actually means then no one can ever teach you anything new there was only eternal truth and principles that have always been here since creation has existed which is eternal okay and all we can do is understand them or not understand them that's it that's the that's the play that is playing out here on earth it's a it's a play of either love or fear a play of either knowledge or ignorance and when we go into that polarity when we go into that first polarity of love we are creating we are consciously co-creating the reality that we are experience when we stay in the consciousness of fear we are unconsciously co-creating the reality that we experience and as I've said before how these expressions work okay we start with either love or fear those the generative polarities that's what we use to create the experience or the manifested result then it goes into what I call the initiative or the initial expressions and that is if we are in a consciousness that is based in love energy okay that is based in real truth okay we are going to become knowledgeable individuals we are going to this is what enlightenment is really all about enlightenment is really about knowledge folks it's not about meditating your way into some state of you know hallucinogenic awareness that would be like taking a large quantity of LSD or DMT or or mushrooms okay or psilocybin mushrooms okay we're talking about actual knowledge of how things really work that's what enlightenment really is it's not knowledge of yourself of what's going on within you and your consciousness and your psyche and it's knowledge of what's taking place in the 3d domain and how the laws of nature work that's what knowledge or consciousness really is so I've worded here as this is how it starts we either take in truth or we reject truth we accept or reject truth this is why the human condition is the way that it is most people have rejected truth see we're in a state of judgment right now the condition of humanity is not only slavery its judgment we are in cosmic judgment I know people will hear that as a religious term I don't I don't really care here and however you want you want to hear it in your mind controlled way of thinking that that means that it's religious no laws of nature or work a certain way and we are judged by how we understand them or don't understand them or how we accept them or refuse to accept them because we're being given a consequence but by the behavior that we have put forward collectively and most people are in that consciousness of fear all day long they refuse the truth a long long time ago and are still in a complete refusal and denial state when it comes to the truth about how morality really works and how the laws of nature really work their soul dead their soul sick ultimately and most of them are soul dead there ever coming back from being that soul-sick they've actually utterly annihilated the building of the soul or the transformation process of the soul and they've put it in in a grave so really they're not even human at some level of existence they have cut themselves off from what it really means to be a human being that's how soul sick and ultimately soul dead the vast majority of people are on this planet so the initial expression is going to start the process of manifestation because this is the beginning of whether we decide we're going to start aligning ourself to what truth is or whether we're gonna say eff truth I want nothing to do with it and most people have may already made their decision a long time ago so that we become knowledgeable people or do we remain ignorant people and I think the answer is quite clear about what's going on with humanity right now then we have an expression that takes place almost wholly within us within our psyche and our emotions okay and in our internal makeup as human beings and that's either that we alleviate confusion about who and what we truly are and we come to know the self and we understand our own sovereignty it's what I call here internal monarchy meaning we ultimately are the rulers of our own thoughts emotions and actions we are the ruler of the kingdom of one the kingdom of self that's all we can ever really hope to rule hope to be the master of okay most people aren't even close to being the master of themselves they know nothing about how they actually work okay or if we stay in that fear-based consciousness which shuts all of consciousness down makes us refuse truth we get into a state of internal confusion or what I call internal anarchy meaning there is no ruler or master of the kingdom of self no one's really at home no one's you know at home in the temple of self and no one's taking care of that that divine temple okay that is within each of us you know we're just letting it rot and that's where most people are at they're in a state of total confusion about how things really work which is spiritual illness and then the externalize depression is what happens in all of society so this is what happens in the 3d domain as a result of the state of consciousness that we have dwelled in which is the causal factor okay the state of consciousness is the causal factor whether we went into love based consciousness or energy or polarity or whether we remained in fear we went into a state of knowledge of understanding of what's going on or ignorance and then we understand who and what we are our internal sovereignty our our true sovereignty as beings that we are not slaves at a true level of existence okay or do we remain totally confused about the human condition we can't even see the slavery taking place all around us so then what manifests in the external world is either freedom or slavery I've worded it on this slide as freedom or control but you could easily replace the word control with the condition called slavery which is what we are in total control slavery so that is how the manifested condition ultimately gets created what then do we are we left with as a result what is the manifestation the result that we have ultimately created in our shared experience of life here on earth it's either manifested good which I call order in this slide or manifested evil which I call chaos which most of us would refer to as chaos or evil so that which is orderly that which is harmonious that which is in alignment with natural law that which is an alignment with truth with love that is what is good that's manifested order and when we stay in that fear-based consciousness and we remain ignorant and we remain confused and we have accepted our bondage and slavery then we're gonna stay in a state of perpetual evil and chaos and these polarities only work one way they only whether it's a unidirectional flow you cannot start creating with love consciousness okay with love energy and end up in chaos conversely you cannot start with fear-based consciousness and end up in a state of good a matter vested state of good or freedom or order it's not possible it doesn't work that way so if you start creating with the positive expressions of natural law the positive polarity of love you you go down this column directly in line it's a unidirectional flow love leads to knowledge which leads to an understanding of our own internal sovereignty which leads to an external state of freedom which is manifested good conversely the negative polarity of fear will always lead to more ignorance and confusion and slavery in the world which brings us chaos and evil that is what chaos and evil is as a manifested condition it can only ever work this way ok this is how the the natural law that is actually embedded in the fabric of creation itself set there by whatever power created all the laws of the universe this is how these expressions actually work in our lives and it's not what I think it's not a belief system this isn't a religion this isn't a belief system this is a science this can be scientifically observed through a long study of history and all you need to do is look at the effect of what was generated in any given society and you could trace back the causal factor it is absolutely connected causally ok so people always want to say oh just the manifested result doesn't necessarily connect to the cause in this case it actually does and a true study a true long study of human history will act absolutely prove that and it is proven it's just people don't want to accept it because they're in that fear-based consciousness they don't want a higher power that ultimately binds human behavior and gives us the result based on how we behave which is not changeable they don't want that condition to exist that's what wanting to be God is that's what runaway ego is runaway ego is there's no higher power than me I am the ultimate creator of my own experience I am God and I get to determine and other people get to determine what right and wrong actually are which is called moral autism and we're gonna get to that let's move to the next slide and look at the relationship between human consciousness and natural law between the aspects of consciousness and the expressions of natural law okay and this is a pretty easy connection to see especially if you're already familiar with my work so there are the three expressions of consciousness thoughts emotions and actions these are the three ways that we ultimately express ourselves in any way in the world to anyone okay so on this chart of the natural law expressions where is the thought aspect of consciousness well it's right here it's the initial or the initiative expression of natural law okay we have to process information that we take in which is part of the Trivium process which we're also going to look at again and we have to come into an understanding of how things actually work that's knowledge and we do that through the acceptance of truth that takes place within our thoughts of course our emotions are connected to that because a lot of times the emotions that we take in that we experience I should say when they're fear-based emotions we're not going to do that that thought those thought processes correctly we're not going to actually process the data correctly or even want to take it in at all because we're in such a state of fear okay so our emotions are actually connected in with that polarity but then they are what is art what are taking place within us they are the internalized expression it's what that's what happens inside of us the emotions are directly leading us to an understanding of whether we are slaves in reality and that's an actual justifiable moral condition somehow or whether we rage against that condition and we feel within our emotional makeup that that is wrong morally wrong morally unacceptable never morally justifiable that it is morally illegitimate that condition that has to be felt as much as it has to be intellectually understood you know so that internal expression of natural law is directly connected with our emotional aspects of our consciousness and then finally what ultimately is manifesting in the external domain what is happening in society is a direct result of our behavior of our actions okay so that third aspect of consciousness is connected with the external expression of natural law whether we are creating a society that is based in freedom or whether we are creating a society that's based in control and slavery it follows so logically and naturally you know but most people have not actually looked at this direct relationship and I think that's it's so important because this is what ultimately helps one to understand not only how good is created in the world but what it means to be good okay that's what we're alternately trying to derive an understanding of because good is ultimate alignment it means aligning our behaviors in every moment or ascribing at least striving to in every moment with an objective knowledge of what right and wrong actually are that's what conscience is the conscience is the knowledge of the difference between right and wrong and then the behavior is the exercise of conscience see that's what we have to do we have to exercise conscience through our actions we do that through our actions okay we don't do that through our thoughts or through our emotions ultimately our actions are what puts behavior into effect in the world and generates the externalize the expression of natural law and gets us the manifested result that we are creating in the world our behavior does that so that's how we exercise conscience by knowing the difference between right and wrong that's conscience and then we exercise it through our actions by willfully choosing right action over wrong action and this is how we ultimately create our reality I've gone through this slide in a former podcast I'll briefly go through it again I call this reality manifestation 101 knowledge or ignorance is the first step of the building block of the Trivium process in our lives it's our thoughts okay we're gonna go through thoughts emotions actions manifested result okay you it's it's you're seeing a pattern here this is everything ultimately works and this is why people in the dark occult don't want people to know this information that's why they want to poopoo all of my work they want to tell you I'm trying to create a cult when I'm telling people techniques of cults to help them to understand not to fall into that through mainstream media and through police and military and other government agencies I'm telling people the techniques that cults have used upon people for thousands of years what a great cult leader right he gives people all the information about how cults actually mind-control people so that they can steel themselves against the cult mind-control but he's actually trying to run a cult people don't even understand how ass brained they sound okay like I said they have liquid diarrhea for a brain and they need a slap in the mouth except unfortunately splatters you know that's that's where most people's head is that in this world okay that's how that's how dumb is ten pounds of dog in a five-pound bag they are okay they literally are that stupid okay and they don't even hear but dumb people don't even hear how dumb they are yeah they don't grasp that concept now that's called the dunning-kruger effect where most people who have a complete absolute lack of grasp of reality actually think that they command an actual understanding of how things work and these are the people people I'm talking about the people who constantly say don't listen to anything that he's saying that's a cult leader okay that's how that's how dumb you would have to be to say that conversely unfortunately the dunning-kruger effect also worked in the opposite way where someone who really does have advanced capacities and the ability to understand the way things work unfortunately will attribute other people to also have those same capacities and that's not how it really works a lot of people just have the capacity to understand because their brain is that broken sadly that's the case that's the sad reality of the matter of the condition that a human being can be worked into so going back to how reality actually manifests in the human condition we first have to assemble the available information that we need to understand the process how reality works so this is all potential forms of data that can be gathered process understood and then acted upon by individuals anywhere in any society if we don't put that grammar those building blocks together from the eclectic variety of sources that we have available at our disposal we can never come to an accurate understanding of anything and that's obviously step two once we have the knowledge we have to develop an understanding of it we have to know what it means we have to develop an accurate grasp of what it means so this is how do we process that data so these are the decision-making processes that actually happen in the human mind okay the processing of the human processor called the human brain and the other processor that's like a brain called the human heart now really we have three we have a third that's like a third brain which are the guts okay so the heart mind guts is what we have to really align thoughts emotions and actions brain heart guts okay you know that we really have three brains okay we have an brain that's about courage the guts are our actions we have a heart based emotional processor that acts like a brain and then we have of course the human brain which provides the higher thought functions and the ability to think logically and reason out things most people aren't using any of those unfortunately that's why the condition is evil is more powerful than good because the aggregate are not using their brains or the Trivium process so if we don't come to an accurate understanding of what it means we're going to be acting in a state of total confusion so we have to either develop understanding or develop or stay in confusion about what it really means what all that information means and then human behavior is the next step because our behavior is based upon these two lower building blocks the available information that we take in and how we process it or in our mind so each individual's behavior is based upon the quality of their decision making processes that they performed in step two which in turn are Bey upon the quality of their available information and I would say the completeness I should add the quality and completeness of their available information okay and then we react in the world and that comes out through wisdom which is right action based upon what we have come to accurately understand we've taken in the truth or folly means we've acted in a state of confusion and in a state of ignorance and therefore were putting horrible quality behavior into the world and getting a horrible result in return for it and that's the last step the manifested reality consequences freedom or slavery what is going to actually manifest in the 3d domain will it be a state of freedom or will it be a state of slavery in the world okay so the quality of the condition which manifests in any given society is based upon the aggregate quality of behavior within that society that's the law of freedom the law freedom determines the manifested reality that's the deterministic component of creation that is natural law we receive a consequence for the aggregate human behavior that we have put it forward into the world that's why the universe works like a giant mirror as the aggregate behavior the quality of it is in direct alignment with morality and natural law there will be a consequence of there will be a consequence in the 3d domain called human freedom and as that that aggregate behavior becomes more and more amoral we will receive the consequence under natural law called slavery that's how the law of freedom actually works this is how reality manifests in our lives now let's look at the causal connection and the relationship between consciousness and the the Trivium and the manifested reality that we actually all share together while our thoughts are that bottom block knowledge or ignorance of course we're processing those things through our thoughts you know and then we internal expression is the emotional aspect are we going to an understanding of what it all means what all that knowledge means once we gather it and process it or we're going to remain in an internalized emotion of total confusion as to what how we work and how the laws of nature work and then of course our actions wisdom or folly we just talked about that dynamic and that's what brings us the consequence of the result of freedom or slavery in the world so going back to you know how all of this works as a stepwise progression or process which is the Trivium these three bottom blocks are the Trivium and then the manifested reality is how the Trivium and natural law work together which level is the ultimate level that must be controlled or influenced to ultimately determine whether people are going to manifest good or evil in their lives are you gonna try to control it directly from the realm of behavior too late people are already acting a certain way you have to get to it before that are you gonna do it in the step to the decision-making processes well some people will come maybe to an accurate understanding if they've gathered all of the grammar the building blocks and some will not come to an accurate understanding so you'll be hitting 50/50 at best maybe a little bit better but you'll never get them all but where you will get almost everyone as if you try to control available information and that's what the occult is if you hide knowledge or you dissuade people from looking into certain forms of knowledge then you are going to control everything that follows after that in the Trivium process and in the manifested result so you will control the whole game from that level and that is why controllers have to control the availability of information if you're going to control whether human behavior goes in a correct or incorrect direction okay you want to influence that and you want to create internalized confusion in people so they don't know what path they're on and they don't know what direction they're ultimately going in life and it's a random crapshoot for them okay and you want them totally confused and you want them thinking hey there is no truth and there is no way that natural law actually works regarding behavior there's no consequences one set of behaviors don't lead you down one path while one set leads you down a different path you know will you want peace completely confused as to that dynamic you can only control the game from the level of availability of information nowhere else that's the level of perception that you have to get to you have to control perception by controlling availability of information or you have to control the perception of that information that information can even be in the world and available you need to control the perception of it by saying oh studying the occult is cuckoo you know or natural law is a religious belief and we don't need any more of those stupid quaint religious beliefs in the world we already have enough of those you know that that's the level that you want to control perception at and most people fall for it they fall for it because they don't have accurate developed decision-making processes to come to an accurate understanding of most things their brain they don't have not been taught how to think and their brain is ultimately broken at a very fundamental level it's broken when it comes to being open-minded enough to even bring the necessary information in and then they don't know how to process it with a scientific methodology or a quantification methodology say they don't know the Trivium and quadrivium and they're first of all too fearful even gather the data because they don't want to know what the data means they don't want to come to an understanding of it because they don't want the responsibility to act rightly upon it that's called the condition of eternal childhood that's where most people are at and that's why evil is winning that's why evil is more powerful than good on the earth most people want to stay in a state of total lack of personal responsibility and they want to stay confused because then they could say it's not my decision which way we go I'm not really contributing to that collectively in the aggregate other people who know much better than myself are making those hard decisions and choices I'm just the father were going along together long I'm just the child paying attention to the the proxy parent calling themselves government you know that's where most people are at little tiny babies who've never taken in the necessary in from because they're too fearful they're fearful awarded what cosmic adulthood really means that's what they're fearful of they don't want to become a cosmic adult they want to remain forever a cosmic child devoid of personal responsibility and guess what folks there is no such thing if you are here living in the 3d domain you are responsible for the behavior that you output and that contributes to the aggregate behavior which contributes to the aggregate condition get get over it get used to it understand how it works get over it you can't change that you're there's no such thing as not being responsible for one's own behavior and ultimately being responsible for either one's own understanding or confusion or own knowledge or ignorance okay and that's the important part here we are ultimately responsible for that because it can't really be truly hidden it's not truly hidden as a matter of fact you know I talked a lot about the occult on the show which means-- means the hidden knowledge okay but is it really hidden no it's not really hidden okay it's out there but people are willfully refusing it and in this next part I'm talking about how much easier it is to for human beings to serve evil than to serve good you know it's easy to turn oneself over to evil evil doesn't really take much to in the way of to do you know it's not it's not nearly as hard to align oneself to as good is good is very difficult to align ones behavior to because you have to aggregate a whole lot of knowledge you have to process that knowledge to understand what it means understand the laws that are in operation and there's so many blocks to that understanding there's a bunch of jackass asshats that want to say let's religious part where we are you know we have to purge all all all religious thought I agree we do need to purge all religious thought you know natural law has nothing to do with religion however you know that as ignoramus headed as saying gravity is a religion the belief in gravitational effect is a religious belief no because we can't observe it in the natural world we can't actually observe the effect in the natural world this is how our occult laws are discovered do our observable effects in nature and in the manifested conditions that take place in nature in the 3d world therefore it has nothing to do with the belief system or a religion I don't know how many times I need to say that you know but there will be people who insist that it's a religious belief because they just don't like the idea that there is any force that binds their behavior that's unacceptable to them but you got to understand that's what Satanism is this is why Satanists who want to be able to get away with anything that they want to do have named the ideology of Satanism which is all just about selfishness Satanism they named it that because they're taking it after the archetypal figure that rebelled against the creator in the Christian a story in the Christian mythos okay they took that as the example that we want to be God that's what that's what the archetype will figure of Lucifer or you know the fallen one to fall an angel that then it becomes equated with Satan and the Christian tradition that was the mindset that no higher power called God will bind me no higher power within creation that is just an aspect of nature will bind me I will do whatever I want and get away with it okay that is what Satanism is ultimately as an ideology of a way of being in the world it's not worshiping anything okay and there are people who will insist that they know more about this religion than I did as a former priest of this religion okay and then there are the other imbeciles that can't you know if they had two brain cells to rub together it would be miraculous you know and you know if they had two brain cells they would die of loneliness you know as David Icke is is a fond of saying they want to say I was never her priest within the Church of Satan yeah there's no register of mark passio as being a priest within the Church of Satan because I June joined the Church of Satan under an assumed name mark rokar Rho CH AR looked that up in the Church of Satan register and it's still there it'll still be there okay that's the name that I joined under and other people want to say oh he's not in the Church of Satan cuz we have no record of Mark pacion oh dumb no okay I never told anyone I joined the Church of Satan under the name mark pass you know that's your asinine assumption I've explained it like ten other places first of all okay I got tired of repeating myself that's what you have to do for imbeciles you got to say the same thing over and over and over again because they're real slow on the uptake you know what I mean that's the problem with people they hear what they want to hear they don't hear what's actually being said they have their own internalized definitions of everything and they know everything you don't actually listen to what's being said they just hear what they want to hear okay so it's easier for human beings to serve evil evil is easy it doesn't take any real work you know it's just like do whatever the hell you want you know be ignorant be confused act like an asshole you know that's all that's all that's what it takes to just turn yourself over to evil it's like no work required you know some of the people who are evil are the laziest people in the world oh they have this Drive absolutely they have the drive to continue to exert their will against other people and keep the condition the way that it is because there's such fearful little boys and girls fearful little babies okay but it's not like it's any real work on the self to be this way you know it's just like you know let yourself just fall apart it's like entropy you're just giving in to entropy you're not trying to order anything in the world or in yourself or in your life or in your internalized makeup you're just giving yourself over to entropy which is the the natural direction that things go in the universe if left unattended and and not acted upon by the will yeah the entropic force is just the way the universe flows alone but guess what there is another force that works against the force of entropy and that's the sin tropic force synt ROP I see sin tropic sin tropi okay Sintra P is the ordering the force that our will acts in alignment with and orders things when we use our will we are using aligning with the centric force of order in the world both of those forces exist okay so people think all there's only entropy no there's not there's entropy and then you could look at it like Center P is the exportation of entropy many people look at it that way where there is only the polarity of entropy but then you can export the entropy to other places and order your own environment this is like the terrain theory instead of the germ theory you know which is no yeah you have a fish in a bowl on the bowls full of germs well let's vaccinate the fish there's obviously a deficiency in the fish I can't resist all these germs no that's that's not the point the point is it's in a filthy dirty tank cleaning the tank that's the terrain theory okay same thing with entropy and centra P just because the tank is dirty doesn't mean entropy is the only thing that can be worked with okay you can clean it export the entropy and then you have a sin tropic energy going on within the tank which is orderly and keeps the fish healthy okay so that's what we have to understand is that a lot of people just think they only see it unit dimensionally they don't see the actual opposite polarity at work it's always a spectrum and all of those seeming paradoxes can be reconciled okay it's just we have to become intelligent enough to understand how those polarities operate and then we have to be honest and enough with ourselves to say where are we where are we in our spiritual development are we truly standing in the force of love and truth or are we giving over to fear and people want to say oh just because I get angry I'm giving over to fear no anger can be a very powerful force for the good when it's righteous anger and when it's channelled righteous anger yeah if people go overboard with the anger then it becomes counterproductive but if it's channeled and it's righteous indignation and you're saying something that is true in an angry way because it should not be that way because people are choosing immoral behaviors to continue to perpetuate it being that way there's nothing wrong with anger then it is it is an emotion that we are meant to feel okay people have to get over this notion that you can't be vitriolic and still be standing within truth and love untrue not true okay so going back to the data on this slide here it's also infinitely easier to turn people toward the goals of evil than toward the goals of good you know all you need to look as the mainstream media the the so-called educational institutions in this country you know government officials you know just uh general idiots who think that they know what's going on in the world and have no clue but want to speak because they'd like to hear their own damn voice okay tons of those very easy to just tell people one thing and you have them believe it because they want to believe and accept something and you know then uh turn them toward the goals of of evil okay or certainly in at least turn them against the goals of good because again those are lofty goals the goals of good and they're hard to achieve that's why it's called the great work it's not called the light easy going party type atmosphere that's not that's not what it's called it's called the great work huge amounts of effort have to be put behind it huge amounts of willpower have to be put behind it and that has to be done in a state of true knowledge in an understanding of truth and morality objective morality so it's easier for human beings to serve evil and be and to be turned to the goals of evil because of the colossal ignorance of most people this is made possible because of the colossal ignorance of most people that therein lies the problem ladies and gentlemen if people weren't as ignorant as they are and they did understand natural law and they did understand how morality really works to bring us the consequences of our be chosen behaviors through our free will because that's the randomized component the free will component and then there's the determined component which is the consequences of behavior that are ultimately brought about through natural law that's the deterministic component of creation so there is no just random aspect of random way the creation works the random worldview that's a total imbalance and there is no determined way the creation works there's there is a random component called free will which is real and exists and that we have and we can determine choose how we are going to behave but then there is also a deterministic component called natural law okay it's not like everything is set in stone and we have no choice but there we are we are either aligning our behaviors to the determined law or we are refusing to align our behaviors to the determined law when we do one we get one result when we do another we get a different result Socrates said that there is only one good knowledge and there is only one evil ignorant I mean you know going back into the ancient Greek traditions of consciousness you know this was known back then this is what good and evil ultimately are and what is knowledge it is the acceptance of truth how do we accept that because we are in a state of love based consciousness and we're talking not talking about romantic love we're talking about love in the agape sense AGA PE they've transliterated from the Greek in the Greek language it would be alpha gamma alpha Pi ADA is how it would be spelled in the Greek language but the word is in ancient Greek agape and it means cosmic love Universal love love which is the underlying force that helps consciousness to expand and Express and unfold okay that's the love consciousness that we're talking about the love energy that we're talking about are not talking about romantic love that would be eros love in in our the Greek ancient Greek language they called the romantic love arrows and there was a third which was familial or brotherly sisterly love that was called filos where we get the word Philadelphia the city of brotherly love brotherly love was filos okay and then romantic love was eros we're talking about the love in that in that expressions chart that we're talking about is agape love cosmic love love for truth love for what is real okay in nature okay love of goodness and morality that's that's agape love care for all care for the freedom of all okay philosopher who came shortly after Socrates who was a student said Plato said ignorance is the root and stem of every evil once again you see the same theme reflected what it means to be a good person is to be a person who has taken truth into themselves and become enlightened about how things really operate according to morality okay what what an ignorant person is what an evil person is is ultimately an ignorant one that refuses truth because they're in a state of fear based consciousness that's the illusory part the absence of love is actually illusory consciousness okay there really is no fear at the ultimate level okay it is simply a walling off of love energy that is always around us and always surrounding us in nature but we will fully through our freewill decisions become fearful and stay rooted and walled off from that condition of love of agape love so you know the ancient Egyptians who predated the Greek philosophers of course they had a saying that ignorance is evil you know in in contemporary Western culture we say ignorance is bliss like it's some happiness state because if you remain ignorance you're not going to get angry about how though can world condition the human condition really is and so you could remain happy and blissful so we say ignorance is bliss no ignorance is evil that's the defining hallmark and characteristic of evil is ignorance willfully choosing to ignore truth okay and woe to the people that are in that state I mean it's it's a horrible car place to be you will be held to account for remaining in that condition doesn't matter how you got there see you could say all the traumas of childhood you know that wasn't wasn't our us who made it that way it wasn't our responsibility that that happened to us that that is something that was done to us we we can't take the responsibility for it happening but upon really becoming a person who is capable of thinking critically which we all should be okay as an adult we should take that responsibility onto ourselves it's our responsible responsibility to undo that trauma that keeps us in that ignorance it's our responsibility to work upon ourselves and do the internal work upon our emotions and upon our consciousness to take ourselves out of that condition of ignorance doesn't matter how ugly the truth is to look at there are no excuses now you look at all of the people to continue to contribute to the slavery condition the actual people who are creating slavery the police the military the the actual creators of the dark new world order the order followers themselves the police and the military and all the other people in government down the lever elast government worker the IRS the the FDA the CIA all the intelligence agencies down to you know ATF you know who else I RS all of the alphabet soup agencies okay then you go to the politicians that the puppets okay and then all the supporters of the system you know Oh believe in us yeah go out and vote you know worshipers worshipers of the religion called government of the god called government okay all of these people down to the followers down to the people who even believe that this system is somehow morally legitimate a system of masters and slaves where some people are the lawmakers who get to in their moral relativistic determined I say that this is right and I say that this is wrong and I will cage you for this behavior but not for this one even if it's not harming anybody okay and all the people who support that and condone it it's not just the people who do it which are largely the police and military who actually carry out the violent behaviors upon people it's the people who direct it and condoning the politicians the dark occultists the bankers etc and then all the people who condone everybody who believes in the system of government every single one of them look even today these people are outrightly I picked politicians today they're out rightly saying that they want socialism outrightly saying they want government to control all of the resources necessary for human life to continue and/or flourish on this planet that they want to put that in the hands of the entity called government imagine and that's what socialism is for all the dumb listening out there that don't know that that's what it is that's exactly what it is all authority rien ism is ultimately socialism whether it's the left-wing faction called communism or the right-wing faction called Nazism corporatism fascism whatever you want to call it doesn't matter they're all forms of socialism because you're all putting total control in the hands of the government it's all totalitarianism and most people are too shit-for-brains to have to have figured that fact out because they're too politically polarized we talked about political polarization in the first podcast back ok they're so politically polarized they can't see the forest for the trees that this is all just slavery that's all it is and all the people who do it and condone it are there exercising participation and evil they are participants in evil itself and that makes them evil people that's what it means to be evil it's the opposite of being good you're condoning slavery and you're taking actions to continue a system that is rooted in slavery duress violence coercion all of those things they're all ultimately immoral and ultimately generate evil in the world down to the very voter down to the very person who just says I think politics I think government should continue at all now I think it's somehow morally legitimate you are participants in evil and that makes you evil yourself that's what a bad person is that's one of the things that make someone a bad person it can may be a bad person but I've met many other behaviors but that is one of the defining things that makes people a bad person if you believe in the legitimacy of any form of government you are a bad person by definition by definition you cannot be a good person if you believe that the coercion duress violence and slavery called government should or must continue just believing that that is the case makes you a bad person first of all okay now just just thinking that that shouldn't exist doesn't necessarily make you a good person you still have to understand that objective morality exists and align your behavior to it by understanding which actions are right and which actions are wrong which we're going to get to so is all of this that we've been talking about up to this point so far you know this understanding of what truth really is what right and wrong really are is is all of this knowledge really occult is it really hidden from people truly you know I've put this slide in some of my other presentations but I think it really warrants going over again here are we as a people as human society in the aggregate are we really ignorant people or are we just merely nation' to people the difference between nations and ignorance a very important factor to understand I call this the context of not knowing because both of these terms nations and ignorance again there you see the term nation it's not an everyday word but you can see it means no science the absence of science now science okay so they both mean nations and ignorance both mean not knowing to not know but there's a context for each one of them how do we not know okay nations comes from the Latin verb Ness quiere okay that's in turn to ride that's the prief and II may in Latin and then you're using the verb ski Oh ski RA in Latin which means to know so Ness Gary means to not know not to know or to be ignorant of but there's a connotation to using the verb ness quiere in Latin it means that you don't know but you you didn't know because the knowledge is not present in your environment you cannot possibly know it because you cannot possibly gather the information to come to an understanding of it so the information is just not present in the environment anywhere you it is on an unobtainable ignorance on the other hand in the Latin language comes from the Latin verb ignore RA and that means to not know even though necessary information is present because that information has been willfully refused or disregarded here we come back to the theme again willful refusal of truth we're not talking about no fault of one's own because you couldn't possibly have known it wasn't possibly available to unto you know we're talking about the information is available unto you and you just say I want nothing to do with that because I don't want the responsibility that goes along with knowing okay that's ignorant just like when someone's in a room you're ignoring their presence you're not gnashing of their presence it's not like you don't know that they're there you want to willfully ignore somebody you know they're there and you just don't engage them deliberately well that's if we look at the human condition is the human condition Nessun or ignorance well do we have tons and tons and tons of information about every possible topic available and and information about the human condition available on to us at a fingertips notice of course we do know this is the human condition right here you know we don't want anything to do with it we don't want to hear it we want to shun people who are saying it to us we want to say oh it matters how you say it to us we you have to have our delicate emotional sensibilities in mind because we're such frail fragile people that can't be upset can't be in any way you know have our emotions a balance upset you know your we can't be a did you know so we're just gonna you know cover our ears and just look the other way and ignore your presence and ignore what you're saying the information that you're bringing to the table you know and then you have the help of the mainstream media and the the big tech gurus that want to censor people now and and take their voice off the table so that they can't be heard and that's a dangerous game to play I mean you know the next step after that is hot physical war I keep telling people that you want to play that game you want to play silly games you're gonna win silly prizes and trust me when that eventualities happens don't say people weren't warned because it's only gonna be tolerated for so long and then it's gonna go it's gonna go off after that and it's gonna be a very bad condition especially for the people who are unprepared physically and emotionally and spiritually for it you know some of us will be in better shape than others I'm telling you folks if you're you're not preparing for that eventuality you're putting all the eggs in the basket of good I don't know if I would have that kind of confidence I think it would be a poor choice personally I think we should continue to work toward the goal of helping people to understand in consciousness so we don't go down that path that's what all my work has been about trying to warn people we're heading down a very dark path and it's going to lead to a lot of bloodshed and that's not fear-mongering that's called looking at a long view of history and understanding the patterns and telling you it's it's not gonna end well it's not for anybody for the people who are on the side of good or the people who have aligned themselves with the forces of evil it's not gonna end well for either side which is why I'm trying to avert that eventualities with which we're racing toward headlong because of things like censorship and willfully ignoring truth we're not a nation society we're an ignorant one an ignorant society that's what we are okay so what actually is a truly good person not see that the variant again that they give you in storybooks little kids or Hollywood movies se-ho he just tried so hard to be good and to like his family and be a likable person that's not what it means to be good folks goodness really means that you have you are enlightened when it comes to the objective knowledge between right and wrong behavior you know what a right is and why it's okay to perform it and you know what a wrong is and why it's not okay to perform it that's what a truly good person is and in every moment they strive in every way in their lives to choose the right action over the wrong action willfully from position of objective knowledge that's what it means to be enlightened so if you're you you you think that you can accidentally stumble into that without actually truly taking that knowledge into yourself through conscience it's an impossibility you know you're wishing for something that never will be it's fantasy world again part of my work big part of my workers the distinction between the actual reality in nature and the constructional reality that is artificially created in the mind and most of the time never the twain shall meet you know we have to understand that most of the time the constructs that human beings have come up with are not in keeping with nature and reality at all this is how far off the path of truth and goodness we really are as a species again conventional wisdom is rarely correct and it's rarely moral so what does it really mean to be a good person we have to explore that question it means to align our behavior to right and willfully choose right over wrong right is that which is correct and based in truth and that which is moral because actions which are in harmony with natural law because they do not initiate harm to other sentient beings whereas immoral behaviors or actions which are in opposition to natural law because they do initiate harm to other sentient beings this is what the dynamic is all about whether something is moral or right or immoral or wrong does the behavior initiate harm to other sentient beings and if it does then it's wrong and you engage it and if it does not initiate harm to other sentient beings and that is reserved as a human right it really is that simple most people can't give you that simple definition that's why all the people who engage in anything to do with government are immoral bad evil people they have aligned themselves with the forces that are going to create and manifest evil and chaos in the world okay because they don't understand the actual objective difference between right behavior and wrong behavior being a truly good person is entirely about correctly understanding and living in accordance with objective morality with the laws of objective morality natural law that's the key to everything it's again that's the golden key that unlocks all the locks on all the doors on all the cages in the extant universe when we understand these principles we won't be locked up in a prison a planet any longer okay we will manifest a condition of actual true human freedom and anarchy on the earth which means a state where there are no masters and no slaves that's all the word anarchy is and ever has meant does mean now and ever has meant and ever will mean but why aren't we at a state of true freedom why aren't we at an understanding of objective morality and aligning our behavior to it and therefore why are more people bad people then there are good people infinitely more overwhelmingly more people are bad people than good people in in our world on the earth and it's because one of the factors one of the primary factors is mote most people on earth are moral relativists and I've done again I've said this before to people I've told I told people this when I spoke down in Annika Poco I've conducted social experiments over the years where I have asked people whether rights are right and wrong are something that human beings get to make up for themselves or whether they are objective principles that exist in the natural domaine and overwhelmingly all the time whenever and wherever I do this social experiment the numbers come back the same two thirds of people two out of every three people in the world our moral relativists they believe that human beings can decide what right and wrong are for themselves subjectively but they do not believe that there is an actual objective standard of right and wrong that exists inherently in nature that's called moral relativism it is the ideology or the religion I would call it a religion more so than even an ideology that objective morality does not exist inherently to nature and that right and wrong are subjective constructs which human beings may invent and arbitrate according to time location circumstance or preference that's what the belief or the religion called moral relativism actually is okay objective morality doesn't exist there's only subjective whims and preferences and human beings can arbitrate what right and wrong are at different times places locations circumstances etc according to their whims their likes their preferences that's what moral relativism is now in contrast to that and in truth and in reality not in the constructional domain of human erroneous human thought and religious belief but in the actual natural domain of the real world the real physical 3d reality based in nature in which we all live okay morality is actually objective it is objective meaning it is independent of human perception rights exist inherently within nature and rights can never become wrongs and wrongs can never become rights at any place or time regardless of how many people bullish believe or wish for it to be so that's impossible you cannot turn a right behavior into a wrong behavior and a wrong behavior into a right behavior just by saying it believing it wishing it writing it down in some magical rich we'll called government signing into law you know all of that is utterly irrelevant right behavior is right behavior wrong behavior is wrong behavior and it is dependent upon whether harm is initiated to another sentient being when the action is performed that's it that is the determining characteristic of right and wrong rights do not initiate harm to other sentient beings wrong behaviors do initiate harm to other sentient beings and one can never become the other moral relativism is the ultimate destroyer of all freedom in the human domain you can never achieve a state of freedom in moral relativism you want to know why moral relativism is rooted in the polarity of fear that's the number one reason and you can't ever create any freedom with that polarity and you can't ever create any good with that polarity any Society of human beings that believes that there is no natural objective difference between right behavior and wrong behavior and believe that human beings may arbitrarily create or decide what right and wrong are for themselves is a society that can never truly bring their own behavior into alignment with natural law and since the governing dynamics of human freedom are predicated upon the aggregate morality of a society it is a total and permanent impossibility for true freedom or anarchy to ever exist in a society that embraces moral relativism only moral Objectivists can ever create a society based in true anarchy and I'm talking about real anarchy cooperative spiritual anarchy not the chaotic form of Anarchy which can happen ok you can have a society than which there are no rules and everybody's still trying to kill them kill each other ok and doing doing violence onto each other they don't think just think that they can rule somebody else but they think that they can go and do all other kinds of immoral behaviors to people just because they can ok that's a morally relativistic society only a true an anarchic Society a true anarchic society is only ever based in moral objective behavior that's it it cannot exist in any other state and people don't understand that anarchist people who claim to be anarchists do not understand that and then they take umbrage with me telling them you're not really a real anarchist you're one of those chaos anarchists you know that gives a reason for the mainstream media to tell people that anarchy is equivalent to chaos because what you would probably create left to your own devices yeah you might not have a world that has government in it but you'd have a world full of assholes of completely spiritually devoid assholes that have no idea of what's real spirituality is because you don't believe spirituality even exists you don't believe consciousness even really exists because you're trapped in a completely bogus out-of-date provably false and proven false over a century ago paradigm of science based in Newtonian materialism that is 100% factually proven incorrect by scientific methodology in the modern world which you are not privy to the new science and you believe that the new science actually constitutes some crazy religious belief in your mind when in fact you have the crazy religious belief that you believe in Newtonian materialism in a year that is a hundred years past where it's been proven incorrect scientifically and you're just not privy to that science this is how far back you're now your alleged knowledge of science is rooted it's rooted over a hundred years in the past and you're taking 100-year old Newtonian paradigm based science and bringing it into the I'm sorry I accidentally just clicked my slide for it I'm going back and you are bringing that ancient outdated so-called scientific quote understanding into the modern world in the present year and trying to say it still holds true just because quote scientists believe that it was true back then erroneously because they didn't have the knowledge that they do today they didn't have the framework for understanding the in correctness of that proposed paradigm now they do as do many others and it's proven to be false so moving on to the next slide why do people continue to create things that they say they don't want to experience again these fake anarchists are a perfect example okay I'm gonna continue to hammer on them and you know they already don't like me so let's go full full bore on them okay first of all they're non scientific individuals that have a religious belief system because again they're clinging to a dead paradigm of science that now can only constitute religious belief so they're not scientifically minded individuals at all because they're not using the scientific method or the Trivium and quadrivium processes to understand reality they just accept an outdated notion because they're more comfortable in their fear-based consciousness of accepting that then actually looking at modern science and what it is telling us about the nature of reality okay I'm the most skeptical person there is I come from a total scientific background in engineering that's about the most real-world physical dynamic based science that there is okay of physical dynamics okay so I have a very skeptical scientific background but because I've kept up with modern advancements in the understanding in the scientific community I understand what we know about consciousness and about epigenetics and about new biology etc okay so now I'm sorry I'm going to just ask my producer but for a moment if you could please see if this wind window is closed because the outside noise is really deeply interfering with my thought process with the kids that are screaming out there again folks it's a it's a very you know constrictive environment in here I'm doing this show in a little makeshift studio out of a bedroom we did open up a window earlier to let some air out of the room because it was very stuffy and I'm trying to get this window closed because there are very loud children screaming outside and it's been very difficult for me to follow my own internal thought process and I apologize for that I'm very short usually very sharp and on point but it's been so loud out there from what I can hear that it's very distracting to me so I apologize that I'm being told it is not coming through over-the-air but it is certainly loud enough in the room to very much distract me so again I apologize and I'll try to refocus so why do people are people constantly saying and paying lip service to want this particular condition freedom anarchy whatever you want to call it okay a state where we are free to exercise our rights unrestricted but yet their behaviors contradict that this is cognitive dissonance this is the state of dreaming which is the prescription against which it is given in the occult mystery traditions to to stop dreaming stop pretending that the world is some other way stop aligning your behavior with things that don't serve who you are in your stated goals okay so we are constantly as a human species in this torn apart state where our thoughts our emotions and our actions are not internally aligned within our selves so we're a kingdom divided within ourself okay so we think feel and say one thing and yet our actions our behaviors betray those thoughts feelings and words okay and what we're doing is actually the bringing about the exact opposite result the exact opposite consequence or manifested condition this is cognitive dissonance or what I have called on this particular slide internal contradiction within the self if we exist in that internal contradiction we don't unify our thoughts emotions and actions we are always going to be in a state of vulnerability and weakness and we're going to be internally contradicted such that we can never truly unify anybody any group externally to bring about like collective behavior I'm not talking about like a group as far as organizations like like institutional organizations are concerned I'm talking about just cooperative efforts between a group of individuals we're not even going to unify that we're not going to unify ourselves internally as as single individuals were scattered we're in the state of schism as you see on this slide that's a perfect example of what the whole concept of internal schism is about you know these three aspects of consciousness fighting each other you know or being ripped apart going in different directions we have to unify all of these so there's constant lip service to things that we say we want we say we want freedom we say we want our rights we say we want our sovereignty we say we want Anarchy ok but just because people say they want these things and they say they know what it is to be good doesn't mean that they're going to get them and it doesn't mean that there are actually really good people you could say all sorts of things people say they're Christians all the time and they're fake-ass Christians people say that they're freemasons and they don't understand the first goddamn thing about the tradition of Freemasonry there's all kinds of in name only people you know you hear the term Rhino in the political world republican and name only but really they're socialists underneath you know pretending to be that well there's all kinds of people who pretend put on a mask and pretend to be one thing when actually they're doing the exact opposite so because we have to stop looking at what people say and look at their actions and this is what it means to really be a good person to be a good person means relying your actions to what is right you're not just saying that you want to do it actions prove who someone is words just prove who they want to be you could say all kinds of things about what you want to do who you to be you know what you say you want to manifest in the world and if your actions are betraying that who gives a what you said I mean it makes no difference whatsoever at all and this is what we have to understand paying lip service to something doesn't mean you're getting it done it doesn't mean you're acting in accord with bringing it about into real world manifestation you're just saying that you want it you know this isn't about saying that you want something it's about actually changing yourself you know the old you know meme with the pot the politicians thing they're saying who ones change and everybody raises their hand but who wants to change you know and then everybody's hand goes down and their heads go down and the Flies are buzzing about their head you know most people pay endless lip service to what they say they want and to what they think being good means but they don't act upon it to make it actually happen in the real world this is what I'm trying to say is makes all the difference you know intention who cares it's what we do that matters you know tons and tons of people saying that they're good people saying that they want to be free what couldn't spell the word freedom let alone know what it really means that's how ignorant they are ignorant hoards dumb ignorant bags of crap that haven't learned a damn thing in their whole lives oh yeah I'm a little angry about it folks you want to know why you want to know why there's righteous anger and indignation there because these people are your enslavers their ignorance is our collective enslavement get over it that's who's really enslaving us the collective ignorance of humanity is enslaving us cut a handful of occultist and slave anybody they're there they're like old crackly boned old farts men most of them okay they're they're an old fart that if they bended their back too far you'd hear them crack crack like some peanut brittle okay how are they going to control seven and a half billion human lives you know like you'd throw a punch at them and like you might not even connect you might miss by like an inch and they'd like explode in the dust I mean that is literally how how fragile some of these people are physically okay and we think they're gonna control the human masses you know they couldn't fight through wet tissue paper in a gift box you know but the fact of the matter is is that these are the people who are enslaving us through their ignorance most human beings are not good people because of their ignorance the world could not possibly be in the manifested condition of slavery if the above statement was not true regardless of their intentions more people are either moral relativists or have not resolved the internal contradictions which hold back their actions from alignment with true goodness and it's partially that way because they are not capable of doing it because they're so ignorant and again then people will make excuses for them right they'll make excuses for why people are as ignorant as they are hear this all the time by people in the community oh they're so ignorant because of this or that or this trauma happened to them or they didn't have time to look into this or that or they have a job or they have kids it doesn't matter all endless excuses and justifications for why people remain in a state of total ignorance and in that state of ignorance they are not aligning their behavior with what is right and they are condoning what is wrong and in doing so that is what is creating the manifested collective human condition of slavery and it's wrong and that's what makes someone a bad person they're remaining ignorant it doesn't matter whether you believe that or not it doesn't matter whether you think there's any kind of a legitimate excuse or not because there isn't there is no legitimate excuse for why people remain in that condition when the truth is all around them it's just an excuse that's all it is people who make excuses or bad people as well because intention is meaningless folks it doesn't matter what you say you want to do you could set a billion intentions is what New Year's resolutions are all about right we set all these intentions for what we say we want to accomplish but how many people actually do what they say they're gonna do action is everything you are what you do not what you say you will do words may show a man's wit but his actions show his meaning Benjamin Franklin it is not intentions that matter it is actions that matter we are what we do and say not what we intend to do we need to throw this idea of intention away I never liked it I never liked it in spiritual circles I always thought it was pseudo spirituality I you know and everybody comes to the defense of intent everybody's waving the big banner the battlefield flag of intent intent is what matters you're full of is what you are you're lying to yourself line yourself because you like how pretty it sounds and you want to hear the little floaty flowery definitions that's what you want to hear that's all you want to hear is the flowery definition of something you know you don't want to hear what it really is you know because that is that is hard to hear in in people's minds you know because it's brutal honesty is that intention is meaningless that's brutal honesty that means you can say anything you could say anything man anything you want to say you can say it that doesn't mean that you're actually going to align your behavior to that and actually do it and carry it out and make it happen in the manifested world saying something anybody can say anything you could anything with anybody we have to gauge people by their behavior by what they actually do in the real world on the ground boots on the ground spirituality I've said it a million times and I'll say it a million more this is about our actions we will be judged according to our actions and that's why humanity is being judged we are in the condition of cosmic planetary judgment that's right now that's where we're at that's what the post-apocalyptic world is all about the apocalypse happened that was the reveal of knowledge it's done and over with and you know what humanity said truth I want no part of you that's what it said to truth and now what follows that is cosmic planetary species wide judgement by creation through natural law we are going to be judged by the consequences that we receive in the physical manifested world that we now must live in as a result of what we have collectively co-created so I don't want to hear about how powerful intention is power intention is only powerful if you follow it up with action boys and girls that's when intention becomes powerful you can set an intention there's nothing wrong with doing that but if you just set an intention to let your lips flap away if you know well who gives a crap what good is that you know you just flap on and on and on you know and feel the breeze of the gums flapping yeah that's all that's all intention without action is when you set an intention and then you follow it up with a right action that brings about that good intention into manifestation then you're on your way to becoming a good person but what do we have from people more and more excuses excuses excuses and more excuses ad infinitum endlessly endlessly excuses are for people who don't want it bad enough stop saying I can't I won't I might I'll try maybe later tomorrow start saying I will and do it today or at least set the process in motion through your action today you could do a little bit and then build on it tomorrow you don't have to get it all done at once is why people never start you know they try to look at the whole big picture and they want to do it all at once you know things are done in stepwise progressions that doesn't mean we haven't had enough time to start folks we need to have more than enough time we've had more than enough time to get on the path of true spirituality and a true understanding of what's going on more than enough time stop making excuses and start making changes excuses are the tools of incompetence used to build monuments of nothingness you know that's all we'll ever become as incompetent people living out in us in a state of surrender and hopelessness and quiet desperation putting their hands out going oh woe is me what could I do you know when in fact the truth is that we're incredibly powerful beings as individuals and if we only step into that power through our right behavior through right behavior we will understand what our true power in the world is to affect change in our in our own lives and in the lives of others for the positive so another aspect of what makes someone evil is complicity in evil through their silence most people who know though I can't tell you how many people I know who know what's going on and they're just totally silent about it and they're given all these excuses oh I might start talking about it publicly I might start talking about it with my family and friends I might start doing a blog I might start store I might start a YouTube channel and talk about all these things I might might might might might might in the future in the future in the future excuse excuse excuse excuse you know and then when you ask them why aren't you actively doing it now there's a million excuses oh I'd have to take the time to do this this this yeah it takes time what do you think these slides build themselves what do you think I'm not sitting here for multiple hours every week building all this material thinking about what I want to say putting appropriate visuals do it no just I the the the the the slideshow fairies come and visit mark in Philly and they build his slides for him they build all the slideshows for him but there are such good creatures the slideshow fairies I mean you know the presentation fairies that's their close cousins man do they do a lot of great work I'm telling you it's like I just have to kick my feet up on my desk and practically do nothing you know kick back with a drink kick the feet up and the slide show fairies got this you know and that's how people think things get actually done yeah it's time it's sacrifice of your time it's putting your attention on something enough to understand it in its completeness and then put it out there in a way that it can be understood most people are just sitting there silencing themselves censoring themselves because they're too worried about what other people are gonna say about them if they come forward and are also too worried about Oh what am I gonna lose in my life that I currently am doing what am I not gonna have time for anymore because this is gonna be a further constraint on my time then I'll have to manage and I'm not gonna lie to you that's exactly what it is there are things I want to do each week that I have to forego doing to do this work and that's just how it is because there's only so much time in a week by passively accepting evil and remaining silent we are participating in the evil those who through their silence allow evil to be done unchallenged are just as immoral earth as those who are doing it and I wholeheartedly concur and truer words were never spoken when freedom is at stake your silence is not golden it's yellow because you're a damn coward that's what it really means to not have started speaking up on this on this condition of slavery imagine slaves not saying that slavery is immoral and they're they themselves are being held in that condition of duress and slavery imagine and they're saying nothing about it because they're too worried about what the other slaves might think of them who are ok with their condition of slavery you know you go back to the writings of Frederick Douglass you should read his autobiography you know I think it's called something like the life of a slave in early America or something to that effect if you just type in autobiography of Frederick Frederick Douglass you you will come across it I think you could download it on archive if I'm not mistaken I think has a copy of it for free but if you read that autobiography you know he was not only you know had the wrestle to come to an understanding of what slavery was in his own mind because you know they just brought you up in it you know you were just brought up in it generationally you know most people didn't even hear the term slavery and understand what it meant you know there was just this is what you did this was your life you know and the master told you what to do when you did it or you were beaten furiously by other slaves the house slaves and that's just what life was you know and when Frederick Douglass escaped his bondage in the southern states and eventually went to the northern states and had some subsequent even while before he did that when he had conversations with other people who were being held as slaves in the American plantations in the southern colony in the American forced labor camps that we shouldn't call them plantations they were forced labor camps in the southern colonies he was trying to explain to them what slavery wasn't how this was an immoral condition for anybody to be held in and they were saying that he was a bad person and he was immoral for refusing to go along with the wishes of the master and when if he were to escape he would be stealing the Masters possessions stealing the Masters properties by property by running away because he would be stealing himself because they saw him as the rightful possession of the master can you believe that that is how many of the black slaves that were held in the condition of slavery and duress that they were during the you know colonial period and into after that into early America up to the Civil War era saw themselves that's how brainwashed that's how much of a job in brainwashing them from birth the people the abhorrent people who did these abhorrent practices you know the kind of brainwashing they conducted upon them from the time that they were babies okay and this is the problem is that other slaves are saying to people don't speak out you you sound crazy or you you're wrong and this isn't just a fine perfect way to live you know and other people are worried about what they have to say they're worried about what others slaves that's like Frederick Douglass say well I better go put myself back on the plantation in the forest labor camp because some other slaves told me I was a bad person because I was speaking out against the master and stealing his property by running away I mean imagine this but that's what the house slaves of today talk like you know people who actually think that there's legitimacy to the whole government slavery system and they're telling us they're shaming other people for talking out against it I don't really care what you say about me you know I'm not fooled by you or do I worry about what you think of me you know and this is the problem is this is why most people are silent because they're too cowardly and they're worried about what other people think of them we also go through complicity and evil through inaction so look we have complicity and evil through ignorance okay complicity and evil through silence which is not displaying our emotions and righteous indignation that's apathy we're gonna even get to that in a moment but then complicity and evil through inaction through cowardice of not wanting to do anything the worshippers of the state state enforcers the police the military pacifists defeatist nihilists who don't care about anything most traditional religionists and most New Age religion Asst life brain eggheads you know the the ultra skeptic the ultra quote scientists scientific but they're actually scientific okay it looks like our slideshow is is paused here we're gonna try to work that technically out if we can let's see if we can get back to because it's not advancing to the next slide there we go okay so complicity and evil through cowardice state worshipper state enforcer thugs pacifists the fetus nihilist traditional religionists and New Agers left-brain eggheads you know who are there just scientism worshipers they all have one thing in common all of these people they would never lift a finger to defend true freedom because they are all ultimately cowards without the slightest bit of true courage these people who want to never take real world action and only talk and talk and talk and talk and and or just you know just go along to get along because they don't want to rock the boat nothing but cowards never have been anything but cowards never will be anything but cowards that's all they are that's all they ever have been and that type of inaction is not gonna get you any real world change its inserting to create a free society you know and again these people are worried about what other people will think of them or they're so locked into their religious belief whether it be traditional religion New Age religion the religion of government the religion of science in which I call scientism it's not real science it's a it's a rigid belief in what the current wizards or sorcerers of science say that you must believe and again the other way that we become bad people as we destroy care so we destroy the three destroyers of being a good person is ignorance apathy and cowardice and inaction cowardice and laziness you can combine those and just call it in action ignorance apathy inaction okay so when we abandon the generative principle of true care heart based intelligence you know what we care enough to put our will and actions behind is what ultimately gets created in our world it can never be any other way this is the generative principle of creation the world is the way that it is because most people do not care enough even if they say they want things to be different to change it through their actions this was a slide I put into my natural law presentation the generative principle the eighth principle the principle of true care part based intelligence and action born of the heart born of our emotions of our emotional intelligence so we can say anything we could pay lip-service to a million different things but unless we care enough to put our behavior into effect our will to engage our will and put the behavior into effect in a 3d world what we say we want is not going to manifest in the real world that's how it works care has to underline under Lyle so most people think about it how many people are actively engaged in the great work how many real teachers of objective morality do we have how many teachers of natural law how many people who are trying to teach people that government is immoral and in that it's slavery you know compared to how many people just go along with it or just pay attention to frivolous stuff or only care about themselves which is what Satanism is ultimately about and try to live a life of hedonism and/or nihilism think about the collective number all over the world of people who you would truly consider are doing the great work to end the slavery called government on the earth and to truly help people to understand what real morality is think about how many people are really actively and effectively doing that type of work on the entire planet and percentage-wise try to visualize what that percentage is and I naively thought when I started this work that there would be millions of people at my level of teaching by this point naively and just absolutely completely erroneously I believe that okay and when you look at the number it is like a thousandth of a thousandth of a percent and I think if it's that we'd be doing well you know it is horrifyingly paltry the number now I know we're moving into the last hour of the show I'm going to wrap up the presentation we will be getting to your calls in this hour so uh everybody waiting on discord just be a little bit patient I'm just gonna wrap up the points in these last few slides the true great work is the arduous task of influencing others to awaken to the truth it is to help them to realize that in supporting and condoning the legitimacy of authority and government that they have actually been supporting and condoning the legitimacy of slavery and that they were immoral for having done so how many individuals have actually stepped into the responsibility of this great work and are doing it effectively that is the question we need to ask ourselves to really understand how many truly good people are out there in the world that they are so in the dynamic of good that they have felt that they must make it their mission to enlighten help to enlighten others no one can enlighten others for them we can show them the information that will help them to enlighten themselves if they take it into themselves and don't refuse that truth that's what the great work is to do most people need to be dragged in kicking and screaming into that uncharted territory of truth and freedom okay but the people who care enough about service to truth that actually are doing that great work are few and far between and scattered to the four winds of the earth and that is why evil is kicking our ass that is why evil is a more powerful force on this planet than is good and I think that wraps it up folks I said my piece I said what I wanted to say on this dynamic okay you have to understand that we have to be honest with ourselves we have to start from where we are at and not lie to ourselves that's the first step of a cult initiation stop lying to yourself above everyone else because if you don't tell the truth to yourself you can't tell the truth to anyone else so you have to start being honest with yourself where are we what are the real dynamics taking place how many people are really actively engaged in this spiritual battle final thing I want to say about this folks is all the infighting that's going on between everybody of every different possible faction and persuasion personally and group dynamics everywhere on social media in the real world everywhere I see it all over the place I try not to get involved in this stupid drama because that's all it is stupid childish drama I don't want that dragging me down into that morass of selfishness and childishness nobody's gonna take me off the focus of my work you see what the focus of my work is you see what the intent of is of it is and then I back it up with action by putting it out there into the real world and explaining it to people and doing the great work of teaching I'm not gonna stop doing that that's my personal responsibility and I'll continue to do it okay so as for all the infighting you know what it really means I'm gonna sum it all up I will tell people what it really means and it can only mean one thing it can only mean you do not deeply personally and viscerally within your own life experience truly know the enemy that we are up against because if you did you wouldn't be in fighting with anybody you'd be putting 100 percent of your heart and soul into fighting this enemy because you know how evil it is that's what it really means is that you do not know who and what we are truly up against and that's all I have to say about it and that concludes my lecture slash presentation portion of this episode of wonder if that's happening go back briefly to the slides I just want to do a couple other quick housekeeping tasks please support the work of what on earth is happening here by going to gifts not what on earth is happening calm that's the little gifts donation gifts area that I have set up where you can get physical items like t-shirts and DVDs and flash drives etc okay good high quality items people have been generally happy with them since I put this up a couple years ago I appreciate all the support and people who have you know made donations to receive items through gifts not what on earth is happening calm also if you want to receive the Ark Drive which is a huge collection of all of the data that I gathered in my knowledge gathering information gathering process when I was putting together all of the work for everything that I've done for what on earth is happening I put it all or I put the best parts of it gathered it digitally onto a one terabyte hard drive which is available today for purchase in a tech online tech store for as little as about $40 you could buy the actual drive there's instructions up on what on earth is happening comm slash arc AR K which stands for the amazing repository of knowledge where you can fill out the form and get the instructions for shipping that drive to me which are quite stringent instructions for a very good reason reason we covered that on podcast number 199 if you want to go and check that out was all about what the arc is and how to ship it to me and finally if you are inclined to do so to help continue to support the work that I do here at what on earth is happening and help continue this entire effort to move forward into the future you can go to the donate a tab at what on earth is happening calm slash donate click the donate tab or button on the site and you can make a donation in nine different ways on the site either through PayPal through many different crypto currencies the old-school method of check or money order and you can also donate directly with technology by clicking on our Amazon wish list the tech needs wish list and seeing what items that we require for work here at what on earth is happening I want to thank everyone who has donated you have made this possible the people who have directly supported my work and efforts your support and generosity has been invaluable and I thank you from the bottom of my heart so thank you so much everyone that concludes the information portion of today's material and now what I would like to do is go to your calls let me close up the things here on my laptop and bring up discord and we're gonna take your calls from now until the end of the broadcast today at 6 p.m. Eastern and just be aware that when I call on you a couple of things okay that I want to make clear I want to unmute myself so that people within the call room can hear me say this okay so that others in the call room can actually hear this you don't want to be listening in your web browser at the point when you're in the call room because there is a time lag of maybe about 7 to 20 seconds depending on your internet connection okay where you will be hearing me not in real time where you want to listen for my voice in calling upon you is in the actual discord room so be listening to my voice in the discord room okay and have your microphone unmuted so that's when you hit connect to voice okay in your mobile app or at the bottom of the app on the desktop there's a small microphone icon what you want to do is okay I'm being told that I have game here check okay okay check one two okay I apologize for that that happened last week for some reason - there must be some kind of a timeout happening in discord I'll I will endeavour to repair that again there's gonna be little tech glitches but you know in general we're okay so going back to this you want to listen for my voice and calling on you in the discord room itself okay because that will be in real time whereas if you watch in a web browser or on YouTube or Facebook you will have a time lag or a time delay okay so let's I'll keep that in mind and keep in mind to unmute yourself I will unmute you from the server end okay so here we go I'm going to endeavour to go in the order of the people and the order that the people joined into the room this week that's gonna be my intent let's see how well I can carry it out in my behavior okay so we've been basically monitoring who what order people have come in this week and I'm gonna endeavour to try to be fair about who got into the room early and take those calls first so let's give this a shot let's go to a pox a pox I guess that's short for apocalypse a pox you're live on what on earth is happening episode number 200 welcome from well yourself good I really enjoyed your show today I found there's a lot of intensity and the main question so I guess I'll do a little background I've been listening to you for two or three years I got into your work I think from the podcast from Popeye yes great guy yeah down the rabbit hole people who aren't familiar with that particular show or podcast should absolutely become familiar with it because he does a fantastic job on that show yeah and so I've been listening to your podcast slowly over the past couple years and I'm on around 159 160 around the cosmic abandonment so I've really tried to integrate your work into my life in whatever ways I can excellent I appreciate that yeah thank you so my main point today was it seems like you touched upon this a lot today which was the predominant philosophies that exist in a lot of people in the scientific community which I've know you I know you've talked about this a lot of you've you've touched on this many times but in in my own life I've found that it's very hard to get people to understand in a in a power higher than themselves in terms of so in my life I've been for many years I was saying atheist until I really started to go into you know work like yourself and other spiritual works that really have shown that there's provable evidence in in this even in the scientific community that show that there is a higher power and I find that it's very difficult for me to like I want to create change by by talking to other people who haven't gone to that point yet I want to break them out of that left brain trap or like you were saying today and I felt like if I can interject I'll turn my point for a moment I think you've made a great point there I'll let you continue in a second what I want to say regarding that is people within the so-called scientific community when they often are very specialized in a particular area where they don't see the big picture of things especially where they just make that there they're kind of a you know daily living thing within the scientific world and they're not like driven to understand something that is so deep and so far in depth and beyond the traditional scientific paradigm they just stay there they stay rooted in that you know Newtonian worldview notion of just delving into matter like some scientists though go so deep so deep either into the realm of matter and energy or into the realm of biology or into the realm of cosmology and they study it so overwhelmingly deeply almost like a that they're driven or have an obsession they are the people who often come out the other side and see the grandeur in it and see the intelligence that underlies it and the perfection in the design that underlies it and the care and just the incredible underlying cohesiveness and unity and intelligence that underlies everything within the realm of nature and they come out the other side as quote you know theists / Diaz people who accept that there is at least a higher notion of creation that created you know what we see all around us and put the laws of nature into effect in the way that they are in effect in our lives that doesn't necessarily mean that they come out super religious people they just come out not atheists anymore because they understand that randomness by itself could not put together the complexity and intelligence that underlies the designs that they see all about us within creation from the very deep level that they have studied it from and you're seeing some scientists with that type of not only what I would call open mindedness with that type of ability to really understand what they are actually seeing in their scientific pursuits and they're not in a religious mindset they haven't locked themselves into the religious mindset of scientism or atheism and in doing so they come out the other side where they can see a much larger picture than just of in materialistic paradigm so uh yeah I'd want to thank you for bringing up that point that's what I wanted to elaborate on it by saying and you can continue yeah thank you I think that's a very good point actually I've speaking to some this one girl recently in scientific community who I was bringing this knowledge to her liked the idea of a higher power and I expected her to be really really against it like really skeptical and she was actually surprisingly open-minded in the same way that you just mentioned in that she had studied it so deeply that she came to a point where she realized that the design like you're saying the designer has a creative intelligence or intelligent design within it so I find that's or that's very well so the one thing that I'd want to comment on is I feel like there needs to be more work done and this is something that I'm actually working to do is to try to explain this that like this there's surmountable evidence of a higher power in say like quantum physics you know the double slit experiment which I believe you touched upon document documented cases of telepathy you know consciousness and freewill which you've talked about a lot I feel like I just don't understand why it's so hard to for these people to break out of that religion like they think it's a religion and like it was very hard for me to break that to break that point and break out of the religion and see it but I why is it so hard for other people to to get to that point well I think that's a really really great question and my answer to that would be they have some kind of a vested emotional interest in the maintenance of the status quo and that could mean either they are involved in some capacity that is still teaching these outdated ways of looking at our reality and/or they are so fearful of the reality being another way that it completely turns their worldview on its head and they are responding not with any intellectual reason but not any reason or intellect whatsoever but they are responding in a pure visceral dynamic of fear a fear-based emotional response and they can't really control that response and so it drives them to just ignore the evidence it drives them to just say anybody that is suggesting anything other than the way we say it works is a lunatic and then want to actually censor any alternative information so it's ultimately goes back to the underlying polarity that we use to create anything in our experience in life are we starting from a place of love which is an open-minded willingness to take truth into our minds and hearts not not to be so open-minded that our brain falls out of our head okay as the old saying goes but to take it in in a perspective of is this serving who we are is this true and is it expanding our consciousness and our awareness about life and the world in which we live in ourselves because it's all ultimately self knowledge you know there's a the Kurt that all of creation is ultimately a construct of consciousness you know the universe is mental is the first hermetic principle you know everything is a construct of mind everything for to exist had to be exist in mind first before it can come into physical manifestation that's why government has to control availability of information has to limit the imagination you know they can't have people thinking about other potentialities in ways that things could be without them you know they want you to think that they're responsible for all life and all life would cease to exist if if this system of evil and slavery stopped you know so it's all fear the answer is ultimately they're coming in consciousness from a place of total fear and that's ultimately illusion it's a looser ikan structural thinking that is preventing them from seeing the real reality that that is all around them at work and active in their lives all around them only courage and self-respect can conquer fear you have to be first of all willing to look at yourself stop lying to yourself stop dreaming about what the world what you think the world is and that have actually what it really is this is courage building stuff that's the shadow process itself that is the shadow processed shadow work process itself that's what we're talking about when we talk about the steps of initiation you are actually really turning the the the lens inward and looking at who you ultimately are and then you have to you have to recognize when there's discomfort with it but don't let that turn into fear you have to let that turn into motivation for positive change so that you become better tomorrow than you are today and you know better today than you were yesterday and better tomorrow than you are today you know that's what the whole process is about and that's the only person we should be competing with is our self from yesterday I've said that a million times so that's what it's all about these people don't want to do that they don't want that personal responsibility and they're dwelling in that fear-based consciousness if they open their minds a little and come out of it and just do some work upon themselves do the shadow work upon themselves they'll see that it'll pay dividends a lot of people stay rooted in their behaviors because they think they have something to gain by staying [Music] try to get a better mic cable to avoid that I hope it's not the mic itself but anyway we'll work it out you know I think what was i I was getting into the fear-based consciousness and they they have to do that work upon themselves and they'll see dividends being paid most people stay in the state of consciousness that they're in because they think they have something to gain okay and they think that they will lose more by changing their perspective and their consciousness when in fact they have infinitely more to gain it's a win-win situation if they actually move their consciousness forward and get out of that fear based mentality they will be gaining so much more than they imagined that they would be losing in reality so that would be my advice let's uh go to let's go to dr dr the doctor you're live on what on earth is happening welcome oh yes i yeah thank you it's actually just two letters but uh yes uh yeah one of your videos i think okay which one was it one of your well like last ones like not too far back okay i believe it was about guns and the Second Amendment present a yes yes what were your thoughts on that or comments or questions and well I haven't something that kind of bottles me okay the feel right and I just went through a demo say you lose can I ask you a question right off the bat what country are you from and yeah I I only hooked half I think but I'm from the Netherlands Netherlands so I I would have probably bet all of my limbs that you were from some country in Europe and that's not an insult it is I don't I don't know I can only a half of you know what you're saying okay so I'm breaking up is what you're saying yeah and okay let me try to disconnect and reconnect hold on I apologize for the audio problems is that clear it up a little hello I'm not hearing there he goes okay okay did that clear up the audio a bit yeah I think I don't know it's good so what I was saying is I was making a little bit of a facetious comment there I was saying that I would have bet my arms and legs all of my limbs I would have bet that you were from some country in Europe upon saying that you are uncomfortable with hearing about gun ownership no no no no that okay so if it's not the gun ownership itself what part of it what part of it rubbed you the wrong way what you always say above them both them go with the bellows of natural law I think something yes the self-defense principle and the non-aggression principle yes yes okay so you do understand that self-defense has zero to do with violence because violence is an initiation of harm so do you think that people have the right to initiate harm against others unchallenged unchallenged by physical repercussions or Consequences on to them if they choose that type of immoral behavior and I don't think anyone should of them anyone you know I just out of nothing so let's say in a situation where you're accosted on the street you would only try to take the option to escape and you would not ever totally defend yourself is that what you're saying no no no I mean that is the second the mailbox it's not a way I kind of see it I suppose oh so you're you're you're not saying that you don't agree with self-defense are you saying that you don't agree that self-defense is part of the the comprises what enlightenment is all about I think it's just first I think that to defend yourself you're not harming another being I guess I agree you're not harming another being if you're not defending yourself you are otherwise right well what you are physically you can be physically harming them okay but the point is is that you are not doing it wrong you are exercising a right in the harm of that other person because they have forfeit their right to remain unharmed by initiating violence against you to begin with yes but then then why is the second you know what's that less than one with just first if nothing I mean it doesn't negate each principle does not negate the other so the the the non-aggression principle says do not initiate harm against other sentient beings the self-defense principle is if harm is initiated against a sentient being they always retain the right to respond against that act of initial initialization of physical harm with defensive use of force and I think both of those pillars have to be understood in harmony with each other for someone really to get what it is to be truly spiritual because there's a lot of false spirituality being taught in the spiritualist community that negates the self-defense principle and says that we don't need that present within ourselves or to be ready to be able to respond with defensive usage of force let's put it this way I'll leave your call by asking this question and I'll I'll not just ask it to you but I will ask it to the entire listening audience okay if you do you believe that your life is of value and it should continue so that you can continue to do good things with your life most people are going to say yes they do believe that they want to grow and improve as human being and the conditions that are necessary for that to occur our life and freedom and not being harmed by other people or prevented from exercising their rights so that they may grow and as an individual well if you have value in yourself if you value yourself meaning if you look at each individual as a unique creation that can never really truly be replaced and that means it has infinite value an infinite potential okay because it's something that will never exist again in this exact form okay so it's unique that brings value to it okay and you have value of your own thoughts your own emotions your own behaviors you value them or otherwise you won't engage them okay and you want to continue your life on accosted unrestrained to do good things and to help improve the human condition for yourself and for others well if you have that kind of value how could you possibly allow someone else to do a behavior to you that is in violation of your rights or initiating harm against your physical body without the right to do that on the behalf of the other person they possess no such right how could you possibly claim that you are still in a state of self-respect and self-love if you say it's okay for you to continue to do that now I get the whole spiritual argument that at the ultimate spiritual level we are one understood I get it fully I get it more than almost most human beings on the in the entire planet on the entire planet get the law of one and the state of true unity consciousness I led my entire podcast series by talking about that dynamic okay that was consciousness and oneness was one of the first dynamics I went into here on what on earth is happening okay but that does not negate in the 3d world in the physical domain when someone falls out of the understanding of the law of one and of unity consciousness and are acting in a state of fear to violate your rights bodily or when it comes to your rights and freedom okay that does not negate your right to stop them physically from doing it so in in that situation do you have right to attempt to leave and get away from the actual continued act of duress or violence you do that's one option you could exercise it's a right that you could choose to exercise you could choose to attempt to remove yourself or extricate yourself for in that situation but I don't necessarily believe that that should be anyone's only option you should also have the right and you do actually in nature many people in in especially in Europe will tell you you don't have this right in especially England you know we could really get into the self-defense self-defense is illegal in England it's it's illegal okay they actually tell you there is no object that you can use for self defensive purposes any object that you would use for the purpose of self-defense is considered brandishing a weapon and you would whether as someone was physically trying to kill you they would claim the police and

and military and you know government of England would claim you don't possess the right to use an object to stop an attacker from harming you who has initiated harm already against you imagine this that these like absolute evil demons would claim that a sentient being does not have the right to protect themselves I mean think about it that's like saying a deer would not have the right to try to defend themselves from a coyote you know physically by kicking him with his hooves you know or pushing him off of a hill or a cliff if he were able to get into position to do so see self-defence is part of life that many people because they have never engaged it don't understand and it's it's I find it very sad and disconcerting that we have so many people who don't understand the self-defense principle I encountered this a lot at an arc apoco believe it or not and you know because you see imbalance in all perspectives you see the left brain imbalance which is that scientific atheist materialist imbalance that's they're all there for the kryptos you know that's all they're there for they're there to try to get rich quick you know and just live a selfish life away from other people they're not really trying to really do any spiritual enlightenment whether upon themselves or how to help other people it should achieve that state of consciousness and then you have the opposite side where you have very imbalanced spiritualist type people who you talk about self-defense with them and they're like I would never engage in self-defense I would never do anything harmful to someone just because they've harmed me and my answer is that's one position is probably the most selfish that you could possibly have that left brain you know selfishness and pure materialist position and then the right brain perspective is one of the most naive and self-loathing positions I think that anybody could ever take neither one of them is spiritual as far as I'm concerned okay so you know some people will get offended by that by hearing that some people I think just don't understand self-defense I don't know whether they ever will maybe the best way for somebody to understand self-defense like that is to be physically attacked you know it's it's a horrible thing to maybe wish physical attack upon someone but maybe if a really bad evil person physically attacked you and you saw your life draining away from you in the moment maybe you'd reconsider maybe people who have that event happen to them would reconsider what self-defense means you know and why it's so important and why it's a natural right and why we can never give it up one thing I do know is that I'm going to do a show about it in the future is that I have to say at the risk of alienating people from listening to my show and risk of offending audience and listeners and viewers I I can't lie to you or myself okay I have to tell the truth about what I see that's the first step of initiation be honest with yourself so you can be honest with others and here's what I see Europeans have had their testicles castrated cut off okay I'm sorry to just say it that way actually I'm not sorry it has to be said that way okay so sorry but not sorry okay I'm sorry that that's the condition but I'm not really sorry for saying it that way and what it is is that it's it's like an animal that has been declawed immediately upon coming out of the womb so if you totally rip out a cat's claws with pliers as soon as they pop out of the mother's womb you dig in and get the claw and dig it out you know and their claws from the day that they're born okay and then down the line the cat would never ever know that one of the things that they were meant to have is sharp claws for the purposes of defending themselves this is what has happened in Europe because there is no birth into a culture where self-defense has any meaning and has been actually made illegal and outlawed and yes it has that is the condition in in most cities in the whole UK you are not allowed to defend yourself okay and if you find yourself in a situation where you are losing your life to a physical attacker who is conducting violence upon you and you responded with physical force with any object that your disposal as a force multiplier you will be jailed that is the condition of life in most of the United Kingdom almost everywhere for that matter within it and that's coming to all of Europe and then they're trying to bring that to the whole world because they don't want anybody to be able to resist the government so once you give up that right in a small level then government's gonna swoop in and just completely and utterly destroy you and that that's why I'm considered myself fortunate to have been born in the United States cuz my testicles weren't snipped off from day one of my birth that's why I understand self-defense and practice it and it mitten practice means just that practicing it means that you are constantly trying to improve your ability should the eventualities curve of being able to physically defend yourself and the self defense is a practice that you never achieve the totality of you continue to just try to improve and get better at it and it saddens my heart to hear that people still don't understand the self-defense principle or understand that it is one of the utter pillars of enlightenment it is the the masculine pillar of the Enlightenment process if you don't understand not too aggressive on others and that you maintain the right to defend yourself when you are aggress the pond I don't feel that any being in that state of ignorance isn't in what is enlightened I feel that they are still dwelling in a state of fear and ignorance self-defense has nothing to do with fear it is there to prepare you so that you do not need to feel fear when a trying situation occurs in your life physically ok I will be very prepared in that eventualities and will not have to go into an insane fear response in order to respond to use my response ability to do something to defend my life and/or my property and/or the life and property of loved ones in that situation so you know it's some I have to do a show specifically about Europeans when it comes it's really most of the rest of the world other than the United States but really who has the you know you know you go into Latin America they they may have been stripped of these rights but they believe they have them and a lot of them just go against the law and say I'm gonna have a gun anyway what are you gonna do about it you want you're gonna come and try to disarm me well they'll be a gun battle because this is my right you're not taking it from me that they have a attitude that is the right attitude to take regarding being ever stripped of self defensive rights whereas I see Europeans having entirely the backwards and wrong attitude when it comes to self-defense unfortunately and I think I need to do an entire show or maybe an entire presentation so at some point about how this situation got to be as it is and really go through the process of you know showing people how they progressively got it there and they're not finished yet you know they want to take that they want to start jailing people for speech for offending people you know so that you can't say anything and eventually they'll just strip everybody's rights Europe is becoming what Germany was in the 1930s on a continental scale that's what's happening because the callousness the officiousness the totalitarian mindset was never really healed in all of Europe kingship was too entrenched there there's still respect for royalty in most of the European countries instead of thinking that these are psychopathic lunatics who believe that their God and have absolutely no right to even consider themselves royalty or you know someone else's rulers we're so different that something gives them the right to rule over other people you know it's a it's a very stunted and the word that I'm searching for it'sit's a domesticated worldview it is it is someone who has have been taken from an untamed feral animal and converted into a little domesticated lap dog that never protests that never protests and it's it's it's heartbreaking to see it's heartbreaking to see so let's go to our next caller see if I can find him in the list I think he dropped off let's go to raw rebellion raw rebellion you're live on what on earth is happening welcome to the show what do you have for us raw rebellion you are unmuted you have to unmute your microphone on your end please does that work there you go absolutely thank you for participating what do you have for us today I just wanted to bring up well you touched upon terrain theory today yeah um has a lot to do with what I wanted to mention you which is have you ever looked into food as the fall of mankind I wanted to hear your opinions on that sure I mean I think that what we have accepted as a diet is atrocious I think a few people have commented that you know I've been you know looking fitter I I agree I've been really trying to tighten up my diet trying to watch you know what I put into my body and you know really just eat a lot of raw fruits and vegetables and healthy stuff and you know combining that with just moderate exercise and physical activity really helps and I'm at I'm at a weight of about two pounds lighter than I was in my senior year in high school okay how many people at my age can make that claim can can say that and it be true so I wait yeah pounds lighter right now today in 2019 then I did back in the 1990's better and I know you you are you eating like a fully vegan diet now I become a fully vegan about halfway through the year 2018 last year it took me 12 years to go to a vegan diet from becoming vegetarian it was a slow process and I had set that intention a while back I still struggled with certain types of foods with eliminating them from my diet but I I've gone fully vegan as of about the summer of 2018 and I have never felt better in my life that's fantastic yeah because like on that point there so there's this there's these things called biophotons which they're starting to do a lot more research into now and well it's it's coherent sunlight energy that's the nucleus of all living cells and so all organisms but humans are since we're the only ones that cook the food we're actually losing a lot of the biophoton uptake that we should be having which kind of kills our sixth sense which is our intuition which is what's allowing us to be controlled and prey upon ourselves and destroy our own environment right and that's just a point that I wanted to make and I think that's a big thing that is left out of you know the mainstream nutrition and an understanding about health and wellness well I think that's a really great point I think I need to really do another show on nutrition and food and clarify some of the points that I made in the past on the shows that I did on that topic and raw rebellion I want to thank you for the call and the points that you've brought up on really great points I had I would agree you know we have a fall in consciousness as a result of a fallen way of looking at food preparing food consuming food putting the level of toxins into our diet that we have been over the vast many centuries since humanity has you know been going through this fall in consciousness and food has a lot to do with it it's our energy it's what goes into the very deep energy production centers of the cells of mitochondria and it's what ultimately helps to build the body and the brain and helps us to engage in our processing ability of the mind and come to the accurate understanding of what's taking place within us and around us so I'd like to do a show on food in the not-too-distant future where I Rhian some of the things that are in the modern human diet that shouldn't be there i rien the whole concept of what a truly healthy human diet could be and talk about veganism from a balanced perspective and not the militant vegan perspective that I hear all too often nor the militant anti in perspective that I hear all too often you know we can understand that this is a process it's not something that has to happen immediately I never told anybody to go vegan overnight I would never tell them that because it would probably harm their health in doing so I always told people it was a process you know no one can hear me find where I said become vegan instantly you'll not be able to do it because I never said it you know so you know it took me it was a process of maybe about five four or five months for me to go vegetarian that happened relatively quickly because I had the set the intention of not eating animal flesh eating meat and when I started it I thought I was going to struggle with it a lot and I didn't it just happened very naturally and freely and it was a I didn't have any cravings for it it was just like wow this is way easier than what I was anticipating I had this whole thing built up in my mind of how hard it was gonna be to do and once I started it was just like it was no thing at all you know so I just you know decided I was saying I was gonna do this over a process of like a year or a year and a half if necessary and at the like four or five month time frame I was just like I'm not eating meat anymore never did you know after that and it just was the easiest one of the easiest most natural things I've ever done veganism was a lot harder for me you know I I held on to some dairy for a while and it took me 12 years to basically make the commitment and fine-tune my diet and transition my body see these are parts of what veganism is knowing your rate - transition it's a process it's not an event that that's what people have to understand where a lot of the people who attacked veganism because I tried it and this happened and this made me sick it's like it's not gradual enough you know and food is like any other addiction in the body you know you start putting one substance and it's used to that you can't just boom radically transition away from that you're gonna you know your body's gonna be like let's go on here you know that's not making sense of the input now you know and then it'll it'll respond in ways were you'll develop problems I've always maintained the position of doing it in a very controlled gentle way that is a process over time and still do I don't know know where people got this notion about me that I was some radical foodist in any capacity I'm not radical when it comes to food you know I'm radical when it comes to human freedom you know again a lot of vegans think we're only going to get human freedom when we we all become vegans I think it's gonna be the exact opposite when we understand true freedom and we develop it for Humanity then we will help to ensure fur there all of the animal kingdom you know when we developed that truth when we take that truth in and then develop that heart based intelligence to not want to harm not only our fellow brothers and sister human beings but also our fellow brothers and sisters in the animal kingdom you know so I think that that's a transformative process in the mind that is also a progression and I don't agree with militant vegans that we have to you know do it the militant vegan way first before we can have any real freedom you know I think that's oh it's a one foot in front of the other process where we have to take a balanced approach to changing the human diet and then you know we can do that simultaneously to helping people to understand the illegitimate of government and that it is slight human slavery and when we free ourselves of that constraint I mean we're going to be able to do so many more things for not only humanity but for the animal kingdom as well that we currently are not able to attend or block from doing so I just think that everything is a progression and doing things in too militant and fast of a fashion can have negative results especially when it comes to changing diet I feel a little less that way about transitioning to anarchy but that's because human beings have free will to understand the difference between right and wrong and I think the process could be very quickly if that understanding is really deeply developed the problem is most people don't want to engage it at all and they want to stay happily comfortable in their ignorance so that's my take on that and I think it's a great point to bring up in the call so let's go to most we have here ah [Music] I see my friend Bob from Cincinnati Bob from Cincinnati it's been a while my friend welcome all right Bob you have to unmute yourself you're unmuted from the server end go ahead try it again I really hope you can get it working because I'm looking forward to talking to you Bob I'm not hearing you my friend listen if you get it working I'll try to come back to you I'm gonna have to meet mute you back up and move on to someone else I tried all right let's go to zachary hubbard zachary hubbard you're live on what on earth is happening welcome well thank you for taking my call am i coming through absolutely perfectly clear right yeah a long time follow your work I missed you while you were on your absence I understand you to take care of some things in your life but it's great to have you back yes show each week and mister last weekend so yeah I uh I got a little bit of a flu bug after returning from Mexico and it took a few days to clear that out of my system usually I'm faster at doing that but this one had me down for several days so uh you can still hear my throat is a little bit scratchy it's not quite up to normal level I apologize for that but you know I fought it off and I'm pretty much back to 100% aside from a little scratchiness there but you know back to doing the work well we're all glad you're back your mics dropping out a little bit but I I'm aware what you were saying that you were ill and the voice isn't quite there my work I'm I'm on my 18th YouTube channel probably pumped out about 5,000 videos in nearly the last six years Wow yeah that's impressive familiar with me it's a lot of work and the vast majority of it's been deleted by Google but have you ever caught any of my work before I my channel name has been Zachary VK Hubbard for a number of years I'm sorry repeat the last question dude there you go I'm sorry repeat the last question well your signals dropping out I don't know if I'm having the same problem but I was just asking if you were familiar with my work at all I I believe I have seen some material from you your name sounds very familiar I think I have at some point I'll come across or seen some of your videos posted in social media okay well it's hard to have this conversation just because for whatever reason your signals dropping out really bad right now but what I ate about is the code of gematria which originally comes from Hebrew and ancient Greek but it's very much delish and it's used every single day by our mainstream media to contrive propaganda from the false flag shootings that we see to almost everything else see even the world of sports is rigged and scripted this way and a lot of time talking about all topics but I really go after sports just because I see that the mind's eye of the masses is so fixated on the world of sports and just look at these arenas full of fifty thousand people a hundred thousand people and I think how many of them realized that they've just coughed up all this money for a rigged ball game and and that they themselves are part of a mass ritual of energy gathering and focus within that stadium 100% and I always think if you could all Myton these people if you could awake them to what they're actually participating in if you could get them to organize and gather in that same way to speak out about the wrongdoing and take interest in all of the things that are being to us the things that you talk about on your program every week things that I've talked about for years just how you could have such a concentrated group of people in in earn that energy from from being fixated on a child's game to to doing something so worthwhile and important and wouldn't it be amazing if all of the people who put their energy over to turn their energy over to something like as you said a child's game being played in a mass Stadium if they actually turned all of that energy that creative and vital energy over to something that really mattered in the world to try to make the world a better place and focus that energy that they all put in something that is completely meaningless if they focused it into some really truly worthwhile pursuit like oh I don't know human freedom could you imagine what humanity might accomplish absolutely CERN philadelphi I just want to share something with you sure your city was established October 27 1680 dude that's the official date of establishment and if you add that date 10 plus 27 plus 16 plus 82 it sums to 135 and the reason that's relevant is because in Revelation there's a letter written to the Church of Philadelphia and in the letter there's something mentioned David if you write out the key of David and use the alphabetical order it's T's xx letter H is the 8th YZ v so on the key of David sums to 135 and this is such a big number in the history of Philadelphia it especially comes up in their sports all the time your baseball team just signed Bryce Harper exactly a hundred and thirty five days after his birthday just yesterday temple finished 13 and 5 in the conference Villanova which is outside of Philadelphia just finished 13 and 5 in the conference by the way Villanova equals 135 one of the biggest part stars from Philadelphia Kobe bean Bryant his name 135 Carson Wentz the big quarterback right there there right now he's had a rookie record he 5 passes before his first interception and I could go on all day March first every city has a number that's assigned to it I'm talking about Philadelphia that's where you're from but you've you learned these numbers and you see how the world of sports is scripted last or two years ago Super Bowl 52 Donald Trump took on the NFL over the protests of the flag on September 23rd 23 / 9 and I said right there I said boom there's your Super Bowl it's gonna be the Eagles and the Patriots the Eagles the home of the flag sown at 239 Arch Street 239 s the 52nd prime you'll have the Patriots with the flag on the side of the helmet it's so scripted the the Super Bowl was won by the Eagles with number 86 catching the winning touchdown exactly 86 days after his birthday and why it's because national the national anthem was officially adopted 86 years before that NFL season so anyway I am very familiar with a culture ma tree and I've talked about it a lot especially in a relationship with the 9/11 mass ritual event a false flag event a human sacrifice ritual let me ask you a question Zak do you see this purely as something that is scripted by the powers that be or do you see possibly that this is a creative synchronicity within the universe itself people have called it synchro mysticism I'm not from sure if you're familiar with the term do you see this as a possible example of synchro mysticism or you think this is simply scripted events as far as you know people actually creating these seeming coincidences but they're actually using gematria I I do believe it is a little bit of both absolutely I think a lot of it in the world of sports is completely contrived but with regards to the larger subject to answer your question I do believe it's both okay so pretty interesting material I would like to talk about it further we're running out of time on the show I'd like to go to some other calls before we wrap up or at least one other one but I'll give out your what was the show that you you do you want on YouTube it's a Zachary K Hubbard I'm also on truth frequency radio once a week but later this year I think we're gonna beat up mark I'm planning I've been invited to the Anarchy Philadelphia conference so I hopefully there I'll be speaking there as well so we'll both be speakers at that event in Arkadelphia coming up in September very cool thanks for having me mark you have a grab solutely Zack thank you so much interesting okay I think we might have time for one more let me see if Bob from Cincinnati is there Bob are you there are you there mark there he goes got him before the end of the show we have one minute go what what what a pleasure to be calling in on show number two zero one I called you 9 years ago on show number 12 of course the numerology on these is 3 which I won't touch on mark the chem trailers are still spraying the geoengineering is still going full force the vaccinations are still being posted from Cincinnati everyone that's all the time we've had Bob thank was so much I'm gonna go to you I'll go to you first next time next show thank Bob thank you for the call ladies and gentlemen ex all the time we have for this episode of women f is happening I hope you enjoyed it remember government is slavery I'm your host mark Casto my website what on earth is happening back home right here medicine [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #202

Topics: *In-Fighting & Division In The Freedom Movement, the Dark Occult Season Of Sacrifice, the Zodiac and the Solar Year, the Season and their Signs, the Occult Sabbats, the Seasons of Life and Death, the importance of March 19th & March 22nd, the 40-Day Season of Sacrifice, Human Sacrifice Rituals and False Flag Events during the Season of Sacrifice, the New Zealand Mosque Shooting and its associated Dark Occult Symbolism, the Cult of the Black Sun, Divide & Conquer, Childish bickering in the Freedom Movement, Hegelian Dialectic, False Choices leading to Conflict, Political Division, False Left vs. Right Paradigm, Religious Division, Gender Division, the Gender War, Economic Class Division, Hyphenated "Anarchy," Open Borders vs. Closed Borders, Vaccine Supporters vs. Anti-Vaxxers, Abortion vs. Pro-Life, Plant-Based Diet vs. Carnism, Flat Earth Religion vs. Globe Earth, Psy-Ops Believers, Appreciation for Mark's Work, the Impact that One Individual can have in the lives of others, Creating a free Society, Solutions, Philosophical and Moral Principles, "Render to Caesar the things that are Caesar's," Letter of Scripture vs. Spirit of Scripture, decoding religious parables, biblical allegories, Great Work Epiphanies, the True Word of God, Heart-Based Intelligence, Mind Control in Music, Freedom-related Music, Socialism and Communism in the Heavy Metal community, Allegories in Video Games and Movies, Occult Numerology, Gematria, Repetition of Dark Occult Manipulation Techniques, Christ Church New Zealand hooting, the Ides of March, the Gun Control Agenda, Adrenochrome, Failed Relationships and Personal Growth, Discernment, Using mental, spiritual, and emotional tools to Discern Reality from the Artificial World, Chaos created by the Ignorant, the Dunning-Kruger Effect, the Golden Rule, Morality and Ethics, Mark's work is free to transcribe, Contribution to the One Great Work.*

freedom man that's what it's all about you've got the groove on freedom possible welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery this show is live every Sunday from 3 to 6 p.m. East Coast time that's 12 noon to 3 p.m. Pacific time today is Sunday March 17th 2019 and we have a great show lined up for you here today we're going to be getting into the dark occult season of sacrifice and what it is what it means and why we should be extremely vigilant during this upcoming time of year then right after that I'll be getting into infighting and division within the so-called freedom movement and how that is absolutely murdering the movement toward true human freedom if we don't become truly unified over morality and natural law we're never going to win this spiritual battle that we're in that's going to be the main topic for discussion tonight so I think there's gonna be a whole lot of information covered I have a pretty extensive slide presentation prepared once again I want to thank everyone on the production team for doing a great job getting everything together for the show I want to thank everyone who has made this possible with their generous donations and I think we should jump right into the topic right into the presentation slides for today because there is a lot to cover and then we're going to go to call go to your calls in the third hour of the show today on discord you can get that link at the show page on what on earth is happening calm slash show all right here we go and by the way I've been dealing with a little bit of allergy issues today if I sound a little bit stuffed up please bear with me I'm gonna just power through it and it'll be it'll be fine we'll take it as it goes so the main topic for the presentation here today on what on earth is happening is in fighting and in the freedom movement the so-called freedom movement and I want to thank Brett Hatton for the great job he's been doing with the podcast art he insert this image in here of bickering children because that is my take that is what I see the freedom movement as it stands right now very unfortunately you know I'm not going to mince words people can get as offended as they want but I have to call it like I see it I have to tell it like it actually is so you know this is how I see the freedom movement today I don't see us unified on I don't see us in any kind of accordance with each other I see us bickering and infighting like little children and if we continue to do that it's going to be our doom so this is going to be the main topic of discussion a little bit later but I do want to cover I want to read cover the occult season of sacrifice for those who still do not know what it is and or do not think it is a real thing or something that is are very worthy of discussion just very quickly as a brief note before I get started we did incorporate a pop filter a few people were giving a little bit of complaints about audio pops I got a couple of the emails about it last week and my producer also noticed it so I put a we put a pop filter over the mic we're probably going to try to do an upgrade to the whole mic system here on what on earth is happening we'll see you know if that goes okay in the future but right now I'm going to be using the pop screen I think it'll take care of that issue so this is the artwork for the main topic let's jump into the ancillary topic okay really it's a topic unto itself and probably is worthy of a whole show but I want to go over this once again as a review for people who again may be new to my work or may not have heard the work that I've already done on the dark occult season of sacrifice as it is called so the the controller's of our world by what other name you want to call them you know some people will call them the social engineers some people will call them the mind controllers some people will call them the Illuminati I personally hate that term for them because they're not illuminated ones you know the original name of the Illuminati secret society that was formed in Bavaria Germany was the perfectibility and now that means the perfect ones imagine the hubris of these people in this dark occult Society of what many people think is was not a dark occult society was just a typical Fraternal Order these people referred to themselves as the perfect ones the perfectibility you know and then that name became morphed eventually into Illuminati the illuminated ones are the enlightened ones they're neither perfect nor enlightened their spirituality is extremely inverted and they are what I call a dark solar cult they are in fact the Sun cult but in in the way that they look at how they are a solar cult is in the form of looking at light or the Sun as knowledge this is what we have to understand about the dark occult I consider them dark Luciferians because Lucifer simply means in Latin it comes from the Latin roots looks meaning light and frere meaning to bring or to carry so it could be seen in one way of looking at it as the light bringer or the carrier of the light of knowledge and that's what these people see themselves as they see themselves as being the torch bearers of the light of knowledge of the occult but it's the way that they use it that makes them a dark solar cult or dark Luciferians so we have to understand that this is all about the Sun as light and they stem out of the saw solar cults of the ancient world all of the Astra the alive cults of the ancient world eventually degenerated into dark occult orders of that we have today and the solar cult was no different we have to understand that the ancient sun-worshipping traditions always looked at the Sun as being a journeyer on the zodiacal star the constellation the belt of the constellation stars okay and these are just a backdrops of star clusters which we call constellations that the Sun visually appears to move through during the course of a solar year this is visually depicted by the zodiac wheel that is shown here and the Sun at the center of the zodiac wheel makes its way through these twelve houses during the course of a year so in the ancient world it was always looked at that the seasons were broken into these four quarter in groups of the zodiac and they were each ruled by a central sign of the season so the mid sign in the middle of each season for spring it's Taurus and that is an earth sign for summer it is Leo which is a fire sign for autumn it is Scorpio which is a water sign and for winter it is Aquarius which is an air sign of course these signs alchemically associate with thoughts emotions actions and then earth being resources so you have thoughts or mind mental capabilities being associated with the air sign emotions of course being associated with what the sign of water and the action or will being associated with fire and you had earth being associated with resources innate talents or capabilities or personality characteristics and what we have at our disposal to work with in the physical world that was what the earth sign represented alchemically of course the Sun in the middle was the fifth element the quintessence which represented spirit or light or you know the spark of the divine however you want to look at that so we also have to understand that the cross that is the vertical and horizontal arms that separate the seasons represent of course the solstices and the equinoxes this is the journey of the Sun throughout the course of the year at its high point its midpoint and it's low point on the earth as seen from the northern hemisphere so these are also the beginnings of each season the beginning of summer or the summer solstice at June 20th or 21st the Sun is at the highest point with respect to the Earth's plane of orbit in the northern hemisphere it is at the Tropic of Cancer which is approximately twenty three point five twenty three and a half degrees north latitude north of the earth's equator at both the equinoxes the spring and autumn equinox the Sun is directly at the equator so we have equal amounts of day and night hence the turtle equal equinox meaning equal night and of course the beginning of winter the winter solstice at December 21st or 22nd the Sun is at its lowest point of power with respect to the northern hemisphere it is at a 23.5 degrees south angle or at the Tropic of Capricorn again these are named these tropics are named as such because the Sun is about to enter the house of cancer at the summer solstice as you see and it was it is about to enter the house of Capricorn at the winter solstice hence the Tropic of Cancer and the Tropic of Capricorn respectively and you know we can see that this is the direction that the Sun takes during the course of the year it'll begin at the spring equinox and then progress through into the summer season and then fall down into the season of autumn that's why we call it fall and then progress into the winter season and then start the cycle all over again so we have to see the entire zodiacal wheel as the path of the Sun and says that it passes through during a solar year now what's very interesting about this is this is where we get the the occult holidays or Sabbath's okay and it's also what we have to understand about this is why sacrifices are made during a particular time of the year why are is bloodletting done human sacrifice rituals traditionally in ancient occult religion and and mindsets these practices were performed during specific astrological times of the year for very specific reasons and what I want to show people in this next part of the slide is that the center points of each season are the High Holidays the the the solstices and equinoxes are considered lesser holidays during the occult year but right here is the very important parts of the occult year the very midpoints of the ruling signs that actually are the midpoints of the season okay so right in between the spring equinox and the summer solstice this midpoint of the house of Taurus okay in the midpoint of spring it is known as it's on May 1st this takes place it is known as Beltane or Walpurgisnacht st. vol pertussis night so this this holiday is that is the point that we're going to be talking about today particularly because this is the end point of the season of sacrifice as I'll explain to people the season of sacrifice actually begins on March 19th and it's a 40 day period that progresses from March 19th which is right at the spring equinox up to and it goes up to the midpoint of spring which is May 1st May Day now May Day is the highest of all the occult holidays it is considered the the the beginning really although or not the beginning of the year because that's considered the spring equinox but is considered the high point of the year because this is the close of the spring season and all the planting basically has to be done that is going to help with your survival through the course of the year because as we'll see the ancients really only considered that there were two seasons not four okay now you looked at the top of the zodiacal will is the season of life and the bottom of the zodiacal wheel as the season of death okay so the midpoints are are known as Sabbats okay these are important times in the world views of dark occultists because they lie at the very center or heart of the season and the midpoint in summer known as midsummer or Lamas is August first and then the Altima midpoint is October 31st we know that is Halloween in the older traditions it was known as soin and then the winter midpoint is February 2nd known as in bulk or Candlemas we know that in the United States has Groundhog Day a time of prognostication Beltane er of all paradis not May first was a time of renewal of life of fertility and then Lamas or midsummer was a festival of light about the Sun in the highest point or probably probably the strongest power during the course of the year and leo around July August the dog days of summer and then the midpoint of autumn is a time of respect and acknowledgement of the dead and death in general a season that we're getting ready to move into the winter which is about survival and potentially death so that's what Halloween or soin is all about so this is a the zodiacal will break down how the sun passes through it the solstices and equinoxes and then the midpoints of each season so this has everything to do with the occult season of sacrifice because we have to understand the importance of the beginning of spring to the mid of spring that's the occult season of sacrifice okay so in this next part just one that I reiterate the the the ancients really only saw two seasons okay they saw the season of life in which the Sun is really in the northern hemisphere above the zero Degree point and that is from the beginning of spring or the spring equinox around March 19th or 20th to the beginning of autumn in which it's at the zero Degree point at the equator and moving southward into the southern hemisphere and that when it's in the northern hemisphere that's when food can be planted and grown in the northern hemisphere because the Sun is is favoring us at that point it's it's facing the northern hemisphere because of the earth's tilt out of 23.5 degree axis with respect to its plane of orbit around our Sun and then of course the season of death is the opposite of this it is the time when the Sun is in the southern hemisphere I'm sorry folks feel sneeze coming on it didn't manifest that's even worse than than it actually happening as we all know I apologize so at this point the Sun is in the southern hemisphere and crops do not grow in the southern in the northern hemisphere during this time so this is the time that we have to be prepared for survival by stockpiling food because of the Earth's axial tilt and this is why there is such a attitude of scarcity instead of a mindset and paradigm of abundance in our world because of the dynamics of our planet with respect to our star we have to basically do all of our planting growing and most of our harvesting during the season of life and then stockpile stores of food during the so called season of death because in the northern hemisphere where the greatest amount of the human population lies food does not grow in the northern hemisphere when the Sun is in the southern hemisphere so that those are the consider the two seasons and here you see them here where you have spring summer represented in the top path of the Sun during the year where it's progressing from the equator up to the summer solstice and then when it hits the autumn equinox it progresses down into the season of death they're depicted on the right hand side and life and growth only happens during those two seasons on the left hand side spring and summer so sorry again folks just have to bear through this been triggered with allergies during the week because of some exposure to dust during spring an early spring cleaning of my place and my my immune system doesn't seem to have been prepared for the amount of dust that I was exposed to so I'm struggling a little bit again my apologies we'll just power through it so you see there the Tropic of Cancer is right at the summer solstice when the Sun is at its high point at twenty three point five degree angle with respect to the Earth's plane of orbit above the equator and then at the Tropic of Capricorn that's when we the Sun is at the winter solstice and approximately 23.5 degrees south latitude it's a very good visual depiction of the path that the Sun it's it's this snake-like path or a sine wave type path that the Sun makes during the course of a year or with respect to the the Earth's plane of orbit that's called it's called the ecliptic if you want to look it up that's the the visual path of the Sun with respect to the earth's equator okay so let's get into what the season of sacrifice really is and why it's so important for us to understand so to understand when the season of sacrifice is quote celebrated by the dark occultus of our world we have to look at again the sun's positioning with respect to the earth so here we're seeing the three times of the year when the Sun is either at the high point the low point where the mid okay so again we've looked at this when we looked at this O'Day achill will the Sun makes its progression from the winter solstice its lowest point of power up through the spring equinox at March 19th or 20th where it hits the equator and then continuing during its course upward into the northern hemisphere it then goes to the Tropic of Cancer at 23.5 degrees north latitude when it is at the equator that is the equinox okay and it is night there favors the northern or southern hemisphere it is directly in line with the earth's equator now the this is seen the zodiacal Trek is clearly seen in the Masonic first degree tracing board but you have to turn the board over onto its side no I did this one I covered the symbolism of Freemasonry because they're telling you this visually in code because the floor of the temple of Solomon depicted in the first degree tracing board is actually the earth with its latitude and longitude '"l lines okay and then the pillars are the equator the middle pillar is the equator and then the northern pillar is the pillar of jackeen when the Sun is at the highest point of power and there you see it visually depicted at the high point that the initiatives have to climb up the ladder to to get to the knowledge to get to the light to get to the Sun okay and that's at the summer solstice then the dark pillar the pillar of Boaz is at the winter solstice so this would represent the Sun at the Tropic of Capricorn so you're seeing these pillars represent respectively the Solstice points and the equinox point ok the equinox points when the

Sun is at the equator so that's the balance point and that's why the all-seeing eye is at that point so the the third day after the spring equinox point the actual center point of the Sun when the Sun is directly in line with the equator is a very important time period for the dark occult in particular this is March 22nd and it's a very important day during the occult year okay there's even an entire secret society slash for turtle order that is named after this date we'll get to that in the next slide but this is the sun's relative position to the earth's equator to the Earth's equatorial line or the ecliptic as viewed from the earth when the Sun is a position at March 22nd it breaks fully the equatorial line okay so the whole disk of the Sun instead of being split right in the middle has now fully passed the equatorial line this is then what what they say is the Sun has actually completely risen after three days okay because you know being in the tone for three zodiacal house is Capricorn Aquarius and Pisces from its lowest point it is in the in the tomb for three days and then it rises up from that point to come out of the tomb or be resurrected so that it can rejuvenate life in the northern hemisphere give life to the earth this is where the whole Christ mythos comes out of the solar Saviour mythos okay so on the third day after the spring equinox the Sun fully breaks past the equator and those fully emerges from its tomb of the southern hemisphere this symbolically represents Lucifer the light bringer or the carrier of light the bringer of light rising from the dead to begin his journey toward his highest point of power at the summer solstice again Lucifer is two Latin roots looks meaning light and fairy meaning to bring her to carry these high and low points of light may also be seen in the cryptic tracing board of tubal-cain shown below so here you see in the tubal-cain tracing board Freemasonry you only see the two seasons the season of life when the Sun is favoring the northern hemisphere there at the top when the Sun has come out of emerged symbolically from its tomb and then you see the tomb below representing the Sun in the southern hemisphere or the season of death okay and when we understand this symbolism and it's all related to the Sun and then we can really decode a lot of secret societies symbolism that uses this okay so one of the main secret societies that uses this type of symbolism is the order of Skull and Bones it's a Yale University secret society also known as the order of the scroll and key it's a clandestine Masonic Lodge Lodge number three to two taken for the date March 22nd which is the most significant date in you know their whole dark occult symbolism because of it representing the emergence of light okay and it's dark light as they use it as we'll see this is the cult of the dark Sun or the Black Sun as it is known d schwarze Sun was a secret society in Nazi Germany which I'm going to actually talk about a little bit later which was a central secret society within another secret society known as the SS or the Schutzstaffel the Schwartz Sun was run by Hans Kammler that largest the most powerful cultists of the Third Reich along with some of the technological sorcerers like Hans Kammler so March 22nd is considered the actual rising of the Sun out of the tomb and again the order of Skull and Bones in Yale has its headquarters at a place called the tomb they're telling you that they're not the ones rising from the tomb they're ones in the tomb in the season of death death worshippers their whole symbolism is the the symbolism of death the the skull and the boat and the crossbones this is a symbol of death or poison okay and it represents symbolically thoughts and actions but divorced from the emotions of heart based intelligence again thoughts take place in the skull actions take place with the bones or the limbs okay but there is no heart in this image okay the heart is missing okay so the emotional aspect is missing but you have the intellect combined with the will to act that is what makes them a dark occult society and that's what makes anyone really turned over to the darkness turned over to the dark aspects of the occult but to go back to the explanation of the season of sacrifice so we understand that you know the the three to two Lodge the order of Skull and Bones they have their headquarters at Yale University and it's called the tomb okay so we see this also the symbolism of the Skull and Bones is also on the third degree tracing board you know we looked at two other tracing boards in the former slide the the first degree and the tracing board of two two ball cane but the third degree tracing board is all about death and resurrection death and resurrection of the Sun or of the soul okay our son's name is soul its scientific name meaning one or unity okay so the third degree tracing board depicted on the left hand side of this image shows the Skull and Bones imagery again and wars us about the three murderers of the Masonic Christ figure Hiram Abiff who is killed by the three destroyers of consciousness ignorance apathy and cowardice that's what puts him in his tomb okay where the Sun goes into the tomb of the southern hemisphere and then there is a hope of Resurrection represented by the sprig of acacia growing at the top of the of the coffin there the symbolic tomb the tools that killed Hiram Abiff there below the the depiction of the floor of the house and the pillars and you have a Hiram Abiff name and numbers depicted on the the plaque on the on the coffin so Hiram Abiff is the figure that symbolically dies and then is resurrected back to life he is the Masonic Christ figure so I also have written here on this slide we must always be on guard against these three insidious destroyers of spiritual awareness ignorance apathy and cowardice / laziness the ignorance destroys our thoughts apathy destroys our emotions or care and cowardice and laziness destroys our will to act so in the Christian tradition you also see a time of sacrifice or a time to make a sacrifice to God to creation however you want to look at it but this time period before Easter is just a proxy of the true season of sacrifice again that's what Christians did they took things that were act active like active communion through some type of psychedelic or entheogenic substance which was given to initiates to change their consciousness for real and they made a proxy of it and give them a communion wafer that's an herb that doesn't actually change consciousness but you're supposed to just see it symbolically as the quote body of Christ so Lent just like everything else in the modern Christian tradition is simply a psychological proxy for the real thing the real season of sacrifice is this dark occult aspect of actual human blood sacrifice that I'm going to be talking about so in the pagan sun-worshipping traditions animal and sometimes human sacrifices were often offered during the forty days between the spring he cannot equinox and the midpoint of spring or May Day May first Beltane so this is the planting season this is when the seeds have to basically go in the ground when we're coming up - it's no longer cold the weather is changing it's starting to get warm it's starting to become a seasonally like seasonally like spring weather like right now and we have to get the plants and crops planted in the ground we have to get those seeds in the ground now because that's when they're going to start to actually sprout and eventually grow and bear fruit and and vegetables and get us through the time of the season of death when the Sun goes into the southern hemisphere so they looked at it what like from now until the actual midpoint of the season is hunting season and if they considered it in the ancient world that if they were to give some type of a valuable sacrifice of something that was extremely valued namely young life okay to the earth and the Sun and the spirit of the earth and the Sun that those quote spirits or consciousnesses would look favorably upon human beings and then it would ensure a bountiful harvest come harvest time during the autumn so that is the root of this occult tradition of sacrifice now when the actual season of sacrifice officially begins is on three to two March 22nd to May 1st if you actually count those days it is 40 days now this is a significant biblical number religiously the 40 days between March 22nd and May 1st are the official season of sacrifice now again sometimes it begins slightly early they usually observe the time leading up to it to throw especially the three days leading up to it as almost included in the season of sacrifice so I often consider the real beginning of the season of sacrifice March 19th March 19th is a very significant day in the occult okay if you actually follow this and study and read into it you'll see the March 19th is a day that darker cultists do a lot of activity okay I was actually initiated into the Church of Satan as a priest again I don't know where the rumor is coming from that I ever claimed to be a quote high priest to be quote high up in the Church of Satan no one can ever produce any such record of me saying that because I've never said it okay I admittedly was a very low-level initiate in the Church of Satan I was inducted into it as a priest however under the name mark rokar which I've repeatedly explained through different presentations and other material that I did not join the Church of Satan as Mark passio I hated my family name then because I was very much at odds with my family and family members and I joined it under an assumed name which I took from the Gnostic texts the piste is Sophia or the faith wisdom as it is called in Gnosticism after a demon that is after my birth sign of Leo named her a car so that is where I got the name that I joined the Church of Satan with and I was appointed to the position of basic priest within that organization not high priest it was only one high priest and only ever is one high priest of the Church of Satan at the time that I was initiated into it it was or given that rank it was Anton LaVey who passed away the following year but he actually appointed me himself in the year might in the year 1996 so to go back to this this is the time of the year where we have to be very vigilant for false flag terror attacks and potential human sacrifice rituals okay forty days is a significant symbolic time period in biblical and occult terms okay and here we see visually the actual one eighth of the year in red shown there in the bottom right hand corner that the actual season of sacrifice takes place from the spring equinox March 19th but actual beginning the the official beginning you could say is 3 to 2 March 22nd through to May 1st of the midpoint of spring or vol purchase nacht ok so that is the season of sacrifice time now what happens during this time is many different potential false flags and blood ritual events are carried out during this time period it's it's March 17th today so I'm telling people right now they also love Tuesdays folks ok so March 19th is going to be falling on Tuesday of this week Tuesday is mercredi in French it is I'm sorry it is not mercredi it is merridy ma rd i in french and that is after Mars the God of War okay so it's the God of War and martial arts comes from Mars that is the death arts ok the arts of death martial law all related to Mars March nineteenth Mart March Mars Mars as month Mars this day they love it when it falls on Tuesday as well ok so I'm just letting everybody know you better watch March 19th this year ok and you better watch March 22nd that's gonna fall on a Friday this year ok they love Friday's as well to do occult rituals because it's the goddess's day okay Freya in the Norse tradition from where we get Friday okay a lot of these rituals you'll you'll notice goddess names in them you will notice also King King they they like the killing of the goddess and the killing of the king it's killing of sovereignty okay killing of nature killing of the Sacred Feminine and killing of sovereignty this is all encoded into these rituals okay now I made a rudimentary list the first time I did this but I put together a slightly more extensive list now and I have 28 ritual blood rituals and dates that I want to go over that have taken place during the season of sacrifice okay so we'll go all the way back to the American Revolutionary period and a lot of this is revenge for that time a lot of these events that take place especially in the United States are direct revenge for the initiation of the the hostilities against the crown to get them out of our lives okay and the battles of Lexington and Concord which were the opening volleys of the American Revolution - which took place at Lexington and Concord Massachusetts I went up to Lexington green a few years ago with my band the founders and we took pictures at Lexington green which is where the quote shot heard round the world took place which was the opening shots of the American Revolution this happened on April 19th 1775 okay even before the signing of the Declaration of Independence over a year later so this is one of the things that they they particularly want to do things on April 19th as well so March 19th is important March 22nd is important and April 19th and as we're going to see April 20th so you have to watch March 19th March 22nd April 19th and April 20th for specific reasons you know I think they started early this year with this mosque shooting okay we're going to get into that a little bit and the symbolism that accompanied it and the manifesto that a company did okay and they they chose the Ides of March another very symbolic day because it's the killing of the Emperor okay killing of the king you're gonna see this over and over again you know the the murder of Gaius Julius Caesar took place on the eyes of Ides of March that's where we get that's why that's a commemorated date and he was murdered by the Roman Senate members and of course his friend Brutus okay so let's move on to the next blood ritual date which was a 1 ritual sacrifice event which was the great Boston Fire now you'll say okay there's natural disasters and events in this list yes there are but that is not to say that they may have not been actual machination by social engineers and dark occult orders you know it is very possible for fires wildfires this friend like that to be done by human beings so the Boston Fire which destroyed a large portion of the city of Boston March 20th 1760 okay one day would day after March 19th and really they burned for a few days right through to March 22nd this was of course Boston Massachusetts the great Boston Fire the riots in Baltimore a big event in the Civil War period era to a place in Baltimore Maryland April 19 1861 so again there you have that April 19th day again you'll see that over and over okay the San Francisco earthquake and fires in San Francisco California April 18th 1906 the sinking of the Titanic which was absolutely an occult ritual sacrifice namely to murder high-ranking members of the Asador family because the Astor's were some of the industrialists in the United States that stood vehemently opposed to the creation and institution of the Federal Reserve System the Federal Reserve dining cartel system here in the United States which has been since that time then since 1913 been the central bank of the United States which issues the fiat currency and controls the interest rates on our currency here in the United States and is devaluing the currency like nobody's business the Titanic went down in the North Atlantic Ocean certainly by sabotage and this happened April 14th 1912 within the time period of the season of sacrifice the xuxa Armenian massacre in Russia Azerbaijan took place on March 22nd the beginning of the season of sacrifice in the year 1920 the cadet katene Massacre sorry folks on my producer is our needs to inform me about something you no worries okay I was just informed that my volume was just a little bit low he wanted me to pull the Michael a little bit closer so that's done hopefully the pop filter is working and it is not interfering with volume too much so the katene massacre in katene Belarus by the Nazis took place during the Nazi occupation in that area of the world in March 22nd 1943 so you sing things right on the dates that I'm talking about April 19th March 22nd these are dates that are very important to the dark occultists okay here's another killing of the King ritual okay Martin Luther King jr. assassination in Memphis Tennessee again Memphis was the capital city of Egypt so now you're seeing you know Egyptian symbology mixed in with the killing of the King ritual which is about the murder of sovereignty and of course murder of a very high-level political activist April 4th 1968 during the season of sacrifice at the beginning of the IRA the irish republican army x' car bombing sprees took place in Belfast Ireland on March 19 1972 that was the very first of the IRA car bombings the Waco massacre here in the United States and which federal agents burned an entire church full of people took place in Waco Texas and that was the siege of the Waco Church took place April 19 1993 again April 19th of the anniversary of the Battle of Lexington and Concord battles of Lexington and Concord the opening volumes the opening volleys of the American Revolution the Oklahoma City bombing took place in Oklahoma City Oklahoma April 19th 1995 two years after Waco okay so again anniversary of the battles of Lexington and Concord which began the American Revolution the Heaven's Gate cult suicides in which like 70 some people willfully sacrifice themselves as part of this UFO cult I'm sorry I skipped one let me go back the Port Arthur massacre and here's another killing of the king ritual Arthur okay Camelot you know King Arthur Port Arthur massacre massacre at Port Arthur Tasmania Australia April 28th 1996 this is the ritual killing that led to the taking away of battle rifles from the Australians okay which unfortunately fell for this and gave up their rights to self defensive weapons that are like military weapons these are certainly weapons that should be in the possession of all human beings to be able to defend themselves against the tyranny of government and unfortunately the Australians gave up that right let it be taken from them because of their fear following the Port Arthur massacre which was clearly a false flag event April 28th 1996 the Heaven's Gate cult suicides again a cult in Rancho Santa Fe California that all committed suicide simultaneously at the behest of a couple of cult leaders probably a monarch mind-control ritual event okay this took place March 26 1997 right in the season of sacrifice the Westside middle school massacre in Jonesboro Arkansas took place March 24th 1998 now here we start the school shooting sprees okay we're in the modern age and now they want the guns in America real bad poor Arthur was the aussies gun confiscation event and now they're going to continue to try to do it in the United States and we'll see many of these so moving to the next slide going from the first 14 now we're going to the second 14 events the Columbine school shootings again here we have goddess symbolism Kalume means the Dove and the Dove is always associated symbolically and ritualistically with the goddess or care the holy spirit is depicted as a dove and in many goddess traditions it used dove symbolism the word Kalume in french means dove so Columbine means place of the Dove okay so it's again a goddess ritual a goddess sacrifice ritual okay so this was in Columbine Colorado April 20th 1999 you also see the date April 20th come up in many of these events okay so that is Hitler's birthday okay they love venerating other members of the dark occult while Hitler was not what I would consider a high-level dark occultist he certainly was doing the bidding of dark occultus during the mass Nations that took place during World War two the Iraq shock and all bombings which began the Iraq war took place in Baghdad Iraq March 19 2003 the very beginning of the season of sacrifice the Red Lake senior high school shooting in Red Lake Minnesota March 21st 2005 the Virginia Tech School massacre in Blacksburg Virginia

April 16 2007 the Binghamton immigration Center shootings in Binghamton New York April 3rd 2009 the Moscow Metro bombings in Moscow Russia March 29 2010 one of the biggest goddess / nature killing events killing of aspects of the earth and destruction of the environment Mother Nature okay the BP oil spill which is one of the largest environmental disasters in human history in the Gulf of Mexico April 20th 2010 Hitler's birthday the United States his invasion of Libya March 19 2011 see they love March 19th folks I'm telling you they start wars on march 19th this is the day they start wars ok Iraq shock and all bombings invasion of Libya both on March 19th the unofficial beginning of the season of sacrifice but that's when they like to do dark ceremony magic for sure they like amass human sacrifice rituals on that day the Oikos university shooting in oakland california April 2nd 2012 the Boston Marathon bombing in Boston Massachusetts April 15 2013 I told people that year be vigilant of a season of sacrifice event and there it was Boston Marathon I've pretty much called the the rest of these dive told people since these events here to be able to look out for these events the Fort Hood military base shooting just outside of Fort Hood Texas took place April 2nd 2014 now over these two years in 2016 and 17 you know you had things happen right on March 22nd at the very beginning official beginning of the season of sacrifice the Brussels bombings in Brussels Belgium March 22nd 2016 and the Westminster attacks just outside of Westminster Abbey in London March 22nd 2017 the Stockholm truck attack in Stockholm Sweden April 7th 2017 these are only the ones that I've researched these are only the ones that I think are worth mentioning there's probably countless others during this time period ok you could you know look at look into it for yourself and probably tell me many that I've missed ok but people will say this is confirmation bias you're far trying to find what you want to see no this is how these ritualists in dark occultism operate they like their ritual they like their ceremony they like their repetition they use techniques that work the techniques are not seen by the average individual and therefore they have no reason to modify their techniques this is something we're going to talk about in the divide-and-conquer section when we talk about infighting and division in the freedom movement these social engineers don't have to modify their technique because they continue to work I want to make a couple of honorable mentions that are almost like laughable almost like a joke but the inauguration of Pope Francis took place at the exact day when all of the dark occultists basically in the world initiate their higher level initiative airy date in 1996 that I was initiated as a priest in the Church of Satan now you have one of the high priests of the dark occult the quote Pope who's really doing the bidding of the black Pope and other high-ranking darker cultists this communist scumbag okay Pope Francis you're a communist scumbag Francis okay inaugurated as Pope March 19 2013 again I still have an open-ended challenge to this fucking Punk okay fight me in the Octagon all right I've called you out and you're ducking me okay cuz you know you can't win an intellectual battle with me I'll really mop the floor with you I'm giving you a fighting chance man just get get in the cage with me okay you know now that'll be your best bet against me okay that'll be your best option I'll try to take it easy on ya but again he's ducking my challenge you know I don't know whether he's a little out of shape or what or he's just scared you know but the the challenge is open-ended you know so anytime let me know you know and probably the worst false flag of all time daylight saving time signed into law March 19th 1918 that might be the most serious of all these events all kidding aside folks who really shouldn't be joking like that you know but you know daylight savings time is pretty terroristic but in all seriousness like we have this now this mosque shooting in Christchurch New Zealand which took place a couple of days ago on the Ides of March and I apologize I felt good though you look at the occult sorry folks you look at the occult symbolism that took place here that is in place in this ritual shooting New Zealand and what do we have here on the shooters manifesto and on the shooters body armor we have lo and behold we have the symbolism from the inner sorry from the inner sanctum of the Nazi occult regime known as the Schwartz son the Black Sun the symbol of the solar zodiacal 12 houses of the zodiac represented by 12 inverted Sieg ruins from the Norse runic tradition the tradition of runes okay the ruin of Sieg means victory but moreover in a deeper connotation occult eclis the seed ruin actually means victorious life but it doesn't really just mean winning or conquering yeah that's how people traditionally see this but the deep connotation symbolically of the seed ruin is a victorious harmonious life live when when one aligns our thoughts our emotions and our actions to natural law we are victorious we live a victorious life it's a it was originally a symbol of good fortune and alignment with natural law - which creates a victorious life it's it's the Norse equivalent of the Ark of ancient Egypt or comment' okay from the Commission tradition which was also a symbol of harmonious life lived in harmony fortuitous and harmonious life lived in harmony with natural law did not mean eternal life as many people believe that it does so here we see the Nazis were famous they turned the swastika around the swastika around okay which was originally a symbol from the Indus Valley traditions okay near India which meant again a harmonious and fortuitous life people didn't like oversimplify it as good luck but this was the Indus Valley tradition of a life lived in harmony with natural law what are the Nazis do they inverted it the original looks like two twos okay put together the Nazis turned it around so it looked like two S's turning it backwards okay and the seed growing here is seen in its incorrect configuration it is not set up like a - here it should be set up like an S so they have inverted the seek twelve times to create this symbol representing the black Sun okay knowledge used for manipulation and control okay not used for the proper purpose of the uplift of humanity and higher level consciousness now in this guy's manifesto obviously this guy is a shill a dupe you know he's a mind controlled monarch this is obviously a false flag event to get the guns from the citizens of New Zealand okay in my estimation there are people who will debate that okay this guy did this for stated political purposes saying he wanted to create division in the entire political spectrum and have the left-wing one to confiscate the guns and the right-wing want to you know basically start a civil war over that okay and that will happened because again I talked about it endlessly in Italian dialectic only one side needs to be manipulated once they take the bait its own that's why it's so important to understand the dialectic before you take the bait okay because you can't just say oh they're manipulated let them keep doing what they're doing eventually the other side is gonna have to stop them that's why we can't fall into this polarization and we can't fall for these polarization dialectics okay so he basically openly admits in his manifesto which he called the great replacement toward a new society that he wants to create this political polarization through this act and that's why he chose the semi-automatic battle rifle to do these this mass killing event and again the symbolism he's choosing is directly out of the dark occult okay and there it is it's called the sigil of the Black Sun this was used in the Swart Sun secret society which was actually the center of the Schutzstaffel which was considered another secret society an elite it was called the protection squadron hitler's own secret police which was known as the SS the Schutzstaffel and this is an inner order of the Schutzstaffel set up by a Heinrich Himmler himself who was one of the master cultists of the third rank and this is the symbol that he had put on the floor at vivos burg fievel's burg castle in Bavaria Germany which he was going to set up as the temple to the Nazi New World Order okay and that's the symbolism that is actually put into the floor there at vivos Birk castle and i talked about this in my presentation called demystifying the occult part to Satanism and the dark occult in which I referred to the entirety of dark occultism as the cult of the Black Sun see we have to understand folks they don't have a name you know they don't call themselves the Illuminati you know they don't call themselves the dark occult you know they don't have a name for themselves this is a cult without a name you can look at it as okay and I like the term the Black Sun or the cult of the Black Sun because it very accurately describes what it is it's the knowledge being used for the complete opposite or inversion the inverted purpose of what knowledge should be used for which is to uplift human consciousness and bring people up in awareness of who they are and what's going on within and around them dark occultist want to do the opposite they want to hold knowledge very tightly to themselves so that in other people's ignorance that places them in a position of power over them because they are knowledgeable and the people below them are completely ignorant because they don't have the knowledge that they do and that's why it is the Sun or light or knowledge wield it as a weapon hence the black Sun the dark Sun okay and that is a set the Egyptian goddess I'm sorry the Egyptian god of death and the god of the the dark aspect of the Sun okay it's where we get the word sunset from okay Horus is considered the Rising Sun Amen or raw is considered the Sun at its zenith or apex which was like a Creator God when the Sun is at its highest point of light and then set is the Sun on the western horizon as it is going into its tomb each night as it sets below the horizon line and symbolically in the Egyptian or Commission tradition set and Horus did battle in the underworld after the sunset and Horus would defeat set each night and emerge victorious on the eastern horizon Horace's zone the zone of horus so where we get the word horizon from okay so whatever you want to label the dark occult as the cult of the black sun is just as good as any other name because again we're giving them these names they're not giving themselves these names okay you know the Bilderberg Group is not the name that they refer to themselves as okay they took it kind of stuck with them because they started it at the Bilderberg Hotel but that's not the name that they came together with okay that's just how it started and then the name stuck okay but they don't really have a name okay they are a worldwide network that is connected in their multifaceted ways in their aims and their goals that's what we have to understand you know it's not just one group either he will be like oh it's all the Freemasons all the Jesuits no it's not all one group it's a vast array of interconnected orders and societies you know and that's why people don't get the truth about this it's not simplistic it's actually quite complicated how the dark occult operates you know it cannot be reduced and oversimplified and that's what little children want to do you know they want to look at something to say it's all the Freemasons you know oh it's all Opus Dei it's all the Vatican no it's a lot of dark occult orders working together and their membership working together because they're unified in their goals they're on the same plate page and their ideology and their goals and that's why they're so effective and that's why they're kicking our ass because they're on the same page and we're completely divided which brings us to the main topic okay the infighting and division in the freedom movement again thank you to bread Hatton for making the great podcast art could not have depicted it any better okay this is exactly how I see the freedom movement okay now we are divided on so many different ways it's going to take me a while to get through all the ways that you know we're polarized and divided and these are just given to us they're handed to us to stay here fight over this you know and we'll just kick back and watch you know the old meme you can put a stick on social media and just people fight about it you know because that's how polarized people are in their consciousness because they're so entrenched in ego this is the problem people cannot set their differences aside it is the equivalent of two warriors on the same side of a war in the trenches suddenly turning their weapons on each other and fighting each other I have to make a I really should have put an image I didn't put an image like that but I should have depicted it as that as well it's not just bickering children it's two people on the same side of a war and wet and you know people with weapons are coming at them bombs are raining down in their vicinity and instead of fighting turning their weapons and fighting the enemy there they suddenly turn and they start fighting each other in the war trench I mean that's literally this situation that we're in but this is more what I even see it as it's two children that are completely lacking knowledge that don't know what they're really up against that don't know what's really going on inside them or around them that are completely screaming in each other's faces and it's laughable I mean I'm telling you the social engineer is like the guys over and at Tavistock are just absolutely pissing their pants meet me and my friend Jay Parker we joke around sometimes and say they have diaper parties I swear to god that's that's what they must do they must get together and bring the all the adult depends out like cases of them and just sit around you know drinking cognac smoking cigars and just pissing in their diapers you know because that's how much you know absolute bladder exploding laughter they must be doing at the other division and in fighting in the alleged so-called movement that we have we have no movement whatsoever okay we have a bunch of naive ill-educated ill-informed ill read unread children screaming at each other that's what this movement really is if you ask me and all the people out there listening get as offended as you like okay not interested in your delicate sensibilities when I'm saying this I'm saying the truth which very few people will say very few people do because they risk alienating their listening and viewing audience I don't really care I don't give a shit whether anybody takes offense to that okay I'm not gonna lie to myself and I'm not gonna lie to other people I'm gonna say it exactly as it is okay and this is what our so-called movement is okay now what we're falling for folks is we're following something known as the Hegelian dialectic okay they going and dialectic is a divide-and-conquer strategy to get us to where the social engineers want us to go okay so this is a rework of a slide I did a long time ago about the Hegelian dialectic it's a framework for guiding our our thoughts and actions in to conflicts see I've highlighted in my top bolded and italicized that that term okay I'm being told there's issue again hold on a second you you the folks we seem to have that issue last week I'm working on getting a better mic and it's a possibility that there's an issue with this cable so you know my apologies again but getting back to this slide the Hegelian dialectic is the framework for guiding our thoughts and actions into conflicts that lead to a predetermined solution so there has to be conflict for this to work okay there has to be something at odd sides that are at odds with each other okay and it's an artificial construct that guides us to a predetermined solution that's already in the wait it's already waiting in the wings ready to go we just have to be conditioned to accept it through the conflict that we undergo so this is accomplished by manipulating consciousness into a circular pattern of thought and action which never leads to a true solution it only leads to a synthetic solution it leads to a pre setup false a solution that the social engineers are handing to us that is never really going to provide the true solution that we seek this synthetic solution to these conflicts cannot be introduced unless those who are being manipulated take sides that will advance the predetermined agenda so again there has to be conflict and there has to be people willing to take sides on both sides of the conflict but what I also warn and again this is a this psychological framework was described by the philosopher Georg Hegel it isn't to say that this particular individual was evil but the way that people have applied this psychological framework called Hegelian dialectic certainly can be used for evil intent okay an evil outcome so we have to understand that there always has to be a conflict there always has to be a false choice given in which you're not going to get to the true solution by taking either choice and they need people to take sides and fight and argue and divide and conquer be divided so that they can be conquered so that the pre-determined agenda can be ushered in that's the Hegelian dialectic so we're going to look at all different examples of how these dialectics are at work in the so called freedom movement and throughout society but particularly even in the freedom community freedom movement whatever you want to call it this these polarization dialectics as i like to call them remind controlled dialectics are very much at work so of course you have the political divide you know and you have people who say that they want freedom still believing in politics you know we're not just talking about the Anarchy community a lot of this applies to the Anarchy community but you have anarchists that say that they like Trump you know you have anarchist to say that they like Bernie Sanders you know I've heard them myself okay it doesn't matter what you want to call this ok political polarization political dialectics I call it the elephant call versus the donkey call ok it's just people who want to join a cult and get behind a false left-right paradigm the left-right paradigm you know has been going on forever it'll continue to go on there's no reason for them to change it because people still haven't seen through the dialectical mind control you know and these have cultists they're not going to change their approach ok I'll go over this again and again they don't need to change their approach their techniques are working the people's minds have not identified the technique they have not come to a mental understanding of it and then change their behavior so that they are impervious to the polarization technique at work that hasn't happened societally it hasn't even happen in small amounts you know very very very tiny minuscule amounts of people can see through this even in the Anarchy community you still have political polarization because you still have people who believe that it is a matter of you know changing the three be political and financial mash nations of the world you know we're going to just address those but we're not going to actually look at the spiritual problems we're not going to look at the the psycho spiritual problems in the individual you know which takes incredible time effort self respect shadow work etc that most people don't want to do they just want to point fingers and other people and say oh this has to change that as the change he has to change he has to change they don't want to do this they're real quick to do this but they the last thing they want to do is this okay they don't want to point the finger at themselves and do the really hard internal work because the problems aren't political or financial they're spiritual and this brings us to the divine and religion do you even see this in the anarchist and Freedom community okay you have people that want freedom and yet they're tied to all sorts of religions okay I see it every day I see people who could have been great activists within the freedom community turning their lives over to religious pursuits and thinking that that's going to be the answer then you know we just have to you know accept the law of the Torah or we just have to accept Jesus as our personal Savior you know and many other things we have to just become light workers in the whole New Age concept of religion you know love and light everywhere and you know never talking about the darkness of our world okay so the religious divide is very strong it's an insidious polarization technique and they have people divided and conquered over this you know the Christian world at odds with them you know Islamic world etc again this whole mosque shooting you know the religious Divisional undertones so strong in that event okay and people are falling for it so I say religion is the one and only problem with the world you know because it all comes down to false belief systems which all religion is okay it doesn't matter whether you fall for scientism versus atheism these are all religions okay these are just what I have on this slide are just the cultural religions you know but it's always that false dialectical choice so then people say okay I'm not religious I'm gonna become atheist well you're just buying into another religion there okay but it's never true spirituality that they want you to look at ever okay because if you're not a total religious nut case then oh you have to go to the opposite extreme of being a Newtonian materialist okay and you know this is what people have to understand both of those traps are set there for people to flow into one hand one polarization divide or the other okay and that's how the social engineers have the entire framework of the world set up most people can't see it so this is another way that people are divided and conquered one of the biggest that I talked about back in for your mind for when I did the presentation called the unholy feminine the satanic EPI eugenics agenda neo feminism and the Satanic epi eugenics agenda is the gender divide or what I would simply call the gender war between men and women these social bond and the the psycho-spiritual slash sexual bond between man and woman is really the cohesive glue that holds a society together and gives it gives it's bonding strength okay and if that is weakened it is always we can at to the detriment of society and to the success and strength of the state and that's why they want this gender war in place the more men and women are each are at each other's throats the stronger the state actually becomes and let me tell you something folks I see this even in the Anarchy community I see so much misandry and misogyny even in the anarchist community it's horrifying horrifying and you would think these people would know veteran of what that they would have looked into this polarization dialectic these have Galyen dialectics at work you would think that they would have and they apparently are you know not knowledge of what all in that regard and then they haven't made themselves impervious to this technique of manipulation this technique of divide and conquer at all you know this is one of the biggest sources of division and infighting is man versus woman and you see the passive aggressiveness so much okay and then you see outright aggressiveness in the form of again misandry utter man hating when the even the individual who is male has done nothing wrong to the other individual who happens to be female and then you seem outright misogyny on the part of men you know showing blatant disrespect them or disregard to women in the movement and I think it's just deplorable all of it is deplorable the infighting between men and women especially in the so-called truth and freedom movements you know we don't need this kind of infighting we don't need this kind of being at each other's throats over gender it's ridiculous okay and many people can't see through it because they're see they're stuck in the human nature polarization dialectic okay is is the nature of a man or is the nature of a woman good or bad you know they don't understand that it's all conditioning you know I talked about in this presentation of the unholy feminine how anybody who even considers the concept of human nature as we have traditionally looked at it as is an idiot that now they know absolutely nothing about what's going on and that got a lot of I took a lot of blowback from that statement when I originally made it I think more people understand what I mean now that there is no human condition in the form of in the sense of human beings are either good just by nature or bad by nature the nature of human beings that we are a programmable species in the mind and as our minds can be programmed our behaviors can be programmed and therefore the results that we get as a result of our behavior our freewill decisions in conjunction with natural law consequence will then change okay and people don't see this dynamic in many cases they want to look at human beings as either good or evil inherently and we're neither we are existing in a conditioned state because we are programmable so you change the programming okay it's a garbage in garbage out scenario you change the programming the outcome will change the output will change and will change the manifested condition do the change of our output behavior okay so this is what we have to understand that when when men look at women and say oh their nature is just bad and women look at madness isn't all men are just bad it's their nature this is a total false choice false dichotomy false dialectic that we are given to believe in and then act upon and fight over we have to reject that we have to understand that we are programmable beings okay so part of the gender divide is the whole you know other gender identities that are now being given to us to confuse people and to get create further in fighting over gender okay so you know you could look at male versus female men the whole non-binary gender aspect which is coming into our society as a discussion and again I've always said I treat people based on their actions I don't care what they want to identify as okay I have transgendered friends I have homosexual friends etc people's sexual orientation and identification is what they wanted to be and it's not in my business and they can live their lives and identify as what they want and be free and exercise their rights as long as they're not harming anybody and as long as their behaviors are consensual okay so I treat people according to their character not by what they want to identify as you know or what they're considered by society okay I do think there is an agenda behind the whole gender confusion issue that is going on in society to further weaken ultimately the bond between people in our society and not talk about their behavior okay and just attack people over whatever they want to identify as instead of actually looking at how that person behaves you know what should be the only factor for consideration that we gauge anybody as an individual on okay so moving to the next slide another division that we that I see all the time is the whole wealth divide and you have people constantly you know bickering over people having more or less resources than than others you know and as if this makes you a good or a bad person look I know people who have a lot of money and are very good people and want to contribute and help fight this battle if you know and people who have resources at their disposal like that they shouldn't have to have it redistributed by physical force by violence not force behind violence okay this is the whole you know capitalism versus socialism debate which I'm going to look at in the next line but you know you have a lot of hatred just over you know how much resources people have at their disposal look I agree we want a war world where everybody has their basic needs met in life okay that is the goal here okay because we have the abundance to do that and we should have an energy paradigm that makes that feasible and is conducive to that which we don't because of the ultra high-level dark occultus and techno sorcerers and really people at the very highest end of the whole banking system who were suppressing known free energy technologies that can liberate humankind from energy dependence that's a whole nother presentation by the way which I already have actually done maybe I could give that on the air in the future I'm gonna release my Tesla presentation that I just gave in New York City a couple months ago it's called Tesla and humanity's missing paradigm shift it was just finished edited being edited I want to thank Jeff for doing that work and I'm gonna be putting that out on DVD and flash drive and then it'll go out to the public for free soon after that but that'll be hitting the the water earth is happening donation gifts area probably uh within a week or so hopefully if everything goes to plan so but this wealth divide you know people have to come off of it and understand that you know we all have to help each other out we can't be hating on people just because they're in a better financial situation than us or in a worse one okay we all have the same rights that's what's important it's important to focus on morality equality when it comes just to income isn't does not necessarily have to be everybody it always has the same okay now that being said I think money is a religion entirely okay so people don't quite understand my approach to this okay it's of course a constructional idea that doesn't exist in nature and it leads to all this inequality and you know a lot of people having a whole lot and other people having nothing you know that's why I think we need to simply work on consciousness and not worry so much about the monetary system in general okay when we get to a level of consciousness that is high enough we'll realize we are one human family and as one suffers all suffer all suffer that's the goal in consciousness that we need to get to if we get to that we won't be worried about a monetary system because we won't let people go poor or hungry or Horace as a society you know as individuals within our society we wouldn't allow it okay and we would have the abundance through the new energy and the free energy paradigm to be able to practically do something about those conditions the economic divide over capitalism versus socialism okay which I think are both you know control plans now crony capitalism I should say is really a control plan legitimate capitalism could be a merit-based system if it is done correctly I still think we have to evolve past that okay but this shows how capitalism is described by capitalists and socialists one of things is the greatest thing in the world one thinks it's violence socialism described by socialists versus capitalist one thinks it's total equality and the other things it's violence okay so I don't think either of these systems are where we say we want to go okay I think they you know are things that can certainly both lead control systems and totalitarian systems when left unchecked okay and they're dialectics because people think Oh capitalism isn't working because it's degraded into crony capitalism so we need socialism which Walt hoping to grate into communism that's how it always has worked and always will work that's why the answer is not economic it's not financial it's not political it's spiritual and people are still resistant to this see this is why they have not gone into a unity consciousness frame of mind they have not actually worked through the ego enough to see the real solution on the other side okay that it is neither one of these systems is going to get us out of any mess that we are in it is working on our own consciousness and spirituality that will get us out of any mess that we work ourselves into we won't work ourselves into these messes if we elevate our consciousness to a high enough love and this is what people in the so called truth and freedom movement are loath to do many of them don't even want to consider the term consciousness or spirituality they don't even want to look at those as legitimate terms for discussion because they're stuck in this Newtonian materialist paradigm this materialist worldview so moving on to the next line different forms of hyphenated anarchy oh boy I love these don't you love these aren't they great you know the the anarcho-capitalist versus the an Ergo communist you know versus the anarcho-syndicalist s-- versus the you know green anarchists or whatever they're calling them the an agro primitive Asst you know verse of the an agro feminist verse of the anarcho a theist versus versus versus versus that's all you need to know about that you know again conflict being pitted against one another you know hyphenating a term that needs no prefix or suffix anarchy just means no rulers okay and you can only get to that level of consciousness when you understand rights and their objective aspect that they exist in nature that we cannot change right and wrong that we have to learn what right and wrong are and then align our behavior to those dynamics which exist in nature in the natural world and we have to understand natural law principles and we have to understand natural law expressions and we have to understand natural law consequences we have to understand the law of freedom as aggregate morality increases aggregate freedom increases as aggregate morality declines aggregate freedom declines okay so freedom and morality are directly proportional to each other and most people in the Anarchy community don't understand that and they want to fight about that they want to say no that's not legitimate there is no such thing as natural law because they're stuck in an atheist paradigm which is another political it's another Galion polarization dialectic between scientism and atheism there's no such thing as different variants or flavors of anarchy there's only one enter key and that's spiritual anarchy under natural law it's the only thoughts that's all real anarchy ever has been and ever will be there is no other form of anarchy that's the only way you get to anarchy that's the only way anarchy has ever maintained to have the whole cosmos anywhere ok you will never get to that state and or maintain that state anywhere in the cosmos without a spiritual understanding of true spirituality and natural law forget it anarchy is about high-level consciousness awareness of self ok and it's about a high level understanding of natural law and how it functions in our lives and how we can align our behavior to objective morality so that we can align it to natural law that's it there is no other form of Anarchy never has existed and never will all the hyphenated forms of nrq can throw them in the garbage bin so bickering over them and fighting over them is all pure nonsense and as a waste of time and all it's serving to do is make your your occult Overlord masters who look at you as their fucking property pissing their pants while they're having a party dancing on Your Grave and putting you in shackles and chains ok that's that's all it's happening as a result of this infighting it's laughable if it weren't so sad I'd be laughing at it too if it weren't affecting me I would laugh at these people ok well unfortunately it affects my freedom see that's why it's a very serious issue if you can put all these bickering children on another fucking planet and leave the people who really do understand real freedom to their own devices and let them go and bicker with with the status who are fighting over who to vote for no problem there would be no problem here but unfortunately that's not how freedom works we are unfortunately all bound together as one on this prison planet and unfortunately consciousness has to change on a universal scale okay on a global scale at least otherwise there will be no change in the manifested condition that we receive as a consequential result okay so unfortunately our freedom is tied to other people's mentality you know and that's why education a true education is really the only solution see stance on borders this is another thing that totally polarizes people and is on getting them at each other's throats all right you know you have people coming down on both sides of this issue okay saying we need to build the wall or we or you know erase all borders okay I mean I personally don't support government so I'm not for national boundaries because only governments would really you know institute something like that I also recognize that there is such a thing as invasion of territory by people who don't share values related to freedom so it's a very complicated issue there but they want us fighting over it they want us fighting over it because they know or polarize people okay I think we need to take a mature approach and look at all aspects of something I went off on the Border Patrol because they are reprehensible garbage I mean I don't want to get into that again because these are people who if you think that these are somehow good decent human beings you are a total fucking dupe you have to see what some of these people are like I'm telling you it's it's it's police they're they're racist trash they're racist trash amoral trash order following trash that will just follow any order oh it's it's my doing my job following orders they're dirty fucking Nazis okay and they're dirty fucking communists okay they don't even understand that they're socialists and communists and totalitarians that's how brainwashed they are that's how dumb little boys all these people are all right and the people who support these authoritarian trash are arguably the worst trash okay because they just they don't have anymore Alchemist they don't have anymore upbringing they don't understand that they're violating other people's rights by doing what they're doing and they don't have any right to do it any more than anybody else does because so watch some magical script will happen on some fucking piece of paper somewhere you know that gives you a right that someone else doesn't have yeah again shit-for-brains that's what they have and that's what the people who believe that they have legitimate right to do what they're doing have a big bag of shit for a brain okay and again it's this it's the same thing with people who come down on pretty much both sides of this issue okay I don't want to get involved in the polarization that it brings I don't want the drama that it's going to bring the yipping and yapping back and forth nobody's convincing anybody and as a matter of fact it doesn't make a difference because unless you're talking about consciousness and true freedom borders are meaningless okay it's just something for people to squabble over and for people to violate people's rights over that's all it is alright so again it's a constructional dialectic thrown at us by social engineers to get us to fight amongst each other and we're all too happy and take the bait and just go at each other's throats like rabid dogs you know and people are mature enough to see how this dialectic and polarization work because they're naive little children screaming at each other's fucking faces moving on to the next line vaccine supporters versus anti-vaxxers okay keep people who you know both consider that they understand the science to all of this okay you know and again nobody's going to be convincing each other you know you know when people will be convinced when they're harmed by the vaccines that's when they'll understand it I tend to basically look I know people personally who have given their children these vaccines and at the same time their children have become autistic after giving them rounds of these vaccines with the adjunct and additives the Vince and additives that are added into these things whether you want to talk about vaccine science without with versus without the additives and adjuvant okay you can get into all of that all of those aspects but I'm telling you most people are never going to change their approach to this issue until it personally affects them in their life and I know people who they've seen it happen to their own children and then they have to wrestle with their conscience and say am I going to really look at this and change my mind about it and then other people they won't do it even then when that happens okay they're there kids can they could have three kids that all got the vaccine at the exact same time after the exact same shot and they still won't say this is my personal responsibility that I allowed this to happen to my children by taking them these people who shot them with this stuff that I don't even know what's in it because they don't want the responsibility they want to say oh it's just some random accident or oh the doctors know more about it than I do they want and hit my children with something that's unsafe you know so again part of this is they just want people fighting with each other who really don't know anything about the science to begin with sorry again folks you know it'll clear up in a couple days anyway it's a hot button push button issue just like abortion is which I'm going to talk about okay and that's why they want it before people that is why they want people fighting over it they want the maximum in fighting value okay that they can get out of putting an issue before people and watching them squabble over it that's what they want okay and they're getting it people are all too happy to fight to the death over this abortion versus pro-lifers abortionist versus pro lifers you've seen this battle raging practically forever in the political circles okay and again most people are not going to be convinced until some event happens in their life see this is why almost it's like fighting over hot-button issues like that you're never going to solve it you're never going to convince anybody you know what you really have to do you have to understand objective morality first that all of these issues folks all of these issues are designed so that people never discover and look deeply into natural law it's to get you looking somewhere else versus where the actual spiritual gold is hidden that's all it is these are forms of obfuscation and occulting the truth when you when you discover the truth things become clear regarding behaviors and you understand whether you're doing that when you're performing an action it's either a right or wrong it's not gray areas like people say that it is in quote situational ethics or moral relativism it isn't gray areas morality is in fact very black-and-white and we can understand objectively by looking at the behavior itself whether it is a right or wrong whether it is initiating harm to other sentient things are not initiating harm to other sentient things and we could look at behaviors which absolutely minimize the initiation or resulting in harm to sentient beings we have to endeavor to do the least amount of harm to life and live that way see if that's the common-sense middle-ground that people can't seem to come to an agreement that's the moral middle ground do is least harm as you possibly can in living your entire life choose the right behavior over the wrong behavior willfully every time you know and people just can't get on that page they can they would they rather fight each other then actually invest the time in their looking into the truth and that's what's happening in the whole freedom movement especially with this issue you know here's the one I see in the anarchist that's doing the most damage I'm gonna do a whole nother show on veganism slash vegetarianism versus carnism okay because people didn't really hear what I said they didn't really hear what I said during the shows that I did okay that this is a moral issue not a dietary one okay it is also a dietary one but it's a moral one first and foremost okay and this is the one that's creating some of the biggest division in the whole truth and freedom movement and instead of people just doing the great work of talking about the legitimacy of authority and looking at true objective morality and what real freedom is and putting that work out there to the world so that we can work on human freedom okay which I'm telling you everything will flow from human freedom you want to see a let less harm to the animal kingdom free human beings less harm will reserve a result to the animal kingdom's when human beings understand real freedom and understand we should be extending that to all life and to the extent that we are able to okay you know you want free energy work on the free part regarding human beings first everybody tries to put the cart before the horse we're gonna have total Animal Liberation tomorrow but human things are still gonna be fucking enslaved yeah so real real fucking smart you know we're gonna have free energy and I have all these free energy devices everywhere so so you know we won't have to pay for electricity ever again but human beings are still gonna be fucking enslaved yeah that's real fucking smart yeah it makes a lot of sense to me you know and this is what how people think it's gonna work it's the cart before the horse syndrome okay people don't want to listen to balanced reason and common sense which is all I ever tried to talk about regarding human diet I never talked about any extremism I never talked about doing things immediately I talked about making him be a proud a process that you're a little bit better tomorrow than you are today you know I don't understand why people can't just hear the simplicity and common sense in the arguments I've made like that time and again but they want to hear their own extremism because they just want to hear their own nonsense flowing out of their mouth like liquid diarrhea that's what they want to hear they like to hear themselves talk and they love the opportunity to bicker with somebody else who also likes to hear their fucking mouth Yap okay it's a bunch of little fucking babies okay coming down on either side of the issue alright stop arguing with each other put some work out you know put some work out that doesn't involve people screaming at each other's faces you know make a presentation that is formally presented make your argument and let people consider it you know I don't understand what's so difficult about that for people that's the way that ideas get spread the best to be honest not having two people go at each other back and forth never really saying anything of any true importance and only trying to win an argument I'm not really trying to teach anybody anything we're not trying to fucking learn either all they're trying to do is win that's what he go is you know I'm just tired of it I'm tired of it it's why I said my piece on it and said I'm not gonna really revisit this because I know how polarizing it is but I'm gonna revisit it and try to bring a balanced common-sense approach to a plant-based diet when I talk about it okay and help people to understand this is something that can be done correctly and here is probably the biggest one now do we have an issue going on in because I've moved forward it looks like we might have an issue in the slides moving forward there we go okay thank you to my producer so the globe versus Flat Earth debate you know this one's still raging and I'm telling you here look folks I'm gonna say it again I come down on a provable aspect of this dialectic but it's a dialectic nonetheless okay and I've told flat-earthers I don't want to be associated with their paradigm you're not going to dissing from me by associating me with the whole Flat Earth religion okay I look here's what happened folks let me just tell you okay I have been digitally stalked and harassed endlessly for about five years now regarding this bullshit okay I'll just tell my listening audience that this is what's been going on with me in the digital domain for about the last five fucking years and then you know it didn't really stop until I blew up see because what they're doing with researchers is they're trying to break down break them down break him down break him down by stalking and harassment this is a very very specific plan going on in the Flat Earth community by shells and dupes who had bought into this CIA invented religion and really it's Tavistock invented religion Tavistock gave them their marching orders to the CIA and said you're going to put this out there into the mainstream media and into the I'm sorry into the alternative media and into the Facebook Twitter etc the social media platforms okay and on YouTube of course and what they did is they began a religion and they got people to graft onto it who don't have a lot of scientific understanding and and be able to really do real math and geometry okay and then they got those people in there wild-eyed religious belief to digitally stalk and harass popular researchers and they did this with me concentratedly over for the four-year period let's say it stopped around this time last year when I really blew up on them and see when I blow up on them publicly then they knew we're not going to convert this guy over to the religion and disinfo his work and make them look like an ass through getting them to put out Flat Earth nonsense material okay the psyops not going to work on him okay and look I don't really care look first of all you email me stuff about this I've already looked into it okay endlessly you don't know I know more than you about the Flat Earth model trust me I've looked at every video ok yeah endless hours I've spent on it to a generally an utter waste of my fucking time ok but that's how I do things I don't say I don't come to a conclusion until I've looked at all the data related to it you just so don't give me the shit that I don't know what I'm talking about about all the research that's been done regarding Flat Earth trust me I've looked into it more than you have trust me you don't need to trust me I'm telling you I fucking have ok cause I don't want to hear I haven't looked into the data no I've come to a different conclusion about this model that is inaccurate and provably so which I will probably get into on a future show or in a full-on presentation that I'm gonna call psyops ok but anyway going back to this they have put people on a harassment plan to try to get them to dissin for their work so that they will eventually cover the flat earth now they did this with me well I'd say from 2014 to 2018 and when I spazzed out on social media about this the harassment generally stopped because they knew I'm not coming over to that side and going and dissing for myself by association with this religion because that's what it is ok the CIA mind control sorcerers in conjunction with Tavistock created a new religion in the space of a year that's not powerful these social engineers are they can come up with endless amounts of religion it's always worked before they're sent over a Tavistock and they're laughing at each other they're laughing with each other and go shall we invent new religion today oh let's do let's yes oh it's always worked before with these monkeys why would it work now you know that's the conversations that go on you know between people Tavistock Institute of human really you know and they're working with all the alphabet soup intelligence agencies to put this out into this social consciousness and it works like a charm they don't have to modify their Hegelian dialectic approaches of a polarization they don't need to why would they need to modify their approach it works you know that keeps work if it keeps working continue to do it you know why would you change your methodology if what you've always done has worked you know these people know what they're doing they know what they're doing that's the problem with people this is why I say if people really knew who we were up against they wouldn't fall for this divide and conquer it can only mean one thing it can only mean we don't know who we're really up against and that means we don't really know who we are but anyway we're fighting over the shape of our prison ok fighting over the shape of the prison is what this all ultimately amounts to ok so they are now doing this folks with my friend max Egan my friend and fellow researcher in the truth community max Egan is being harassed by flat-earthers endlessly you know when max doesn't need this shit he doesn't need this shit any more than I do or anybody else does he's come to his conclusion through his research and people should respect it ok you want to have a different outlook then put your information out you know once I've told you I've looked at it and I don't concur you know I don't want to be bothered with it anymore you know and because ultimately it doesn't really matter when it comes to human slavery whether it's slavery on a ball or slavery on a disc it's still fucking slavery you know that's what needs to be understood here you know these people don't want to see it that way then because I've already put out my take on flat earth it comes down to two words because god that's it they think this is going to be proof of God that's why these religionists count this nonsense so much because they're religionists you know and they have a religious mindset they're not actual skeptics you know they actually just believe they've latched on to something that they think is going to be proof of God and they believe in with religious fervor no matter what evidence is brought to the contrary that you could look at through geodetic surveying you know that you could look at through simple visual observation and many other techniques by thrown as thick in the goddamn ground for God's sake okay so we need to stop polarizing on this regard you know the shape of the prison doesn't matter the fact that we're in a prison matters quite a lot stop being little children and falling for psyops okay see instead of falling for these psyops and fighting over all the shape of the earth that the founding fathers are the bad guy and Hitler is the good guy now Q is gonna drop another you know info bomb tomorrow at noon you know yeah yeah they're all the white hats are fighting for us you know how about the blue avians how are they doing still the warp drive stuffs still damaged we're waiting on that to get fixed so they could arrive and save us all yeah that's what's going on this week in that community you know people fall for what they want to hear you know and because they still haven't I even unscientifically developed mind they don't understand the methodology for truth discovery okay they don't get it you know that's why they can be easily led they're not really thinking for themselves they're just believing and grafting onto something that somebody else told them they don't understand the methodology for actual truth discovery on one's own through scientific methodology through the Trivium and quadrivium processes they don't understand how to apply that it's because a lot of people just don't understand basic basic math really is what it all comes down to they can't plug in numbers into an equation yeah so we have to be much more mature about this dynamic okay we have to be much more mature about the dynamic that is going on regarding social engineers and mind manipulators giving us psyops to believe in and accept with religious fervor then we go out and we were eat them and then we look like idiots by association you know on forums all over the internet people who are questioning what is in vaccines some of the dangerous compounds that are in vaccines being injected into small children are now being called flat-earthers just because they're questioning things oh you don't want this injected into your child oh you don't want aluminum derivatives and mercury derivatives inject it into your child putting a flat earther - you know I actually see this an earring I mean that this is where we're at as a society this is how easily lead people are on both sides of the equation just imagine what inroads we could really make toward true freedom if people stop bickering over nonsense provably false stuff or just be at each other's throats over whatever issue they think is the most power of paramount okay if they actually did work about objective morality and natural law and real Anarchy and put that out there did the real great work and put that out there you know and really were arduous about it really did the hard work about it talked about real boots on the ground spirituality and really put those issues before people to consider how much the world would change for the better if we had more teachers doing this instead we have people squabbling on Facebook you know as if anything is gonna be changed and on Facebook or Twitter you know it's the modern-day equivalent of a newspaper mine and a fucking birdcage is what it is you know that's why I get very few interpersonal conversations on these platforms one I don't have the fucking time too busy doing real work too busy doing real work okay building presentations researching trying to enhance the quality of the output of what I put there into the world you know instead of slapping on the the webcam and bickering with somebody on whatever social media platform is the order of the day okay it's not accomplishing anything except to turn people against each other and further fracture fracture and atomize the so-called truth and freedom community that's all it's accomplishing so ladies and gentlemen that's going to conclude the presentation portion for this episode of what on earth is happening you know you've heard my Appeals you've heard my takes personally get his offend that as you like and personally I really don't care what you think about what I've just said okay you know I'm not here to get everybody and their grandmothers feedback about everything sometimes I'm just here to put out the way that I see it okay and then hopefully people will benefit from that and learn a thing or two from my years of experience involved in this movement and involved in direct association with the social engineers and mind controllers of our society because I know a thing or two about their tactics and how they work okay so take that for what it's worth and do with it what you will but all I know is that the continued fracturing of this community through these divide and conquer techniques is only going to weaken it further and never push us closer toward a state of true anarchy cannot be done that way so if you do find value in what you hear on what on earth is happening please consider going to the donation gifts area on the website by clicking gifts okay that will take you to gifts stock what on earth is happening calm I've a fully implemented secure socket layer SSL for encryption on the site which a lot of people requested that is has been done for a few weeks now it's working very well so it's a totally secure site all your information will be that you put into this will be taken secured okay and you can find hard copies of all of my material there you can find t-shirts flash drives DVDs coasters keychains button stickers and other items and the Tesla and humanity's missing paradigm shift presentation that I gave in New York City earlier this year will be released hopefully within a week's time on gifts not what on earth is happening calm also if you want to take me up on the offer for the arc which is a huge one terabyte collection on a one terabyte hard drive of the data that I gathered and studied to understand the things that I understand about our world in addition to my personal experience that I make available for free for people simply for a personal donation for my time and effort you can go to what on earth is happening dot-com slash Ark to read about the Ark drive the amazing repository of knowledge hard drive on which you can get the whole picture this is where you will learn the whole picture folks so take me up on the Ark offer you can fill out the form and get shipping instructions there and you can watch a video that we did in a former podcast on how to pack the Ark pack and ship it and finally if you've found value in any of the work that I've done here on what on earth is happening to support my work well into the future please consider making a donation at what on earth is happening calm slash donate there are nine ways to donate on the site you can also look at the wish list the Amazon wish list we're always trying to improve the quality of what we do here through technological devices these are our helpers technology is the helper for the medium of spreading truth okay so we we could always use some better equipment so if you see something that you'd like to contribute in the form of technology on the needs list please feel free to do so at water earth is happening calm / donate by clicking the Amazon wish list button that having been said that concludes our presentation for for today and we're going to go to your calls on discord ladies and gentlemen you can always get to the discord calling room by going to what on earth is happening comm slash show okay so go to the show page sorry about that go to the mute this go to the show page okay and if you switch back to the slides I'll just show them where that calling link is this is the the live show page quickly there we go so on the live show page I'll make this full screen real quick you can yeah the the the show plays in here okay and yep so here's the show page you can click this button right here where you can click this tab and right here underneath the white text this first blue link click here to calling live is the link to join the calling room you'll need the app discord you can get that at discord app calm and please when you are calling in do have yourself unmuted so you have to actually do a push-to-talk okay and I'm not push-to-talk but underneath your audio I should say and I'm going to go into the room and put my headphones on and we're gonna get ready to take your calls for the duration of the show okay so I'm being told my audio may not be coming through let me readjust that momentarily is it coming through now looks like it's coming through okay okay alright so let's see who is in the call room alright we left off last show with Bob from Cincinnati I told you if you call back in that I was going to take your call first Bob from Cincinnati my friend welcome to what on earth is happening episode number 202 Bob you want to go ahead and unmute yourself in the discord interface and please everybody listen in the room don't listen in the browser so listen to me in the room Bob from Cincinnati are you there I'll jump and come back to you like I had to do last week if you're having audio difficulty alright I'm going to mute you back up Bob I'll try you again let's go to Nathan 7 7 7 Nathan you are live on what on earth is happening welcome Nathan can you hear me I'm being told I am being heard in the discord room it would appear I am unmuted you have to unmute your microphone from your end all right let's go to Ivan from Phoenix Ivan you're live on what on earth is happening welcome looks like we may be having a issue with audio coming in from discord there we go I think ok let me let me go back and try this again looks like we're having some server audio problems let's go back to Bob from Cincinnati Bob you're live on water Arthur's happening can you hear me now folks I apologize my producers trying to work this out hello mark Bob welcome to the show I just heard him is my mic hello mark there he goes yes Bob I can hear you now am I on yes you are Bob I can hear you it appears that he can't hear me it gets delayed mark okay is it you have to be listening in through discord not through your web browser okay if you listen in through the web browser it's going to be delayed you have to actually have your audio directly through discord this is why I always recommend using in the disc I'm I'm only listening in through discord and you are still in a delay I don't hear you through the headset okay so it looks like we're experienced some experiencing some kind of a delay issue in discord this could potentially be problematic let's try to get it worked out I'm going to quit discord and relaunch it and let's see if that helps give me a moment folks you okay I'm relaunching discord folks and hopefully this will clear up the issue all right let me jump back in the collar room and let's go back to Bob Bob you're live on what on earth is happening can you hear me in real time now it looks like there's still a delay unfortunately this could be a problem with the I know listening to you on the show but nothing in the headset okay so not sure if we're going to be able to take calls my producer says he's trying something alright I'm doing I'm following a suggestion from my producer chef or he's telling me that I'm being heard I hear you in a headset there you go can you hear me now alright let's go to let's go back to Nathan Nathan Riddick can you hear me yes look it looks like Bob may be having an audio problem so I can hear you Nathan it looks like we have this rule finally okay good stuff great great show mark as usual thank you thanks for taking the call so you're asking people to call in to mention the benefits of going through your work yes so I just wanted to just want to thank you from the bottom of my heart mark thank you you know seriously and those should really extend to all Earthlings on this planet trying to thank you for the work that you're putting out there to to salvage this situation well this is so you know you've helped me go through a complete transformation i hammered through all of your work in in maybe a year and I actually started with your cosmic abandonment presentation the one you recommend not just like we started yeah so I first heard you on mark Devlin before that I actually I came across your website early on in my awakening and I was quite daunted by the amount of information on there you know at such an early stage and sure did I listen to you again when you're on mark Devin's podcast series and I thought yes I'll go back to Mark's work right and so I did and it's you know I mean what what really is worth knowing mark if you don't even know the difference between Ryan Rock that's right you know so just to start me off on I could have been wandering and darkness forever so no thank you ever so much and the information you brought about the Trivium and the quadrivium to help me think things straight and get my grandma write the books that you've helped you led me to so no big big big thank you me oh you're very welcome and I thank you for that wonderful commentary it means a lot personally to me people respond to me all the time and write to me to tell me the personal impact that the work that I've put out has had on their life and it's a very humbling thing to hear from people because it shows the power that an individual can have for the positive over many individuals lives if we only put our life dedicate our life to that type of an effort we can all make an impact like that we're all we all have that power within us over all capable of it so thank you very much and Nathan for a commentary yes and you know I really took it on board very readily as well as I was working through your podcasts you know helping me to change my diet yeah it's just for this fantastic so thank you very much I also you know I've gone on a made my own presentations as well I've been handing out cards to the police and military with links to your Colver ultimate evil you know so it's a religionists and to carnist self natural door flowers have been handing out so I've been doing my bit and it does I've seen occasion on natural law and it's absolutely great you want to give out your YouTube channel or any other link that people can check you out or find your work because I know that you do some really good work well thank you very much but wait under my name much like yourself Nathan radec I double D in TT so the next ask mo did you watch the condensed version or did you watch the i watch the extended version okay okay yeah just try to condense you know a lot of the information I found it very hard to and why is it where you've done such a good job condensing information yourself and you know bring it so concisely but elaborate on a few little bit bits and pieces hemp that's very very passionate I'm very passionate about hemp because it can save the world but we need to be free first like again been known to cart before the horse that's right so yeah now that's that's the main reason the corn again Marc yeah there are many individual solutions that we can work toward you know approaches that we can take to make the world a better place but without the underlying philosophical and moral principles no matter what we do in the 3d world it would just be like rearranging the furniture or sinking shed we have to have that as our firm foundation that we build everything else upon then we're going to see tremendous positive changes happen once we get that foundation right so ladies and gentlemen Nathan R identities check out his work it's very good and he has a very firm understanding and he's out there doing the great work this is what I'm talking about okay get out there and actually put that work out there get it in front of people do it in a presentation put it out in writing poetry music you know just squabbling amongst ourselves we're not going to really make any headway you know we have to try to raise ourselves to a higher standard and in doing that will hopefully raise other people to a higher standard as well so great call Nathan I really appreciate your kind words thank you so let's move to Anarchy real Anarchy real you're live on what on earth is happening welcome hello mark can you hear me okay yes fantastic my name is John I've been listening from Taiwan oh is this want to thank you so much for your presentations really changed my life and it was a start a small Instagram page just wanted to put my grammars together and just love to have any feedback from you at any time possible my question today is about paying taxes their outline in Matthew 22 because he mentioned this on the freemen show and you said that what he's trying to prove a convey was that trying to say that's this crap let them have their crap right how do I go about cross-reference see this like using lexicons concordances you know different things that got to really solidify or what you saw at that particular point well I don't know if it's necessarily anything that you do is going to convince people who are determined to believe that it means what they wanted to believe but I think you can really hear it in the spirit of what was being said in so many words and trying to phrase it as nicely as possible to people who are listening the parable is saying that Jesus is saying give to Caesar what is his or what he what belongs with him what he deserves to have okay it's it's like you know oh well he's fighting over this nonsense these two people are fighting over this nonsense oh let them have their nonsense it's not important to us this is not what is the real spiritual gold that we are seeking this is not the real money it's not the real one I you know you can hear in the connotation in the spirit of the words that the teacher in this parable does not consider this an important thing he's basically just saying let him have his coin of the realm you know it's not necessarily saying bow to their commands you know by complying in every way it's saying if you value this as what you are really seeking and what you are really turning the attention and energy of your life over to then you are giving that energy and attention and vital energy over to what this Emperor King values not what is valuable in the real spiritual world okay that's the spiritual connotation what is being said how you can fully arrive at that understanding through just you know lexicon and concordances I think that's more studying the letter of it great words that's not going to necessarily teach you the spirit of it okay and again I'm no Bible religionists by any stretch of the words but I do I am able to decode a good parable when I hear one or read one and that is the real meaning of what is said in that section of the New Testament okay thank you so much for for that thank you absolutely you've done great question and you know sometimes it is very important to decode religious work and parables that are there teaches moral lessons it isn't to just say they're completely worthless throw them out just because they come from the religious domain you know we can gain an understanding allegorically of what certain things are meant to teach us if we are able to decode them out of the realm of the literal and bring them into a true spiritual understanding and that's what I strive to do with works of religion parables etc things like that so let's see how can we go to next let's go to essence of an Archon II okay excellent way of looking at Anarchy the absence of the archons okay so essence of colonies you're live on what on earth is happening welcome to the show hey Mark can you hear me absolutely all right great love to talk to you been listening to you for about five years now great and it's taking me a little bit to fully absorb it all but I think recently I've been having some extra special moments if you want to put it that way some have come through huh oh yeah well and like you were talking about earlier it seems like a lot of the people bickering about say the Bible is real the Quran is the true Word of God the true Word of God it seems to be is reality and all these things are just translation the true Word of God the true Word of God is written upon our heart in our emotional intelligence in our heart based intelligence if you want to really see where the the real language of God is look no further than inside oneself that's where it's written exactly and just all this bickering it's like you think it's ridiculous I have a radio show here I'm my name's Jason I'm from

Southern Illinois I've got a community radio show in town and I've really been talking about any of this stuff on there but I think I'm going to start - I've recently I've started to try and stop playing music that has bad messages because that's just part of the mind control I'm trying to get it a little more focused on freedom related music which you know in looking for that it's kind of there's not a whole lot of stuff out and far between unfortunately quick anecdote you mentioned like freedom related music I mean a friend just told me that you know he he attended a show where he was actually playing in another band and he said that socialism and communism is so strong and they even in the metal community you know radical left ISM in the heavy metal community oh yeah I can believe it hitting me you know I've just that that makes my heart just like hit the floor like a concrete block you know to think that that's what's going on in in even metal related music which is supposed to be about real rebellion and freedom and saying no to Authority and you know I mean I just can't believe that that's how wishy-washy even the heavy music scene has become in the modern day it's very sad oh I know evil saturated every aspect of being it seems like or at least trying to and it brings me to art which for the longest time I was thinking is art all evil because it's all kind of a distraction but recently I've been realizing that it's only if the art is portraying a negative message I mean you can push natural law and truth and really any kind of art like your music you know it's a heavy hardcore type of music that some people would be like oh that it turns me off that sounds angry and it's just loud but there are people out there who like angry loud music and you can bring truth to them from that direction it's the people that haven't reached a zero on the tarot deck they don't even ask you the question maybe get him get him to ask one of those questions that's exactly right or like the video games even like video games really get deep into your mind I mean you're playing a game the whole world disappears but take for instance there's a game out there called papers please you play in a border guard you got to check people's papers make sure there's no discrepancies and if there's not you let them through if there are you kick them to the curb but if you play the game the way that it tells you to play it you're never gonna win it because you also have to pay rent and buy food for your family and everything so the only way to really win this game is to understand morality and let the people in and disobey authority right so it's through things like that you know you we gotta saturate all of our art with truth and reality to really fight you know the people that are that are the real enemies really be laden with heavy duty allegories you seen that's a way that some people are trying to slip in both good mental constructs and bad ones that'll lead us down the wrong path it's it's a medium that can be used for either you know infusion of ideas oh yeah and like Suspiria I saw that recently and I saw that truthstream video but I'm with you I saw you on Vinnie the other day and I think that I think that movie was good because ultimately Blanc have you seen it I am NOT okay well it seems like good wins in the end if you look at it allegorically and not through this christian fear of oh no there's magic and witches seems like the allegory of that movie was good and I want to see it again because I might be innocent I might be misremembering it but I'd like to hear what a your one friend who might get a movie show has to say about that one sure absolutely all right well it's great to talk to you mark I don't take too much your time I'm sure I'll call back without a doubt thank you so much for the call great points made see uh it's just we always have great callers to bring up tremendous topics and have a very focused approach to what they see and hear and I've always said I have the best calls on on talk radio you know on the Internet period okay let's let's move on and go to me let's see if I'm pronouncing this right flowey flowey you are live on what on earth is happening welcome hey Mark can you hear me yes I can loud and clear perfect well first of all like everyone else I want to express my my gratitude to the work that you're doing you have really changed my perspective about esoteric teachings I started following a material about a year ago shortly before on our couple go and then I saw you on stage at an arc Opoku we're also met Pat and Carmen and I'm working with state of energies where you're doing the NACA poco event later this year yes so everything sorry I misspoke anarchic yes and your talk about 9/11 and the Chaos magic and how it relates to numerology and the 11 and so on really put me down rabbit hole that has influenced me on such a personal level where I saw this guiding me from one point to the next and then opening at certain key points magic moments in my life that happen at powerful rep digit numbers sandwich he went down what they call the sinkhole yes also the the syncro mysticism exactly last week Zachary Hobart from gematria News effect was calling in to your show I think it was the last or second last guest he didn't have much time to talk about his work but it's absolutely amazing you don't work basically led me to his and he is effectively predicting sports events and deaths like George HW Bush he predicted that he will not survive the month of November last year and he died at the things in the 30th then it's really really interesting how more ology and gematria defines our daily life with news and sports events and murder by numbers where celebrities are being killed off with faked supposedly faked suicides and then all fitting by the numbers so you were just talking about this this season that we're having right now for shootings I found this really really interesting there's in the middle of that season as April 4th she said basically directly in that season if I'm not incorrect there which was April 4 that is the fall for the 44 day which is which is equaling kill in the English ordinal Sipho and it's being used a lot we saw for example Martin Luther King being assassinated that day look at David Berkowitz who they called mr. 44 you know the New York killing spree you know they called him the Son of Sam and then later book came out about his potential involvement in a much wider satanic cult Network oops interesting yeah yeah I'm not doing this name I will check him up later but I want to come that movie it was a very very interesting topic that can lead people down all kinds of paths of discovery and these are cultists they like their numerology they like their ritual they like their repetition because it's very predictable and they have that reptilian aspect of the brain that is constantly working and they like that a predictability and repetition it's something that they they value and they always go back to and they don't modify their techniques as long as they work which is something I'm trying to explain to people on a show like today's so it's something that I think people would really learn a lot from from studying more into but yes go ahead that's it absolutely absolutely I agree and we see it in the Christchurch shooting more than more than we could imagine just on the nose so for example the first mosque that has been attacked was at 101 Dean 7 uu in Christchurch 8 o 11 and this is really interesting because one or one equals Ides of March and it's happening on the Ides of March on March 15th the day where Julius Caesar was killed in 44 BC where we had the 44 again right and then we have Brenton Tarrant the name of the year of the terrorist brenton equals 101 terrorists equals to one assassin equals one one it took place in a Muslim Church Church eagle equals one one Wow he wrote the manifest with a title the great replacement by the way all these ciphers that I just mentioned it's most of them were all in the English ordinals so the abc123 sites are basically then we had to group the title of cement manifests of the great replacement which is one one in Reverse for reduction so you applied the roots of numerology in Reverse what a lot of these you know much more about this but I think it's being used in Sallee Mia Aleister Crowley magic reversing everything and it's coming down to duality - and that's the same as 9/11 that reduces to 2 because the 9 is like a zero in in a cult numerology it doesn't it doesn't change the value right and it's also really interesting how the news after an event is immediately putting certain phrases into hyphens for example now News New Zealand Prime Minister set within hours our gun laws will change with our gun laws for change in hyphens being recycled by all these different news agencies and that equals also 101 and a single reduction cipher and what is really more interesting is how this event our pin pointing to other events so they're going back in certain number of distances we saw that at 9/11 we had all these different events which which were tied to 9/11 would happen afterwards like I don't know I don't know exactly these events like these attacks in Spain that we saw in London that we saw they were all tied to this and surrounded by like 911 days etc yeah exactly and now what we have this thing this phenomenon of August 11 2009 teen and Zachary Hobart and his I call it a high-flying community of gematria Nader's who are all into this and doing this research on shared on all these different people that they're finding amazing things and August 11 was a two hundred twenty third day of the year which is the reverse two to three three times we've done in bonds number they love reversals as well that's another thing that's important in the occult in writings are a big part of their entire ideology and applause mmm at-fault Santi shabbath that day the day where they mourn the destruction of the first temple of jerusalem the Second Temple of Jerusalem where the Jews have been expelled from France Spain England the start of the First World War the start of the Holocaust all correlating with the Shabbat where basically the 11 T shabbath is all about the 11 is all about the twin pillars that stood at the entrance of the Temple of Solomon and always was the whole destruction of the World Trade Center was all about simply exactly action of the tempo of song right exactly and me watching this video of yours really put me down this rabbit oh no I love now we see this year with the Christchurch 811 having the zip code there right next to the 101 that already showed us its importance so that is August 11 that is exactly these numbers that we're looking at and Mark I tell you that's one day before my birthday August 4th is it interesting and I'm not going into all the details because there would be to our talk I leave it to everyone to research that themselves their videos by mark Pesce oh I'm sorry by Zachary Hobart out I made a two-hour video putting it all together and also post it on Steam it on my handle flowy when you can see it all and you FL a uwy flowy correct all right it's really really interesting one more thing I want to get here there is more how it's connecting to August 11 the shooting here because he said the attacker said don't forget to subscribe to PewDiePie before he went on his rampage heard about what she live streaming and PewDiePie and this is really really interesting from the attack to PewDiePie's next birthday are 223 days just as August 11 as a 223rd day and then because we have 365 days up accordingly it's also 142 days from his last birthday which also is August 11 leaves 142 days in the year PewDiePie's birthday in base numerology October 24th 1989 10 plus 24 plus 1989 is 142 terrorists equals 142 the attack was reported to the local police at 142 it's really the point you have to consider how much could possibly be not a coincidence you know it's like you know there could be synchronicity involved in it but then you could say these occultist certainly are fun of their numerology without any doubt checkout flow ease works I'm gonna have to look deeper into some of those a cupboards work I'm definitely going to do that but there is absolutely something to gematria you see it plastered all over the 911 event and many other events like the 7/7 bombings in London London etc and they most certainly are doing these things in a ritualistic design ritualistically designed way they're orchestrated events most certainly I'm going to go in and try Bob again Bob from Cincinnati you're live on what on earth is happening are you there my friend it looks like Bob may still be having technical problems Bob I'll try to get you back before the end of the of the hour I'm gonna have to get Bob either a good headset or mic or whatever he's lacking in a set up let's see let's go to let's go to electric boogie electric boogie you're live on what on earth is happening welcome you're unmuted at the server and make sure you unmute yourself in the discord interface all right I'm gonna jump looks like they disconnected alrighty so let's go to let's go to living outside the box living outside the box your live on what on earth is happening welcome I'm not hearing you make sure you're unmuted going once going twice alright let's go to the next one let's go to let's see let's go to rob hood rob hood you're live on what on earth is happening welcome to the show mark can you hear me yes I can loud and clear hey what's going on man um so I got it I got a few things again you know loved the show and I'm so glad you're back on but um what I wanted to discuss was I you know one of the your earlier presentations I remember you talking about the most addictive drug and everyone in the rooms like you know cocaine no heroin marijuana and and all of the sunny said no it's adrenaline and that kind and that kind of a blew my mind and you know a lot of research and topics have been talked about adrenochrome yes and then when you tear Jay Parker speak you're like holy cow these guys are well let's tell people a little about a little bit about what adrenochrome is for those who may not know at the time of a very traumatic experience especially that either borders on or fully goes to death okay a substance is released from the spinal column of a human being or I'm sorry the adrenal glands of the human being that is known as adrenochrome okay it might be in the spinal column as well I'm not really 100 sure but essentially this is one of the most powerful and invigorating substances that a human being can possibly take into their physiological makeup and it would appear that this substance is actually harvested in some satanic occult rituals when they actually take the life of sacrificial victims and it may be one of the things that some of the human sacrifice rituals that were done in the ancient world like say in the Aztec tradition in Mexico were done to procure so people should look into adrenochrome and you know you can research what that is and what it's all about why these high-level occult elitists want to procure this substance because many of them think that it will keep you young almost indefinitely by taking it that's how powerful of an adaptogen and it'll transform someone at almost a cellular level yeah it's pretty um it's pretty sick and twisted I mean and also if you follow Michael to Sirians work and he talks about the vampire and then the psychic vampire and all that all this stuff aligns yeah I mean it's it it's just wild and you know as an everyday person as myself you know I don't have a show I'm kind of disappointed in myself for not being as I guess you say proficient in all this stuff but what I do is everyone I meet I try to I try to talk to them about this stuff and it's a very good way to start because when you start doing that at least talking to others will get you some confidence in an interaction and all really doing a radio show or TV show is like is talking to someone who is in the room except they're not in the room they're just scattered throughout the world and a listening audience that's all my problem is I'm just technically illiterate and I realized that that is her overcome yeah part of doing this work I'm going to try to close that gap by again maybe doing a seminar called how to become the new media and actually teaching people some of the technical technological as I'm doing this I may even do some of it right here on one roof is happening so that would be awesome but no just say I'm just kind of blow through these last couple points so when you're woke or I guess you could say aware or you know conscious so if you haven't seen this new Audi commercial they talk about this like creepy old lady brings this like you know beautiful woman back to this like butcher shop and she says I understand you thirst for adrenaline and brings her back and then there's the car so that's just one thing I also want to touch upon it's kind of again crazy how I wanted to call in today and talk about the king mentality because I'm a big basketball fan and I've been watching that King LeBron James and his deterioration so if I was him I'd be kind of freaked out about god bless you about all the previous Kings with that moniker just just something to think about and then the other thing the last caller touched upon you know that movie us comes out next week which is on 322 August has us in it very creepy that's another thing gender this is just for my own personal thing a lot of my friends are getting divorced then they keep on saying commenting to me I understand why you never got married and that's not really the case I never got married because I never made a connection with anyone yet you know what I'm saying and I and I didn't feel the need to follow society norms to do that because their personal relationships have found for whatever reason they have failed that that somehow extends to everyone of the opposite sex and nothing could be further from the truth it's just a personal experience and sometimes people grow apart sometimes people go down different paths in life at different times and you know it doesn't mean you have to hold the entire opposite sex responsible for the breakup of a personal relationship it's something that may happen to help us to learn and grow and grow as an individual so you know again it's part of the whole divide and conquer strategy to really try to break down the bonds between men and women and just between individuals you know that's what they atomized people are easier to defeat and the last two topics I just want to touch upon and maybe you can speak about and further is guests on TV podcasts I'm gonna use Joe Rogan as an example when they have guests that talk about touchy situations if you follow their eyes it's almost like they're reading from a script or a teleprompter they're not having a conversation with the guest I think the show is planned I think it's scripted and I think it's just another way to brainwash the masses and then the other thing is I'll briefly try I don't particularly really see him as the genuine article I know I've never really seen the big appeal to the show I don't really think really personally I don't really think it goes as deep as some people claim that it does right I was never really a big fan to be honest I personally like a much better as an MMA commentator than a podcaster I agree and then the last thing I agree and the last thing is I I've been a big Red Hot Chili Peppers since I was in the seventh grade and you know since under the bridge came out and I just saw that they did a concert at the pyramids the geek Jesus trip on March 15th so I don't me that questions if there was some symbolic or sacrifice or some type of payback to the gods for what just occurred and what is your take on on if you like music you know cuz I'm like torn right now I'm like man that's kind of creepy that they played at such a magnificent I guess you could say space in the universe and a certain event occurred is it and no I means that the artist is in on it sometimes they just want to go where the fame and money is at and they'll just say yeah you're going to all right for our you know booking agents told us this is the gig we're gonna do here and they go and they play and they find themselves in involved in whatever it is and they're just pawns prayed pretty much look at look at the guy who plays the organ at the ritual events in eyes wide shut he's not a member of the cult he's just paid to play you know a lot of times it is that sometimes they are involved you know so yeah you have to use the sermon and determining which situation is which all right well thanks again and um you know you know I'm in the air you know who this says anytime you want help with that guard in the backyard let's get that going cool you got it i man I'll see you take care great call alright let's go - lets go - this should be interesting let's go to Lucifer spelled el o o se fer Lucifer live on what on earth is happening welcome are we going to hear from Lucifer yes you're breaking up a lot I'm not sure if you can clean up the audio on your end by any means it sounds pretty staticky but go ahead and try to give it a shot alright it's pretty broken up so I would say you know try to make a comment or a question and I'll answer you because it's over but you're breaking a pretty heavy right am I breaking up also is the question I'm coming through clear loose from sorry I may have to let you go it looks like it looks like he dropped out anyway might be his internet connection there in that instance so let's go - lets go - we'll check from Poland you're live on what on earth happening welcome no mark maybe a little shy okay but I should manager yes great show today it's not about you know not used to speaking English so it might be a little hard to get you know get going yeah anyway great so today you touch on a lot of subjects I wanted to talk to you about a talk with you about about the hatred in the community you know I think it stems a lot from hubris there is a lack of humility in in the community that I noticed people call themselves like enlightened community you know and and so forth so it's it's something that like I think it's likely foolish people like to feel smart and if I'm not saying it like in a in a way to criticize others because I was and to an extent I'm still like that it's something that one has to work on you know and I think it's a matter of discernment which is why I chose to wear the shirt that I'm wearing today okay this is a truth connections t-shirt my friend Kathy Bablu that's our website truth connections calm she does a radio show as well and her shirt merely says discern and then has a website and I think it's very important because discernment is more than I think the the aspects of real awakening of really truly being able to use our tools and our disposal in the mental domain and the emotional domain and the spiritual domain to really be able to discern reality from fiction or fantasy and that's what what on earth is happening has been about from day one it's about trying to separate the realm of the real and the natural from the realm of the artificial and constructional and it takes discernment to do that it takes discernment and judgment to be to do that yes I agree but minute may 8th I mean because some people have less kappa capability you know some people have higher IQs other IQs and it's like when people with let's say less and capacity to understand and discern things try to be smarter than they really are yeah they they cause a lot of you know chaos and and misunderstandings that is known as in the psychological world the dunning-kruger effect which I've talked about a little bit on what on earth is happening in on some interviews for people to look up the dunning-kruger effect about how people with low capacity for understanding often think that they know much much more than they do and it works in an opposite people yes I think an advanced understanding often attribute other people to have the same ability to learn that they do yes I actually you know have been involved in academia a lot so I noticed that a lot in in scientific circles especially you know he was doing my PhD back in the days I left it anyway but but people like professors think that they are really really smart but they're fools very often not all of them of course but a lot of them and I wanted to correct you on one thing cutting the cap in massacre because I'm polish so I know it was not done by the German Nazis but it was done by the Soviet Russians you know only he who does nothing has no it doesn't make mistakes you know so it's it was a massacre of Polish officers the Russians caught Polish intelligentsia officers and they shot them it was around 20 over 20,000 people they shot them in the back of the head spread there were a prison of war let's say yeah and they executed them by a bullet in the back of the head actually on April 10th 2010 there was also the Polish President and part of Polish government crashed in a quote-unquote accident when they were flying to celebrate let's say commemorate yeah yeah that's the word commemorate yeah yeah yeah and it was also quite obviously let's say false flag event and it was actually one of the catalysts that that started me on my path of waking up have you seen the short symbolic film on YouTube in shadow it's very similar to I pet goat but it's different it's made by someone who is really and I recommend this to you I'm sure you'll love it yeah in shadow it's like minutes long animated I'm sure you'll love it and the last thing I want to touch because I don't want to take a lot of time it's the Golden Rule because you often said that the apophatic way of understanding it do not do harm do not do to others what you wouldn't want done to yourself is like the more the stronger one and I agree actually do unto others what you would like others to do unto you is a bit different because the first one from my perspective is you know you can do nothing and actually you don't harm anyone but but the other one is more of a service-oriented or intended once though I love so as the difference between those is the difference between morality and ethics morality is prescription from doing harmful actions epochs means you're actually doing constructive and actions which which uplift or better other people so it's going the extra-mile is the ethical approach compared to morality which is simply the non-aggression principle of doing no harm did we lose them well anyway in in that essence I think that covers the essence of what would check was just saying so thank you so much for the call great points thank you for correcting me regarding the captain captain massacre okay so we have about five or six minutes left in the show let's see let's go - lets go - loke toe look Quito you are live on what on earth is happening welcome to the show no Quito are you there yes coming through rather muffled but go ahead and try to make a comment or a question because it's pretty distorted go ahead okay I apologize for that you know that I've actually translated on your natural not natural awesome learn to Spanish axel and I'll be doing a presentation actually on 3rd 20 of April so it's all gonna be actually in Spanish excellent access to so yes it's been about a year actually I met up with you at your Phoenix presentation yeah and that's when I actually that I was translating you're working and we talked personally for a little bit but your audio cleared up a lot now so I can hear it a lot better okay thank but yeah so I guess I'm a little nervous I'm surprisingly that but but yeah so that's what I've done lately since I've met you so I learned that word I want to I want to thank you for doing that because that's a real labor of love to translate that much language into another language so anybody that does want to do any translation or transcription of my work you don't need my permission to do it as long as you upload it re-upload it in in its complete form you know without changing the context go right ahead I've always told people that that is fine to do so I appreciate that you were doing that making that available for spanish-speaking people so thank you I know and thank you too I guess I kind of got more of a push once I heard it from you personally I said go for it and I was like all right cool it's like I know you said that it was for free and you know anybody can do what they want with the information it's just I just I guess I just needed to hear from you and I was like sweet um but yeah yes so I'll actually be doing a live presentation and it's actually again it's free and everything for people I've actually already passed out flyers today before I got on to the show but thank you ya know just to thank you for that and that's what I've done lately basically just an announcement of what I've done with your work thank you so much it contributes to the great work you know it's helping you know it's just like the good you look at the great work as lifting a great weight you know every effort to to help counteract that force of gravity that's holding it down helps so you're you're doing what you can do in bringing some work to the table so I really appreciate that of course then thank you also because it helped me in learning what the natural law is even though my see my my roads took me into those steps of learning the truth of what it is little by little and and I think a lot of us go through that it takes little steps in synchronization that's right it takes time you know I don't expect everybody to get it overnight either you know it takes an investment of time and attention and if people are willing to put some of that work in they're going to see it paid dividends on the other end and then as soon as they actually get a recorded audio and video I will actually load it up in one of the I'll come back on to your show and just let you know that I've posted it and see if we could do a link for a Spanish version of it so excellent excellent sounds great thank you so much no no problem thank you you take care of it everybody else enjoy today thank you I mean see that's what contribution to the great work is all about folks you know people can do it in many ways that are that are constructive and help other people to learn who might not have been an advantage to because of language differences so fantastic let's see who else do we have let's see I think I have time to squeeze one more in paddy lager you're live on what on earth is happening welcome hi mark can you hear me yes I can loud and clear we're pressed on time well I just want to say I hope you feel much better and I just want to put out there that I do live Q&A I've been asking for the past few weeks because I have been going through some personal issues in my life but you know we we work forward through that which is chaotic and yeah

What On Earth Is Happening Show #203

Topics: *How the Religion of Atheism is destroying Human Freedom, the Hegelian Dialectic, Religion is the One and Only Problem of Humanity, the definition of Religion, Religion as a method of Mind Control, the Psychological Schism, the Characteristics of Chronic Left-Brain Dominance, the Characteristics of Chronic Right-Brain Dominance, the Divide & Conquer Manipulation Technique, the Worldview Schism, the Imbalanced Worldview of Randomness and the traits and behaviors to which it leads, the Imbalanced Worldview of Determinism and the traits and behaviors to which it leads, Knowledge as the ultimate Savior of Humanity, Polarization Dialectics, Religion vs. Atheism as a Polarization Dialectic, the Worldview Characteristics of Religionists, the Worldview Characteristics of Atheists, Natural Law as the Key to Human Freedom, the Center Path, the Way Out of Polarization Dialectics, the Worldview of Simple Deism, Scientism, the Inconsistency of Atheism with the Scientific Method, Natural Law as a Science of Morality, the Law of Freedom, the Etymological Root of the word "Natural," Atheists in the Freedom Movement subscribe to the same ideology that drives Nazism, Marxism, Socialism and Communism, Why Atheism always leads to the Destruction of Freedom, Atheism's direct relationship to Moral Relativism, Anyone who believes that Humans can create Rights must by definition believe that Humans can alter or abolish Rights, Intention vs Action, Governmental Agendas, Anarchizona, the requirement of monetary funds for content production, Entitled people who expect everything for free, Millennials and entitlement, Chronic Complainers who have no work of their own, Bridging Occult and Mainstream information, Media formats to deliver content and begin the Great Work, Righteous Anger, the political climate in Sweden, Human Beings' Fear of Personal responsibility, Morality as the Common Ground in the Freedom Movement, Mainstream Media Censorship, the ARK Drive, Self-inflicted suffering, Humans and Animals as different and independent forms of Consciousness, New-Age Nonsense and False Spirituality, the European lack of understanding of Self-Defense and Firearms, Are Europeans waking up?, potential Season of sacrifice acts, the breakdown of Society through divisive dialectics*

freedom man that's what it's all about [Music] you have to move on freedom book says [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of the choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening calm ladies and gentlemen government is slavery the show is live every Sunday from 3 p.m. to 6 p.m. East Coast time that's 12 noon to 3 p.m. Pacific time today is Sunday March 24 2019 it's episode number 203 we have a great show lined up for you here today every week on what on earth is happening we are ending slavery one mind at a time today very controversial topic coming up for the show I'm going to be talking about how the religion called atheism is actually destroying human freedom that's right atheism is a religion and that's right it does not liberate the mind it enslaves it so we're gonna be talking about that very controversial topic a little bit later first I have a couple of quick housekeeping duties that I want to let everybody know about next week March 30th 2019 is going to be the nine year anniversary of the what on earth is happening show / podcast nine years I've been working on this you know with a couple of hiatuses however on March 30th 2010 was when I began so been at this for nine years now amazing so next Sunday will will celebrate that I'll figure out some you know form of celebration maybe we'll do a little contest or something not sure yet but next next week's show will be the 9 year anniversary of the show I have released the Tesla and humanity's missing paradigm shift lecture that I gave at the Nikola Tesla conference 2019 in New York City at the New York or hotel if we can briefly switch over to the laptop I will show people that that was released it's on the home page of the what on earth is happening calm website and you can pick that up on the gifts area of the site by going to the gifts tab or clicking the donation gifts button on the left and this this is the description on the homepage of what on earth is happening I'll read it very briefly the manifestation of free energy through Tesla technology is entirely dependent upon a particular type of spiritual paradigm shift that must take place first in the body of humanity this paradigm shift was hinted at by Tesla himself but unfortunately that necessary shift in consciousness still has not occurred at the level required to break the stranglehold of our current corrupt polluting and unsustainable energy systems in this presentation mark passio discusses what this spiritual shift in consciousness entails and some of the reasons why we are still so far away from achieving it as a species so this is a presentation that went over pretty well at the Tesla conference many people were very interested in it and came out and talked to me about what I said at the conference there was still some people that it made a little uncomfortable and who weren't ready to receive it but you know that's okay maybe they'll get there in time but anyway um you can pick that up by going to donation gifts by clicking this tab right here or by clicking this button and then when you enter that you can go over to the DVD section and the Tesla and humanity's missing paradigm shift is available on DVD there is the image of it and it is also available on flash drive you could also pick it up on a USB flash drive I've actually upgraded to some USB 3 flash drive so they're even better quality than they were before they're faster and I also want to let everybody know that I did put a new donation method on the donations page so people have been asking me if I would do patreon for a while some people like this as a donation platform allows recurring monthly donations so I did start a patreon page and I'm posting all of my video series that I do right here on the one on earth is happening you know video show is will be posted at patreon as well with their descriptions so if you click that it will take you right here to my patreon page and you could become a you know someone who donates on a monthly basis using patreon if you like this as a donation platform so I think that's all the housekeeping that I have for this week's show let's jump right into the main topic which is I'll start my presentation slides and we could switch over to that and again the main topic for the show today is and we're we have to switch over to the slides that's the yep okay there we go okay so the main topic is how the religion called atheism is destroying human freedom and once again I'll give a shout out to Brett Hatton for making the great podcast art that he's been doing for me you know great job with the graphics as always so this is a very highly controversial topic for a number of reasons obviously a lot of people know about the dangers of religion in the so called freedom movement or anarchist movement if you will and I have no problem with that as a matter of fact I've said from day one and will reiterate on this show that religion needs to be destroyed okay period okay I'm a I'm inst don't mince any words about it I know I make no bones about that I don't care what people who have a whole lot of religiosity in their mindset and still subscribe to religious viewpoints want to say about my take on that they'll say oh I'm still a Satanist because I say that no I'm someone who really understands how you really use reason and how the real scientific methodology works okay and that does not negate the existence of a creator that put the laws of reality into effect which we're going to talk about here today so a lot of people in the freedom movement because of their sheer hatred for religion which I don't have a problem with but it's more of its let's not even use the word hatred it's more of a blatant dish crossed and an understanding that religion is a control system which we'll be talking about but yet they're stuck in the dialectic see they think that the answer as I did many years ago when I turned away from my religious upbringing I thought the answer was to go to the opposite extremity the opposite polarity and the opposite polarity is always in the controlled dialectic it's always part of the polarization dialectic there is a third way or a middle path that usually if not always leads to the truth but that's the one that you're you never hear about that's the one that is kept hidden that's the one that they don't talk about on the mainstream media and that you don't learn about in history books and you don't learn about in school you don't learn about from your school teachers from your parents from your friends from your family members you know from anyone okay that's the one that you have to go out and seek on your own through depth and breadth of knowledge you know and there's a whole lot of confusion and misunderstanding regarding this so I hope to clear it up today with this presentation and I hope to get some of the people who in the freedom movement think that atheism is somehow the answer to understand that really you're you're fooling yourself and you don't understand ultimately what the religion called atheism leads to in society in invariably inevitably and it is historically proven if you have a long view of world history that it leads to what I'll be talking about that it leads to which is totalitarianism so let's jump into this presentation and this you could call continuation of the divide and conquer strategies that lead to the infighting in the freedom movement now a lot of people will then that I talked about last week now a lot of people will insist I'm adding to the division okay they'll they'll say that mark you're talking about how oh these people are wrong and these people are problematic and even people in the freedom movement are problematic I'm not trying to create any division folks I'm trying to help people to understand that when they are incorrect about a dynamic that often far too often their ego is so in the way of any real learning or growth and this was the same for me mine was no different when I was younger and I went through the whole polarization dialectic process okay so I want to take a very brief aside and let people know I'm still struggling with some allergy issues okay this presented itself on the show last week when I also say I haven't really addressed that briefly before I continue I set up a new intro for the show that is a motion graphic intro I actually made that myself pretty proud of how it came out I think it's looking pretty good and working very well and then I was able to pick up a nice brighter colored backdrop that's like a marbled blue which I'm really liking and it's a lot better fabric than what I was using I'm gonna actually like iron it make even less wrinkles in it so it'll look pretty pretty slick but I just actually unpacked that today and set it up and a wonderful individual donated this new microphone which is a shure sm7b and it's obviously a better focus own than what i had been using so i want to thank the individual who donated that you know who you are i don't know if you want me to say your name publicly on the air but thank you so much it's a beautiful donation to the effort so we're trying to continuously improve the quality of what on earth is happening and the entire production value so thank you to everyone who has contributed to that effort so jumping back into the presentation what we have to understand one other thing by the way I take the issue that allergies are a form of vaccination damage okay just as autism is just as other illnesses that are brought on by vaccines that have absolutely ridiculous additives and adjuvant in them that if people want to debate vaccines as far as the actual active mechanism for building an immunity that's one thing but the additives and adjuvant that are added into these things are an atrocious poison and that are are they're harming children and they harm adults as well because I never had allergies growing up ever indoor or outdoor to animals to cats anything okay to dust nothing okay pollen absolutely not the allergy symptoms that I experienced in adulthood came on during my early teenage years when I got a booster vaccination for going into high school after I was graduating from grade school and then I was not able to be around cats literally right after I got that booster vaccination shot okay then cats set me off they triggered me like I was good you know going to die not able to breathe my lungs you know basically completely a big becoming congested my sinuses filling up and not being able to breathe well through my nose I said last week that I think this was triggered by some dust that I was exposed to during cleaning a spring cleaning on my place here in in Philadelphia and I think this is a continuation of that and or possibly I was exposed to another allergen in my environment but I just want to say that I think that this is vaccination damage and many of us will have it not even understand why we have some of the issues that we do physiologically and I've tried every remedy possible people have put me on different programs to clean just about every system of the body my diet is pretty decent I say it's actually been tightened up since I became vegan in 2018 I've never physically been in better shape and I've never physically felt better and my diet has never been better so I don't think it's a dietary issue whatsoever and I don't think that anything really that you could do with dye and homeopathic remedies is going to solve the issue okay I know I no longer believe that because I believe this is immune system damage that was done through vaccinations and that's why we have to be very serious in our efforts to understand the problems with vaccinations and really really err on the side of caution whenever attempting to give any of these things to children okay whoever disagrees with that you could have your own take on that I've said my piece

I'm going to go into all of this in depth on another show on nutrition and health which will be coming up in the near future so going back into the presentation for today on atheism what we have to understand is that like religion like all other forms of religion atheism is just a dialectic and it's again it follows the form of the Hegelian dialectic that we talked about last week which is a divide and conquer strategy now again the philosopher who came up with this was George George Wilhelm Frederick Frederick Hegel okay this individual I don't feel was a dark occultist I don't think that this person was just evil in coming up with this philosophical stratagem okay but what it has been done is it has been taken and perverted and used for the manipulation of humanity so the Hegelian dialectic is a framework it's a psychological framework for guiding the thoughts and actions of individuals into conflicts that lead to a predetermined solution okay so you have to have conflict you have to have opposing sides that will vehemently war against each other and then from that thesis meeting the antithesis okay conflict will engage and then there will emerge a synthesis from which the controlling class can manage the conflict and the chaos and bring about the result that it wants that it already had predetermined but if it said I want to do this everybody would you know give resistance to that they would say no we don't want that but once you bring this conflict this artificially induced conflict and and a polarization between two sides then it becomes a piece of cake to bring in a predetermined agenda that is that synthesis between the two okay so and what they want is they want people warring over these ideas so that they are easier to conquer they are manipulated they are weakened and they are easier to further manipulate and further control so the Hegelian dialectic is accomplished by manipulating consciousness into circular patterns of thought and action which never lead to a true solution the synthetic solution that is offered by the ones manipulating this artificial conflict this is called artificial conflict resolution that's another term that in the modern world the Hegelian dialectic is given by social engineers and by some psychologists artificial conflict resolution okay the synthetic solution quote-unquote to these conflicts cannot be introduced unless those who are being manipulated takes sides that will advance the predetermined agenda and that is what people are doing when they fall into either religiosity or atheism they are both diet polarization dialectics as I'm going to explain so moving on to the next slide this has been my take since day one on what on earth is happening and I will reiterate it and it is true it doesn't make a difference whether you don't accept it it doesn't make a difference whether you don't believe it it is true regardless okay the concept of religion and what it actually means not what you currently think it means for those who may be new listening to the broadcast okay again part of what I show here on what on earth is happening is you have to understand what the presenter means by the topic that they are discussing not hearing a word and triggering your own pre-existing internal definition that exists already in your mind of the word because there is a larger context in which matters with everything context matters with everything okay the larger context that I am using the word religion to help people to understand what it really represents okay so you have to get your internalized mental definition out of your brain that you've been handed that has been handed to you and has been regurgitated to you since the day you were born and understand I am using religion in a much wider sense as a word as a construction mental concept to convey meaning to someone then what you may understand religion to be or what your dictionary definition that you have floating around already pre-existing in your mind this tells you that it is so I call religion the one and only problem of this world okay the word religion does in fact come from the Latin verb relig re there are people who insist that this isn't the case and I'm telling you this is the etymological definitive etymological place origin of the word religion it comes from the Latin verb relig ra relig or e in Latin literally means to bind to hold back by tying to thwart from forward progress all you have to do is go to a Latin dictionary online a Latin to English translation site or and pick up a rudimentary like a high school level freshman or sophomore level Latin reader and go into the vocabulary of the Latin reader and look up the word the word relig or e it is a verb that's the infinitive form okay religio relig ra okay and it means to bind to hold back or the thwart from forward progress religion as I am using the term is a system of sociological control it's a control mechanism based in there's three qualities of something that that makes something a religious belief okay the belief is unchallenged it is erroneous meaning it is false and it is dogmatic meaning it is rigidly held to and it can be law actually unchallenged or completely unchallenged but basically is pretty much accepted on blind faith so it is based an unchallenged erroneous and dogmatic belief not knowledge which is provable through scientific methodology but a belief system which is specifically designed to hold back the progress of human consciousness the term religion as I am using it here does not merely refer to the belief systems of what I call and many others refer to as the cultural religions of the world okay for example Christianity Judaism Islam Buddhism Taoism Hinduism etc so forth and so on on infinitum and all the different flavors and variants that they exist in throughout the world these are what I refer to as the cultural religions or the world religions the cultural religions of the world however you want to look at that term however you want to express it these are cultural belief systems okay that are often about God about creation about human origins about morality you know etc okay but they are beliefs they are not ultimately based in knowledge often they work through parables to teach people some rudimentary moral lessons but you're not really getting to the heart of science of true knowledge when you just believe in largely unchallenged almost always or partially erroneous beliefs and dogmatic beliefs which people just take on faith and stay rigidly clinging to okay what on earth is happening has never been about clinging to any rigid beliefs it's about understanding factually what has taken place and what is going on in the world okay and what has taken place in nature okay so people will say well it's a belief to believe in something like gravitation or electromagnetism no it isn't because it has an observable effect in the world and that's why people say oh it's some sort of a religious belief to believe that natural law exists no it requires no belief because it has a natural observable effect in the world as we're going to talk about and that's what sets it apart and it's not a religion it's actually a science and it is knowable just like the dynamics of motion are knowable through scientific laws the dynamics of the consequences of behavior are also knowable and thus come comprised a science of morality so religion in a wider sense must be recognized as an active form of mind control placed into human society by social engineers religion in this wider view of the term includes an array of limiting and controlling belief systems or social structures such as Authority government money mainstream media scientism which will talk a lot about materialism solipsistic ism hedonism atheism and many many more we could do a hundred shows on religious beliefs and never touch on Christianity Judaism Hinduism Islam etc we would never need to bring the cultural religions into the picture I could do a hundred shows on religious beliefs and never talk about the cultural religions once that's how many religions are out there in the world folks if you understand religion in this context and stop insisting that it's just your limited mental definition of the term okay so all forms of religion not just some but all forms of religion are what put the human mind in a cage and keep it there I refer to this graphic on the right in this slide as the head cage or the brain cage or the mind cage and that's what this is all about it's very interesting that this show is number 203 ok symbolically occultic allah in a cult numerology when we break that down it's 20 that zero doesn't add any value so it's it's equivalent to 23 in the thalamic system of occultism numerologically the number 23 means getting out of mind control that is literally what the number 23 means okay to get out of the limiting and controlling belief systems that have held back your consciousness and that is very synchro mystic if you ask me I did not work work at that's this way this was my intended topic and I didn't even realize that until like yesterday okay it's very interesting how things just work out like that almost magically if you will okay so what we have to understand religion as ultimately is nothing more than forms different forms of mind control that's all they ever have been that's all they are now and that's all they ever will be okay so you could replace the word religion in the top sentence as the one and only problem that mind control is the one and only problem because religion is mind control just like government is slavery well all forms of religion are forms of mind control so I don't know how much more simplified and repetitive and babyish I need to take this down to a level of I don't know how much more simplified I can break it down in little baby spoon-fed bytes to the listening audience huh you know there are people who say to me mark I can't stand how much you repeat I can't stand how much you're you you just go over the the same things but it's like then other people are like I can't even understand a word that you are saying to me so you have to tread this medium of saying things over and over so those who are a little slow on the uptake can get it okay versus potentially boring people who are very quick on the uptake and they have a sharp mind and they can get it with the first time it said I are on the side of I'm going to keep repeating it I'm gonna hammer it into the minds of the people that are out there to the extent that I am capable because there is all I think more people than not are slower on the uptake and that's because of a lot of vaccine damage that maybe they've they've undergone that fogs the mind and and you know affects the body in many different ways but it also has an effect on the mind plus all the toxins that are in our environment these are all forms of controlling the mind and limiting it and slowing it down okay we have to understand as I'm talking about it here you cannot tell me one human problem that is not based in mind control that is not based in wrong thinking wrong thinking is the basis of every single human problem and that follows the law of mentalism of natural law everything is ultimately stems from and is created from a mental construct even the universe itself okay so everything has to come eventually from mine as a causation as a causal factor then it comes down into the realm of manifestation once it has existed in mind so every single human problem first existed in the human mind before it became a manifested reality in the 3d world in which we live and share that's why religion has to be destroyed all forms of it every single form of religion humanity will not be free until every form of religion including atheism is destroyed and we know the truth because only knowledge will set us free ladies and gentlemen there's no Savior coming to rescue us from our own fucking stupidity you think that you are a baby a baby in your mindset no saviors coming to rescue us and no blue avians are coming to rescue us either for your other group of fucking babies okay because that's what you are who believe this nonsense peddled to you by people in that whole fucking community of the the et saviors that are coming any day now they're just having a problem with the warp drive they're getting it fixed they're their engineers are working on it as we speak they'll be here any minute fucking little dunce children believe this shit okay and here's why this is the reason people fall for religion this is the reason people fall for any form of mind control that they fall for it's why they don't understand reality it's why they don't understand what's taking place around them and within them it's why they've remained mental children their whole damn lives okay and this is a piece of cake for people who understand it to manipulate people and this can either one of these conditions okay our social engineers the masters of this world the d'arco cultists of this world who are manipulating the events from behind the scenes it's a you're a joke to them Humanity is a fucking joke to these people okay they are they have people on strings are making advanced like dunce puppets that they are because that's how easy it is to manipulate people in a state of brain imbalance okay getting them to believe the nonsense that they put on TV get them to believe all these nonsense false flag events okay yeah you know get them to lay down their rights whenever they're told okay it's a piece of cake for these social engineers to do because of the ignorance I'm gonna term I'm gonna call in a new term I don't know if it's it's out there in the cultural lexicon yet but it I haven't heard of it so I'm gonna coin the new term okay the ignore ROTC okay that's what the vast majority of the human race is the ignoratio yeah you've been you've been christened as belonging to a new secret society it's not the Illuminati the illuminated ones the enlightened ones no it's the ignore Otte okay the ignorant ones that's what I'm gonna start calling people instead of the Dead the Sheep the Sheep oh you know the ignoratio is what the people of this world really are okay the ignorant ones there's your new very own custom-made secret society okay and you know it would be funny if it weren't so damn sad that's what it really is it's really sad it's a sad joke is what it is okay and here's why the puppet masters can continue to make that puppets dance on their strings because people almost invariably are in one form of chronic brain imbalance in the neuro chemistry of the human brain in one form of brain imbalance or another so chronic left brain dominance this is when someone is too rigid of a left brain egghead okay and we all know people like this we all know them right we all know people they're the ultra skeptics nothing is true you know no one can ever really truly know anything you know jackass is to think like this I mean imagine this there's no such thing you know it's almost like they've gone so left brain that there are a fully right brain imbalance you know that's how a lot of these forms of imbalance work you know how many people know the Sikh religion is that is like a control freak because they've gone so far in the right brain imbalance their whole fucking brain becomes imbalance and they come around the left brain tendencies it's the same thing when it comes the left brain imbalance so some people are such rigid skeptics that then they go into solid sysm okay and they think nothing can be true because no evidence is good enough for them no matter how much is presented rigid skeptics the eggheads okay scientism worshippers those who worship at the altar of scientism which we're going to talk about what that is what scientism is and what it means okay not real science not genuine science but scientism a religion atheism the religion that we're talking about here today okay this is a hallmark of chronic left brain dominance people who believe that there is no spiritual dimension that there is no consciousness they'll say consciousness is just electrochemical signals in the physical brain science has proven that inaccurate we're going to talk about how much science has proven inaccurate in the Newtonian model in the completely 100 percent scientifically disproven outdated Newtonian materialistic paradigm of science you are clinging to the dead corpse of 150 year old disproven science minimum of a hundred year old disproven completely disproven me and that that's people who think they're up to date with scientific developments they think they're up to date they don't read any new science that comes out they're reading things from textbooks that were printed 75 fuckin years ago and think that this is still accurate you know or what they learned in school when they were just a little chump you know and they actually believe that what they their teachers told them and in the textbook that the Rockefeller Foundation published you know that somehow that's accurate science that's accurate cutting-edge modern science you are it's like it's like it's like someone who says I just got the latest telephone you know and they bring out one of the old you know models forget the rotary ones that that would be way too new they bring out the old ones that are like that mountain mounted on the wall and it has the mouthpiece that you talk into and you got to hold the earpiece up like that and there's a crank on the side you know that that that's what they think is the latest telephone model you know forget the latest iPhone or Android model that's what they're working with and this is exactly what they're working with regarding science and they think they're up to date on science and they're using a completely outdated and disproven paradigm as their basis for understanding and then they consider themselves scientific you got to be absolutely fucking joking me okay but unfortunately no these people are actually serious okay and think that they know see a problem is it's shallow depth of knowledge not drinking deeply enough from the perience spring of knowledge okay they want to take the shallow little sips you know like a little girl at a tea party the dainty little sips of knowledge and then put it down never go back to it again and say I know everything there is the fucking know you don't know anything little boy little girl nothing because you don't do the real work you don't you're too lazy you don't really look into it deeply because that takes too much time and effort and you want to believe what you want to believe you want to stay there and I ultimately this is about I'm not trying to change anybody folks I'm here to witness truth that's it I'm here to put truth out into the world that's my job that's what I am tasked to do okay it's someone else's Karma whether they want to stay on the path of Satanism and disinformation and wrong information and then do harm as a result that's their Karma that has nothing to do with me okay I'm fulfilling my Dharma and my karma by putting the word out by speaking the truth out there into the world okay and then I've done my piece then it's up to other people and what they do with it is on them it's not on me okay that having been said this rigid left brain chronic left brain and dominance will then lead to even solipsistic ism approach that is so rigid and so believing that nothing really ultimately constitutes proof of anything that they go into the religion known as solace ISM which is the religion that there is no such thing as truth that there is only perceptions and that there is no actual objective truth no objective knowledge I have people saying there's no such thing as knowledge I hear this on on social media no no such thing is not what nothing can be known you can't know anything you know imagine this imagine and they think they're gonna be free they think they're gonna be free folks knowledge is the only path to freedom there is no other path to freedom except through knowledge get it out of your head if you think otherwise you want to think path to actual freedom is believing in something we're believing in someone okay these religious mindsets will put you in a fucking trap and keep your soul in that trap they'll keep your mind in that trap and they'll keep your soul in that trap because that's what their design to do that's exactly what they're designed to do and atheism is no different atheism is the exact same trap just another religion just like saw abscissa is okay so solid sysm the religion that espouses the belief that there is no such thing as truth and everything is just a perception moral relativism is what left brain imbalance will lead to because if there is no such thing as knowledge well there's no and there's no such thing as objective reality an objective truth then hey how could there be objective reality well obviously there can't be so these are see this mindset this left brain imbalance leads to the belief it's all perception and therefore human beings get to make it up what morality is it doesn't exist in nature it's not something that we have to align our perceptions to because it exists objectively and independently of us no no no we get to make up what right and wrong are and then we could change it we can change it anytime we want we could change it in any location we want you know this is the jackass mindset of people in this left brain chronic left brain dominance form of brain imbalance this is how fucked up their mind is okay and it's just amazing it's amazing that it's the year 2019 with all of the scientific knowledge and discoveries that we have made regarding consciousness and regarding actual spirituality that we're still at this dark age we're still in the dark ages when it comes to this dynamic because there's a gap in science see all these left brain eggheads think they're up to date on science in there there's a scientific knowledge gap that takes place in time and it's growing and growing and growing and growing you don't understand this dynamic you better look it up and research it when new actual scientific discoveries happen and the scientific community it's now taking longer and longer and longer a period of time to get that understanding out into the public sphere at all and then even once it does emerge into the public conscious it takes so much longer for the public to really understand how that dynamic scientifically works so you you have to you have to realize you're dealing with to time lag chasms from the time an actual scientific discovery is made you're going to the time lag when it actually gets published out to the community in any kind of a wide way where people are even taking notice of it at all then there's another time lag from the time it gets published into the wider public community and the time that it's actually understood by dumb people you know till they can rewire their brains enough to accept yes this is actually how it does really work you know so that's the kind of time lags we're fighting so going back to the slides you know moral relativism is one of the hallmarks of Satanism Satanism is a religion that comes about through extreme chronic left brain dominance and imbalance and moral relativism will lead to social Darwinism because they'll say well hey since human beings there's no other higher power in the universe and this is how atheists and most left brained eggheads and rigid scientism believers think okay since there's no higher power than human beings well we get to make up what right and wrong are why shouldn't human beings form a social pecking order that is like the animal kingdom see it all comes down to when you're in this form of left brain and balance you think the rules of the animal the lower animal kingdom should be applied to human beings behavior and I see this over and over I see jackasses arguing online saying oh well the lion just devours the the gazelle on the plains because it takes what it needs - why shouldn't human beings act like that why shouldn't we just do whatever any other animals do because we're not fucking animals that's why we're not just animals we have an animalistic component but then we all have a higher thought component which are neocortical brain is supposed to make possible but most people aren't using it they're not using either hemisphere of the brain they're certainly not using them well I'll tell you that much you know so because they they think we're no different than other animals you hear this all the time human beings are not set apart from the animal kingdom no no we're not set apart from the animal kingdom right because animals can do all the things that we can you know they can form multiple languages they have higher level mathematics and creativity and art yeah yeah right there's no difference I mean people don't even understand what dumb bags a shit they sound like when they talk they really don't they don't they don't understand how ignorant they sound they really should videotape their voice and go back and listen to how dumb they sound okay you know I go back and listen to old shows that I do and I go Wow unbelievable job nobody else is doing this and I'm horrified it isn't like I want to take pride in it I don't want to take pride in it I'm horrified that so few people are even doing anything like this there's like a handful of people that are doing this this type of work effectively but most people it's the exact opposite they open their mouth and a liquid stream of diarrhea comes blurting out of it you know they should videotape themselves and go back and watch and hear what they sound like cuz they don't even just understand how bum they sound when they talk yeah we're no different than other animals I mean please and then of course you know in the satanic mindset moral relativism will lead to social Darwinism you know that we should just act like other animals and have a a dog-eat-dog mentality you know a beastial those with the shark sharpest teeth and claws with the most ravening vicious attitude will come out victorious and emerge on top of the of the human herd you know yeah that'll get you a great world yeah it's a what a wonderful place you'll be fucking living in yeah oh we're already living in that place because of this mindset I forgot that's where we already are at see yeah that's what wrong thinking has gotten us this is the state it has gotten us to and then you just take that out to the final solution and it's called eugenics a Thor eteri anism totalitarianism and eugenics which means some people are going to decide who's allowed to live and who must die and that's the height of the satanic ideology that's the height of what these Saints this dark occultists want to put into the world that's where they want to get the human population to accept they want to get us to that place of acceptance then on the other side of mind control again I call these the psychological schism I call this the psychological schism this is where our species is at in one form of chronic brain imbalance or another I call this the prelude to divide and conquer once you're in this form of imbalance you could be conquered only people who are operating with the brain on all cylinders combining the left and right brain hemispheres and using it toward their highest potential which is what the mental path really is okay then you're going to be able to be manipulated deceived and ultimately conquered and enslaved chronic right brain imbalance works the exact opposite way it's the exact opposite form of mind control so the symptoms of this form of brain and balance are you're naive and you'll just believe anything open to blind belief with no investigation somebody tells you something new with very little evidence to back it up and you accept it blindly too many people in that mindset especially in the truth community okay it's a hallmark of religious extremism religiosity it has been called a willingness to just believe dogmatically religious beliefs solve abscissa mcgann you see the religion called solid system works in both directions left rein and balance and right brain imbalance people in solids ISM think there's no such thing as truth no such thing as objective knowledge absolutely things exist independently of our perception in the universe in the natural domain it is our job as human beings to align our perceptions to the objective reality that is taking place within us and around us this is like this is like infant class 101 of reality detection and understanding it's it's horrific sadness to me that I have to explain this to any other living human being and that there is you have no idea the tremendous resistance to taking in even this small amount of knowledge how many people would say absolutely not you're completely wrong you don't know what you're talking about over and over and over and over again I hear this while the world is practically in fucking flames and they still can't get that it's because of wrong thought it's because of wrong perception people acting upon inaccurate perceptions that they have come to inaccurate conclusions because they are using inaccurate methods of reasoning and they don't can understand that this is what's happening worldwide that is putting people into the position where they can be easily manipulated and ultimately enslaved and they'll fight you to the death that they know and this isn't how it really works fight you to the death the ignoratio ADEs and gentlemen we're gonna have to build them some kind of a a building some type of a meeting house or a church of some sort you know it has to be really really fucking big I'll tell you that much you know it has to be a gigantic facility somewhere so salep sysm exists on both sides of the equation left brain imbalance and right brain imbalance okay no such thing is anything that's true it's all just a matter of perception and opinion and then of course right brain imbalance will lead to things like unworthiness self-loathing drug addiction you know so you know just hating the self you know I'm not good enough and then that leads people to join institutions like cults like the government like the police like the military you joined a fucking cult little boy little girl who hates themself that is in a state of largely both left brain and balance and right brain and bounce but the willingness to join a cult is a big right brain dominance trait right brain imbalance trait okay because you got to be already in a state of self-loathing and self-hatred to join a cult okay and that's where the order followers and the police and military come in they're in that form of imbalance as well even though they're left reign and balance Psychopaths many of them most of them almost all of them and the form of right brain brain imbalance will ultimately lead to people being willing to be a willing slave by choice or saying there's nothing that we can do about it the world is headed into slavery we can do nothing to turn it around it's an ultimately going to be destroyed it's called giving up giving up and standing down mentality don't do anything take no action little impotent children think like this powerless children and ladies and gentlemen this is what this whole mind-control dialectic is designed to put people into that's the mindset it's designed to place you into the mindset of a powerless child these social engineers know exactly what they're doing they know exactly what they're doing and they're doing it very efficiently and very effectively by the actual state of the world all you got to do is take a look out your door see what the world is really like and you understand we're getting our asses kicked by these social engineers and it's because people don't want to set their ego aside admit that they were wrong admit that they were duped admit that they're in one form of brain and balance or another and then heal themselves go through the shadow work of healing yourself so that you can actually strengthen yourself and come out of the the mindset of being a powerless impotent child and actually act as an adult as a cosmic adult in the real to make positive lasting change now people don't want to do that they want to remain infants cosmic infants so this mental schism will then lead to a worldview schism and I know this is a review for some people but guess what a lot of other people don't know this or they heard it and it went in one ear and out the other and they completely forgot it okay in one ear out the other not paying attention not really giving the spiritual currency of time and attention to the subject matter okay and that's why that it does bear repeating to firmly nest it in the psychological understanding in the human mind okay when you're in the left brain form of imbalance your worldview starts to shift toward believing that the universe is a state of total randomness with no order to it this is the the universe is a grand cosmic accident no creator no underlying intelligence and nature everything happened as a complete accident all the laws of nature just manifested that way because no answer to it okay because it just randomly happened that way okay they don't even try to offer an explanation they'll just say it's just random occurrence okay as if you could throw a bunch of pieces up in the air and when they land it's a working computer I'm just gonna take all the components of a computer or all of the raw materials that comprise a computer I'm gonna take it in a big box I'm gonna take the box throw it up in the air and when it lands there's a perfectly working you know MacBook Pro or there's a perfectly working HP Envy right there you know imagine this this is how people think the universe works that there was no design that there was no handiwork whatsoever that the laws of nature just magically appeared from the thing as did all matter they think there's no such thing as spirituality consciousness morality natural law nothing meaningless terms I actually had someone in the freedom movement I'm look I don't generally when I talk about people that I interact with on a daily basis I don't use their names because in 99.9% of the scenarios that I refer to if I did use somebody's name I would be horrific aliy embarrassing embarrassing them to their peer group and that's that's a sad thing I had someone at a meeting of alleged libertarians and anarchists say to me consciousness and spirituality are 100 percent meaningless terms to me and I said well enjoy your slavery men just enjoy it like why would you be concerned that you're going into slavery at all why would you show up here why would you even be concerned that the world is degenerating into totalitarianism why wouldn't you just go back kick on the fucking idiot tube and watch whatever reality show you feel like watching for the night why not what would you be trying to get into any philosophical discussions about the wrongness of going into a state of totalitarianism and slavery what would it matter because consciousness is meaningless to you and spirituality is meaningless to you well then right and wrong obviously have to be meaningless to you as well truth has to be meaningless to you as well by definition because they are stuck in a paradigm of science that is 100 complete outdated and wrong and this is again I'll be saying it over and over again the Newtonian paradigm of scientific materialism look up the primacy of matter okay as put forward by the Newtonian paradigm of science that is 100 percent Blee false by modern scientific standards and yet they still think that's the standard for science you're not privy to the new shit man as the dude from The Big Lebowski would say you're not privy to the new shit sorry but I got to just say it just like that you are you're thinking your old rotary telephone is this the industry standard okay and again it's because they take a tiny little bit of knowledge they latch on to it that's that's dogmatism that's religion and this is my beyond and all and this is my damn identity it's my identity you know that's how most people think people in the randomness worldview trapped in the worldview of randomness believe that existence has no purpose other than to continue to exist there's not attempting to do anything to create anything to move toward any other preferable state of existence no purpose other than to continue to exist when that is actually completely scientifically disproven we know that the universe is attempting to create more complexity and less differentiation by creating more forms this is something that the ancient Greek philosophers and Egyptian philosophers talked about endlessly and ultimately the randomness worldview are the hallmarks of scientism atheism and totalitarianism every totalitarian regime that has ever existed on the face of the goddamn earth has told people these things the universe is a cosmic accident there's no creator okay spirituality is meaningless there's no such thing as real objective morality or natural law existence has no purpose except to survive survival as human beings only purpose that is what they are trying to put into the minds of the people to get them to accept total control absolutely 100% that's what it leads to left brain and balance and that is what atheism is all about determinism on the other hand just to counterbalance this okay is the opposite right brain in bounce and this is why a lot of people go into the opposite dialectic see folks I want to re-emphasize this people see the danger of religion and then they think atheism is the preferable alternative that's where they're getting lost that's where they're making a big error in judgment because they're falling into the setup socially engineered dialectic of two false choices that's why when I tell people I'm not a religion aside on't subscribe to any religion I think all religion needs to be destroyed and equally I am NOT an atheist I do not accept atheism I think that's just another religion that needs to be destroyed people like look at me like I have you know 1000 hydras growing out of the base of my neck you know they don't they can't that immediately stop someone from putting you in a box because that's what everybody wants to do they want to do this you know a ontological grouping in hierarchical boxes okay which is not even a right way of looking at ontology anyway okay but that's where everybody when they're they're trying to figure you out they want to get a read on you that's what they try to do I gotta put this person in a box immediately or then he she makes no sense whatsoever to me and I needed to rigidly make sense in my dogmatic worldview okay so you have to understand there is a third alternative and in many cases there's three four five six a thousand alternatives to the dialectic let's look at the right side of this dialectic let's continue it's called the worldview of determinism the opposite of pure randomness everything is determined everything is set in stone you can't change a thing God controls every event in all of creation so all occurrences are obviously preordained because God is all-powerful and all-knowing free will is an illusion and does not actually exist this is actually one you could throw on the left as well under randomness a lot of people they've gone so into the paradigm of the primacy of matter think that matter controls everything in the since there's no consciousness there can't be any free will so you got to see how brain imbalance and often mirrors each other one form of it it often is a mirror to the other form okay so just because you go in right brain and balance doesn't mean you can't have characteristics of left brain imbalance and vice versa just because you go into left brain and balance doesn't mean you can't have right brain imbalance they work together hand-in-hand to systematically destroy the mind and the soul so free will to the deterministic individual then the worldview of determinism doesn't exist and since God controls everything change is impossible because it's all part of the divine plan that you aren't really given free will it's all an illusion and therefore you know action would be meaningless because you can't change anything you know it's all set in stone it's all pre-written it's all written to occur and these are obviously the hallmarks for anyone who's really thinking and paying attention at all of both religious extremism because this is all pure religiosity and the mindset of a slave slave think as I call it one is master think one is slave think and even to call it master think is really not accurate it's you know just pure left brain imbalance of believing Sciences the beyond and all which leads to atheism and leads to totalitarianism and then the opposite is a total religious nutter so in either instance you're not coming out with a good outcome in either instance you're coming away with the world that is drenched and saturated in chaos okay that's what ultimately these two forms of completely brain imbalanced worldviews will ultimately lead to so I call these polarization dialectics okay these are dialectics to polarize the public into two camps because that's where they're easily managed from two camps that are fighting against each other then you could easily manage the chaos and you can manage the outcome on the other side and then you win so you conquer once you have the people divided and fighting amongst each other which boy do they have I mean man when I I thought it was going in the right direction and we were gonna really understand these dynamics we were really gonna bring them to a wider understanding in the world and man did we horrific Lee fall on our face in our own shit that's what happened in the freedom movement folks that's what happened okay I don't care who I offend by saying it you're not doing good enough you're not doing well enough you're not getting the word out there effectively enough you're not trying hard enough you're not trying hard enough because look at the state of the fucking world too busy fighting each other not understanding the polarization tactics that are brought to the table by these engineers I'm telling you your face and people that are infinitely more powerful than you fucking realize I was with them I work with them I know who they are and I know what they're capable of and you don't you think you do and you don't you believe that you know what you're up against but you don't or you would be putting every ounce of your effort into fighting these people instead of fighting each other so let's get into the polarization dialectics of religion versus atheism so you can really see how this comes about and how it manifests in society the worldview characteristics of a religionist which is obviously religion ism religiosity religious extremism is born out of chronic right brain dominance as we've already seen so we all know this jackass we've all met this jackass okay we've all met the Jesus Freak we've all met the Allah Freak we've all met you know the Jewish Torah law insane fuck okay we've all met them alright cuz there's no shortage of them out there okay no shortage of them these are people who really belong in mental asylums really if you ask me as opposed to walking the street trying to convince people of their absolute nonsense garbage view of reality so look at the world view characteristics spirit is primary God is all-powerful so matter is ultimately meaningless okay what I've heard people say this that believe the new-age variant of this religion you know now I'm not just talking about Christianity I'm talking about right brain imbalance religion you could throw a New Ager over there and it would be the same thing just just be a different image okay spirit and is primary creation God whatever you want to call it is all powerful the physical world is evil or it should be ascetically shunned at the very least I have people I heard someone say recently all matter is meaningless the 3d world is just a total illusion that doesn't matter we should try to ascetically shun it we shouldn't take any action we shouldn't try to change anything here we shouldn't try to impose our will upon and etc so forth imagine imagine they think nothing that happens here matters Wow are you lost lost that is the epitome of Satanism that is not spirituality at all that is what Satanists would have you do and that's why Satanist wrote a lot of the book of the books of the modern spiritualist movement they've they bragged about it to many other people other than me you know you can go back into other people's works that talked about the that dark occultists we're going to take over occult publishing houses I mean have a spiritual publishing houses I taught I was told when I was involved in satanic grottoes in my tri-state area I was told that they were taken over publishing houses and they were gonna put all kinds of spiritual nonsense out into the public domain to muddy the waters of what real spirituality is told out the old plainly blatantly like they were just proud of it because they are and they don't just talk folks they do what they say they're gonna do and they did it because what people believe today they have their head lodged so firmly up their ass they're probably never gonna get it out till the day they die and even then they won't get it out and death as I've said many times before is no cure for ignorance they'll probably be reborn as still in the ignorantiy okay so God demand strict human obedience to his arbitrary and often conflicting set of rules and goals in the physical world should not be focused on rather we should focus on the promised afterlife with God so every single one of us knows the religious freak every single one and because there's no shortage of them okay now this is why most people in the freedom movement distrust dislike and/or outright hate religion and rightfully so okay however what is their strategy once they recognize that this is a controlled paradigm and a control system most of them go well all forms of spirituality and consciousness are fraudulent and therefore I have to become an atheist that says I don't believe in the existence of any form of a spiritual dimension okay that's part of the dialectic of the social engineers to get us to accept that we don't have a soul and that we there is no such thing as spirit or consciousness that's the dialectic and many people fall into the night dialect as did I I fell into the atheism dialectic and that's what pushed me into Satanism and in a way I wouldn't have changed it I wouldn't change it okay what I would change is other people's rigidity and holding on to it because while I held on to it for a length of time I still wasn't in such ego that I held on to until the day I died okay but what had to change it for me was recognizing that I was actually taking part in the enslavement of all my fellow brothers and sisters okay that's what had to change it for me and I had to suffer for that mindset to change see most people will never change their mindset because they they're they're so entrenched in ego run amok that they cannot admit that they were ever wrong they're incapable of making an apology to themselves to other people and to creation and they cannot say the words I was wrong see I was never that kind of a person ever never ever once for I'm saying while I was a Satanist for a time I latched on to that but really if you show them the alternative evidence I would say I need to look into that and then once I looked into it that and you can you could confirm this you could ask people who know me personally if I do this in real life okay when alternative evidence has shown to me and it is convincing not if it has billions of holes in it that can be easily you know brought forward and shown to be holes in the model or paradigm but if it convinces me and it holds sound the rigorous testing I will say I had not considered that thank you for bringing that new information to my attention and I'm going to adjust my worldview accordingly and if you don't believe that I do that and have done that endlessly ask people who know me in my personal life if you could find them on social media and they'll tell you the truth about I won't put any words in their mouth let them tell you okay so I'm not just saying that I do that alright so what people fall into here is the exact opposite dialectic they think because religion is emisn t answer that atheism must be the answer when it's only another completely contrived setup part of the dialectic to hold people's minds enslaved so the left brain dominant atheist thinks like this and this is our mascot for for this show you know you saw him and I believe it was on anarchy and the occult part one that I gave it an orca poco in 2018 okay this is the mascot that I'm putting forward for a he looks like a nice righteous smug little prick doesn't he okay so you know and this is what most people who take on this worldview look like and sound like and think like and you know in general behave like that they're so above everybody else that they haven't figured out when you don't have anything figured out boy you don't have anything figured out girl nothing your mind is so small it's like you know the whole the old adage there's more in heaven and earth than his dreamt of in your philosophy okay Shakespeare you know he's saying your mind is so small you can't even conceive the wonders that are out there in the universe at all and this is one of the things atheism will hold you in a very tiny mindset that is incapable of perceiving the wonders that are all around us the worldview characteristics of atheism is that matter is primary and that there is no such thing as spirit there is no such thing as God or spirit does not exist the physical world is all there is so we just continue to smash subatomic particles down to finer and finer constituent elements we're going to get to that god particle and it's going to explain everything about the entire universe yeah good luck with that you know not only is that not going to work to explain the intended outcome a result it's probably going to end up in very destructive forms of energy that are gonna blow a blow a large portion of the earth up or maybe the whole thing atheists think that only the physical laws of the universe exists but there are no laws that govern behavioral consequences so there's no such thing as natural law to them and that is why they're destroying freedom that is why people in the freedom movement it's one of the main reasons the people in the freedom movement that subscribe to the polarization dialectic called atheism the religion called atheism are destroying helping to destroy human freedom without even knowing it and they think they're liberators they actually believe their liberators in this cause or movement so-called movement it's not moving anywhere never has been okay we haven't formed the movement we haven't formed the true community that is actually trying to move a weight from one place to another they don't understand people who subscribe to this worldview don't understand the great work they don't know what it is they don't know what's required to do it because they're lost their soul sick this is what soul sickness is comprised of that you've gone so far in the left brain and balance the you you have lost really your ability to commune with spirit and to commune with any higher form of consciousness than your own limited consciousness and that's why people in this mindset don't really have true compassion that's why they don't really understand natural law as what what is in nature objectively as the true arbiter of the difference between right behavior and wrong behavior and that's why they get a lot of it wrong that's why they will advocate for things that aren't rights to for human beings to do so when you think only physical laws exist but there is no such thing as spiritual laws that govern behavioral consequence you're going down a very slippery path atheist thinks think that science and I wrap it in quotes is the arbiter of truth then only if there's some scientific peer-reviewed journal that says yes this is how it is that that's how it is well there's a lot science gets wrong too just because science hasn't understand certain workings of nature doesn't mean that those workings of nature don't actually exist and aren't working you know science doesn't know everything because science comes from human beings the methodology of science so there are always going to be human error and flaw within it so we can't like quote-unquote trusted implicitly forever you know you could you could trust the scientific methodology up to a point but there are always some things that we're not going to be aware of variables and calculations we haven't factored in okay because we have limited perception and our measuring instruments have limited perception and there are things in the universe that exist well outside of the limiting defined boundaries of the human perception capabilities through the senses and even out far outside of our measuring implementations through scientific instrumentation that we use to extend our five senses okay so we have to understand science is not the arbiter of truth but this is what atheists think it is and that's why I put science in quotes real knowledge is not limited by this belief system okay what I would accurately say that they believe in a scientism meaning that they look at scientific institutions here on earth as the be-all and end-all and the arbiters of truth and finally they believe that consciousness is either purely mechanical and existing as electro magnetic fluctuations in the brain or it is meaningless altogether again as I said I've had people in the freedom so-called community come up to me and say consciousness is a meaningless term to me I don't even want to discuss it as a word I nothing that you can say about consciousness has any meaning to me at all imagine this yeah so they won't even a person like that would not even start watching what on earth is happening when I started talking about consciousness as the solution to the problems of the world and to the problems of the self-inflicted suffering of humanity they won't even start that journey of the discovery of knowledge of who we are and how we create the reality that we create because there's no such thing as consciousness it has no meaning to them but you're gonna be free don't worry about it yeah let's switch back over so these are the two polarization dialectics that have to choose from just like we have Republican and Democrat conservative and liberal you know we have all these what Coke and Pepsi McDonald's and Burger King oh my god they might throw Wendy's in here from time to time that's that's the Libertarian Party you know I mean when are people gonna learn how the divide and conquer strategy works I mean I can't I can barely believe folks it's 2019 I went over this in 2010 and hardly anybody understands it to the point that they're actually living it nine years later almost a fucking decade later that I have to revisit divide and conquer over to shows people should be embarrassed embarrassed okay that's where we should be that we should be in a state of embarrassment and dare I say shame shame on people for being this lazy and falling for violet polarization dialectics this easily I mean I would have thought people in this community were made of harder material we're made of tougher stuff their little fucking boys and girls that can be easily swayed and then you have other jerk-offs that want to say I'm a cult leader because I'm trying to explain to people how it really works I'm not asking anybody to believe anything I'm telling you belief is the beginning of the destruction of all freedom asks again people don't even understand how stupid they sound their mouth opens and liquid shit pours out and they don't even see how stupid they sound they don't hear it because they have in their minds what they want to believe and that's it and there's no room for anything else there's no room for real understanding for penetrating into real knowledge they already know everything there is to know and that's it and the height of hubris and the epitome of ignorance so here's what we're given oh and by the way yeah I'd be a really you know just hasn't another assign I'd be a really effective cult leader right because I explained all of the dynamics and all of the mental manipulation techniques of cults over many shows yeah so I'm a great cult leader because I've told people the techniques of cults yeah yeah makes sense doesn't it telling you man if these people had a brain cell with die of loneliness so then this is the dialectic we're given right this is it here is your two choices here's your Coke and Pepsi here's your Republican and Democrat okay but and this is where most people fall now they just think about this dynamic to the people in the viewing audience how many people in the world fall into one of these two categories would you not say that is over 99% of human beings that either have a religious belief system or are atheists you'd have some people you'd have a small sliver somewhere maybe okay I'll say maybe 1% then we'll say they're spiritual and they don't they're not an atheist but they don't subscribe to any religion but it's a sliver if that if not a paper-thin slice okay so as with all polarization dialectics they can ultimately be seen through if our consciousness is high enough and we can go to the middle path we can go to the Middle Pillar we can go to the center path the center point however you want to look at at the point of balance between these two hallmarks of extremism and polarity and that's where they can be reconciled and that is that natural law is the key to human freedom if we understand that there is a freewill component I'm gonna back up a couple of slides because I want to go back to the worldview schism slide and explain the the the middle path between these two or the truth which leads to enlightenment to true enlightenment once we have that knowledge is that there is a random component to creation and there is also simultaneously a determined component to creation or a deterministic component however you want to word it and natural law is the deterministic component and it works hand in hand with freewill so there's not just natural law there is natural law and freewill which is the random side okay when we understand that we have the freewill to behave however we want but we do not have the free will to be isolated from the consequences of how we behave there will always be consequences for action depending on whether you act in harmony with the laws of morality or not that doesn't mean there is not free will it means that is a hot pot on the stove there is a flame raging under it there is water in the pot it is what it is that's a hot pot that's a hot stove that's a hot flame that's hot water that's the state of it that is law it is in that state of reality right now if you do a certain thing as a result of your freewill meaning you have the free will to walk over to that boiling hot pot and put your hand in that boiling water that is within your freewill choice to do that and a consequence will be delivered unto you if you make that freewill choice that is how natural law works that is a natural state the heat that is being delivered to that pot to make that water boil is a natural state that exists in the 3d world you walk over to it you put your hand in it that's a freewheel decision and a consequence will be delivered and it will not be pretty okay and it works like that flawlessly all the time no matter who wants to say there's some supernatural being that can do that and not have received the consequences doing it you're full of shit anyway and it works that way 100% of the time flawlessly unless you're performing some nonsense party trick like putting some chemical agent on your hand that has some kind of like a you know protects you from the boiling point of water I'm not talking about any kind of trickery I'm talking about just doing it regularly in the natural world you'll see what will happen you'll receive minimum second probably third-degree burns where your skin will be blistering okay so we have to understand that there is both a random component which is freewill and it's working in tandem with the deterministic component which is the natural laws of creation going forward back to the dialectic where we split the dialectic and came down the mental path to understand that if we understand that our freewill is at work in the world in conjunction with the deterministic natural laws of the universe regarding human behavior and morality that is the key that is the ultimate key to the cage ladies and gentlemen it's the key to the head cage it's the key to the cage of our souls it's the key the cage of our hearts that our hearts are in and it's ultimately the key to the cage of the physical prison reality that we exist in here on earth on earth natural law is the ultimate key to all human freedom and that is why atheism one of the reasons that atheism is destroying human freedom because atheists reject the existence of natural law morality they believe we can make it up they believe morality is a human construct that we get to invent based on our whims and preferences and I will explain exactly why that's one of the most dangerous paths to go down to believe that morality does not exist inherently in nature and then it exists only as a construct of the human mind because if we are the creators of morality we can arbitrate it and ultimately we can take it away that's inescapable logic that if you're being honest with yourself you have to acknowledge if man is the creator of morality men can wipe morality off the face of the earth just as easily as he curse allegedly created it it doesn't work that way folks the behavior exists in the 3d world and therefore the characteristics of the behavior exist in the 3d world that is the natural realm the natural world that is why natural law exists in 3d reality in nature not as a contract of mind whether a behavior is moral or not is predicated entirely upon whether a behavior initiates harm to another sentient being or not that's it and people still don't get it and they don't want to get it it isn't that they are intellectually incapable of grasping how this works it's that they outrightly refuse that it works this way because they want to be God they want to be the highest power in the universe this is the problem with the human ego run amok the human ego run amok says there is no higher power in the universe than man because that's what I am I'm one of these creatures and therefore nothing can be more powerful and buying me I have to be able to do whatever I can get away with doing as long as I don't get caught that's what most people think morality is they're jokes who are ultimately leading humanity straight down the path to enslavement and destruction and they don't even understand that that's what they're doing you know it's this whole adage forgive them for they know not what they do know don't forgive people like this they don't know what they're doing in their ignorance they're causing your enslavement and your destruction and the devastation of your freedom and mind and that doesn't deserve forgiveness that level of ignore ents doesn't deserve forgiveness these are ignore and people that are ignoring reality in thinking that they can be sheltered from the consequence of ignoring reality and there is no such thing so going back to the slide here is here's what it is it's me saying this is the key I'm trying to hand you the key to understanding and again this is why her medicines throughout time have told people don't do this they I've been warned by other people I've been warned through books and lectures endlessly and even individuals personally don't do this humanity is a barbarian horde species that is to set in their ego to ever accept anything resembling truth you're wasting your time you're wasting your breath you're wasting your energy and guess what folks I know that's true I already know it's true and I reject it anyway I'm gonna put it out there just because it's the right thing to do and for no other reason okay I'm not looking for anybody to accept this I've long since come to the acceptance point that the vast majority of people will reject this until the day they die and want to kill me for saying that it's true doesn't fucking matter go to say it anyway because it is true and I don't serve human beings I serve the truth that's the force that I work for I don't work for people I don't even work for me so this Center path this middle way okay is what ultimately shatters the illusion of the polarization dialectic and the center path the reality of what is go in the universe that we have to align our perception to is that yes there is a creative force at work in nature that is intelligent and is ordering it's an ordering principle that is attempting to drive the universe toward a certain direction of more morality more freedom more complexity more understanding more consciousness Terence Mckenna once described this as a complete the universe is a complexity conserving machine okay it's bound by law just as machines are bound by the mechanical components that comprise them and then the software if they have a software component the universe is no different the physical matter in the laws of creation are what make the big machine that we call the universe that's a it's a mental construct ultimately but there is a high level high powered intelligence that runs the machine that runs the clockwork of the machinery and I call this world view the world view of simple deism and again this is not religion people will insist this is religion no it is not and the only thing you have to ask yourself is where did a physical law come from to realize we know nothing about the origins of laws zero even myself you say if you tell me where did natural law come from I have to tell you it came from creation so what does that mean what does that mean that I know about where it came from what are the characteristics of that well it's intelligent it's conscious it's attempting to learn and grow and create new forms but can I tell you what that law is how it got put into effect how that consciousness or intelligence put it into effect no no more than I can tell you what what put the law of gravity into effect that's not for me to tell you okay this is what simple deism is simple deism means that laws exist in creation and man didn't put them there higher power did and that sit that's basically nothing more than that it is a balanced worldview that too far too often goes completely ignored in the dialectic war between atheism and religion because they don't want you to understand this worldview the simple deist worldview is that there is no separation between creator and creation they are one see the religionist wants you to accept that the creator and the and and the creation are separate that's why it's religion okay that you know the creator is something independent and separate from the creation and then the atheist just wants to take the creation aspect and say that is it exists independently and there is no creator they're both separatist worldviews separation worldviews none of them are holistic integral worldviews this is the only holistic integral world view the deism simply means it comes from the group the Latin root Dei which means God where we get the word deity obviously okay so it simply means there is an existence of a higher power or creator and if you're okay with the word God use it I am I'm fine with that word many people are not you're not fine with it use the word creator use the word creative intelligence creative force I don't care what you use doesn't matter to me again I'm not here to tell you what that force is I'm here to help you explain that force put the laws of nature into effect that we experience and that we are bound by and here's the main thing people always talk about oh there's no evidence wrong there is evidence for a creator the evidence of the creator may be scientifically discovered and known through the observable effects of the laws that the

Creator put into affecting the universe we know the existence we are able to discover the existence of the Creator through the observable effects of universal laws when you observe the effects and understand that they are quantifiable and knowable then you understand something put those laws which always work that way flawlessly or at all times and places into effect and creation something had to put them in effect and again it doesn't matter what you want to call that force you can call it anything you want neither the physical nor the spiritual domains take precedence over the other in essence they are one and the same this is the spiritual domain you're in it now it's not in Hereafter this is the physical domain the physical domain is that the body of God if you will the body of creation the universe is that body it is the spiritual domain they are not different they are one in the same this is so impossible for people who are rooted in either an atheistic or a religious paradigm to even conceive of they've never thought on this level ever once for a day in their lives and that's how the manipulators wanted that's how the controllers wanted they want that people can't think at this level and that they reject the middle path which is the true path because they want them stuck in the dialectic which is always going to be about warring and fighting you know and it's not about Oh getting into such non duality minded thinking that you think nothing matters no wrong incorrect not spiritual at all okay that's not what do out Everson's non duality means it means that seemingly paradoxical scenarios can be reconciled by getting out of the dialectic it doesn't mean oh don't take up the polarity of standing up for gun control because the manipulated masses want gun control and then you're falling into a non-dualistic mindset No one thing is true and one isn't see oh oh you're going to fight all the status because they want to enslave humanity and want government to continue to exist and keep keeping humanity and his condition of slavery so oh you shouldn't now stand up against that because that's dualistic thinking wrong one is right and one is wrong one is false and 1 is true spiritual anarchy is right and true and is based on principles and morals and government is slavery and is a false illusion based on the falseness of authority the false belief in authority and it does harm to people it's violence and it's coercion and it's enslavement so that's not what we mean by duality versus non duality ok yeah and people go into this right-brain form of imbalance where they think oh we should try to strive to go into this you know thinking that nothing exists worldview not nothing exists it's all construct it's all an illusion and therefore no no no action here matters I mean nothing could be further from the truth and nothing can represent fake spirituality more than that the truth is is that this is a place of learning and growth the universe is a place of learning and growth built upon law for the benefit of all beings not just humans all beings this is a place of learning and growth built upon law it's not random it's not pure chaos we can turn it into pockets of it into chaos by our free will if we ignore the law which are the laws of morality and which is exactly what we're doing here on earth we've turned this into a chaotic prison planet and that's why Earth is quarantined folks you think the rest of the universe wants this infection you think it wants this viral disease called human beings infecting the rest of this quadrant of the galaxy you got to be crazy we ain't going nowhere till we get our heads right until we get our heads unfucked and uninflated ok then maybe we'll visit our car we'll be able to meet and visit our cosmic neighbors but not we're thinking like this not while we're stuck in these Diet polarization dialectic paradigms and people cannot seem to get their head out of them they're just clinging on to them like they would cling onto the body of a dead corpse that they were you know loved like a relative or spouse and they're long dead crumbled to dust and they're still clinging to their fucking bones that's how these people cling to these false paradigms the worldview of simple deism puts forward that natural law behavioral consequence are in place for our maximum evolutionary progress not as any kind of a prison mechanism or you know as the dark ocultist seem to think oh because there's laws that bind our behavior that we're in a cosmic prison no the laws that bring the consequences of behavioural free will choice to us are there for our maximum benefit so that we can understand what happens as a result of what we do we can understand the results of what we get in manifested reality as a result of the behaviors that we put forth into this reality if anybody can't see how this approach is far more balanced than realistic than the approach of either scientific materialism or atheism or religion I feel sorry for you at a soul level I feel sorry for you that you're that childish that you are and people will call these ad hominem attacks no they're not they're the actual state of consciousness that one must exist in to keep buying into the dialectics and not see the other path that can lead to true freedom it's the mindset of a child who wishes to eternally remain a child that is what it is it's the mindset of someone who has not grown who has not progressed spiritually and who has not come into a mindset of cosmic adulthood that's exactly what it is and here's one of the things that holds people in that paradigm of atheism scientism okay and I'm not the coin ER or the inventor of this word it's been around for a while scientism is an exaggerated trust in modern scientific institutions to such an extent that the individual extending such trust believes that these institutions are the only source of verifiable truth even many so-called quote-unquote anarchists still believe in such an institutionalized worldview of science to a great extent they also accept without question the completely outdated and definitively scientifically disproven paradigm of Newtonian materialism many within the anarchist movement cannot grasp that true science is a methodology of truth discovery that is actually an ongoing process and not a belief system not a rigid hardened dogmatic belief system as dictated by modern worldly institutions some of the foundational hallmarks of government grant money funded materialistic science quote-unquote include ignoring entire data sets to fit their worldview and fudging existing data sets to fit their own deeply entrenched worldview the emerging modern sciences of epigenetics and holistic biology are just now beginning to turn the tide in such a world view by rightly and correctly incorporating consciousness and metaphysical understanding into their research methodologies and I know a lot of people will have problems with the word metaphysical okay but it just means meta is a prefix that comes from Greek that means to go beyond it means you are looking beyond the purely physical and you are going into the domain of consciousness and spirit to understand what gives rise in the call realm to the manifested physical reality that we experience that's all it means you can look at it as metadata or what is metadata metadata is data that describes what other data is like or behaves like so metaphysical just means it there's something that goes beyond the physical that has an effect upon the physical and has an effect upon the physical manifestation now I looked long and hard to try to find an image to describe scientism and I came up with this one which was a person writing on like one of these clear you know dry erase boards in a white marker but he is completely blurred and obscured as a result of the equations that he's putting out there through what looks to be a biochemistry and I wrote underneath it that scientism does very little to advance real understanding it mostly serves only to cloud our understanding of self as this image is portraying the person is getting lost in the trees and cannot see the forest nor can even see that he's in the forest okay he's getting lost in the minutiae which is not the purpose of scientific discovery scientific discovery should be about the betterment and advancement of humanity and this is where science has gotten lost on the way by removing the spiritual component the new emerging fields of epigenetics and holistic biology or simply new biology are what are attempting to begin to put science and spirituality on a healing convergent path instead of the incorrect worldview of diverging them to the point where science thinks that there is no such thing as spirit also completely disproven if you look into modern sciences again the people who think that way aren't privy to the new shit in science ok to you know put a funny anecdote to it ok but they're just not privy to the new science as all comes down to now I want to put people onto some names I was going to put them into the presentation but I'll just give you some names okay you want to look into in the fields of epigenetics Bruce Lipton again in holistic biology or new biology as well dr. Bruce Lipton okay he wrote the book the biology of belief and many other things on the wisdom of yourselves is another excellent book to check out by Bruce Lipton okay and it's out in audio series as well so Bruce Lipton talks about epigenetics the factors and consciousness that go beyond the genes the genes do not control our reality or our experience they are simply expressions that are actually activated through consciousness and the environment and if those things can be changed the expressions will change okay it is not like the Newtonian paradigm of material reality when it comes to genes of materialism okay we are learning in new fields of science that it does not work that way so many people in the older generations you know beyond my generation like even one generation older than me are so stuck in that Newtonian paradigm that genes are everything no your if your genetics are a certain way that's just it that's just it you were dealt a bad hand of cards under it's not true it simply isn't true and the emerging fields of epigenetics and holistic biology are proving this now another person you want to look at when it comes to epigenetics and spirituality being merged with modern science is Gregg Braden Gregg Braden is also a great researcher that he wrote something I think called the God code about the the the expressions in human genes or the God matrix something like that he has many books out he wrote something called fractal time that I think is a something that explains how consciousness can affect human outcome on a species wide level okay and now how we are given Choice points in time and that our consciousness if we learn and grow enough and we mature spiritually we can change entire timelines okay that they are just tendencies for expression okay they are not set in stone endless cycles as many people erroneously believe they are from their studies of you know the Vedic UGA's etc which are not saying that they are set in some cycles they are saying consciousness has everything to do with how they flow okay and then finally a Joe Dispenza dr. Joe

Dispenza he's worked a lot in the field of epigenetics written many books I highly recommend his work especially you know when it comes to understanding how the subconscious works and how you know we have to do internal healing work upon ourselves and our own subconscious mind because that's far more powerful and having a much deeper effect see it's the metaphysical part of the mind it we want to just look at look for consciousness in the brain that's not where it exists at okay this is like a receiver antenna like a radio you know do you look for the person who's speaking on a radio inside the radio you know are you looking in your your speakers connected to your you know desktop computer for from my voice you think I'm a little guy inside the monitor no you realize that it's a signal being sent to the device it's the same thing when it comes to consciousness in the brain you know we're using it as an as an antenna / receiver receiver / transmitter and the subconscious plays an infinitely stronger more powerful role than does the conscious mind often in determining or in helping us to understand why we choose certain behaviors that we do and this is what I talked about regarding shadow work you know there are many people that will use different techniques in conjunction with shadow work physical techniques you know shamanic dancing drumming tapping you know meditation yoga it goes on and on you know sweating you know extreme physical exercise psychedelics you can go on and on with the methodologies you know forever okay but it's about actually getting into the nested regions on the subconscious and changing how the conscious mind ultimately works because that is part of the metaphysical domain it goes beyond the physical brain this is all part of epigenetics and new biology and if you don't research those emerging Sciences I'm sorry folks but if you don't research those emerging Sciences you have absolutely no idea about what's really going on discovery wise in science in the modern world and you're stuck in a paradigm that does not incorporate consciousness that does not incorporate the metaphysical aspects of our reality okay and therefore it is taking an entire section of the world an entire section of reality and is saying all of this is off-limits for consideration when it comes to what is actually happening scientifically and we can only look at this limited paradigm that only exists in the physical domain when it when you look at it is a sliver it's a tiny little sliver in the visible spectrum in the auditory spectrum okay in what our senses and our instrumentations can pick up what we say is a quote observable in the scene world is a sliver compared to what actually exists I highly recommend David Ickes work on that topic who has done a great job in explaining that the metaphysical reality goes far beyond the physical realities much wider and this is what the world of occultism incorporates okay the definition of occultism is that we are looking into the unknown or unseen world the largely unknown or the largely unseen and that exists in the unseen realm far more than in the seen realm so so that it involves the incorporation of a much wider and larger worldview and a more complexified worldview than that which is ordinarily taken by the average human being and the average human being defaults to one of two speeds they either look at the simplicity that religion offers them because their minds are so simple they can't operate on any higher level or they say I'm gonna dump all religion and become an yes and say there's no such thing as spirit or consciousness at all and both of those are childish worldviews that don't incorporate the totality of reality they haven't looked far enough into what's really taking place in our world drinking a shallow draft from the Parian spring at which point you will become brain imbalanced and intoxicated and only drinking extremely deeply from the stream of knowledge will sober you again okay and that's where most people fall short they don't go deep enough in their knowledge and in their understanding and that's certainly what scientism promotes so not that I could ever give enough evidence for anybody to accept it so I decided I'm not going to try to push that on people I'm giving you vistas and areas and avenues of research to go down which there are endless once you start there you can go into endless other areas of research I've given you three four names so far actually five okay where you could research for the rest of your life on the five names I've dropped in this one show okay but if you think you know everything then you know keep living how you're living and expect a different result which you've never gotten and never will atheism is actually a religious belief that is completely inconsistent with the scientific method now this is not me saying this this is a Templeton Prize winning scientist in physics saying this ok I honestly think this is a Marcelo gleiser he said I honestly think atheism is inconsistent with the scientific method atheism is a categorical statement that expresses belief in non belief that's a circular argument I don't believe even though I have no evidence for or against period that's what an atheist says it's a declaration but in science we don't really do declarations we say ok you can have a hypothesis and you have to have some evidence of some evidence for or against or for that an agnostic would say I have no for God but on the other hand an agnostic would also acknowledge no right to make a final statement about something he or she doesn't know about so if you don't have evidence for the definitive non-existence of God just saying that you don't believe in it is a circular argument it's saying I don't believe I believe in a non belief okay it's a circular argument and he concludes by with the in this statement with the adage the absence of evidence is not the evidence of absence okay which is a eternally true statement just because you don't have evidence to support the existence of something right now doesn't mean that it definitely doesn't exist it doesn't mean that it does exist either okay but just saying that you don't believe that something exists is not proof that it doesn't exist and I would argue we have more proof of the existence of a creator through the observable effects of the laws that have been put into place okay so moving to the next slide natural law is a science it is not a belief system and again I make no bones about the fact that 90% of people will not accept this are not going to understand it will not look deeper into it will just say you're wrong you don't know what you're talking about I do and shut it off so guess what if that's your approach I don't care what you think do that stay dwelling in your ignorance thinking that from the position of the low level of knowledge that you have that you can somehow solve the problems of the world when there is no way of doing that without growing spiritually and understanding the wider laws that are applying and active in nature if you don't understand those laws you are going to be going blind through life and you're going to be unconsciously co-creating the shared reality that we all live in and this is what 99.9% if that's probably a very low estimate of people in the world are doing they're co-creating completely blind because they have no they're in total deep ignorance of the actual laws of nature that are operating all around them natural law is a science of morality that can be directly observed in the 3d world you don't have to believe in anything there are no religions no rituals no practices or beliefs that you have to subscribe to to understand the existence of natural law at all the evidence of the existence of natural law is the resultant state which humanity receives as a direct consequence of its aggregate behavior or in other words the human condition itself and yes there is a correlation in this instance between manifestation and causation okay correlation and causation do perfectly align in this instance in many cases they don't but in this instance they absolutely do all you have to ask yourself is the human condition freedom are we free our human beings free are we free to exercise our rights unrestrained or we're being stopped from doing that are we living in a perpetual state of duress which is the continued threat of violence being conducted upon us if we don't comply with the commands of government the ruling class that's the human condition duress enslavement violence coercion it isn't freedom and when we understand that the law of freedom has the quantifiable effect that aggregate freedom is directly proportional to aggregate morality meaning as a society behaves more morally they become more free that we understand that natural law is actually in effect by the consequence that we have received societally are we an enslaved species yes we are therefore we cannot be behaving morally as a species period the end that is how the law of morality works in nature and it is in effect it does exist and it has an effect upon our behavior whether you like it or not or understand that or not there's nothing you could do about it no more then you could change the you know the way a galaxy were okay you're not powerful enough to change those laws nor you powerful enough to remove the operation of natural law the moral laws of consequence of behavioral consequence you cannot take them out of effect any more than you could put them in effect the consequences will be manifested in the human into the human condition either way as a direct result of the moral quality of the aggregate of aggregate human behavior collective human behavior we collectively reap the result of the behavior that we collectively so so the law of freedom is simply this aggregate morality is directly out sorry aggregate freedom is directly proportional to aggregate morality that's what that that equation written right there at the bottom of this slide is the sum of the all of the human freedom that is experienced on earth by all of the human beings on this planet is directly proportional to the sum of the quality of moral behavior of all of the human beings acting on this planet the sum of freedom is proportional to the sum of morality it is eternally this way and can never be any other way and the problem is see this is this is Revelation folks that's what this is when you deep penetrate deeply enough into nature itself into the way nature operates and works this is what will happen eventually if you stay true to the study if you stay true to the discovery process you will penetrate it and go beyond the veil and then it will be revealed unto you how it actually works that's what enlightenment is it's knowledge about how the laws of morality work to bring us the consequences of our freewill behavior in the form of the experience that we undergo collectively here on earth and anywhere else in the universe for that matter but human beings are so deeply entrenched in ego and ignorance that they refuse to even look into it to any extent to end let them forget any penetrating extent they won't look into it from a cursory extent moving to the next slide this is one of the reasons that the word natural has been so co-opted and degenerated to a point where you can't even say natural law and have people understand what you mean by it they want to say oh you're talking about the laws of Darwinism or you're talking about the laws of survival of the fittest survival of the most brutal no I was never talking about the law of the jungle I was never talking about how animals behave to each other ever that is exactly what natural law is not I'm gonna do a whole presentation one day here on the air called what natural law is not how about that that's gonna be an upcoming show you know I got shows up coming on nutrition and morality I got a show coming up on what natural law is not I'm still going to do a show to identify the mavens of your family and/or friends set and how you can work on them to help them to understand so that they can subtly influence other people in the ways that they naturally do okay I have a lot of shows planned I'll announce some topics next week maybe of a future shows but I wanted to take a little bit of time too and I know we want we want to go to callers but I have a couple slides left and I think are very important to go through so we will be taking your calls for the duration as soon as I finish my slide show the etymological root of the word natural this is very profound for people who have not looked at this before hopefully you will know a lot of them people know in my work what I do is I break words down from there etymologically okay so most people have never even heard of where the word natural the word natural came from Latin language okay the English word nature is enema etymologically derived from the ancient Egyptian word n TR okay and I'll get to the uncie ation of that in a moment but if you transliterate that from the egyptian when they took it into coptic they actually spelled out the phonetic pronunciations of their words that were originally in hieroglyphs it was transliterated as NTR okay and it meant God in the original Egyptian it was symbolized hieroglyphic Allah as a simple stylized flag on a pole which represented a force which was known to exist through its observable effects but difficult or impossible to see with the eye now many people have also interpreted the symbol of n TR the flag on a pole to be an axe and that is a alternative end I would say possibly equally correct symbolic way of decoding the hieroglyph okay because it was a symbol of power and strength in the physical domain that could cleave things and could take them down to their constituent elements by breaking it down further and further and further and this is what the force of nature ultimately does if we are listening to it if we are paying attention okay and it could help us to break ourselves down and get us out of ego it can cleave our minds and get it out of the ego you know because we're certainly in a state of a complete complete entrenched egoic mindset which is holding us enslaved and it needs to be broken down and broken down and broken down until it's undifferentiated and goes into unity consciousness to help understand to help us understand what the actual laws of nature really are so continuing with this etymological breakdown and TR the Egyptian word meaning God was actually pronounced nectar okay there's the phonetic pronunciation their net sure extremely close to the English pronunciation of nature and many would argue who have studied Egyptian that the vowel sounds were not the important parts they didn't really have vowels as they're not really present in a lot of the Semitic languages like Hebrew okay so the vowels were not important the consonants were so it could easily have been pronounced nature okay so literally the word for God and Egyptian was nature see that's when it was integrated that's when we had a holistic worldview that's when they understood their words was no separation between the natural physical domain and the spiritual domain and that's the understanding we need to get back to by bridging science and spirituality from the divide the chasm that has you know erupted between them all unnecessarily because of the separation brain imbalanced worldviews of most human beings now the word the the suffix al just to finish this I should have just added this into this slide and I left it in its simple form al comes from a sanskrit a root and it means of from or relating to so we tack on al to any word coming originally from ancient Sanskrit and it means it is about this it is of this is from this it is relating to this so when we take the word NT our nature God and we tack on the root the Sanskrit root al natural okay it literally means of from or relating to God okay which is the same thing in the Egyptian language as nature okay it's this holistic integral worldview that is not a separation worldview of the creator separate from the creation of nature separate from spirit they are one in the same and that is the middle path worldview many in the so called freedom movement and I always put freedom and anarchist in quotes when I talk about these kind of people subscribe to atheism and scientific materialism actually outdated and disproven paradigms but they are the very same ideologies which drive Marxism socialism and communism and I'm gonna add they drive Nazism as well absolutely okay but you know this is a historically provable fact I'm not going to back this up with anything you can research it on your own whether the Communists were atheists whether Marxists are largely atheists and socialists or largely atheists it's should be common sense understanding to anybody at this point in the game okay what I do want to ask is the much more important question than just recognizing that these are the idea that atheism was the underlying ideology which drove Marxism socialism communism and Nazism okay I want to ask why why did they have to make the religion of atheism the underlying belief system in these ideologies why does the religion of atheism destroy freedom and drive totalitarian ideologies such as Marxism socialism Nazism and communism why is that the case most people have never asked that question and you should come to a accurate understanding of why if you've listened to me and understood what I've said thus far now I'm going to put up a couple of slides here folks that I've deliberately arranged the way that I have arranged them and made the text as large and bold with a satanic Baphomet behind a couple of slides I'm going to talk about that I have because what we have to ultimately understand is that everything that I just put up on that screen and the last slide which I'm going to go back to okay let's move back to the slides okay okay the Marxism socialism Nazism and communism I've put them all together for one specific reason because if you really understand what these ideologies are you understand that they are one and the same ideology and that is the ideology called Satanism this is what Satanism is and is creating so listen to the power of this statement right now for the very reason that the religion of atheism postulates that there is no higher power than humanity atheism is the ultimate pathway to moral relativism in any society in escape ibly once you have the people buying into atheism the next tenant that you can bring them into in the Satanic ideology very easily is moral relativism now why why is that the case that is the case because if someone accepts that there is no higher power than man and there's ultimately no creator of the laws of morality except man himself so if we made what our arbitrary construct that we call morality is and it's not something that exists in the natural world and that was put there by the Creator then we can change what morality is or means at any given time or location and that is called moral relativism and it's one of the hallmarks of the ideology called Satanism the religion called Satanism that I was a priest within so moral relativism is the destroyer of all freedom moral relativism is the ideology or religion that objective morality does not exist inherently to nature and that right and wrong are subjective constructs which human beings may invent and arbitrate according to time location circumstance or preference in truth and reality morality is objective rights can never become wrongs and wrongs can never become rights and any place or time regarding how many people believe or wish for it to be so and that is for the reason that man did not invent rights rights exist inherently to creation they are not arbitrary contracts of man going back to the slides any society of human beings that believes that there is no natural objective difference between right behavior and wrong behavior and therefore believe that human beings may arbitrarily create or decide what right and wrong are for themselves is a society that can never truly bring their own behavior into alignment with natural law since the governing dynamics of human freedom are predicated upon the aggregate morality of a society it is a total and permanent impossibility for true freedom or anarchy to ever exist in a society that embraces moral relativism the Satanists the the dark Luciferians the social engineers the mind controllers of this world they all know how that dynamic works ladies and gentlemen that is why they are bringing people into the mindset of Satanism so that they are easily divided and ultimately conquered and enslaved you have to get people to buy the Satanic ideology at a much lower level than the Masters of the ideology and the masters of that religion in order for the masters to control the slaves of that religion and here's the other slide that I backed up with the Baphomet symbol of Satanism ok all subscribers to the religious belief that rights are a human creation and that includes atheists because they most certainly do believe that by definition also religiously believe that rights can be altered or abolished at the whim of human beings now that bears repeating again in this episode all subscribers to the religious belief that rights are a human creation because there's no higher power than man of course by definition also religiously believe that rights can be altered or abolished at the whim of human beings ladies and gentlemen that's why all totalitarian regimes want their slaves to become atheists that concludes the presentation form for this episode of what on earth is happening I do want to remind people you can make a donation through the donation gifts area of the site my new Tesla presentation Tesla and humanity's missing paradigm shift is now available on gift stop what on earth is happening at the in the form of DVD and flash drive so please if you are do find value in what you've heard on this show in this episode and in others consider going to gifts and making a donation for gifts items there also the Ark drive is an offer that is still on the table and hopefully I will be able to continue to offer that indefinitely into the future because there are people who have been taking me up on it and really expanding their knowledge base which is what I like to see so if you're interested in the Ark Drive which is called the amazing repository of knowledge one terabyte of data from it is all of the research that I did by putting all gathering all of this data and putting it together and studying it to come to the understanding that I have come to I place it on a terabyte hard drive that you purchase and you get the hard drive and ship it to me I put the data on it and ship it back to you okay so you could read more about that offer and sign up to get the shipping instructions at what on earth is happening calm slash Ark since I did video on the ark since I did a whole episode on the ark people have really been on the ball and been very good very respect respectful of the offer and have really uh there hasn't been one problem or one damaged dryer I used to have damage drives a lot more and people have visually put together what I'm looking for to get your property over to me safely and get it back to you safely so I very much appreciate people doing that and thank them for doing that it's made my daily life a little bit easier as well so thank you for taking those instructions seriously and being respectful regarding the ark offer and finally if you want to make a straight donation to what on earth is happening you could do it ten different ways now on the water earth is happening calm website just hit the donate tab or button you could do it through PayPal you could do it through five different crypto currencies you could do it through patreon now you could do it the old-fashioned way through a check through a money order and you could also go to the Amazon wishlist page because we always have some technological items that will you require to keep things going smoothly here at what on earth is happening there's a couple of them a couple small items still up on the wish list nothing major thank you to everyone who has donated you've made this work go a bit smoother so thank you so much for those who have been willing to contribute and I have found value in the work and have contributed because they have found value in it so thank you and that's that's all for today with with presentations and slides and housekeeping so let's start going to your calls give me a moment I'm going to close up my other stuff here and I'm gonna switch over to discord all right I'm on muting okay are you hearing me okay okay all right so I'm gonna jump into the call room there are a lot of callers waiting here my goodness okay all right so all right let's go to let's go to ponder ponder you're live on what on earth is happening episode number 203 welcome to the show you have to unmute yourself you are unmuted on the server end unmute your microphone on your end going once going twice alright I'll see if I can come back to you later let's go to one shoe one shoe you're live on what on earth is happening welcome okay I should be hearing everybody I am unmuted and not ok I'm gonna mute him back up alright let's go to Ivan from Phoenix Ivan from Phoenix you're live on what on earth is happening welcome hey Marco there he goes he's got it working right folks listen up Ivan before you start it's ok with a little bit of background noise but I just want to say people who are using discord just use it on your own a little bit before you jump right in like try to understand how it works ok I understand there's a little bit more to it than your average you know chat program but just you know maybe read a little bit about it like I've read the instructions in the what on earth is happening chat when you come in the text channel called wo e IH just you know check that out that'll help you to understand what you need to do once you get into the channel ok because a lot of people are just technologically not ready when I go to them and it kind of like you know disrupt not not disrupt but it create a free-flowing show so please if you're gonna go into the calling room try to be technologically on the ball if you can we've been doing this for many weeks now and you know if you're not sure of it maybe work it with a friend until you do become sure of how it works okay I'm just asking that all right I even go ahead yeah you're cutting out I think it's because some of the other mics might be on and it kind of interferes or something I don't know when I listen to you on this board yeah it's uh it's it still doesn't have good duplexing and I'm hearing that from several people generally if there's not a lot of noise on the other person's end it doesn't happen in your case you're gonna hear that because you have noise coming through the mic and that is going to create a duplexing situation which discord does not just it just does not handle very well which is why I recommend a very quiet environment using headphones so you'll have to bear you'll have to bear with me on that but go ahead and go ahead and make your point Oh or your comment anything you want to talk about movie stuff I know last week where was a crawler that referenced the movie Suspiria and I started watching and I didn't finish it it looked very very strange and it looked like it had some ritual abuse stuff and some satanic stuff in it I couldn't make heads or tail of the beginning I went about halfway through it and had to stop for personal reasons I had something else how to take care of I'm gonna go back to probably finishing it probably one night this week so I'll be able to comment a little bit more on it but it definitely looked like some sort of a head job regarding some type of ritualistic stuff for sure exactly that's what I picked up was the ritual on dance how dance can be a big ritual and you know people artists dancers perform big things that occurs graph about an idea of what you know reasoning behind it might be what energetic you know connections you might have I don't know a physical you kind of harped on intention intent or intention intention and I think I don't know I've been talking a lot about intention and I think we're falling on opposite sides the same way we did with government when I mentioned government the external entity government is a feeble internal government you you know controlling your own mind is the positive I think intention we're on the same on the opposite things that that to internal intention you know your intention yeah that's all bullshit unless you do actually however we need to be aware of the external intentions coming towards us also known as agendas or agenda corporate agendas religious agendas what are their intentions so those are the things you know why I kind of use the word intention sure instead of agenda it's it's it's somewhat of a slightly different connotation but I hear what you're saying and I agree you know their stated intentions of why they do certain things are not the real reasons we have to look at the action and what it actually produces in the real world not just what these people say okay and then um I know just to put it out there people that might be local to Arizona I'll be speaking next Saturday up here at a local event up north called Anarchy's ona and that spawn off the an arc of poco some local guys decided to put that together and reached out to me and invited me to speak it's just a little 20 25 minute talk but that that'll be the first time I'm going public and it's interesting you were talking about religion in this episode yes that's gonna be kind of my topic is money or proxy proxy ISM people that are proxy Asst and don't even know it in that so you know synchronistically you're talking about religion and I'm gonna be talking about that Nick well Ivan I want to wish you really a whole lot of luck I know you probably won't even need luck because you're gonna do really well on your first public speaking engagement so you know absolutely uh you know put it out there and I wish you the best with it so that's anarchy zona that's all this coming weekend right yeah Saturday all-day event yeah it's on my website for your my name's EECOM has a link to that and tickets on facebook on our key zona and I did try and get ahold of you because mark I needed help from your flag show fairies you know those things are not easy to put together I'm up to about 50 slides just okay going around there to put things up I'll tell you why I will give you a shout to give me a shout tomorrow I will probably have some time to help you out with some of that without a doubt I'm being sarcastic mark we remember a few weeks ago you were talking about the slideshow presentation fairies that they make those oh the fairies yes okay so you don't really actually need my help you're talking about that the fairies came and helped you out and it's all good yes they're awesome man aren't they great yeah they're so out de Ivan people were complaining that I dare to put my presentations on donation gifts and and you know ask for a donation for them before putting them out for free I should just have every single thing that I do forever and have nothing coming in so that I starve can't pay bills you know can't live in a society that unfortunately is brainwashed toward money you know but it's like you know I live in a house like everybody else I'm a human being I need to consume food nobody's coming over and going look let me just give you all the food that I have you know unfortunately I require that too it's like you know they're not looking at it from a realistic point of view I cannot espouse money and tell you it's a form of mind control but if I don't bring it in I can't survive and continue to do this work until we undo the monetary system and replace it with some something else that is more spiritually inclined right now everybody is in that situation I would never begrudge another researcher like if you want to you know put your put your presentation that you do at a dark Ozona on DVD and flash drive and say give me a donation for this Who am I you're not allowed to do that man you know it's it's unbelievable what people expect for free so another show I am gonna be doing is called the entitled attitudes of modern-day Millennials and also some other people who are from foreign countries outside of the United States that have a very socialist attitude which that's all safe for now but I have noticed this attitude of like give me everything completely for free I put every single one of my presentations that I have ever done for free on my website and that's not enough I can't put one on the gifts area for a couple months before I release it for free I'm not allowed to do that Ivan yeah Oh too bad you don't control yourself Marc I mean hey we need to submit to these authorities people don't even know what they're putting out there a lot of cognitive dissonance on the body yeah there is and here's the thing Ivan you look up these complainers and these are you know alleged critics you know they're not really the critics of anything except showing how naive and entitled they are in their very they're very childish mindset of not really understanding how the real world operates or what kind of expense is going into doing things like this and you know what was I just getting at about how they you know they're their whole entitled mindset just shows you know how they don't really understand how reality in the year 2019 works and you know they want to they want everything just given to them they don't want to work for anything you know it's it's amazing so yeah I know that's unfortunate because we some of that concept yeah in a future higher elevated consciousness society where we've grown out of that necessity for this belief in product ISM where you know things that are in existence we all have a right to access you know food clothing shelter and

and you know where we outgrow this belief yeah everything can be freely given receive and shared and all that fine yeah when we're at that level of consciousness right but you know in the modern world it's like to do this stuff what do you think none of the equipment that I am using here cost me anything what do you think everybody again like the equipment ferries they just delivers the equipment stork I forgot about him the equipment stork delivers equipment right to my second-story window he hovers out there he says here's a new camera mark it's the equipment stork yeah I have a new laptop for you you know I mean imagine this and then you look up these complainers these chronic complainers and you know what they've done publicly that's what they've done publicly how's that how'd that come across on this court you know and I caught it I calculated yeah dude I I real I broke out MATLAB on the computer I calculated that that's exactly what they've done that's the exact amount you know I took me a long time to calculate I had work a few days to calculate that exact amount but that's how much work they have out there publicly yep hmm Ivan it's always refreshing to hear from your brother great do some great work out there next week I know you don't even need to hear good luck but all the best okay all right thanks mark next day on the next week Sunday if you get to my car absolutely you got it man all right take care all right Ivan from Phoenix always great to hear from let's go to who do we have here let's go to let's go to electric boogie electric boogie you're live on what on earth is happening I think I tried you last week did we get to you hi I'm mark can you hear me now yes I can there you go welcome nice to finally be on the show absolutely yes I just want to thank you for your a great and as you say it can 99.9% of all people don't really get it it's well you know as long as they're not like if they're staying attached to mainstream forms of media and entertainment and they're not reading the right material they're not reading the right books they're not watching the right podcast they're not listening to the right lectures it's not just about how much data comes in but it's about what quality of data comes in and that's the unfortunate part is they're not really reaching the quality material yet and you know hopefully if they dig a little bit deeper and they spend a little bit more time and pay a little bit more attention they might get there but you're absolutely right too few and too far between our quote unquote getting it as of right now unfortunately you know I've been feeling drawn to start making videos in one way I believe that I'm one of those people here to bridge the gap between teachers as yourself which from South with the knowledge you know for the people as me and others here you know with all health interests and just in the truth and I want to kind of bridge the gap between your information and the more like mainstream ignorant general population but I'm not really sure how how to do that so I guess that's like it's not really question but it's you know I've been pondering about this for quite some time now I'm not really sure how I would you know like reach out to them more why I hear this a lot that people want to start reaching out but they don't know quite how to do it or how to begin so let me ask you something that might help you determine where you might how you might do this work effectively would you want to do this with video would you want to do it just audio do you think that you would be do well standing up in front of other people and speaking like in a presentation format would you rather not be seen but just be heard like what ideally do you to yourself a form of media or what a situation would you ideally see yourself delivering your content or information in yeah I've been thinking about that a lot too and uh and you say you want to take up in the maybe other so your mic is breaking up a little bit just repeat the last part you've talked about righteous anger yes and I've been feeling that a lot you know for a long time but personally I feel that like people don't listen to me being like a so-called angry insane tinfoil hat you know that for me I think maybe doing like comedy sketches or something that like kind of would make people think but like yeah I've often thought about that I know a lot of friends who are very much into delivering things that way I think it could be powerful if it's done right so if that's your you know chosen form of expression then that's one way of getting it out there and I wish you luck doing it I think I've actually kicked around believe it or not doing some form of spoken word Live individually it's something I may throw my hat in the ring to do at some point you know I've seen it done by other people and I've looked at it and go like I think I could come up with something pretty creative and do some you know creative and even snarky spoken word you know so I around the idea you come with some pretty you know dark sarcastic humor you know so I would probably want to look for people to cooperate with you know maybe I'll call in you know in the future again with like an email address or something - cool - to get people to me maybe you know talk about like writing a script or something you know for for these subjects because it's like I should look yesterday I'm from Sweden and you know the situation here or actually globally but here it's really fucking yes really bad like you know they pushing the transhumanism and and transsexual is agenda the the social Marxist Marxist ik agenda you know and all of that shit really hard and they actually just recently came out with a new law this year to protect people with transsexual is what they called yeah there are transsexuals for against hate speech so people generally think this is a good thing right but actually what this actually what it actually sorry my English right now we're getting fucked us but it actually creates you know the the free speech is you know on the line of don't have free speech anymore cos you can basically get imprisoned for yeah you know what I mean I do they have they have taken free speech to such an extent people or self censoring because they don't want to take a chance of landing himself in prison I get it and that's where America is gonna be headed soon if we don't wise up and see how far this agenda has been advanced in many other places in the world and prevent that from happening here electric boogie thank you so much for the call I hope that it gets better out there in in Sweden because I know that you guys are in many ways further down the path of totalitarianism so but thank you so much for the call and your insights let's go to let's see let's go to laws of reality laws of reality you're live on what on earth is happening welcome hey Mark how you doing I'm well yourself I'm doing all right um I wanted to say that your joke that you just made about the UH the mathematical equation that what done publicly I really got a kick out of that I mean sometimes you have to laugh or you'll cry it slightly that bad right I wanted to say that your slides today and the presentation really on point I thought you did a great job with those thank you I try every week I mean you know really you know like I said that the the slide show fairies they're just good to me you know funny how I don't have to do anything I just miss all magically given to you right right absolutely no that was gonna say I think the main problem honestly in the whole society not just the quote-unquote freedom moon that people are absolutely they dread responsibility they're afraid of it and they don't want to actually do anything they just want to listen to other people do something and you got it I see it every day in my work I do you know just an Instagram account I have I'm working on a a website do you know Yan Irvin I believe you guys have been in the past yeah I do know Yan we were friends for a while and when I came out as a vegetarian and started talking about you know the immoral aspects of carnism as to how we treat animals Yan suddenly lost his mind on me and like thought that I was you know involved in you know trying to perpetuate or promulgate the globalist agenda and a satanic agenda and saying that I'm still involved in Satanism and it's like I don't I never did anything but treat that guy nicely you know I actually he stayed at my house one night when really he was speaking at free for your mind conference early on in in that series of conferences and tried to treat him you know with respect and uh you know went on a show a couple times and then he just suddenly turned when I did that show and that was it now I'm the bad guy Wow so you know there's no what once you hit a religion that people are firmly attached to because they don't necessarily have all the information or have approached it you know in a in a way that wasn't the correct way of approaching it then they Anna they think that you yourself are trying to push something bad and it's like this is what I talk about depth of knowledge this is why I talk about you know not just skirting the periphery of something you have to go so deeply into it that you know all of the aspects of it and all right I personally feel that he didn't do that regarding a plant-based diet and then wants to you know blame others or say that it's it's an evil lifestyle and it's shame because you know I thought he was doing other good work and you know then he comes out and just does nothing but launch you know vicious attacks on me personally right he doesn't like one aspect of what I'm talking about so it's a shame but that's what it is and some people you're not gonna change their behaviors and they're gonna act the way that they're on act oh yeah what I was gonna say is is that like the problem the biggest problem is like all these compartmentalized issues whether it be like the diet or shape of the earth whatever it is it's totally fractal eyes the truth moving the other point where the the bottom line the foundation of it which is what you focus on and everything that you do is been totally obfuscated and so there there's no there's no way to reach common ground with anybody and the common ground has to be morality and natural life and that's what is no no one's even talking about that because they're fighting about all these other things again I go on line at night and try to find any radio show live or any podcast or something on YouTube regarding morality and natural law and it's like I I end up watching my own stuff how could it just how could it be that way it's like no you how come you're the only one out there how the more people not be talking about this you know I know I feel the same way every day and I I do my best to bring light to this as much as I can what I have I was actually uh I was on Facebook for four years a few years ago and I had like a pretty decent foundation of people who were listening and after the algorithm changed that Facebook did and the recent purge of pages that they did last year I had all of my I had my whole page just totally dismembered and I'm telling you they're their shadow banning like crazy it's unbelievable they are they are making your results not show up I mean even search results it's it's getting really bad the censorship and the shadow banning and I'm telling you I've said it before it's a slippery slope they want to continue to play this game they're gonna play silly games they're gonna win silly prizes it's not gonna be pretty when you know that they don't understand the bomb that they are setting off they are gonna set off a bomb here in America throughout the American population and when it goes off there's not gonna be any unexploded it oh it's gonna get ugly I mean there's no doubt about it I mean America on the precipice of blood in the streets if you ask me I mean it's getting to that point people are just getting so angry at each other over you know this or that and the next thing and then you have the people are angry with the establishment who don't know how to how to react without you know causing a absolute shit show so I mean it's inevitable but yeah with the Facebook thing I had about 1.3 million like likes on Facebook and with my with my work and it was just all gone overnight so I've been kind of having to restart and I got off of Facebook because that is just a hellhole there is no point in trying to use it so I've been using Instagram right under the same name laws of reality and I you know what I'll tell you I've gotten some great feedback from people that I really wasn't expecting I've made more connections with my you know 954 followers on Instagram that I did with the millions of people on Facebook it's it's not always about quantity sometimes you have to look for what has been called vertical integration and go with the people who really will get it to a very deep level and build from there build to a higher level from there and then eventually it can go out horizontally you know so I I try to do I never try to garner a whole lot of followers I want people who will understand the work that I'm putting out in a very deep sense that's what I'm looking for with putting this show on and putting my website up if other people get it fine that's great that's an added bonus but I'm looking at the people who have the will and the drive to actually do something about the situation that we are all in you know who actually have the desire to take this knowledge to other people on their own in their own way that's what I've always been looking for I've always been looking for the other teachers out there never for followers so thank you so much for the call laws of reality I wish you luck in your aspect of the great work so thank you and let's go on to let's see Francesco Francesco you're live on what on earth is happening welcome to the show thank you I can you're coming through loud and clear thank you okay [Music] you received in art great so what did you think of the art drive and the knowledge that's on it to make a decision as what possibly as you said this will take you know probably more than a lifetime would you say that there's enough to keep an average individual occupied for probably the duration of their life if they really wanted to exhaust the knowledge on that device one pocket-sized device and the knowledge that's on there will basically help you to understand just about everything that you need to understand about what's going on in the world and you probably could not exhaust the knowledge on there from now till the day that you die that's what I would describe the arc yeah I think it's pretty safe to say that and I would like to make a comment on what you said about the well first of all something I noticed least over here when I talk to people that are usually very left brained yes oriented and they they'll claim you know that they are so a is and so what unquote you know scientific or pseudo scientific right yet I mean you hear what is it you hear mostly that you know some religious actual religious belief both from Christianity from you know pseudo

Christianity mainstream Christianity and you know another misinterpreted principles like many men is inherently evil yeah and life life is suffering yep yep the whole human nature misunderstanding the whole thing that life is actual suffering instead of that it contains suffering and that we should not contribute to the suffering that is contained in life by generating self-inflicted suffering they never talk about that and then you always hear this argument that human beings are just like every other animal and it's just not the case it's not true we have characteristics and capabilities within ourselves that make us very drastically different than the rest of the animal kingdom and we should not hold ourselves to the standard that we hold animals to we should hold ourselves to an extremely much higher moral standard than any animal has ever held to because they have limited capacity for understanding and learning and growth that's what makes us a more advanced creature than any other animals and the other the other big thing is the the fact that if you mentioned to them something like the New Age they say oh my god no I I don't believe this I don't believe this BS this spirituality absolute nonsense yet and especially as you mentioned on your show especially you know in this in these parts of the world if you say that you you have a right to defend yourself and to keep and carry with you the means that you but defend yourself yeah yeah yeah the most you know the more the useful tools to defend yourself such as firearms they go you know they go nuts on you how dare you how dare you be able to protect yourself and your loved ones off such evil sale Francesca where are you from sorry where are you from what part of the world I'm from Italy Italy so what we're having a lot of callers from Europe I would expect that you guys seem to be your concern is seeming to awaken from what I am able to understand I'm getting a lot of arc requests from Europe you know would you say that there is a growing concern with the direction that most of Europe is heading in the population do you see that happening especially you know lots of anger at the situation but it's I would say yeah it's not balanced with knowledge would you say the anger that is expressing is not balanced with accurate knowledge yeah yeah yes okay oh yeah it's mm it's really it's all right probably a recipe for disaster in a way because people are getting more and more polarized so they are very angry and they express their anger at you know immigrants or the anger at right right-wingers right at each other yeah yeah yeah that's the political polarization divide that's what we have to as people who are really in the know about how these dynamics work that's what we have to start to try to break down in our fellow brothers and sisters and get them out of that form of mind control so Francesco thank you so much for the call great points I think I have time for maybe one more caller let's see let's go - lets go - Remy the seeker Remy the seeker your live on what on earth is happening welcome hey Mark how you doing well yourself good good good good yeah so I mean you for just like for a few minutes about some actually some of the stuff you've been talking about over the last couple weeks sure which i think has been a really has kind of in a big sort of an answer it kind of to help kind of equal out some of the conflicts that I've been having but um there's actually something and that happened recently that I kind of want to address was you were about like the the season of sacrifice last week okay and you I actually have been paying attention to what's been going on going on in the country and I kind of made a call that on the 19th and the 22nd that something would happen and so I'm currently based in Pittsburgh and so there was you know one of those police brutality cases for a kid named Antoine Rose they actually started his trial on the 19th okay and they closed it out on the 22nd and then there were riots in the city because of that and uh and I I actually I said on social media I was like there's gonna be something weird happening and I that same day I found out they started the case and then they closed it on the 22nd so amazing yeah it kind of heavily not an accident if they not at all absolutely to dis rest unrest yeah and yeah I mean it's kind of it's crazy to see all the stuff that's going on just around because yeah because of the results of the case you know and um it's really kind of showing what I think is a very kind of saddening aspect of the of the division of the it's pretty much just like it didn't conquer that that's happening and I think more polarizing lis than ever that I've ever seen but I just wanted to bring that to your attention because I think that that's something that not only to you but possibly the listeners you know um could possibly kind of look at and and sort of see it as like a as a solution as not to react in anger and like to like really see what's in that like the people that we're pitting up ourselves against are really are the people that were supposed to be unifying with and I think that it's kind of you know it's it's very telling to see how how many people have fallen for it they just you know right into it and sort of how you brought up the idea of that like okay you need to pay for things you need to buy food and it's like although you can acknowledge that money for example isn't real we have to deal with the collective the collective consequence that so many people have acted upon that foul that false belief which is resulting exactly as as you could observably see with the natural law and because of that we're seeing a breakdown that we have to pay for food when food grows free and in the same way the idea of the whole racism thing is that racism in its core is understanding of the human relationship as far as like our value as spirits of you know but because other people believe in it we are now dealing with the issues of that act of that's right and that's racism is unfortunately a section that I left out of the divide-and-conquer from last week's show it's something that I probably can do a whole entire show on I don't see racial divides getting better they're getting worse as well in many instances it's it's really a shame you know but this all goes to Remy it all comes down to that the people who are falling for these division these divide and conquer techniques still do not have enough knowledge they have not taken enough knowledge into themselves about how these tactics work and that knowledge that they could be taking in would steel themselves against them when they see them used and brought out to be put at work in society so Remy I want to thank you so much for the call ladies and gentlemen that's all the time that we have for this episode of water on earth is happening remember everybody the show is live every Sunday from 3 p.m. to 6 p.m. East Coast time I'm your host mark passio you've been watching episode number 203 of what on earth is happening we'll see you right here next Sunday remember ladies and gentlemen government is slavery thank you for watching [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #204

Topics: *How To Find Occulted Information In The Era Of Internet Censorship, 9th Year Anniversay of What On Earth Is Happening Show/Podcast, Internet Censorship and how dangerous it is, Centralized Client-Server Network Model vs. De-Centralized Distributed Network Model, Learning concepts instead of memorizing tasks, Alternative areas of the Internet, Archive.org, UseNet, IRC, BitTorrent, File Systems, File Type and Apps for Digital Media, How to download and use a BitTorrent Client, Concen.org, Torrents vs. Magnets, Seeking information beyond the Mainstream Paradigm, Taking responsibility for the condition of the world, Justifications for immoral actions, Logical exercise reducing a moral argument to two people to illustrate Right vs. Wrong, Most people are NOT honest with themselves, Excuses people make for being ignorant, People who dispute Knowledge with Opinion and Belief, The Pain of mingling with people in public who are not Awake, a "Defacto" Anarchist, Vices vs. Crimes, Self-harm resulting in Neglect of stewardship, Ignorance of Freedom does the Greatest Harm, Best Practices when calling into the WOEIH Live Show, Fear holding people back from downloading important alternative information, Brandon Lee March and the Season of Sacrifice, Measles outbreak despite vaccinations, Memories triggered through sensory input, Routine distractions fed to the public*

freedom man that's what it's all about [Music] you've got the groove on freedom [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening calm ladies and gentlemen government is slavery and right here on what on earth is happening we are ending slavery one mind at a time welcome to the show today is Sunday April 7th 2019 this is episode number 205 of what on earth is happening we have a great show planned for you here today I'm going to be getting into another controversial topic that is sure to simultaneously enlighten and offend the very entitled socialist attitudes of millenials and Europeans I'm going to be talking about today the show is called gimme gimme gimme and as harsh as that may sound folks what I'm gonna try to do today in the first part is to try to really tread a balance between being harsh enough to explain to people that the behaviors that they are exhibiting are very socially unacceptable because of what they are demanding from other people that they don't have the right to demand but I also want to you know try to balance where I'm trying to not be so harsh that I don't inspire people to want to do better you know that's my goal here for today so you know I'm not trying to just drive away part of my listening audience I'm trying to make them aware of what habits have become culturally ingrained into their very way of existence and I'm going to include some other groups of people in there as well but you know another thing before I get into the main material for today I'm going to do is I'm going to do an addendum to last week's show toward the end of the show today I'm going to show people something that I neglected a couple of people brought to my attention when I was talking about how to get occulted information how to download find and download occulted information on the Internet in the age of Internet censorship I neglected and there it was a big oversight on my part I really should have shown people right up front how to download videos from the Internet this is something that most people don't know how to do they don't know how to grab a YouTube video you know to reshare it or to just save an offline to prevent it from being censored okay and this is something I'm going to show people on today's show after I get into the main topic of gimme-gimme-gimme the socialist and entitled attitudes of Millennials and Europeans another thing that you know people have been bringing to my attention they say that the shows that I've been doing have been have been very divisive okay I don't see it that way okay I'm not lending more to the divide I'm trying to heal the divide by showing people where the wrong behavior is at so that they can make corrections this is what real spirituality is ultimately all about it's about looking at the dark side it's about looking at the shadow side and doing that shadow work of looking at the aspects of one's personality and one's makeup that you do not like the in yourself you know it's it's looking in the mirror it's it's it's stopping pointing the finger outward and turning it around this way and saying what work do I have to do spiritually upon myself even in the the absolute muck of the soul in in in the the dark night of the soul in the the horrible aspects of the individual personality that people don't want to look at and often want to run in the other direction from this is part of what this is all about it's about exposing that it's about confronting that and looking at it head-on not you know beating around the bush and dancing around these types of topics but addressing them and looking at them you know right on point you know so that they can be dealt with and they can be worked with and you know purified these are aspects of the personality that we have to work on to actually purify and become better so that's what this is all about looking at all these things that are seemingly divisive but it's really about how we can do better that's ultimately what it's really about and as I said we don't need to compete with anybody but ourselves from you tonight you know that's who we should be competing with so with that being said I'm gonna jump into the topic for today it's gonna be like a dual show and it'll take as long as it takes again I may not finish the material today it may take that long or I make you know finish early and take calls early so if we finish early you know whatever time we have left we'll take calls till the end of the show in any event this is the graphic that Brett made for today's show always doing a great job with the title cards it's all the the the title for the show today is gimme gimme gimme the entitled socialist attitudes of Millennials and Europeans we're going to talk about what all this means what is entitlement what is socialism you know who are the Millennials you know why do they behave I do they behave this way you know what what has been culturally inculcated into them and why do Europeans take up this socialist attitude we're going to talk about that as well and it's part of what inspired this show I want to say right up front is dealing with people regarding the Ark Drive now for those who may know the Ark driver may or may not know the Ark Drive is a one terabyte hard drive with all of the research data that I have put together over the years that have helped to influence my work and have like the this is all the data that I downloaded from the internet earlier that helped to awaken me and enlighten me as to what is going on in the world I put the best of that research data on a one terabyte hard drive and I offer it to people not charging anything for the data that's free you just provide the hard drive you know and I do ask for a personal donation for my time for assembling it and you know basically putting the doing the copy of the data and then taking the data to the local carry or taking dead boxes to the local carrier office to ship them back you know and I feel that's an equitable trade for you know all the research data that I've put together over the years now in dealing with people to take me up on this offer I am making an offer for information that I have put together and done the work to assemble as an aggregator obviously it's not work that is created by me okay but I've I've assembled it I've gone out and found it found the pertinent relevant data and then assembled it and then in making the offer I have certain caveats and prerequisites that I want people to strictly abide by because I'm the one making the offer and the other person is the one taking me up on the offer and in taking someone up on an offer if the offer is actually done out of kindness and respect for another person which this offer of the art drive is I don't have to do this you know there's nothing there's nothing compelling me to do this other than my recognition that it's my moral responsibility to help teach and enlighten other people okay but there's nothing that is other than that that is binding me to have to do this for other people I want to do it because I know it's the right thing to do to help enlighten them so I am the one making the offer out of my generosity and kindness and then I find other people making demands on me that I must do it according to their likenesses and their preferences their their likes and whims and preferences okay and I see this largely amongst younger people taking me up on the offer and amongst Europeans and Canadians I have to say taking me up on the offer I'm going to include you know our neighbors to the north here in North America now in this segment I didn't put that into the title but they are almost as guilty as our European brothers and sisters okay and again I can get as offended as they want about what I'm going to say here today about the people I'm talking about in this show but it doesn't make it any less true okay and part of it is that people don't deal with a lot of people in from many different parts of the world very few people are constantly on an everyday basis dealing with people from just about every country on this planet as am i okay people write to me from all over people send arcs to me from just about every country okay so I deal with a wide variety of personality types so I have a good frame of reference a database of personalities if you will to extrapolate what I'm talking about today that is a generality it's it's a generally true thing and of course not everyone is like what I'm going to talk about today ok this is not a blanket statement that's another thing that should be understood I'm talking about the majority of the people in the Millennial Generation and the people from Europe and Canada that take attempt to take me up on the art drive offer now in in saying that I do have to say since explaining my reasoning for doing the Ark offer the way that I do it's gotten somewhat better ok so you know if there's an improvement here when people get more information when they understand what you're going through the art drive video is one of the best things that I've ever done that episode on the ark I believe it was episode 199 ok since that has happened hardly anybody has messed up any of the instructions on the ark and all of the Ark's have arrived all of the hard drives have arrived in perfect shape not one of them has been damaged and I don't believe any of been damaged going back everybody has gotten their data ok which is what I want to see that's the whole purpose of being strict with the instructions because I've seen it a million times done a million ways wrongly and then people have had their hard drives damaged right and we don't want that because that cost you time that costs you money then you don't get the data and then you have to do it all over again if you really want the data ok so that's where this show was inspired from I just wanted to say that as beginning ok so let's jump into the material for today this is all about the great work it's about doing the great work ok and you know what I'm trying to explain to people today is if we're going to do the great work we have to be ready for some of the consequences ok how hard it is to do this ok and this is what a lot of people don't see or understand ok because they're not doing it see they're watching ok so the great work is about dragging people kicking and screaming into freed that's really what it is as sad as that is to say is sad as that sounds to say out loud most people don't want the state of freedom okay they want to remain cosmic eternal children with no personal responsibility one of the things that you can say to somebody to make them hate you more than anything else is you are 100 percent totally responsible for what goes on in your own life that that will make people murderously enraged toward you murderously enraged okay okay because that's the truth and people hate that truth more than they hate anything else they hate personal responsibility being put squarely down upon their own shoulders and they want to shirk it they want anything but that okay so when I tell people the state of the world is our doing it's not being done to us we are the ones who are doing this to ourselves we are the ones who have put ourselves in the state of slavery okay the great work is to get ourselves out of the state of slavery okay and that is often to have to hammer on people's minds okay see the whole idea the whole adage that George Orwell said okay Eric Blair author of 1984 he said if freedom means anything at all it means telling people what they don't want to hear that's what real freedom of speech is things that make people uncomfortable because it it confronts them with themselves and the ugly shadow side of themselves that they don't want to see that's what this that's what a cult psychology is all about ladies and gentlemen okay it's about owning even the dark elements of the self that you don't want to acknowledge as being part of who you are okay and being responsible for that so the real work is to try to explain to people what the true philosophy of freedom is all about and the true philosophy of personal responsibility and natural law so the true great work is the arduous task of influencing others to awaken to the truth it is to help others to realize that in supporting and condoning the legitimacy of quote Authority and God or man's law that they have actually been supporting and condoning the legitimacy of slavery and that they were therefore amoral for having done so and this is the thing no one wants to confront and realize this is why we can tell this to our best friends and family members and they want nothing to do with it for us in many cases after we come out as being anarchists true anarchists and people who abide by natural law and think the truth and know the truth that man's law is nothing but coercion violence and slavery okay so we often you know take the attitude or take the idea the the analogy I should say of being this individual here on this slide on the right-hand side of the slide he's in the room with all the other people who were asleep and he has his head in his hands because he can't believe you know he can't wake them up and that you know that they don't want to know that they don't want to see but you know what folks some of the people okay who are sleeping are people who think that they're awake and I'm talking to a large part of my viewing audience right now a lot of the people who think that they're that guy with his head in his hands trying to wake other people up are actually the people who are asleep because they're not really doing anything okay they think they're doing a whole lot okay but they're not really getting the word out in any kind of a wide way okay talking to a few friends and family members you know we're trying to wake up your spouse or trying to you know talk to a old old auntie who you know is in a nursing home or something is not doing the great work in any kind of a wide way and I've been very harsh and critical to people because let me tell you something folks in all honesty naively of me I'm gonna use the word naive which is the word I hate the most applied to me but naively I'll say it to myself okay I was naive in thinking that there would be something of the order of about a hundred thousand teachers that were teaching natural law to my level by this point in time minimum maybe more I thought okay and here's here's the problem it hasn't manifested it hasn't manifested cause people aren't really awake and aren't really listening they they put on the air that they're awake and listening but you know what they're doing they're sitting doing what I was doing when I was still asleep they're amassing more and more information and they're watching it play out and they're not getting involved in the spiritual battlefield in some capacity okay so people who think they're that individual who's trying to wake other people up are actually the people who are sleeping in that room in that image right there in that analogy okay so moving on to the next slide no the next part of this slide in short to do the true great work means to help people to abandon their false religions their false religious beliefs and again we talked about religion on last week's show it is not just the cultural religions that we identify as religious beliefs like Christianity Judaism Islam Hinduism Buddhism etc those are not the only religions we are talking about we are talking about false axiomatic beliefs that lead people away from higher consciousness and hold them back from an understanding of natural law all false belief systems do this whether it be the belief in authority whether it be the belief in government whether it be even the the you know complete belief in the necessity of the monetary system for life on Earth okay whether it be a belief in that only truth can come from science or that only health can come from pharmaceuticals or or doctors okay these are all religious belief system these are all religions okay false religions okay these are the erroneous and dogmatic beliefs which hold back the progress of consciousness specifically by impeding the reception of truth and natural law this is what it is to do the great work to do the great work is to chip away at false belief systems all day long okay and why don't most people want to do it that's the hardest work in the world that there is to do the hardest work in the world there is to do is to tell people something that they fervently believe in and have believed in their entire life is a total crock of bullshit and is doing nothing but harming not only themselves but just about everybody else in humanity and it's destroying human freedom that's why it's so difficult to do most people don't want to hear that they want to kill the messenger they're not interested in just saying oh yeah I was wrong and I have to change now I have to change not only my thoughts but my behaviors too hardly anybody wants to do that I didn't want to do that when I was learning what the world was coming out of a satanic mindset I was so depressed about how wrong I was i sat and soaked listening to doom metal in my bedroom all day for the better part of two years okay you know that's how hard it was for me to tell myself I was wrong and how wrong I was but I still did it you know if we're because that's that the whole caveat here is if we're being honest with ourselves right you know you could tell yourself all kinds of Lies to say no I'm okay you know I don't need to do any of that I'm good you know and you just can lie to yourself all day long 24 hours a day seven days a week but if we're being honest with ourselves okay we have to be make an honest assessment am I really doing the work upon myself and I'm am I really influencing others to do that same work upon themselves and to abandon their false belief systems and I would say most people are asleep in the room and they're those people on the right-hand side who are completely unconscious especially if they know and aren't doing anything I'm talking to them more than I am that this the asleep or the dead okay I'm talking to the potential teachers out there who haven't said a word okay you're in a much more deep trance and coma than the people you think are asleep trust me okay and this is the problem the problem is that there's really stolen we one and only mark and that's a problem that's a big problem okay oh I want a hundred thousand people doing the work of teaching natural law to my level or beyond minimum maybe more and I'll tell you what if I can name five off the top of my head that are doing a great job we're doing well all right so what we have to understand is that there are two there's really three basic mentalities of what we can be doing in the world how we can be basically approaching life on earth in general we could be engaging in service to self service to others or a third form of service which I'll talk about in a later slide but let's look at the dynamic of the two mentalities are the two worldviews of service to self versus service to others this is a big part of what inspired this episode and what I see in the dynamics of dealing with people with the ark drive when you're making an offer of service to others and all you hear back from them is service to self gimmi gimmi gimmi me me me you're not doing enough you're not catering enough to my preferences okay when I'm dealing with hundreds of people and they're dealing with nobody but me okay and and my instructions for for packaging and shipping the offer in a way that can be accommodated to my schedule my busy schedule okay who a person who is doing a whole lot and has been doing an incredible amount of work okay and I always want to say thank you to the people who assist me people on the staff and the production crew and the setup crew people who have donated you guys make my work easier okay and in many cases I couldn't do it without those people all right but the whole point is in most cases if not the vast majority like almost all of them the people who are receiving this knowledge aren't really doing anything themselves some of them are I'm not saying none of them no blanket statement there okay some of them are doing their own work but most of them are still in the learning phase and like and they're really not even really at the very beginning of the learning phase you know they're very green when it comes to this many of the people who have requested the arc from me okay and this is a whole new thing trying to oh they're trying to open up whole new vistas of understanding and unlock you know previously locked doors in the mind okay which I commend them on doing they're to be commended just for wanting that knowledge okay however when you deal with many of them you see they're still in this service to self mentality almost like a form of mini-me Satanism as I call it the Satanist have done a brilliant job the social engineer Satanists have done a brilliant job folks in bringing people into a lower form of their own mentality in a in a I call it mini-me Satanism it's it's not the big boys Satanism you know of the world control class yet they have to give their acolytes they have to give their lower-level initiates the people that they really want to rule over a watered-down variant of their ideology and the watered down very enough their ideology is only care about yourself get whatever you can and get as much of it as you can and whatever you have to do do it to get what you want okay and take as much as you can if you're given a quarter of an inch takes six and a half thousand miles okay so and this is what I see there is there's no attitude of gratitude or gratefulness in many cases and now look I want to make it very clear folks some people are so grateful to receive the information okay and they know what they've just been given then there are other people who they want to constantly it's not even bargaining they just want it on their terms that's it because they don't understand how to operate with anybody any other way they don't know manners in since okay well what I'm really talking about here are social manners something that's largely lost on society people don't know how to engage socially with manners okay with basic mutual respect okay if someone makes an offer to you you don't start barking terms to them you know they're making an offer out of their own gratitude they're not charging you for it they're not saying you have to do favors for me to get this okay they're just saying I am dealing with a lot of people and I'm dealing with a lot of other work that I do simultaneously okay you're not the only one that is of import right and if I'm making an offer that involves my time my technological horsepower that I have to give up time on computers to do copies on drives and resources on computers okay not only my time the unpack boxes hook up the drives copy the data breach act the boxes take them to the shipping office I do this folks me I do this I don't have teams doing this for me some people occasionally help me copy a couple art drives but largely I do almost all of it myself okay in addition to all the other work that I do during the course of the week here on what on earth is happening it's literally a full-time job okay so what I see is that many people not all don't have an attitude going in of be great farm willing to do this okay and look I see this again I'm going to tell you the people I see it in and I don't see it I'm very very happy to say I don't see it that attitude of you know gimme more you know do this for me I don't care about what's involved in your schedule I don't see it with a lot of Americans I'm happy to report that okay you would think it'd be the other way around you really would you'd think with the European contingency they're very cultured people in many cases and that they wouldn't have this you know level of disrespectful attitude and again I'm not saying it's all of them okay and it's gotten better I let people know since I brought this to people's attention it's gotten better that's why we have to talk about stuff like this and bring it to people's attention because if you don't they think what they've been doing has been as it'd been acceptable and will continue to be acceptable and then it doesn't improve see this is part of why the world is in the shit state that it's in okay that's why we're in the state of slavery people won't call other people on their bad behavior and things just keep snowballing and getting worse because of that dynamic because they don't want to rock the boat and they don't want to cause discomfort okay so going back to this dynamic of service to self versus service to others this is an image that I found online that I think just perfectly depicts the service to self mentality I'm gonna get all I can I'm gonna consume all I can screw the other guy his problem isn't my problem I don't care what suffering he goes through I'm gonna take take take take take me me me me me gimme gimme gimme that service to self you know what if we're being honest with ourselves ladies and gentlemen if we're being honest with ourselves the most important word in that statement is not honest it's not ourselves it's if if we're being honest with ourselves most people are in this state okay most people in the world are in this state of consciousness and you want to know what that's why the world is enslaved that's the very reason that's the very causal factor that the world is enslaved because this is the attitude of human beings that it's a satanic mindset from the religion called Satanism which is the main first tenet is self-preservation above everything else including morality that's the very first tenet of the Satanic ideology and the Satanic religion and so they gave to all the people of the world they inculcated them into a lower-level variant of their very own mindset mini-me Satanism that's what the world is in okay so if we want to transform that and change it and by changing ourselves thus change the reality that we live in the strange the manifested world okay we have to change the causal factor which is the level of consciousness that we are operating at so service to others mentality puts us in a position where we understand see what service to self mentality does I'm just gonna step back briefly what service to self mentality does okay is it is the question what can I do for me that's the question it asks each one of these mentalities or forms of consciousness has a question that it asks this one says what can I do for me I wake up at the beginning of the day and I immediately start thinking what can I do for me as the day goes on the question continues what can I do for me when I go to bed I'm thinking about what can I do for me tomorrow and that's it and you wake up and wash rinse and repeat the cycle and do it over and over again in an endless loop that's Satanism that's what Satanism is see this is the whole problem ladies and gentlemen I have almost never in all of my studies and all of my watching and listening and learning I have almost never heard anybody explain to other people that that's what Satanism is and that's the problem is that nobody knows that that's what Satanism is and the problem is that hardly anybody is telling and teaching other people that that's what Satanism is but that's what it is it's it's spending the entire day asking the question what can I do for me okay never asking the question how can I help someone else okay because that's service to others mentality how can this mentality this worldview this way of being in the world way of living asks the question what can I do to help someone else okay how can I alleviate some suffering for another individual or group of people okay how can I bring someone up to my level that's why I like the image that I found for for this dynamic okay it's people trying to help people up a rocky you know incline alright which is what the world is like you know and those who have made it up to the top they're trying to help others get up there and encourage encouraging them that they can do it alright this is service to others mentality it's not necessarily doing any the work for them okay but it's in us being an assistant see in in in the work of alchemy in the work of a cult alchemy you can never be the alchemist for someone else okay you can help to influence them to become the alchemist for themselves to do their own personal inner transformative work okay but no one can do alchemical or shamanic work for someone else we can be wayshowers we can show the methods and we can show them the path that they have to walk down but they have to walk down at themselves there is no substitute for personal experience in the great work okay so that's service to others mentality it's it's it's taking a step outside of yourself and you know it's it's not to say that you lose self-interest okay but the self-interest becomes enlightened self-interest because you're saying in helping others I'm also helping myself by bettering the world you know I still have that dynamic of ego as we all should you know one should become so 100% of altruistic that in the loose sense of self because then your your health will start suffering you you know and I get into this dynamic where I get so over the top sometimes that it's like it will start affecting my health and nervous system and you don't want that you know there has to be this balanced read right where you're doing enough to maintain yourself and keep yourself healthy and in good shape and energetic enough to keep going and keep doing it but you also have to be helping other strong enough to help others on the way that means you got to be strong enough for yourself and strong enough for others and let me tell you something folks it gets draining it becomes very draining at times even for someone like myself who's been doing this this long because then you start getting burnout especially when you see other people aren't making the effort nowhere near in any kind of a capacity that is required and you know they're still doing something like hinging on my every word when they should be becoming teachers themselves you know you should only need me as a teacher up to the point where you start to become a teacher yourself you know this is what we need not everybody in the world is gonna learn from Mark passio trust me most people will never hear a word I say this is why I have to explain other people you the idea is not to just send people to me the idea is to become a teacher yourself I'm not trying to have followers for Mark passio I'm trying to help people to understand natural law and encourage them to teach it that's what I want to see all right I'm not going for you know my goal here is not popularity notoriety YouTube views money anything like that okay look if people do learn from me great it's an added you know benefit you know if I can support myself doing this wonderful that's an added benefit but that's not my motivation my motive motivation is to put the truth out in the world and help to inspire other people to teach it alright so that's the whole mentality of service to others and in doing service to others you'll benefit as well okay because the world will improve and you will reap the benefit of that improvement now there's a third mentality okay and this is the mentality that I want people who I'm talking about to really get not just the service to others mentality and getting out of the service to self all day mentality okay but to go further than service to self mentality which is great it's wonderful it's needed but that this asks the question up to to yourself what can I do to help someone else what can I do to help others right that's the question well the next mentality is service to truth mentality okay this is the one that's left out by almost all other spiritual teachers because this goes beyond human beings this goes right outside of the physical domain this goes into the pure spiritual domain service to truth you could call this service to the Creator if you will all right service to natural law whatever you want to call it all right but you are serving a higher power in nature than just human beings whether it be you or anyone else okay and the question that is asked by the person who goes into the mentality that the way of being in the world of service to truth is what is the best way that I can possibly help the world see it's not just saying well there's an immediate situation here how can I alleviate this immediate suffering but if it's the idea of if you want to feed the old adage if you want to feed a person you give them a meal if you want to feed them for a lifetime though you teach them how to procure food for themselves okay and you know that's the whole that's the whole problem is that people aren't being taught self-reliance self discipline self responsibility okay so this is the dynamic of you don't just try to give people an ideology or a mentality you try to show them how to learn how to exercise discernment how not to fall into traps you know of being wrongly influenced and controlled okay and then how to go out into the world and ask the question what is the best way I can teach the maximum number of people so that they will start to disengage wrong ways of thinking and thus disengage wrong ways of being see this is the question I had to ask myself when I said when I realized I knew a lot about the dynamics of the world back when I was younger especially because of the experiences I had gone through okay I had to ask myself what am I gonna do with this knowledge and experience right am I just gonna tell my friends and family and hope some of them listen maybe spread it down to the next generation will that really be long-term effective will I reach the maximum amount of people and do the maximum amount of good that way you know do I write a book that maybe I'll get in a couple of bookstores if they take it if I get decent enough distribution and then maybe enough people will buy and read even though print media is like you know kind of almost like a dinosaur compared to how people absorb media today okay and learn so you know I had to sit and consider the question how am I going to approach this dynamic and the answer to me was I had to ask the question what is the absolute best way that I can it that I can help the world and the answer came back I need to put this work out publicly online and I was going to do it unapologetically and I was going to do it in my own aesthetic and my own delivery style not trying to be someone else okay delivering it with the personality that someone might see talking to me on a daily basis some people can handle it and some can some are never going to be able to handle it they're gonna die in their state of weakened I'm offended by everything mentality many of the people okay who can't handle one second of a mark passio video that's not who I'm doing this for though see I decided a long time ago my target audience was the strong people who would be able to hear what I was saying because they had come partially so far and I would try to influence them to become the next generation teachers of the world to put this work out there in many different ways so that other people can get it I can only do it I'm only going to do it this way I could do it a million different ways if I you know put on a bunch of masks and pretended to be somebody else this is Who I am okay as a matter of fact I hold back a whole lot on the air ask people who know me in person I hold back on the air okay so you know that works with some people it's not going to work for everybody okay so the idea is service the truth mentality says how can I in my own special way in my own way right put the work out there so that other people's people can get it and that what is which what way can I do that then I'm gonna make the maximum impact in the world and do the most good as a result and if you're really in a higher level consciousness mindset this is the question you're asking what is the best way to help not just one way to help but what is the best way you can have and that's your will that's your true will if you follow that path that is the way that you if you keep doing it the universe will open doors to you I know I've done it okay and I've seen those doors open to me you know just the fact that we're I'm doing this show it is proof of that that it came together it manifested it took a couple of years but it manifested okay and all of the dynamics the resources and the people came together to make that happen because I was in this mentality that's the reason that it happened I had to push for it I had to fight for it but as long as I stayed in that mentality of service to truth and focusing on what is the best way to help that's why that manifested and see this is what I'm trying to explain to people the people I'm talking about they imagine themselves to be awake many of the people that I'm talking to be talking about in this presentation but they're not really in this state of mind okay they haven't really gotten that and don't really understand this is a spiritual war where you have to ask that question what is the best way to help okay most people don't ever get there you know if they're doing well they get to the mentality of well how can I help somebody else maybe I'll try to enlighten my mother or my sister and my brother okay but they never really go to that service to truth mentality and that's where we all have to get to so moving to the next slide I'm talking about people who have entitlement attitudes attitudes of entitlement what does that mean okay we hear the word entitlement but let's actually define it okay entitlement is a belief that someone is deserving of or entitled to certain privileges certain privileges with which they did not necessarily themselves earn or should have the right to it is also entitlement is also a set of social expectations which are considered unreasonable or unduly prescriptive upon others in other words making demands upon other people's resources making demands upon other people's time wanting you to give them leeway in instructions that you that you've set because they work for your time and schedule and resources right make exception for them because they are considered special they're considered entitled right and there's a million reasons why they want it well I don't have as much money as the next person or I don't have you know the same resources or you know I live in this country or that country or that country you know and it's like okay I get all of those things I understand but at the same time then you don't need to accept an offer that is made it's like someone who wants to go out to a restaurant with a bunch of friends and doesn't have any money to pay for his meal well the person might want to go to the place to enjoy the social interaction and the good food with his friends his or her friends but if the person doesn't have the money to pay for that meal they probably should not go to the restaurant empty-handed and then expect someone else at the table to pay for them this is what this is like okay it's it's it's like saying well I didn't work for what I'm getting right but I want to change all the dynamics and all the rules involved and get it on my terms anyway okay and that is again the words here it's a perfect

perfect definition unreasonable or unduly prescriptive means that you have made unreasonable demands upon the others resources time efforts etc okay they're unreasonable unduly prescriptive and this image perfectly describes it that this image is what I see spiritually playing out inside the mindset the mentality the psyche of the people with this type of an attitude and I want to I want to tell you like it sits in the anarchist movement it's in the so-called freedom movement see because we're many of the people are still of this notion that this is all just an external conspiracy ok the conspiratorial aspects of this are worth studying they're worth noting and studying and they're real ok but see if you get just lost in all of that and you you don't go back to the beginning of my work ok which is why started with the solution what was the solution in the beginning of what on earth is happening the presentation and the podcast right was it no every aspect of the conspiracy you know no that wasn't the solution was it right was the solution blame one group you know that you think you think is the be-all and end-all of who's controlling the world and point the finger at them and say that's the problem that they just have to be eliminated and everything will be fine was that the solution presented at the beginning of what on earth is happening no that wasn't the solution either was the solution come up with redic ridiculous models for the shape of the earth all right we're not gonna go there ok but that wasn't the solution either folks ok the idea was change your consciousness understand what higher consciousness is and means and then do your internal work to change your consciousness and thereby change your behavior and then start influencing other people to change their mindset and behavior and here's the here's the problem folks you wanna know the reason why there are a hundred thousand teachers teaching at my level because they haven't gone through the personal transformation in consciousness yet they're still studying all only the external factors about the world control system and they have not learned all of the dynamics of human consciousness that is the required causal level factor for creating the change in the manifested reality to change one's own consciousness and this is why the world isn't changing because we're not doing that internal work and most of us look like this baby with their arms crossed the making demands on other people and see this isn't again people will turn the table and say you're doing that no I'm explaining what other how other people are falling short in doing the great work I'm not making the ban I'm saying you and other people out there saying you want this change to take effect okay therefore there are prerequisites there are requirements in work that must be done for that change to take effect you you're in slavery you want freedom well there's prerequisites that have to take effect that means you have to change certain things in your mindset and behavior I want those things that change so I change those things in my mindset and behavior that's why I am acting like a responsible adult when I deal with someone else not like an angry child with their arms crossed okay you know making unreasonable demands I've come out and said I won't continue to do work unless people step up and do contribute resources and time and effort and I don't see it as the same thing because of what I've already freely given okay having freely given of my time my energy my resources my respects periences from my own caring from my own desire to want to enlighten other people which is what the true great work is about okay I don't think that that's the same as going up to another person who is said okay I can I can do this for you and then me saying well you know I want you to do this this this on my terms okay I can say no that's okay if you can't be here every every Tuesday when I work then we we I I don't accept your offer of help just like somebody can say well I don't have money to ship an art drive to you so I can't take you up on your offer maybe when I have the money I'll take you up on it you know but there are people who want you to jump through their hoops to do everything to do it for them and this is I'm gonna explain it comes out of a socialist mindset the attitude of entitlement actually comes out of a mindset of government taking care of everybody and it comes out of this staying a child again this is the perfect image go back to the image okay you see the child not getting their way right this is wanting immediate gratification not wanting to work for something right it's a lot different you know wanting immediate gratification not wanting to work for something people will compare this to me saying I want some help for doing the great work with what on earth is happening how dare I you know how dare he asked for for volunteer help because I've been doing this for like 12 years so I don't desert freely I might add and out of my own pocket only recently if people come forward to really contribute resources financially for me to make things go to the next level with this and you could still say that they're at somewhat of a semi-pro level you know this isn't anything like some of the production values of really bigger podcast but it's it's not bad for doing it on the budget that I have available to do it on okay but my point is you know entitlement is something different than asking for justified help and resources that you know after someone puts a whole lot of work in you could say hey they deserve that this is undue mindset of deserving something when they the person hasn't earned it that's what makes it entitlement okay something can be deserved but not given okay but this means it's not deserved and demanded for that's what entitlement is all right so you can't get the two things confused with each other all right because there are legitimate things that people should receive especially if they put a certain amount of work into something to benevolently enlighten and guess what it's not just me there are many other people that deserve resources that people should go out and fund you know because that's what they do you know they give up their full time to do this to research and then to present in whatever form they present it and those people should be making more money and have more resources at their disposal than imbécile basketball pliers and imbecile baseball players and imbecile football players who don't give a damn about anybody themselves and lead totally hedonistic selfish satanic lifestyles okay to play children's games they get there those kind of resources because that's what this the the whole society values this is how screwed up our value system is okay the people who are trying to teach people what real values and real principles are I have to scrape by by the skin of their teeth and people who play an idiotic children's game so that people who don't want to think about reality can crowd into crowded stadiums and watch grown men play children's games you know they're making millions you know while the people who are actually trying to enlighten humanity are scraping by not having the resources that that they have to even help you know their their pay their staff or or or even live themselves you know it's ridiculous and then then we'll get flak from imbeciles saying how dare we ask for donations I mean like shove it up your ass okay people who think like that so I'm talking about almost invariably people who have done absolutely nothing and yet think they're entitled to a whole lot okay for having done nothing just because they want something on their own terms just because they're used to getting what they want on their own terms because daddy government mommy government has given me everything since the day that I was born for free and that's how it the whole world should be nobody should work for anything government should just provide everything for us so I'm gonna sit here with my arms crossed because you just asked for me to follow instructions what why should there be any rules on anything why shouldn't I just you know get what I want at any point in time just because I feel like it cuz that's what's always been given to me by mommy and daddy government is this is this child mentality that's coming out of a lot of people all right and it's embarrassing and I'm trying to try line here folks again I said this at the beginning between being harsh but not too harsh that I make people totally tune out and say I don't even want to improve myself it should make people feel uncomfortable to the point of that they're somewhat embarrassed for previous bad behavior and want to say you know what we have behaved like that it is due to cultural inculcation in our way of life prop you know hammered into us by the media and the government and we can do better and we can change this mentality all right so let's move on the people that I'm talking about that are doing this are Millennials and Europeans in other words what we're going to talk about what the Millennial age group is it's basically people who were born around the early 1980s into the early 1990s mid 1990s maybe okay so but and of course Europeans are people from just about any country in Europe and but they're taking an entitled attitude which we just looked at what that means and they're taking a socialist attitude and again I feel that these attitude of entitlement actually is derived out of in stems from the socialist mentality so what is the dictionary definition of socialism according to the merriam-webster dictionary which whether you consider that a valid source or not it's a basic dictionary definition this is someone else's slide by the way government ownership and administer socialism me government ownership and administration of the means of production and distribution of goods okay now some people will twist and contort that definition is simply public ownership okay which there is no such thing in the lark and roads just did a great video on how public ownership is utter nonsense there is no such thing if there isn't private ownership there isn't ownership because ownership means you decide exclusively what happens to to an item a piece of property how it gets to be used period okay so if that is an exclusive it's not owned by anyone okay it's in the case of socialism it's a tool for the state to control that's all it is okay and it isn't just collectivized ownership or quote public ownership it actually is in the hands of the state so people want to nitpick and fight over that definition that's what socialism is ladies and gentlemen it means the state owns the means of production and distribution of goods period that's what it means that's the classical definition of socialism and guess what it's the correct definition of socialism all right now right off the bat if you can't see how that's going to end in a nightmare situation then you haven't read world history and you haven't understood how this descends into totalitarianism fascism Nazism communism etc and ends up with starvation and we're mass deaths by military or secret police you know or starving people out because that's how it happens and every recorded instance in human history and that's how it will continue to happen as long as total retarded people who are completely slow on the uptake which is what the word retarded means you don't need to have any kind of a syndrome to be retarded in your thought process it just means you're slow on the uptake that's all it means to retard means to slow down look it up in a dictionary go look it up in merriam-webster okay it means to slow the progress of and it means that people are slow on the uptake in their ability to understand what things mean and what direction things are going so yes the people who haven't understood that that's where socialism goes are retarded in their thought process okay socialism is also defined as a system of society or group living in which there is no such thing as private property and I would agree this is what these idiots believe this is what people who think that no one can own anything see all rights are property rights we talked about this when we talked about natural law if you don't understand that go back and listen to the natural law seminar go back and listen to the podcasts on natural law without property there are no rights all rights or property rights everything that is a violation of any human right is a violation of someone's rightful property property is real it exists in nature in nature is not a constructor idea money is a constructor idea that doesn't exist in nature it's an agreed-upon thing rights aren't constructional they exist in nature property is not construction it exists in nature okay you are actively using it into the 3d world its property okay going back to the definition of socialism a system or condition of society in which the means of production are owned and controlled by the state perfect definition correct definition okay the means of production owned and controlled by the state again what socialists naively believed is we're going to give all this power of the state we're going to then solve all the problems of the world because in their beneficent knowledge there are mittened beneficence the state is going to take care and provide for everyone thus ending all problems of the world by their effective distribution of the means the distribution of the means of production and the distribution of goods and services solving all world hunger all world problems and then in that state of ultimate power of controlling everything how everything is made produced and distributed the state will magically dissolve itself out of its own beneficence thereby producing an anarchic world yeah that's how it'll work yeah where's our vomit guide do we we got to have him on file okay we got to have our vomit guy on file okay so we can play him at any time so I could go back to you know hold on let me see if I could find him real quick just to back off of my slides I'll go to my through my stuff and we just see if I could find that guy give me a second okay all right hold on a minute yes switch back switch back to my laptop real quick I can't do it wait wait give me a second I'll do it full screen go back give me one second here I'll do this full screen for everybody yeah we're gonna improvise here on what on earth is happening that's how important this is okay I should have planned for this but I didn't so I'm gonna make a slide real quick and I'm gonna play it and I'm gonna go fullscreen hold on give me one more second there we go go fullscreen now there we go here we go folks yes the state is going to control all means of production and distribution of all goods and resources and services and then the state after we after arriving at this ultimate source of power is going to dissolve itself oh it's not it's not even our benevolent leader folks this is the per average person who believes in socialism okay this is the believer in socialism spouting this nonsense the the state's going to control everything folks it's going to control all the method of production the means of distribution and then it will dissolve itself leaving an anarchist Society Oh what pure beneficence aw it's so wonderful this is how imbecilic people sound this is how really imbecilic they sound folks you know again I I think people should really record themselves right they should record themselves and then play themselves back so that they can hear how ridiculous and nonsensical they actually sound when they speak or what their ideas are speak your ideas aloud then play them back to yourself so you could hear how ridiculous some of the ideas that people speak actually sound that this is what socialists believe that's what they actually believe will happen this is what marks the Antichrist if there ever was an actual Antichrist in the world what Karl Marx pumped into the mindset and it wasn't Marx it was the social engineer occultus who controlled him and his family members and his associates like angles and and basically commissioned him to put the planks of the Communist Manifesto out there you know Marx was it was a puppet okay he wasn't even somebody with this type of mentality you know it was like Levay in the same sense that Levay conquer ties the Satanic mentality and put it out in the Satanic Bible it came forward years after that that he was charged to do that by higher levels Satanists namely the Bush family okay who were friends and handlers of lavae all right so what we ostensibly believe are put out there by certain writers / philosophers i ideologues are not their real really their own work okay they're they're commissioned to do that so that the real source of these ideologies and mentalities can remain secret it away okay so anyway we have to understand what we're talking about we're talking about a socialist attitude of entitlement this is where it comes from because it comes from the belief that oh the state should provide everything for everyone and therefore hey you know how dare you you know go against that mentality by saying aye you want me to do something and it costs me money and resources and time and effort and energy even if I'm taking you up on your offer you know oh I have to make demands on you even though you offered the thing to do it my way and and as free and little resources I have to put into it you know I mean I just go back to this folks I'll do it when I get to the the Europeans okay let's just move forward invariably unwaveringly socialism um always descends into communism or a form of it okay and it can descend into nationalistic fascism as well it is possible okay or it can descend into a very twisted inbred variant of the to where you have certain aspects of the society acting fascistic or corporatist and then other aspects acting completely communist socialist but in general the social engineers of the world have decided that communism through socialism arriving at communism through socialism is the most effective means because it is largely done culturally and over a long swath of time compared to a nationalistic fascism form of totalitarianism which is often done as quickly as possible often through military coos and conquering other nations militaristically through military invasion this is seen as not preferable to the long marks through the cultural institutions that a socialist / communist regime would choose because it is done almost imperceptibly and then people wake up in a totalitarian society not even understanding how they got there often accomplished over multi generations multiple generations but people like Stalin said you know I only need one generation to you know have the future generations for hundreds of years and you know the generation that has been gotten in our culture is Generation Y other otherwise known as the Millennials okay and when I mean gotten I mean they are hardcore God okay to put it in Street lingo they are God okay and they don't even know how gotten they are all right see that's the problem is you have a a an entire entire generation of individuals an entire demographic of people that are so overly intellectualized and overly quote educated formerly that they largely don't have the common sense to understand how completely duped they've been okay that's why so many younger people in this generation believe in socialism and communism all right and what communism is people have to understand it and they have to go and read and understand really what this ideology is because people don't understand what it is I'm not going to get into all the planks of the communist manifesto today that's a whole nother presentation I will be doing that in I'm gonna do a long-form presentation it's probably gonna be about eight or nine hours called occult the dark occult origins of Nazism and communism because they have a shared dark occult origin okay so I'm gonna be getting into that in a formal long-form presentation not probably not on what on earth is happening more likely than not that will probably be being done either probably at the near next year probably toward the beginning of next year in Philadelphia I'll set up a location and I will deliver probably an all-day seminar here in Philadelphia just myself called the occult the dark occult origins of Nazism and communism probably in the year 2020 if we're all still here okay so what people have to understand about communism is communism is a system of international socialism see so the words national socialism is in the definition of communism here but the the prefix inter is applied at the beginning so national socialism is what Nazism was you know the the word Nazi is a truncation of Nazi oh now so Silesia to Deutsche arbeiterpartei and pricks use my German pronunciation I probably butchered that but if you take the acronym of it it's NSDAP National Socialist German Deutsche Workers arbiter party okay National Socialist German Workers Party NSDAP was the initials for the Nazi Party and then the truncation of it became Nazi in English because they didn't want to say the whole thing in German okay and in that is National Socialist it was a socialist regime but again it was National Socialist again that's what fascism is it's national socialism okay it means that you've accomplished socialism through a more individualistic nationalistic approach you've gotten it there appealing to people's egos and nationalistic pride and then you've largely conquered militarily instead of culturally you through military might that those are the mechanisms of National Socialism folks just read about it historically which most people won't pick up basic history books and read about it okay what we're talking about here in the form of communism has practiced by you know Red China and Soviet Russia we're talking about international socialism that's the only difference between communism and Nazism one does it through nationalism one does it through internationalism okay so this is international socialism it means instead of putting people on a nationalistic path you are putting them on a common world path the common goal common purpose to a world system okay and that's why this is favored by the people who talk about they want a new world order the new world order is international socialism and that's communism all right that's why they want us to go to the the gap in between going straight to communism you've got to get to full socialism they want democratic socialism they wanna they wanted to degrade from a republic okay down to a quote democracy down to democratic socialism then into pure socialism then eventually into international socialism which is communism okay so moving forward to understand the dynamics of why people do not understand what communism is and do not understand why people in high-level positions of Finance and banking and military and government okay want to bring about world communism through socialism and always want to project that socialism is a good thing for the masses of people and they want people subscribing to the idea of socialism it's the same thing is why do they want why do Satanists want people subscribing to the ideas of communism but oh I'm sorry of Satanism but on a lower level many me Satanism well you get a if you're a high level communist and you want to bring the world into totalitarian communism the New World Order the dark New World Order you have to bring people into a mini-me version of your mindset which is socialism that's mini-me communism it's the same thing as what I call mini-me Satanism and let me tell you something folks this book right here that I'm putting on the screen put this fullscreen okay this is probably the most important book any human being will ever read in addition to the end of all evil by Jeremy Locke and the most dangerous superstition by Larkin rose okay I have now asked multiple rooms of people at events that I've been at who has read this book cover-to-cover in its entirety it's a short book it's like 150 pages to 200 pages depending on how big the print is in whatever Edition you're getting it in okay maybe even less than that and hardly anybody's hands ever go up in my personal life I asked people how many people do I know of read people this book cover-to-cover I might know three or four people personally as individuals that have read this book cover-to-cover I'm telling my whole listening audience my whole viewing audience right now this is the most essential book right now that anybody could read at this point in human history this is it none dare call it conspiracy by Gary Allen I will link to a PDF copy of the book in this podcast download it put it on put it on your damn reading device whatever it happens to be whether it's a smartphone a tablet whatever the hell you want to read on okay and read this book cover-to-cover anybody who wants to claim that they're awaken has not read this book you're asleep I don't care what else you know you don't know what's going on in the world if you haven't read this book somebody had high position of government writing about it from the inside from his own knowledge from the inside just like I'm telling you about Satanism because I on the inside and came out of it this person's telling you about what's going on inside high-level positions of government because he was on the inside it's not prophecy folks it's a game plan okay all right people want to say it's conspiracy no it's called a game plan of internal collusion between high-ranking members of politics banking military industry etc that is operating in the very real world that you don't have to apply the moniker of conspiracy to to understand that it's happening and he called it none dare call conspiracy because it most certainly is an organized conspiracy and he was trying to explain to people what why do these people want to bring it in through socialism because this is what people don't understand they think they're trying to help you by bringing socialism in nothing could be further from the truth these people aren't interested in helping you they're interested in controlling you in enslaving you for anybody in the truth movement that is not read none dare call conspiracy by Gary Allen you are asleep and you don't know what's going on if you haven't read this book I don't know how much more how much much more harshly I can say it those who haven't read the book none dare call conspiracy are not awakened to the political machinations of what is are really going on in the world and if you can't take the time to read a hundred some page book cover-to-cover you're not worth anything let alone putting the time in to awaken or helping to awaken other people so read the book no problem my producer was just informing sorry folks are just informing we had a little network screaming hiccup there I apologize for that hopefully everything is working fine again but you know these things happen we are live so you know we'll just continue to go going back to this slide I'll link it in the you know in the podcast when I put it out also just as a brief aside people and ask you know well you know the live stream goes on YouTube when it's live it goes on Facebook when it's live on Vimeo you know we we simulcast on Vimeo Facebook and YouTube in addition to what on earth is happening calm slash show okay but the podcast officially gets put up from the raw video okay yeah and it's largely uncompressed video so I wanted to look as pristine as possible and I usually put that up the night after the show I'll take a break for a couple of hours after I do it because this show leaves me pretty drained and then I'll take a break I'll eat something I'll relax for a little bit then I'll go put the video up okay so you know don't expect the podcast immediately this isn't an automated process folks one day I'm gonna leave that till the next show okay one day I'm gonna leave doing the podcast til the next show and I'm gonna show everybody what I have to do to put the podcast up so you understand the work that I do after the show which nobody does for me I do it okay so you know coming some slack on the time it takes me to recuperate after I do a three-hour live broadcast you know to the time when I got to go back and sit at the computer immediately again and start working on the podcast okay there's no magical podcast button oh wait a minute oh I see it it's so bright above the return button there's the podcast button I thought that was the back slash but apparently that's the podcast button you hit that your podcast goes live right out boom oh it's all tagged everything it's up there in the format you want the XML feed is built boom podcast stop no work required it's one button on the keyboard sorry folks I missed it I didn't know that there was a podcast button on my keyboard see that's why you got attention and when you buy new technology you gotta look at the instruction manual you gotta look at all the buttons I you know if I would have known that I'd be hitting that button boom one second after the show is done play and it would be live so you know understand it's a complicated process okay and it takes a little while all right I'll do it live on the air one day thomas jefferson said and he was really talking about socialism here i predict future happiness for americans if they can prevent the government from wasting the labors of the people under the pretense of taking care of them that's what socialism is ladies and gentlemen it's taking all of the labor of the people into the hands and usability of the state as tools and then you're telling them we're doing this so we can take care of you and provide for everybody as nanny and mommy and daddy you know but really what they're doing is enslaving you all the while patting you on the head and patting you on the back saying we're going to take good care of you that's all it is and Thomas Jefferson understood that as did all the founding fathers okay but people don't want to listen to that conventional with that true conventional wisdom no they want to say they know better than you know our ancestors did in what to look for as far as government control goes yeah because we're doing a real good job of being vigilant for it now you know we're halfway into communism we're almost all the way in because this is what the Millennial hears and most of the Europeans free stuff because we love you you know the crown the state the government they just want to give you all this stuff they don't want to give it to you to keep you dependent and keep you acting like a little child just taking and sucking on the tit no they want they want to give it to us they love you keep calm right keep calm there's my there's my take on keep calm okay there's my take on the crown asking us to keep calm okay that's my answer okay to use psychopathic inbred cases of pure filth pedophilic filth okay but this is the attitude of most of the children of the world and by children I mean the adults of our society the eternal children and this is the podcast title this is the title of the show gimme gimme gimme right because we're in service to self mentality and I'm entitled and I deserve that you know how about stop allowing yourself to be robbed and spend your money how you want to spend it by not paying taxes you know stop allowing the Psychopaths to take from you find methods of doing runarounds around their system by whatever means necessary to do it and don't contribute into their taxation system of slavery and then put your money where you want to put it voluntarily you know but this is everybody's attitude gimme gimme gimme cuz I'm entitled I deserve to get it for free even though somebody else labored to create it to produce it to distribute it it's because there's no respect for property no respect for property rights see in their in their whole attitude there should be no such thing as property well if you dump property you dump rights with it because if you understand natural law all rights or property rights there can't can't be rights without property then think about it if the word proper means right its moral its proper its rights we use the words to mean the same thing that's not accidental those words were chosen to mean the same thing for very specific reasons so why do the Millennials have this mentality okay they have this mentality of instant gratification first of all who are the Millennials that I'm talking about who are the millennial generations who is the millennial generation so the millennial generation could be defined as Generation Y in between X and Z I'm a generation Xer I come from Generation X born between the years 1965 and 1980 I was born in 1974 right in the middle of Gen X okay you know in Gen Xers are more like focused on sort of a vocation you know they're not like Drifters from one project or career to another or you know they're generally like identify with like doing a a vocation of some type of task that they are very good at Gen Y is more you know flowed from job to job or work for from company to company mostly because there isn't a lot of job security anymore but it's like you know they don't really have that like sort of vocational idea about what they want to do in life so there are more drifters they're also highly focused on self service to self mentality not all of them again these are generalities not blanket statements in this case again some blanket statements are true and sometimes I'll make them in this case I'm making generalities generalized statements that are largely true but not always okay Generation Y was born between the years 1981 and 1996 some people will place that slightly higher I've heard you know 84 to 97 to 98 it's in that region okay you know early early 80s to mid 90s - even late 90s okay and they're highly focused on the it's like these are the people I was talking about last week - think the personal computer is over with we don't need high-end desktops or laptops we could just use tablets and self and smart phones okay they're always in their phone they're always in social media obsessed with social media this generation is obsessed with social media status on social media is like there life's goal okay and thinking that I can do everything on my cell phone I could do everything on my tablet well actually no you can't and that was a deliberate effort on the part of the social engineers to get you off of a truly creative platform like a powerful personal desktop computer okay or a powerful laptop computer all right that's that's what who we're talking about here okay so this has been also called the me me me generation and there we have it again mini-me Satanism me me me gimme gimme gimme instant gratification you know my generation has some of that but not to the extent that the next generation does now generation Z I'm hearing good things about that are seeing all the bullshit of Gen Y of the Millennials and going good god how do we let it get this bad and they're stepping up and doing something about it already as young as they are you know they're realizing how totally fucked their parents are you know how fucked up in the head that they are and realizing how fucked they're making the world and they're basically saying no we got to do something about this some of them not all of them but you know a portion of them are waking up just by the nature of how mentally screwed up their parents generation is okay and guess what I'll blame it right on my generation my generation made Gen Y Gen X produced Gen Y okay we produced the Millennials my generation produced the Millennial generations because largely my generation was so screwed up from the baby boomer generation that created us that we passed the nonsense right down to the children that my generation produced and created the Millennials it seems like the cycle is being interrupted a little bit I'm not going to use the word completely broken but it's not progressing in a cyclical pattern as it did over the last three generations something is going on with Gen Z that isn't the way that the social engineers are really planning for it now that being said let's see how it plays out I'm not prophesying anything there okay I'm saying that I think they have a little bit better of a chance that the gen Z younger generation does than the Millennials because the Millennials have I'm what I mean the mind control worked perfectly upon them when I mean it worked perfectly I mean it went flawlessly the Machine had not one kink in it during the formation of Gen Y at all the social engineers I have to give them a round of applause I mean you guys brilliant work okay you yeah it's there no joke these people are not a joke the social engineers who program Generation Y with their belief systems did a flawless job I have to say okay a flawless job because I have never seen in my life a more brainwashed generation ever ever okay and thank God your children aren't listening to your bullshit thank God okay that's all I have to say you know thank God your children are infinitely smarter than the dunces that you are most of them most of them I'm not talking every single person in that generation because there are some that are legitimately awake okay but I'm talking to the vast majority as a whole as a group okay you're you're not gonna get done to your children the mindfuck job that that the previous generation unfortunately allowed to happen to you it's not gonna happen with your children okay there's too much information too much data and they're just a little bit more streetwise than you are okay and they're not buying the lies that you bought from the mainstream media because let me tell you something folks this generation that they'll portray them in the media as oh they're always on their cell phone they are addicted to mainstream media addicted addicted okay and you want to say oh no they don't watch as much television they watch just as much television and they watch TV and other four just because they're not watching TV on a television doesn't mean that they're not paying attention to the mainstream media on other devices okay just because they absorb the same bullshit on a different device doesn't mean they're not taking the same bullshit into their minds okay so this is who Generation Y is the Millennial Generation okay and this is what I'm talking about that has this attitude of I needed on my terms I'm not interested in in your daily work of or what you have to go through or your routine your schedule your hardships it's me me me is this gonna be better for me well then do it even if it's harder for you okay that's their whole mentality their mentality is I care about only me it's a satanic mindset okay Satanism was very much propagated propagandized to this generation of individuals and they bought into it hardcore hardcore what else was very much propagandized to these individuals was socialism okay socialism was that the long march through the cultural institutions the Graham sheep land coming out of the Frankfurt School of Germany okay was brought into the mindset of the millennial generation in a hardcore form more so than any other generation on earth and that was done through the university systems of North America specifically the United States and of all the European countries the university system is where the Communists and socialists decided to spread their tentacles through okay and that's where they decided that they were going to actually conquer ties and conduct the the long march through the institution's that the plan of antonio gramsci the italian communist okay read about him read about the Frankfurt School which was you know said the conquering a nation militaristically with communism and then bringing to the rest of the world is not the way to do it that you would have to extend your tentacles to the far corners of the earth and then conquer the world culturally conquer each nation culturally weaken its people weaken the sexes divide the sexes divide people along all kinds of boundaries which we talked about on former shows about division and then conquer them through cultural means and that was called the long march through the cultural institutions and it has worked flawlessly and it has worked most flawlessly on Generation Y the millennial generation they bought into that whole plan of divide and rule divide and conquer bringing in socialism and eventually communism through a cultural mechanisms okay that is the mindset that largely their parents pushed them into that came out of the socialist schools of thought of the 1960s and 70s okay that invaded this country through Soviet Russia and other places in Europe this is why we've seen Millennials propagating socialism so much in the modern world and saying we don't want a capitalistic Society not that we have one they don't even understand that what they think capitalism is is actually cronyism or what is known as crony capitalism which is a collusion between government and corporate power it's not real capitalism okay and they want now to bring in what they call and many politicians in the world today like Sanders and Cortes are calling democratic socialism so here are basically communist flag wavers that are waving you know flags akin to the hammer and sickle although you know they're not putting the hammer and sickle on it or you know the Chinese star just straight red flags and calling it democratic socialism and you know look at look at the age group folks the age group is exactly the people that I'm talking about we're talking about people in their mid to mid 20s to early 30s who are getting you know politically quote active in the political circles and attempting to change the United States into a communist country which would then of course eventually fall into outright totalitarianism through communism as it always does throughout human history when ever attempted and they'll just give you these lines like oh it hasn't been done right yes Stalin just didn't starve enough people you know you know mal just didn't have enough people murdered you know that's all so you know they think that we're gonna get out of the crony capitalism by going into the opposite polarity which is called socialism and they want to do it through demo a blending between what they consider democracy and socialism and all this is folks is this is like you know well we're going to use the mechanisms of government to have voting and we're going to basically even if people are wrong and you know fifty-one percent of people vote to cannibalise the other 49 well then it was passed through law and it was democratic and so you know dive in with your forks and knives and chop up your fellow beings you know because it was put to a vote and it was democratically done you know that's what the real mechanisms of government are all about you know that's all they've ever been about they've never been about anything else except violence through coercive control that's it and you do that through voting and if the vast majority wants to commit whatever heinous acts of violence they want to commit well hey you voted on it you know forget individual rights this is about the majority rules you know it's about collectivism and majority rules well guess what most of the time the majority is wrong most of the time the majority is immoral you know you have to go down to the individual principles individual rights if you're going to get to truth if you're going to get to real prints if you're gonna get to real values okay and if you're ever gonna get to real freedom you certainly need to get down to individual principles and rights but yeah here's uh here's the Democratic socialists of American I want you to take a look at all the faces I want you to take a look at the age group it's a very nice neatly packed age range isn't it there's no very very young people and there's no certainly no people with any gray hairs in the head there's certainly no much older people you know from like our grandparents generation you know none of them are in there okay this is all you know people in their late 20s to maybe mid 30s max and that's the Millennials right now that's it okay and they think they know what's going on they think they have it figured out they think they know whether the woes of the world you know now they know what the mainstream media and their socialist professors told them that's what they know because they've been put through the gauntlet through the wringer of outcome based education which is Soviet style education based upon former Nazi style education based upon former Prussian military style education and if you don't understand that again you haven't been paying attention you're not awake you don't know where the modern education system comes from or the former systems of education that it was influenced by okay so what I'm trying to explain to people is real methods of Education to get people out of this type of a mindset and the real method of Education is the classical liberal arts education methodology known as the Trivium and quadrivium which we talk about here a lot on what on earth is happening these people none of them the the classical liberal arts education methodologies were all pulled from the schools of these people long before their birth okay they are not involved in true critical thinking methodologies they're not involved in real scientific methodology really never have been in the schools that they went to and that's why they came out outcome based education they came of that gauntlet that they were put through thinking exactly what the engineers who built that system of indoctrination want them to think that's how social engineering works folks and people are just too overly educated to acknowledge that they were duped and put through that wringer you know they don't want to admit that to themselves largely also because they're still drowning in like probably hundreds of thousands of dollars of school debt you know so-called education debt okay so you know this lifestyle leads to them basically not even making enough and being in debt so much that they can't even eat out a modest living and then they want to blame capitalism for that look I'm not I'm not you're you know huge proponent of capitalism and monetary systems and everything like that I'm a proponent of higher consciousness and true spirituality and a lot of the selfish assholes that you find in on the other side of the spectrum when it comes to being radical capitalists you know they don't understand a thing about real spirituality there are people in the anarchist movement they are say they're anarcho-capitalist and they say the word spirituality has no meaning to them consciousness is a meaningless term well left right asshole is a meaningful term to me which is what those kind of people are you know and you know these people are just as in basilic you know because they think that the state should take care and provide for everybody you know like a benevolent parent you know that's gonna take care of them from cradle to grave and provide further every need so in a recent poll conducted in America they just basically asked a bunch of people from many different states and many different walks of life and age groups provide the definition of socialism and of course the socialism is the means of production and distributions of of goods are in the hands of this state basically that's if people basically just answered that said you know publicly collectively whatever the means of production and distribution of goods as in the hands of the state is in the hands of the public or the state they would have been gauged the correct answer okay and in doing that only 16 percent of Millennials actually gave the correct answer of what socialism was when I'm gonna read you an article now coming up that talks about over 58 percent of Millennials want there to be socialism or don't want capitalism and yet only 16 percent could pretty when polled could provide a correct answer of what socialism even is Americans in general only did twice as well Americans above 30 years old only 30 percent of them correctly gave the answer less than a third approximately one third it's disgraceful that people can't give a simple definition of what socialism is you know and yet you know over half of them we're gonna be advocating for it I'm gonna pause the presentation right here and I want to go to an article okay so I'm gonna switch over to my web browser you can you can cut back to the browser and we'll go back to the presentation but I want to read this article now okay it's from The Washington Times not the most reputable source but I'll tell you what I believe the article that they're writing right now that they're publishing right now okay so they are they are they did a poll where they polled Millennials and asked them would you rather live in a socialist or communist nation than under capitalism and guess what folks in this article they actually also said if if fascism was a choice would you accept that over capitalism okay so it says this troubling turn highlights widespread historical illiteracy in American society now for the Washington Times that folks okay this is how radically off-base this poll got that even the Washington Times published that this is troubling and it indicates widespread historical illiteracy from a paper that I would say you know isn't that the most trustworthy source in the world okay however it at least tells the truth in this article which I'm gonna read okay so here's some former you know Soviet you know leaders including Lenin and Stalin busts they're shown it says the majority of Millennials would prefer to live in a socialist communist or fascist nation rather than a capitalistic one according to a new poll I just want to read that first statement again listen to this folks if this doesn't trouble and worry you you need your head screwed on straight because it's not okay the majority of Millennials would prefer to live in a socialist communist or fascist nation rather than a capitalistic one according to a new poll in the victims of communism Memorial Foundation's annual report on US attitudes toward socialism fifty-eight percent of the up and coming generation opted for one of the three systems either socialism communism or fascism compared to 42 percent who said they were in favor of capitalism the most popular socio-economic order was socialism with forty four percent support communism and fascism received seven percent support each so again they are for the stepping stone to communism which is socialism Marion Smith executive director of the victims of communism Memorial Foundation said the report shows Millennials are increasingly turning away from capitalism and toward socialism and even communism as a viable alternative this troubling turn highlights widespread historical illiteracy in American society regarding socialism and the systemic failure of our education system to teach students about the genocide destruction and misery caused by communism since the Bolshevik Revolution 100 years ago mr. Smith said in a statement Millennials are more likely to prefer socialism and communism rather than the rest of the country 59 percent of all correspondents chose capitalism as their preferred arrangement compared to 34 percent who said socialism 4 percent fascism and 3 % communism some of communism z' luminaries are admired by Millennials 31 percent said they have a favorable view of Shigure era 32 percent had a favorable view of Karl Marx 23 percent had a favorable view of Vladimir Lenin and 19 percent had a favorable view of Mao Zedong okay think about that folks that's one in five thought the Chairman Mao was an admirable human being who indirectly as a dictator led to the deaths of an estimated 90 million people okay that's an admirable soul Joseph Stalin was viewed favorably by just six percent in the poll only 33 percent of millennial of Millennials were able to identify the correct definition of socialism in this poll were they largely favored it still only 33 percent that that nationwide poll I just showed you only 16 percent could tell you what socialism was only 33 percent in the very poll in which 58 percent said that they would live in a system either socialism communism or Chisholm all out of them only 33 were able to identify correctly the definition of socialism they fared about as well as the rest of the country which only successfully identified socialism at a 34% clip generation Z the millennia the generation after the Mongols was the most informed group with 43 percent correctly identifying socialism you see the younger generation isn't taking the bullshit they're not taking the indoctrination as well as this Generation Y class of individuals just swallowed it down like I said they stayed they funnel it down the gullet okay with a funnel and a fine a firehose okay forget spooning it in you know can't get it in there fast enough throw a funnel down down the throat get the hose in there and just turn the valve on as fast as it can pump it in you know that's how fast we got to get that propaganda down the gullet okay so we're Millennials struggled compared to other generations was in the identification of capitalism just fifty one percent correctly said capitalism is the economic system based on free markets and the rule of law with legal protections for private ownership that was by far the lowest of any age cohort Americans as a whole correctly identified capitalism 67 percent of the time Millennials are also less likely to have a negative view of communism just 36 percent said they had a very unfavorable impression of communism and only 44 percent said they would be insulted if they were described as a communist think about that that means that 56 percent of the millennial generation said they would not even be offended if they were described by someone else as a communist could you imagine that this is this is who many of the people who listen to my show that these are your children okay that's all I have to say all right this is that this is the job you did raising children all right and then people want to say go pump out as many kids as you can is one of the reasons I haven't had children okay because this is the kind of job people do raising them or I should say not raising them all right as a whole 56% of Americans view communism very unfavorably that's tragically low that should be a hundred percent so only 56 view it very unfavorably and sixty-three percent would be insulted to be associated with the ideology one possible explanation for the millennial infatuation with socialism is that 53 percent of the cohort reports feeling burdened burdened by the economy so because they feel economically burdened they think we should trash any form of capitalism and have a socialist system by which this state controls everything and just meets it out the people as they deem fit for their needs yeah yeah it's worked so well it's it's just it's you know just look at it historically you know if forms of socialism have been responsible for the deaths of over 250 million people in the 20th century alone that's a quarter of a billion souls it's worked so well as a matter of fact it's worked exactly as intended folks it's worked exactly as intended Millennials were the only age group more likely to say America's economic system works against me rather than for me generation Z had the most positive impression of the economy with 66 percent saying it works for me although many of them yet have to have yet to enter the workforce the victims of communism Memorial Foundation survey was conducted online from September 28th to October 5th it pulled 2,300 members of the general public aged 16 and above all right so we can cut away from that for a moment I'll switch back to my slide presentation I think that was a very pertinent article to view and to you know explain to people that that is a what is going on in our culture so to go back to the slides this was that national poll only 16% of Millennials and in the whole country were able to identify correctly what socialism was by definition so you could see why so Millennials have this attitude okay and why they're identifying with it they're poorly schooled they're poorly educated and you know whether you I'm not talking about like you know compulsory schooling I'm talking about they're not educated at all they're not truly educated they're indoctrinated and again that's the do to the gram Qi plan look it up okay understand that stems out of Europe and it's another reason that Europeans have a lot of the same mentality as well okay but look up the gram Qi plan of the long march through the institution's front that came out of the Frankfurt School inspired by Antonio Gramsci okay that's GRA MSCI gram Chi the long march through the cultural institutions understand that was their plan they did it through education through cultural infiltration of the educational system in America and through you throughout all of Europe okay and they put communist professors in these areas that or we're Soviet and or outright try come in their mindset okay and they put them into these positions of Education high-level positions university tenured at university and they just absolutely let the floodgates loose brainwashing the American and European public of young people okay they knew that that's how they were going to hit the population going to educated cultured centers where people would you know propagate the ideas out to the next generation down below them and that's exactly what happened so Europeans why do they take this attitude and therefore why do they act entitled okay cuz I'm gonna explain some of the things that they've done and what they'll ask okay see let me before I even read this let me explain talk about some of that dynamic okay what people will ask me you know when I have already said in instructions this is a set way that I do it this is all the time that I have I don't have time to do it any other way that's the main thing that I want people to understand right if you were me dealing with many many many many people on a daily basis which you don't do you're not see there this is why they're in service to self mentality and they don't look at it from anybody else's point of view they never put themselves in somebody else's shoes that's the whole part of the problem they can never turn or turn it around and look at look at it from a different perspective something from somebody else's point of view they don't do that they're only ever thinking me me me me me me me what can I get out of this right so I'm like I can't do this any differently would you be willing to go and use this carrier over here oh it's only you got to go to the other side of the city no I drop packages off in one location because I do multiple packages a day I don't have time for anything else I can't make an exception for you it has to work in a regimented way I can't be specialized toward any individual in this case because I'm one person trying to do the best I can to get the word out there with the time that I have to do it see that's why there's a set way of doing it I'm not telling you I don't respect individualism that's ultimately what this is all about okay but I can't tailor the experience just for a each individual person or I'd be running myself ragged more than I am okay and the point is is if someone has generously made you an offer that you want to take him up on you don't want to do the work that I did to assemble all of that data right you can do it don't find it yourself right you don't have to get it from me no one has to get the ark from me I'm not forcing it on anybody you have to receive this this dataset from me you don't have to no one has to look into it right you want to it's something you want right so then everybody is like well this costs too much can I send it this way no I don't want it destroyed or lost I want it insured a certain way I want to carry it and handle a certain way I want it packed a certain way want to know why I'm the one who's going to fulfill the offer for you I'm providing the service so the service is on my terms not your terms right so it's like if a cable company doesn't have the channel as you want you don't subscribe to it you go to somebody who does oh you're free to go and get the data from someone else I never told anybody they couldn't copy it for someone else I couldn't once it's in your possession you can do whatever the hell you want with it you could set it on fire for all I care I think it would be highly disrespectful to all the work that's on there but it's your property that's what property means you're allowed to do what you want with it that's one of the reasons I'm stringent with the instructions for the arc Drive because I don't want damage to happen to someone's property that isn't mine I wouldn't I would I would treat my property the same way with that level of care and respect why wouldn't I do it for someone else's property okay so the point I'm making here is that I I see in my experience and you could say okay this is subjective right but in my experiences with American citizens who have done taken me up on this offer they seem to really understand and respect personal property they seem to get it and that's because I think in America we have more of a culture of don't mess with anybody else's stuff they work for most of us do now again that's not a blanket statement cuz there are some people that have no respect for other people's possessions things a property etc and or will steal lie cheat to get whatever they want and harm anybody else or their property that's also a mentality here in America don't get me wrong there are low-lives who act like that okay however the people who take who are into my information and take me up on the offer that I have given about the arc Drive okay seem to really respect my time and effort and don't get uppity in asking me to do it a different way they see that my time is limited that I am trying to put the resources that I can into doing what I can for people and they seem to take it in a humble way and just say if this is what I gotta do mark then that's fine then I'll just I'll follow your instructions and they generally don't even ask they don't ask for anything different now multiple times I asked people nicely nicely I can't do this personally I can't tailor it personally for you I'm sorry but I can't I don't have the time the energy the resources I have to just have it a set way and just knock these out okay because I have so much other stuff I got a do during week again I'm sorry but the slideshow fairies just don't come to me anymore and build all my slides for me during the week right the package packing fairies they don't arrive and pack up all my stuff that I have to ship right okay the research gnomes don't hop into the house and do all my research for me and it's all waiting there I do all that stuff okay so I wish we had all of these beings we need the package Pixies the research gnomes and you know the the the the slide making the the presentation fairies okay but I'm sorry but these are mythical creatures that don't exist in real life okay so what I've noticed with Europeans and Canadians are they don't like it when someone says I have personal rules regarding this offer they don't want that to exist they think everything should be completely on their terms and I've it's not so it's not something I'm saying because I've somehow don't innately like Europeans or Canadians I hang out with anybody treat them on equal terms I judge people by the content of their character nothing about where they're from you know their culture their skin color anything their sex nothing like that okay I treat people even-keeled based on how they behave that's it and all I want to see is do they behave morally and do they behave respectfully toward other people so when I have interacted in many cases and again I just I want to say emphatically not all okay there are many people from Europe and Canada they're highly respectful individuals and there they're just they're like look I cut above okay that's that's all I have to say however they're in the minority until I really had to get in their face about it now it's improved okay so this is I'm largely talking about in the past but I think this is a holdover from how inculcated into socialist attitudes they are in the European Union okay so what I would say is I don't want to do this on your terms you can do this for me you know why can't you do this differently for me right this is gonna cost me more money doing it your way if I do it my way I won't have to pay as much money to the carrier well who said any word about how much it would cost I never told anybody a thing about what a package would cost to send to a private carrier which is what the Ark requires you can't send it through the post office I've had so many arks lost or damaged through the post office I don't use them as a carrier anymore okay I send out things that are you know less important items like just t-shirts or you know DVDs that can be easily replaced okay rather than someone's hard drive with a ton of data on it which I want to have a little bit of reverence for because this is not their own property it's not my property okay it's theirs okay and it has the data of what can potentially transform the world on it so I want to show that a little bit of respect right yet they'll continuously ask I want to do it this way instead of your way right when I asked nicely don't ask for special treatment I'm not going to give you special treatment because I can only afford to and have the time to do it this way when I deal with so many people and so many packages on a daily basis right so the Americans seem to get that and say I'll respect your wish I'll respect your time I'll respect your resources because I know you're one person trying to send out all this stuff it's like a server in the server model that we talked about last week the one server okay and then all the clients receiving the data from that one server okay I'm like the server in the middle of that model okay well and the other people will say how many people continue to say put the ark online first of all that's not the point of the ark okay the Ark the whole point of the Ark is that you're researching offline so that you have to make no internet connection at all no matter how fast or slow or non-existent of an internet connection you have the data is already local that's the point of the ark I don't want to distribute it online first of all the other thing is people who haven't dealt with this much data try uploading a terabyte of data see how you do see how well you do on your internet connection then I want you to try to download a terabyte of data off of some web server or something see how well you do okay all right yeah you could probably do that with a torrent file right but you know it depends on also how much it's going to be seeded and and people are gonna keep seeding it all right so in any one of those instances trust me trust me folks I've put out more arcs to people personally through my house than anybody has online trust me it's in the thousands okay you look at just about any tort and see how many times it's seeded you're lucky if it ever hits a thousand okay more people have the ark do to me copying it on a personal computer right here in my house and have it from anybody that's ever attempted to distribute any amount of that information online so I'm not interested in putting it online stop asking me okay I hope that clarifies why I don't want it online the Ark is to research offline so you don't need an internet connection to have access to all this data okay so I want to read this it's a maybe a little bit small may we go fullscreen that's better okay this woman says this is a meme I believe taken from some social media or a website he is she says I'm a school teacher in Denmark making about 61 thousand dollars a year we get free education you don't have to pay for the doctor or the hospital and students even get paid to learn it all sounds so great right however I forgot to mention that nothing is ever free the minimum income tax in Denmark is 40 percent okay and I believe this was back in like 2007 or eight or nine something like that it was it was a while back okay this was this was not now okay I don't know if the date is in here but Waka I'll keep reading also we pay a sales tax of 25% that's on top of their income tax sales taxes 25% there and on top of that the government applies duties and fees a gallon of gasoline is about ten dollars ten dollars for a gallon of gas tax on a car is 180 percent this is called a V 80 in Europe a value-added tax so anything that they deemed non-essential they put a v8 e on like a car meaning that a car that sells for about twenty thousand dollars in the United States like a Honda Accord raises the price to an astounding forty thousand dollars in Denmark for the same car Denmark is the highest taxed nation in the world not just Europe but in the world taxed an average of 80 percent on every dollar earned Dane's have the highest personal debt in the world few will ever own a car or a house anyone who makes over $80,000 annual annually pays a personal tax of 68 percent this means that people with higher earnings have either found ways to evade the tax or have left the country taking their companies with them what's the motivation when you're giving that much money back to the government what's the motivation to succeed or improve nothing you know they won't let people do anything that they want with their own money that's how heavily taxed it is this is what communism is folks here's the new tagline that has to be brought out on every show is that's what communism is this isn't just socialism that's what communism is okay and it's worse it gets even worse than that Denmark suicide rate for the past five decades has averaged twenty point eight per with the highest rate of 32 the American suicide rate has averaged 11 point one during the last five decades and it has never exceeded twelve point seven more than 11% of dein of adult Danes supposedly the happiest people in the world are on antidepressants and I'd say it's higher than that that's a very low estimate everyone wants the American Dream in Denmark's neo communism economy no one will ever own or accomplish anything this is because there is no respect for individuality and personal private property okay individual property okay and this is the attitude that is being taken by more and more this is that the cultural inculcation that is being taken into the mindset of most Europeans this is why they act like they are above someone else's time and effort that you have to tailor to their needs and whims okay I cannot tell you every I won't even go through them but every single solitary data point that I requested in the arc Drive has been fought tooth and nail toward me by Europeans and Canadians Canadians to a little bit lesser degree than Europeans but not drastically and again they've both gotten better because folks let me tell you something I have since going through visually what to do for the Ark Drive and going through the instructions and telling people how I do this myself okay and what I am how I am offering this and why I ask these things because of respect for trying to protect other people's property okay it has gotten a lot better that they have they have not gone as terribly into the obnoxious you know bickering back and forth with me over change this stipulation do this for me the way I want it done okay and you know what I had to get almost mean about it right I told you I asked nicely first and said please don't make requests never saying I'll do anything if you do but I said please respect my wishes respect my time and and my efforts this is how I do it it's a set method it works for me please don't ask me to do it any other way nicely right then repeatedly knowing that I had asked to respect that I would get back more and more and more and more and more requests in the face like flaunting it in the face throwing it right in your face like oh you've asked me not not to ask you to do it this way here let me throw it right in your face I'm gonna ask anyway like just totally disrespectfully you know when when I only asked nicely please respect my time and my wish is to do this a certain way that's all that's how I asked at first well then when would come back over and over and over again Oh like I would say 90% made requests to do it a different way 90% okay so at that point after I said don't ask me it would drop it's still about 3/4 what asked me to do it a different way so I had to I had to say if you ask I'm gonna take away the offer right that's how I had to get that nasty about it I had to almost like show teeth because and I didn't want to be like that I generally you got to understand how non-confrontation I am at first when people push me though then I don't just become con for take confrontation all getting outright aggressive if I'm pushed okay I just don't think people should push people like that don't press other people's buttons because you don't know how much they will snap right I don't press other people's buttons because I don't know what who they are I don't when I go on the street I mind my own business and I'm armed III am armed when I walk on the street okay but I mind my own business I don't say a word bother anybody because I first of all I don't know who they are I don't know how crazy they are I don't know what happened to them I don't know what kind of a mood they're in I want to let them be I don't know anybody anything except non-aggression that's it that's what I owe anybody and that's what everybody else knows everybody leave it other people alone okay I apologize for the noise in the background I'll know if that's coming through but there's a car alarm somebody's not shutting off obviously they've you know left for the day another car alarm has gone off and it's blaring in the neighborhood and you know unfortunately hey I don't have a soundproof studio I do my show out of my home you know I'm sitting in my bedroom right now folks because that's the shoestring budget I can do this on ok it looks pretty damn good for being on that shoestring budget but unfortunately I don't have a soundproof studio you know I wish I could afford something like that but I can't so we got to deal with it anyway this is where Europeans are at culturally ok and that's the problem there culturally in a position where they've been totally brought into a socialist mindset and now because so much has been taken from them they feel entitled to take from other people as if like we're just perpetual we'll just perpetuate this cycle like oh I'm given all this the government they're providing me well you got to do things for me for free too you know I think that's where this comes from and again we're well into the third hour now I don't think we're gonna have time for calls I'm just letting people know if there are time we'll take them but I as I said it'll take as long as it takes I also want to show people a video downloading okay which I didn't get to I'm going to do an addendum of last week's show still if there's if time allows for that but anyway I I thought just providing an explanation for why helps to clarify this I don't think these are just bad people right Europeans aren't bad people I think they should be our brothers and sisters in the fight for freedom right Canadians our brothers and sisters to the north of the United States should be in the truth and freedom movement fighting alongside Americans in the fight for truth and freedom okay we are not we shouldn't be at each other's throats I'm not bringing this up to further divide people and be at each other's throats I like Europeans and Canadians I want them to understand what's really going on I want them to champion for the truth and champion for freedom okay but we also have to understand our shortcomings and they'll say many Americans are ignorant I couldn't agree more you'll go out on the street yet look at what these polls I just showed you today's show I mean look at how ill-educated my own American brothers and sisters are I mean could you imagine this I'm horrified by these numbers that are shown in these polls these are in polls that's like of like that probably underestimate how bad it is and these aren't these aren't even like new sources that would like say won't even tell people the truth about how bad it really is okay and I'm showing you those numbers and they're horrifying you know the numbers are probably much worse okay but the point here is is I'm showing people this for improvement I'm showing people this because if you some people don't even know that they should be embarrassed about their beliefs and behaviors about their attitudes and behaviors they don't even understand that it looks childish it looks like you're telling someone else that their time isn't worth your time you know that you're better than them in that way it's a very entitled attitude to have I'm not gonna use the word privileged it's entitled there's a difference okay you know it's saying that you deserve this when you've done nothing to achieve it or earn it okay and again there are some people who request the Ark that have done a lot of their own work but they're few and far between folks I mean you know if I really had to gauge how many people request the ark drive out of out of that number percentage-wise how many people really have their own thing going and are doing it well it's less than 1% I'd say maybe about 1% okay so and I get it the people who are requesting this are in the in infant stages of this growth and learning experience experience so that's why they want the knowledge and that's great I don't want to discourage people by talking about this to get the ark nari so the whole point here also is it's gotten better since I talked about it publicly I said I was gonna talk about it publicly and it was still getting bad at that point then when I finally brought it up and told people why their behavior was rude and even ignorant you know it got better I gotta say congratulations the people who are sending these from overseas wherever it has to be Europe and other overseas countries you guys have been doing a fantastic job since a podcast number 199 about the Ark drive like fantastic nobody's arks been damaged you've been packing it great so that the it doesn't get damaged and you've been having some basic respect for the offer which I very much commend you for and appreciate and that's what this is about it's about improvement it's about getting better yesterday then you were you know getting better tomorrow than you were the day before that's all not nothing else and that's all I ask that's all I could ask anybody for okay that's what I've been asking from day one with this show do your research look into things deeply come to your own conclusions but do it through logic reason and intuition right people don't understand that that that's to come together you know people will say oh that's a contradiction no it isn't not a bit you have to have good intuition to even go no where to go and what books to read and what videos to watch you got to use both you got then you have to even use it to say is this worth pursuing more and get downloading more regarding this is it gonna help it ask the big question what's gonna help the most what is gonna do the most what is gonna be the best way to help what is gonna help the most in the world okay so that being said I want to just wrap this up with talking about ultimately all this is about is about the difference between collectivism versus individualism okay when we get into talking about political ideologies okay versus real freedom okay we're talking about people who believe in the collective versus who respect the rights of the individual the collective is a group construct it's a constructional idea doesn't really exist in nature individuals exist in nature okay so this whole thing of the collective it has this mindset okay that is all construction again this is the nature of my work the underlying basis of all my work ladies and gentlemen is what is the difference between the natural and the artificial the real versus the illusory and the constructional well this is it this is what it all comes down to the individual is real the individual owns property the individual has rights the collective is a construct that can be used by the state to prey on somebody's you know desire for better just a state of being in the world more equality under Rights etc but it's preying on that it's preying on that you know altruism that is in most people okay and that you can legislate that or you can get that done through coercing through collective means which is what government is so here you have the black sheep that represents the individual saying I just think that all interactions all human interaction should be voluntary that's it very simple that's non-aggression principle all human interaction should be based on voluntary meet you know consent that's it everything should be consensual once you break consent you have something called coercion which is violence I believe that all relationships should be consensual okay voluntary and then you have the herd with their herd think they're collectivist herd think mentality company that's a you that's utopian hippy but who would build the roads freedom isn't free move to Somalia government is a necessary evil and on and on and on and on we need democratic socialism let's throw that in there you know it's the same collectivist nonsense think that leads to all kinds of injustice --is destruction of freedom and ultimately slavery chaos and death okay this is what eventually results from collectivism every single time and if you don't think so all you have to do is pick up a history book and read it which far too few will do you know I've been asking people to read none dare call conspiracy for the better part of 10 years now and like a handful of people have done it you know and they yet people will still call themselves advocates of the truth and freedom movement when they haven't read practically the Bible on the subject you know ultimately this is what it's ultimately all about folks this is where collectivism versus individualism goes we move more down the road of collectivism we're moving down the road of totalitarianism and slavery we respect the rights of individuals and we get out of this socialist and entitled mindset and understand principles and rights and natural law we are moving toward a world that is based on real freedom under natural law the laws of morality that ultimately govern the consequences for the behavioral choices of human beings and beings that are even beyond human beings but natural law isn't about animal animal kingdom see and people talking about objective morality versus subjective morality and can't understand the concept that the laws of morality don't apply to animals the animals in in the field living in the only earth do not have the brain capacity and understanding and development in the brain and central nervous system to understand the difference between right and wrong to be held to account according to the laws of behavioral consequence you have to have a brain that is capable of understanding the laws of behavioral consequence and the difference between right behavior and wrong behavior animals don't have that you cannot put them in the same category as human beings and getting gauge them on the same behavioral standards are you nuts are you completely nuts that is like saying oh we're gonna give an award here for who has a you know built the best model of the solar system and you know we're gonna gauge you know Charlie here in the third grade versus Charlie's dog well Charlie's dog can't do an operation like that so you know you're we're gonna get gage that according to the same standard they're it's not the same capabilities this is why people have to understand natural law which is the laws of consequence have nothing to do with animals it has nothing to do with Darwin Darwinism or Darwin in Darwinian theory at all okay look I think next week's show or maybe in a couple weeks not sure if I might have a guest next week I might do a show on this if I don't have a guest okay I might do a show called what natural law is not okay so I've never done that I've never actually done an entirety of a show on all of the things that people who have a zero understanding of what I'm talking about when I order the phrase natural law think in their own mind their own mental definition that it means and then they babble on and ramble on and they spew out all that nonsense that verbal diarrhea about what they think natural law means that has absolutely zero to do with what natural law really is so I think maybe I'll take this as a segue okay and maybe next week the topic for the show will be what natural law is not okay so we can clarify that once and for all time here formally on the show of what I do not mean when I talk about natural law and what you can never use as an example to represent the laws of morality or even objective morality at all when it comes to human standards for morality animals can't have standards for morality because they're animals they don't have the capacity for understanding morality and yet you still have imbeciles debating this okay so I'll end on this next slide which really sums up the entirety of the thing don't be one of the sheep racing toward the edge of the cliff with your attitude about socialism and your attitude about entitlement okay be the dog who's saying the black sheep I'm sorry who's saying excuse me excuse me excuse me and going the opposite direction against all the herd of groupthink and collectivist mentality that thinks they know what they're doing but is racing over the edge of a cliff to their deaths be the black sheep who is the individual who understands individual property individual rights and natural law as the mechanisms that will all ultimately lead to true freedom and true voluntary human interaction which should be the only form of human interaction okay so you know you could be harsh about it you could be polite about it and say excuse me but I'm going heading this way you could head that way okay but in one form or another be the individual and don't go with the collective mindset because the collective mindset always leads over cliff alright so with that my formal slideshow aspect is finished I'm going to just go back to it briefly because I'm going to ask people if you find donation in the work that I've done here on what on earth is happening please visit what on earth is happening donation gifts that's gifts dot what on earth is happening calm best way of visiting it is just hitting the gifts tab or button on the website this way you can just read the caveat and then click into the green button if you're okay if you have a Bitcoin account or a PayPal account that's the methods that I take for donations here also if you want to make a if you want to get the ark Drive which I've talked about on this episode a whole lot okay because this was the impetus this was the influencing factor for making the content of this episode so if you want to get the Ark Drive go to what on earth is happening slash Ark or just click the Ark drive tab or Ark button okay and you can read about what the Ark is what's basically on it and what's required you need fill out the form to get the shipping instructions to receive the Ark drive and please you know follow them people have been following them very well and their property has been in great shape it's been making the full round trip back to them and they've been enjoying the contents of the Ark and becoming enlightened as a result and if you want to make a straight donation to the cause of what on earth is happening go to what on earth is happening calm slash donate there are ten different methods for donation now including PayPal a patreon Amazon wishlist to donate directly with tech needs and several crypto currencies or you could do it the old-fashioned way with a good old fashioned check or money order so check out the donate tab or button on what on earth is happening if you want to make a donation thank you to everyone who has contributed we couldn't do this without you and this is what earth is happening is run solely on your donations through the gifts donation donation gifts and through straight donations without your support I wouldn't be able to continue to do this so thank you so with that being said I want to give an addendum to last week's show because a few people wrote to me and basically said that it was a pretty big oversight on my part and I agree with them that it was a large oversight that I didn't cover how to do something that everybody should know how to do and that's download YouTube videos so I'm gonna do that here today in the last half-hour of the show and if there's time for calls we'll take a couple before the end but let's see how this goes okay so let's switch over to my laptop I'm going to go to YouTube okay and I'm going to type in individualism versus collectivism individualism versus collectivism okay and let's see what videos come up collectivism and individualism okay here we go okay I think this is a perfect one so here's gia or Griffin on collectivism versus individualism okay let me just click this it is a lecture it looks like it's an hour and 17 minutes long let's just look through it why we have these problems in the world we're not going to all right all right all right this looks like a perfect example to download okay now I am using Firefox okay now different people will have different takes and preferences for browsers I'm a fan of free and open source software that's why I use Firefox I try to use open source software wherever possible I am using a Mac which is the antithesis of that if Apple is the antithesis of that I should say not really the Mac per se but Apple is certainly thin - this is of that in the modern world I use it because I am sort of tied to the platform by you know a lot of media that I've made in programs that I built with it so I do prefer it as a creative platform I hate the company but that that's neither here nor there I'm using Firefox and it is open-source software I think it's a good choice for a browser number one because I think the rendering engine the quantum rendering engine in the new Firefox is probably better than most other rendering engines I don't really prefer the WebKit engine engine that's in Safari or Chrome rendering engine personally so I like the speed of Firefox I like the layout engine and I like the plug-in architecture the add-on architecture which is what I'm going to show you right now so YouTube doesn't make any other videos downloadable for you no copyright reasons or censorship reasons okay so this will show you a way to preserve things that are potentially going to be censored on YouTube by just downloading them to your computer and then you could distribute them by other means like on a hard drive a thumb drive on other areas of the internet through BitTorrent through other YouTube channels Vimeo whatever okay so it's a way to do an end run around censorship of any kind on the web okay so let's let's look at I'm gonna do it through an add-on to Firefox now there are other means of doing this which I'll get to but this is a universal means through a universal browser what that means is you could do this on any platform okay so I'm trying to keep it as I'm trying to keep the methodology of doing this as platform agnostic as possible okay so you could do this on Linux you could do this on Windows you could do this on a Mac with Firefox and the add-on I'm about to show you okay so I'm going to click the menu button on the Firefox interface that's on the far right underneath the the title bar okay so that's this little see this little a hamburger 3 lying menu icon that's iconic for menu ok I'm clicking that now in there I'm gonna click on add-ons ok so I click add-ons that makes a new tab and it shows me the extensions that I have in my browser so I'm using one password which lets me keep my passwords and encrypted database I'm using Downie which is a program I'm going to show you if you're a Mac user in a few moments I use something called furniture that I could open video windows outside the browser in you know I use a pop-up blocker called pop-up blocker ultimate I use an ad blocker called you block origin and there was an acrobat plugin I have that disabled ok so anyway these are some extensions that don't come with the browser that I've added now I'm going to show you one called video download helper ok so I'm gonna type in 2 here where it says find more extensions in Firefox ok video download helper so download helper is all one word download helper just like that ok and now that's gonna and folks we're doing this in real time ok so you know if there's a technical glitch it's what it is this is this is a live demo ok just that as a caveat there alright so video download helper you'll see it is the most popular with over 3 million users so the people who do YouTube or or any other video downloading this will not just work on YouTube this will work on any page that embeds a video so if there's an embedded video you can grab the embedded video with this plug-in with this add-on for Firefox so about three million people have this plug-in because the people who are doing this know that it works ok so I'm gonna click there on to the add-on and it says video download helper the easy way to download and convert web videos from hundreds of YouTube's like websites add to Firefox I'm gonna click this button here that says add to Firefox ok Firefox is going to ask me do you want to add video downloader it requires these permissions I'm going to say yes I want to add it ok congratulations you've just installed video download helper ok I'm gonna hit OK right here and then now there is one more thing you will have to do before you start downloading video you'll have to go to the settings and you will have to install the companion app the companion app makes it possible for your operating system to actually download the video to your file system so you have the browser plugin but now you need the application which basically takes it from your browser and saves it into your operating system ok so I'm gonna click here again I'm going to go back to add-ons click the menu go back to add-ons now video download helper is in my installed extensions and I'm gonna hit preferences right here this is the Preferences window and you can customize it however you like I'm not going to go into all the ways it can be customized I'm just going to show you it says companion app not installed right here this is what we have to get installed ok so I'm going to click this disclosure cross right there and it says you have to install the companion app ok so I'm gonna click install companion app that's gonna take me to another tab in my web browser and I know this is gonna look complicated but it you don't have to do this once ok so then for the Mac this will show you for linux for windows whatever system you're on it'll show you a way that you could download and install this okay so i'm just going to use the recommended installation method I'm gonna hit it's a package installation I'm gonna hit download all packages is just it's a piece of software it's like an installer you just double-click it and you install it so it says you've chosen to open this is the name of the package net download helper Co app okay I'm gonna hit save file so I hit save file you just saw my folder down there jump that's my downloads folder okay I'm gonna go to my downloads folder and open it okay so this takes me to my Finder interface and I'm gonna just double click on the file I just downloaded which is net download help or Co app this is the package okay for the companion app okay I'm gonna double click that and it gives me an installer I'm gonna hit continue and then install alright I'm gonna just allow it to install and I'm gonna hit close and you can either keep the package or move it to the trash I'll move it to the trash I don't need that anymore okay now I'm going to go back to Firefox and I'm going to close this tab and I'm going to right here hit recheck for the companion app so it says verifying companion app companion app installed we found the companion app in your Applications folder you're set now to download from any site that you can browse to that has a video embedded on it okay I'm gonna close these other tabs okay and so that wasn't too bad you know some people will consider that technical it was one down it was a download of a browser add-on and a download of a little small companion application that goes into your Applications folder that's it that's all so yeah an extension to a browser and a small program okay now we can download this video okay so I'm gonna refresh the page and it I have to allow access through my firewall which I will okay I'm gonna pause the video here okay now I'm going to go to this button right here you'll see that it put a new little button on the interface next to that menu okay so if I click that it will show me a couple of variations of the video that are available for download so I there is a 720p version and the 1080p version so I'm gonna download the 1080 version which is the full HD version okay so all I have to do is click here and hit download or I could just hit quick download now it's downloading so if I click in here and I hit running it will show me that the video has started to download and again it's a long video you know it's a it's an hour and 17 minutes and it's full HD so it's gonna take a while to download but you'll see it's already gotten one percent okay and it will put it in a folder inside your home folder called DW helper okay nothing's in there yet because it's not done downloading but it'll make a folder in your home folder and it will call it DW helper which is the download helper and when it's finished downloading you will then have the full video in your d DW helper folder inside your home folder you can go in there you can move it wherever you want you could double click it to watch it right there that is how to download just about any video that you find on any webpage that you can navigate to okay so I'm gonna show you one other method for doing this okay now this is my preferred method but this will only work on a Mac okay now there are other apps that are equivalent to this so again last week when I showed you that there are methods for downloading things with BitTorrent okay the idea was don't memorize the steps right the steps are just the method that we used in this particular instance on this platform using this app right if you're on a different platform it might have different steps if you're using a different app it might work a different way right so for example I was talking to a friend about IRC okay and you know a former friend showed me how to use direct client to client search engines they call DCC search engines right so I went on one and you know I was gonna download a file that I wanted to watch a documentary and this server had it on IRC and you know I started downloading it and my client program for IRC was very buggy it hadn't been it was I used to use an IRC program called Lincoln asst okay for the Mac which I liked I thought it was a good one there's a lot of old clunky ones old pure text interfaces this one had a nice window to interface it had like a direct client to client transfer feature worked really well when it was in its heyday I just checked you know I haven't been on IRC a lot and I haven't run Lincoln US in a while the last time this app was developed on the Mac was back in 2012 the developer has like you know it's abandoned where that's what they call when the developer stops making improvements and just lets the software just go so this program was abandoned where right and I think you'll you'll benefit from this anecdote okay because it helps demonstrate the adaptability that you have to have when it comes to doing things when you stay rooted in your ways and just tightly I'm gonna do it just this way this way this way okay and memorize steps and not just go along with the flow of something of how a general idea works right you're gonna find you're gonna be lost in computing okay this is about correlative thinking correlational thinking right this is what we've talked about this endlessly when we talk about the occult okay the occult contains tons of examples of correlative or correlational thinking the same applies with the technological world okay so I found Lincoln us to be super crashy when using it again in the real world on a modern operating system it hadn't been developed I guess since you know Mac OS 10 point 11 or 12 years ago right I'm using 10.14 now right so I said well let me see if there's another better IRC client so I downloaded something called textual right and I've never seen that program before in my life never saw it downloaded it for the first time open it up right there's a few things in different places but in general I recognize where to go to do things immediately because it's a general idea how does one use an IRC client right a general idea how does one use a a BitTorrent client a general idea how does one use an Internet video downloader they're going to have general principles that they're built on right that's the principle that's what you have to understand all right if you try to just memorize cotton memorize you know details of where this is at where this is at word and menus and tasks you are not going to be there in something that's built differently so you have to adapt and say I'm not looking for exact memorization 'el tasks this isn't a trained monkey thing where you know do this then this then this that no it's about the conceptual idea of what does this program do what is the purpose for it where might these items live if the person has a general idea of interface development okay and then you're going to adapt or correlate correlational you're going to correlate in your mind where functions might be in that other app okay so I open up textual and I was almost immediately able to start using a program that I've never seen before in my life because I got the general concept instead of memorizing tasks this is what good practices in computing are okay and in teaching technology which is going to be a big part of what on earth is happening going forward because I'm telling you folks I meet technologically illiterate people and it's it's unacceptable this is the equivalent of not knowing how to read and write in today's world ok it's not acceptable ok because if you're going to actually try to communicate and effectively teach other people you have to know how to do this stuff this isn't optional it's required so get the concept don't memorize tasks ok so I'm gonna show you a video downloader that is custom built for the Mac meaning it's a native Mac OS application you might go and type in to a search engine for example the program I'm gonna show you briefly is Downey ok so Downey is built for the Mac that there's no Windows version there's no Linux version however you might be able to type into a search engine of your choice what is a equivalent of Downey for windows of the Downey video downloader application on the Macintosh for Windows or for Linux so you know I when I'm on Windows or Linux I'll just use video download helper I know it I'm used to it so I use it and it works ok but you might want a native app on Windows or Linux so find something that does the same thing look on software comparison websites you know on all type in alternative to and then type in Downey for Macintosh right and just you'll find an alternative they exist then learn about the software buy it you know if you have to and start using it ok so let me show you Downey and how easy this one is so this is the interface for Downie okay oh it's a blank window that's just uh hovering I'm gonna even make it smaller so I have it kind of stretched out there it's just a tiny little window when it opens right and you can do a couple things here okay you can copy and paste the URL from your web browser that has the video on it to the downing window okay you can drag and drop the URL onto the downy window or you could do what I did and I installed the downy add-on okay so all I did here was I went to add-ons same way I did the video downloader and you'll see it's already in here so I'm not gonna redownload it I'm just showing you I've already done this process and I'm gonna just type down in here and again this is Mac only okay so this is the downy extension there's not nearly as many users you saw what was there let me go back there there was three thousand one hundred ninety eight users compared to three million users for video downloads so this is absolutely not as popular of an option okay yet for me I feel it's the best it works natively and it works very efficiently even easier than what I just showed you okay so it's already installed in my system so it says remove they're not install I'm not going to remove it because I use it okay so I'm going to use it to download the this GL Griffin video on YouTube so I'm actually I could start with it open or I could start with it quit it won't matter okay I'll I'll quit it so I've start with the program completely quit out of okay I'm just going to click this button which is the Downey button the Downey it says open with Downey okay so all I do is click that Downey opens it finds the video and it starts downloading now now Downey you'll notice is incredibly faster because it uses multi-threaded downloading technology which means it's initiating many downloads simultaneously for the same video and combined him that video is done downloading already folks the other one let's see where this one's at the other ones still at 28% okay now you understand why I use downy instead of you know download helper on the Mac okay not knocking the other one it's a good open-source alternative but look here's another thing folks not to belabor this point I talked about it a little bit there's a reason proprietary software people are willing to pay for it did you see the difference I know I did okay I want the free and open source community to succeed man what I mean I want I'm telling you from the bottom of my heart I want to support it I do support it I don't want to support it I do support it I wanted to improve okay the free and open source community cannot just make their selling point that it's free and open source your software must be good it must work well okay so let me tell you something if you give me the choice between that free and open source program that I can modify to my heart's content but it's going to download like that versus a proprietary program that I don't have the code to that I had to pay a developer for but it's gonna work like Downey just did I'm taking Downey 100% of the time every time and that's what most of average people that are using a computer to get things done are going to do so this is what the open free and open source software world has to learn okay you they gotta learn that it's a hard lesson to learn they don't want to hear it but they have to learn I believe me I'm one of your champions you you if people build free open-source software I'll highlight it on this show if it does the job better than anything else okay but I just showed you the program for me that does the job better than anything else for me okay you can choose what you want but you know I'm gonna just click this window and I'm clicked right here this little magnifying glass that'll take me to the finder we're the video is that and I'll just show you it is the full video and I can play it in its entirety in HD if we switch to the sorry and we switch back to the computer hold on there's a yep we're having it okay we're good I thought we were having a tech glitch there no worries here we go so I'll just show you this is the full video in HD and you know we can at ease let me just pause it I'm just gonna show you I could scrub all the way through it from beginning to end just as part of the middle you could it be injured you might even get kick I'll go all the way toward the end you know and it is the full presentation that G or Griffin gave on individualism versus collectivism all one hours one hour and 17 minutes worth so that is how to download a video from YouTube to prevent it from being censored folks okay you know I'm finished I'm quitting the program there close out of my browser so we're running out of time so I think I will let's see do we have time for one call going out let's see let's do one call we have about two minutes left in the show I hope everybody enjoyed that little addendum who do we have waiting here let's go - lets go - let me unmute myself I'm unmuted there alright let's go - lets go - dutch patriot dutch patriot you're live on what on earth is happening welcome i should be being heard in the room you have to unmute yourself this is what we have to put an addendum in here let's go to essence of an arc ani you're live on water hey Mark can you hear me yes I can loud and clear welcome to the show alright very limited time so go oh cool things then it's funny that we're talking here on do such harmony on something's that's you know with the green language and the data caps are probably more about cycling information flows than uh you know trying to make you look around you got digital I mean you look at fire satellite just looks like a low resolution image on the and I remember hearing that you were you're a fan and in the trip and I'd say they'd probably call you mark the shadow because you are diamond cutting people through the shadow cells I appreciate that your audio is cutting in and in and out a little bit so I'm gonna let you go but I got the essence of what you were saying we do have to press on with trying to cut through that darkness and you know part of that is showing people how to get information on their own and also to distribute it on their own you know we have to be not only people who download that information and take it into ourselves but who also propagate it and publish it out to others so let's go to electric boogie you're live on what on earth is happening welcome now let's go to true rebel true rebel you're live on what on earth is happening thirty seconds not there I think that's all the time we're gonna have for this edition I tried to squeeze a couple calls in toward the end that's all the time we have for this edition of what on earth is happening ladies and gentlemen I hope you enjoy the show we're live here every Sunday from 3:00 p.m. to 6:00 p.m. East Coast time remember everyone government is slavery we'll see you right here next week [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #205

Topics: *Entitled Socialist Attitudes Of Millennials & Europeans, The Great Work, Who is REALLY Awake?, Service to Self, Service to Others, Service to Truth, Entitlement, Prescriptive demands on others, Spiritual Shadow Work, Rightful and Non-Rightful Property, All Rights are Property Rights, All Wrong-Doings are Theft of Property, the Correct Definition of Socialism, How Socialism ALWAYS degrades into Communism historically, All forms of Totalitarianism are Socialist Regimes, Communism is Inter-National Socialism, the importance of the book "None Dare Call It Conspiracy" by Gary Allen, How Socialism bates people with "free stuff," Who are the Millennials?, Generation Y, Millennials and their support of Socialism, Millennials not being able to correctly define Socialism, Indoctrination through the "Education" System, the Frankfurt School, Antonio Gramsci, the "Long March Through The Institutions," Europeans and their support of Socialism, Europeans and Canadians making rude and undue demands and not understanding that it is socially unacceptable behavior, Collectivism vs. Individualism, Totalitarianism and Slavery vs. Natural Law and True Freedom, Going against the Social-Engineered crowd, How to download videos from video sharing sites, understanding technology concepts instead of memorizing tasks, Free Software vs. Proprietary Software*

freedom man that's what it's all about [Music] you've got the groove on freedom [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening calm ladies and gentlemen government is slavery and right here on what on earth is happening we are ending slavery one mind at a time welcome to the show today is Sunday April 7th 2019 this is episode number 205 of what on earth is happening we have a great show planned for you here today I'm going to be getting into another controversial topic that is sure to simultaneously enlighten and offend the very entitled socialist attitudes of millenials and Europeans I'm going to be talking about today the show is called gimme gimme gimme and as harsh as that may sound folks what I'm gonna try to do today in the first part is to try to really tread a balance between being harsh enough to explain to people that the behaviors that they are exhibiting are very socially unacceptable because of what they are demanding from other people that they don't have the right to demand but I also want to you know try to balance where I'm trying to not be so harsh that I don't inspire people to want to do better you know that's my goal here for today so you know I'm not trying to just drive away part of my listening audience I'm trying to make them aware of what habits have become culturally ingrained into their very way of existence and I'm going to include some other groups of people in there as well but you know another thing before I get into the main material for today I'm going to do is I'm going to do an addendum to last week's show toward the end of the show today I'm going to show people something that I neglected a couple of people brought to my attention when I was talking about how to get occulted information how to download find and download occulted information on the Internet in the age of Internet censorship I neglected and there it was a big oversight on my part I really should have shown people right up front how to download videos from the Internet this is something that most people don't know how to do they don't know how to grab a YouTube video you know to reshare it or to just save an offline to prevent it from being censored okay and this is something I'm going to show people on today's show after I get into the main topic of gimme-gimme-gimme the socialist and entitled attitudes of Millennials and Europeans another thing that you know people have been bringing to my attention they say that the shows that I've been doing have been have been very divisive okay I don't see it that way okay I'm not lending more to the divide I'm trying to heal the divide by showing people where the wrong behavior is at so that they can make corrections this is what real spirituality is ultimately all about it's about looking at the dark side it's about looking at the shadow side and doing that shadow work of looking at the aspects of one's personality and one's makeup that you do not like the in yourself you know it's it's looking in the mirror it's it's it's stopping pointing the finger outward and turning it around this way and saying what work do I have to do spiritually upon myself even in the the absolute muck of the soul in in in the the dark night of the soul in the the horrible aspects of the individual personality that people don't want to look at and often want to run in the other direction from this is part of what this is all about it's about exposing that it's about confronting that and looking at it head-on not you know beating around the bush and dancing around these types of topics but addressing them and looking at them you know right on point you know so that they can be dealt with and they can be worked with and you know purified these are aspects of the personality that we have to work on to actually purify and become better so that's what this is all about looking at all these things that are seemingly divisive but it's really about how we can do better that's ultimately what it's really about and as I said we don't need to compete with anybody but ourselves from you tonight you know that's who we should be competing with so with that being said I'm gonna jump into the topic for today it's gonna be like a dual show and it'll take as long as it takes again I may not finish the material today it may take that long or I make you know finish early and take calls early so if we finish early you know whatever time we have left we'll take calls till the end of the show in any event this is the graphic that Brett made for today's show always doing a great job with the title cards it's all the the the title for the show today is gimme gimme gimme the entitled socialist attitudes of Millennials and Europeans we're going to talk about what all this means what is entitlement what is socialism you know who are the Millennials you know why do they behave I do they behave this way you know what what has been culturally inculcated into them and why do Europeans take up this socialist attitude we're going to talk about that as well and it's part of what inspired this show I want to say right up front is dealing with people regarding the Ark Drive now for those who may know the Ark driver may or may not know the Ark Drive is a one terabyte hard drive with all of the research data that I have put together over the years that have helped to influence my work and have like the this is all the data that I downloaded from the internet earlier that helped to awaken me and enlighten me as to what is going on in the world I put the best of that research data on a one terabyte hard drive and I offer it to people not charging anything for the data that's free you just provide the hard drive you know and I do ask for a personal donation for my time for assembling it and you know basically putting the doing the copy of the data and then taking the data to the local carry or taking dead boxes to the local carrier office to ship them back you know and I feel that's an equitable trade for you know all the research data that I've put together over the years now in dealing with people to take me up on this offer I am making an offer for information that I have put together and done the work to assemble as an aggregator obviously it's not work that is created by me okay but I've I've assembled it I've gone out and found it found the pertinent relevant data and then assembled it and then in making the offer I have certain caveats and prerequisites that I want people to strictly abide by because I'm the one making the offer and the other person is the one taking me up on the offer and in taking someone up on an offer if the offer is actually done out of kindness and respect for another person which this offer of the art drive is I don't have to do this you know there's nothing there's nothing compelling me to do this other than my recognition that it's my moral responsibility to help teach and enlighten other people okay but there's nothing that is other than that that is binding me to have to do this for other people I want to do it because I know it's the right thing to do to help enlighten them so I am the one making the offer out of my generosity and kindness and then I find other people making demands on me that I must do it according to their likenesses and their preferences their their likes and whims and preferences okay and I see this largely amongst younger people taking me up on the offer and amongst Europeans and Canadians I have to say taking me up on the offer I'm going to include you know our neighbors to the north here in North America now in this segment I didn't put that into the title but they are almost as guilty as our European brothers and sisters okay and again I can get as offended as they want about what I'm going to say here today about the people I'm talking about in this show but it doesn't make it any less true okay and part of it is that people don't deal with a lot of people in from many different parts of the world very few people are constantly on an everyday basis dealing with people from just about every country on this planet as am i okay people write to me from all over people send arcs to me from just about every country okay so I deal with a wide variety of personality types so I have a good frame of reference a database of personalities if you will to extrapolate what I'm talking about today that is a generality it's it's a generally true thing and of course not everyone is like what I'm going to talk about today ok this is not a blanket statement that's another thing that should be understood I'm talking about the majority of the people in the Millennial Generation and the people from Europe and Canada that take attempt to take me up on the art drive offer now in in saying that I do have to say since explaining my reasoning for doing the Ark offer the way that I do it's gotten somewhat better ok so you know if there's an improvement here when people get more information when they understand what you're going through the art drive video is one of the best things that I've ever done that episode on the ark I believe it was episode 199 ok since that has happened hardly anybody has messed up any of the instructions on the ark and all of the Ark's have arrived all of the hard drives have arrived in perfect shape not one of them has been damaged and I don't believe any of been damaged going back everybody has gotten their data ok which is what I want to see that's the whole purpose of being strict with the instructions because I've seen it a million times done a million ways wrongly and then people have had their hard drives damaged right and we don't want that because that cost you time that costs you money then you don't get the data and then you have to do it all over again if you really want the data ok so that's where this show was inspired from I just wanted to say that as beginning ok so let's jump into the material for today this is all about the great work it's about doing the great work ok and you know what I'm trying to explain to people today is if we're going to do the great work we have to be ready for some of the consequences ok how hard it is to do this ok and this is what a lot of people don't see or understand ok because they're not doing it see they're watching ok so the great work is about dragging people kicking and screaming into freed that's really what it is as sad as that is to say is sad as that sounds to say out loud most people don't want the state of freedom okay they want to remain cosmic eternal children with no personal responsibility one of the things that you can say to somebody to make them hate you more than anything else is you are 100 percent totally responsible for what goes on in your own life that that will make people murderously enraged toward you murderously enraged okay okay because that's the truth and people hate that truth more than they hate anything else they hate personal responsibility being put squarely down upon their own shoulders and they want to shirk it they want anything but that okay so when I tell people the state of the world is our doing it's not being done to us we are the ones who are doing this to ourselves we are the ones who have put ourselves in the state of slavery okay the great work is to get ourselves out of the state of slavery okay and that is often to have to hammer on people's minds okay see the whole idea the whole adage that George Orwell said okay Eric Blair author of 1984 he said if freedom means anything at all it means telling people what they don't want to hear that's what real freedom of speech is things that make people uncomfortable because it it confronts them with themselves and the ugly shadow side of themselves that they don't want to see that's what this that's what a cult psychology is all about ladies and gentlemen okay it's about owning even the dark elements of the self that you don't want to acknowledge as being part of who you are okay and being responsible for that so the real work is to try to explain to people what the true philosophy of freedom is all about and the true philosophy of personal responsibility and natural law so the true great work is the arduous task of influencing others to awaken to the truth it is to help others to realize that in supporting and condoning the legitimacy of quote Authority and God or man's law that they have actually been supporting and condoning the legitimacy of slavery and that they were therefore amoral for having done so and this is the thing no one wants to confront and realize this is why we can tell this to our best friends and family members and they want nothing to do with it for us in many cases after we come out as being anarchists true anarchists and people who abide by natural law and think the truth and know the truth that man's law is nothing but coercion violence and slavery okay so we often you know take the attitude or take the idea the the analogy I should say of being this individual here on this slide on the right-hand side of the slide he's in the room with all the other people who were asleep and he has his head in his hands because he can't believe you know he can't wake them up and that you know that they don't want to know that they don't want to see but you know what folks some of the people okay who are sleeping are people who think that they're awake and I'm talking to a large part of my viewing audience right now a lot of the people who think that they're that guy with his head in his hands trying to wake other people up are actually the people who are asleep because they're not really doing anything okay they think they're doing a whole lot okay but they're not really getting the word out in any kind of a wide way okay talking to a few friends and family members you know we're trying to wake up your spouse or trying to you know talk to a old old auntie who you know is in a nursing home or something is not doing the great work in any kind of a wide way and I've been very harsh and critical to people because let me tell you something folks in all honesty naively of me I'm gonna use the word naive which is the word I hate the most applied to me but naively I'll say it to myself okay I was naive in thinking that there would be something of the order of about a hundred thousand teachers that were teaching natural law to my level by this point in time minimum maybe more I thought okay and here's here's the problem it hasn't manifested it hasn't manifested cause people aren't really awake and aren't really listening they they put on the air that they're awake and listening but you know what they're doing they're sitting doing what I was doing when I was still asleep they're amassing more and more information and they're watching it play out and they're not getting involved in the spiritual battlefield in some capacity okay so people who think they're that individual who's trying to wake other people up are actually the people who are sleeping in that room in that image right there in that analogy okay so moving on to the next slide no the next part of this slide in short to do the true great work means to help people to abandon their false religions their false religious beliefs and again we talked about religion on last week's show it is not just the cultural religions that we identify as religious beliefs like Christianity Judaism Islam Hinduism Buddhism etc those are not the only religions we are talking about we are talking about false axiomatic beliefs that lead people away from higher consciousness and hold them back from an understanding of natural law all false belief systems do this whether it be the belief in authority whether it be the belief in government whether it be even the the you know complete belief in the necessity of the monetary system for life on Earth okay whether it be a belief in that only truth can come from science or that only health can come from pharmaceuticals or or doctors okay these are all religious belief system these are all religions okay false religions okay these are the erroneous and dogmatic beliefs which hold back the progress of consciousness specifically by impeding the reception of truth and natural law this is what it is to do the great work to do the great work is to chip away at false belief systems all day long okay and why don't most people want to do it that's the hardest work in the world that there is to do the hardest work in the world there is to do is to tell people something that they fervently believe in and have believed in their entire life is a total crock of bullshit and is doing nothing but harming not only themselves but just about everybody else in humanity and it's destroying human freedom that's why it's so difficult to do most people don't want to hear that they want to kill the messenger they're not interested in just saying oh yeah I was wrong and I have to change now I have to change not only my thoughts but my behaviors too hardly anybody wants to do that I didn't want to do that when I was learning what the world was coming out of a satanic mindset I was so depressed about how wrong I was i sat and soaked listening to doom metal in my bedroom all day for the better part of two years okay you know that's how hard it was for me to tell myself I was wrong and how wrong I was but I still did it you know if we're because that's that the whole caveat here is if we're being honest with ourselves right you know you could tell yourself all kinds of Lies to say no I'm okay you know I don't need to do any of that I'm good you know and you just can lie to yourself all day long 24 hours a day seven days a week but if we're being honest with ourselves okay we have to be make an honest assessment am I really doing the work upon myself and I'm am I really influencing others to do that same work upon themselves and to abandon their false belief systems and I would say most people are asleep in the room and they're those people on the right-hand side who are completely unconscious especially if they know and aren't doing anything I'm talking to them more than I am that this the asleep or the dead okay I'm talking to the potential teachers out there who haven't said a word okay you're in a much more deep trance and coma than the people you think are asleep trust me okay and this is the problem the problem is that there's really stolen we one and only mark and that's a problem that's a big problem okay oh I want a hundred thousand people doing the work of teaching natural law to my level or beyond minimum maybe more and I'll tell you what if I can name five off the top of my head that are doing a great job we're doing well all right so what we have to understand is that there are two there's really three basic mentalities of what we can be doing in the world how we can be basically approaching life on earth in general we could be engaging in service to self service to others or a third form of service which I'll talk about in a later slide but let's look at the dynamic of the two mentalities are the two worldviews of service to self versus service to others this is a big part of what inspired this episode and what I see in the dynamics of dealing with people with the ark drive when you're making an offer of service to others and all you hear back from them is service to self gimmi gimmi gimmi me me me you're not doing enough you're not catering enough to my preferences okay when I'm dealing with hundreds of people and they're dealing with nobody but me okay and and my instructions for for packaging and shipping the offer in a way that can be accommodated to my schedule my busy schedule okay who a person who is doing a whole lot and has been doing an incredible amount of work okay and I always want to say thank you to the people who assist me people on the staff and the production crew and the setup crew people who have donated you guys make my work easier okay and in many cases I couldn't do it without those people all right but the whole point is in most cases if not the vast majority like almost all of them the people who are receiving this knowledge aren't really doing anything themselves some of them are I'm not saying none of them no blanket statement there okay some of them are doing their own work but most of them are still in the learning phase and like and they're really not even really at the very beginning of the learning phase you know they're very green when it comes to this many of the people who have requested the arc from me okay and this is a whole new thing trying to oh they're trying to open up whole new vistas of understanding and unlock you know previously locked doors in the mind okay which I commend them on doing they're to be commended just for wanting that knowledge okay however when you deal with many of them you see they're still in this service to self mentality almost like a form of mini-me Satanism as I call it the Satanist have done a brilliant job the social engineer Satanists have done a brilliant job folks in bringing people into a lower form of their own mentality in a in a I call it mini-me Satanism it's it's not the big boys Satanism you know of the world control class yet they have to give their acolytes they have to give their lower-level initiates the people that they really want to rule over a watered-down variant of their ideology and the watered down very enough their ideology is only care about yourself get whatever you can and get as much of it as you can and whatever you have to do do it to get what you want okay and take as much as you can if you're given a quarter of an inch takes six and a half thousand miles okay so and this is what I see there is there's no attitude of gratitude or gratefulness in many cases and now look I want to make it very clear folks some people are so grateful to receive the information okay and they know what they've just been given then there are other people who they want to constantly it's not even bargaining they just want it on their terms that's it because they don't understand how to operate with anybody any other way they don't know manners in since okay well what I'm really talking about here are social manners something that's largely lost on society people don't know how to engage socially with manners okay with basic mutual respect okay if someone makes an offer to you you don't start barking terms to them you know they're making an offer out of their own gratitude they're not charging you for it they're not saying you have to do favors for me to get this okay they're just saying I am dealing with a lot of people and I'm dealing with a lot of other work that I do simultaneously okay you're not the only one that is of import right and if I'm making an offer that involves my time my technological horsepower that I have to give up time on computers to do copies on drives and resources on computers okay not only my time the unpack boxes hook up the drives copy the data breach act the boxes take them to the shipping office I do this folks me I do this I don't have teams doing this for me some people occasionally help me copy a couple art drives but largely I do almost all of it myself okay in addition to all the other work that I do during the course of the week here on what on earth is happening it's literally a full-time job okay so what I see is that many people not all don't have an attitude going in of be great farm willing to do this okay and look I see this again I'm going to tell you the people I see it in and I don't see it I'm very very happy to say I don't see it that attitude of you know gimme more you know do this for me I don't care about what's involved in your schedule I don't see it with a lot of Americans I'm happy to report that okay you would think it'd be the other way around you really would you'd think with the European contingency they're very cultured people in many cases and that they wouldn't have this you know level of disrespectful attitude and again I'm not saying it's all of them okay and it's gotten better I let people know since I brought this to people's attention it's gotten better that's why we have to talk about stuff like this and bring it to people's attention because if you don't they think what they've been doing has been as it'd been acceptable and will continue to be acceptable and then it doesn't improve see this is part of why the world is in the shit state that it's in okay that's why we're in the state of slavery people won't call other people on their bad behavior and things just keep snowballing and getting worse because of that dynamic because they don't want to rock the boat and they don't want to cause discomfort okay so going back to this dynamic of service to self versus service to others this is an image that I found online that I think just perfectly depicts the service to self mentality I'm gonna get all I can I'm gonna consume all I can screw the other guy his problem isn't my problem I don't care what suffering he goes through I'm gonna take take take take take me me me me me gimme gimme gimme that service to self you know what if we're being honest with ourselves ladies and gentlemen if we're being honest with ourselves the most important word in that statement is not honest it's not ourselves it's if if we're being honest with ourselves most people are in this state okay most people in the world are in this state of consciousness and you want to know what that's why the world is enslaved that's the very reason that's the very causal factor that the world is enslaved because this is the attitude of human beings that it's a satanic mindset from the religion called Satanism which is the main first tenet is self-preservation above everything else including morality that's the very first tenet of the Satanic ideology and the Satanic religion and so they gave to all the people of the world they inculcated them into a lower-level variant of their very own mindset mini-me Satanism that's what the world is in okay so if we want to transform that and change it and by changing ourselves thus change the reality that we live in the strange the manifested world okay we have to change the causal factor which is the level of consciousness that we are operating at so service to others mentality puts us in a position where we understand see what service to self mentality does I'm just gonna step back briefly what service to self mentality does okay is it is the question what can I do for me that's the question it asks each one of these mentalities or forms of consciousness has a question that it asks this one says what can I do for me I wake up at the beginning of the day and I immediately start thinking what can I do for me as the day goes on the question continues what can I do for me when I go to bed I'm thinking about what can I do for me tomorrow and that's it and you wake up and wash rinse and repeat the cycle and do it over and over again in an endless loop that's Satanism that's what Satanism is see this is the whole problem ladies and gentlemen I have almost never in all of my studies and all of my watching and listening and learning I have almost never heard anybody explain to other people that that's what Satanism is and that's the problem is that nobody knows that that's what Satanism is and the problem is that hardly anybody is telling and teaching other people that that's what Satanism is but that's what it is it's it's spending the entire day asking the question what can I do for me okay never asking the question how can I help someone else okay because that's service to others mentality how can this mentality this worldview this way of being in the world way of living asks the question what can I do to help someone else okay how can I alleviate some suffering for another individual or group of people okay how can I bring someone up to my level that's why I like the image that I found for for this dynamic okay it's people trying to help people up a rocky you know incline alright which is what the world is like you know and those who have made it up to the top they're trying to help others get up there and encourage encouraging them that they can do it alright this is service to others mentality it's not necessarily doing any the work for them okay but it's in us being an assistant see in in in the work of alchemy in the work of a cult alchemy you can never be the alchemist for someone else okay you can help to influence them to become the alchemist for themselves to do their own personal inner transformative work okay but no one can do alchemical or shamanic work for someone else we can be wayshowers we can show the methods and we can show them the path that they have to walk down but they have to walk down at themselves there is no substitute for personal experience in the great work okay so that's service to others mentality it's it's it's taking a step outside of yourself and you know it's it's not to say that you lose self-interest okay but the self-interest becomes enlightened self-interest because you're saying in helping others I'm also helping myself by bettering the world you know I still have that dynamic of ego as we all should you know one should become so 100% of altruistic that in the loose sense of self because then your your health will start suffering you you know and I get into this dynamic where I get so over the top sometimes that it's like it will start affecting my health and nervous system and you don't want that you know there has to be this balanced read right where you're doing enough to maintain yourself and keep yourself healthy and in good shape and energetic enough to keep going and keep doing it but you also have to be helping other strong enough to help others on the way that means you got to be strong enough for yourself and strong enough for others and let me tell you something folks it gets draining it becomes very draining at times even for someone like myself who's been doing this this long because then you start getting burnout especially when you see other people aren't making the effort nowhere near in any kind of a capacity that is required and you know they're still doing something like hinging on my every word when they should be becoming teachers themselves you know you should only need me as a teacher up to the point where you start to become a teacher yourself you know this is what we need not everybody in the world is gonna learn from Mark passio trust me most people will never hear a word I say this is why I have to explain other people you the idea is not to just send people to me the idea is to become a teacher yourself I'm not trying to have followers for Mark passio I'm trying to help people to understand natural law and encourage them to teach it that's what I want to see all right I'm not going for you know my goal here is not popularity notoriety YouTube views money anything like that okay look if people do learn from me great it's an added you know benefit you know if I can support myself doing this wonderful that's an added benefit but that's not my motivation my motive motivation is to put the truth out in the world and help to inspire other people to teach it alright so that's the whole mentality of service to others and in doing service to others you'll benefit as well okay because the world will improve and you will reap the benefit of that improvement now there's a third mentality okay and this is the mentality that I want people who I'm talking about to really get not just the service to others mentality and getting out of the service to self all day mentality okay but to go further than service to self mentality which is great it's wonderful it's needed but that this asks the question up to to yourself what can I do to help someone else what can I do to help others right that's the question well the next mentality is service to truth mentality okay this is the one that's left out by almost all other spiritual teachers because this goes beyond human beings this goes right outside of the physical domain this goes into the pure spiritual domain service to truth you could call this service to the Creator if you will all right service to natural law whatever you want to call it all right but you are serving a higher power in nature than just human beings whether it be you or anyone else okay and the question that is asked by the person who goes into the mentality that the way of being in the world of service to truth is what is the best way that I can possibly help the world see it's not just saying well there's an immediate situation here how can I alleviate this immediate suffering but if it's the idea of if you want to feed the old adage if you want to feed a person you give them a meal if you want to feed them for a lifetime though you teach them how to procure food for themselves okay and you know that's the whole that's the whole problem is that people aren't being taught self-reliance self discipline self responsibility okay so this is the dynamic of you don't just try to give people an ideology or a mentality you try to show them how to learn how to exercise discernment how not to fall into traps you know of being wrongly influenced and controlled okay and then how to go out into the world and ask the question what is the best way I can teach the maximum number of people so that they will start to disengage wrong ways of thinking and thus disengage wrong ways of being see this is the question I had to ask myself when I said when I realized I knew a lot about the dynamics of the world back when I was younger especially because of the experiences I had gone through okay I had to ask myself what am I gonna do with this knowledge and experience right am I just gonna tell my friends and family and hope some of them listen maybe spread it down to the next generation will that really be long-term effective will I reach the maximum amount of people and do the maximum amount of good that way you know do I write a book that maybe I'll get in a couple of bookstores if they take it if I get decent enough distribution and then maybe enough people will buy and read even though print media is like you know kind of almost like a dinosaur compared to how people absorb media today okay and learn so you know I had to sit and consider the question how am I going to approach this dynamic and the answer to me was I had to ask the question what is the absolute best way that I can it that I can help the world and the answer came back I need to put this work out publicly online and I was going to do it unapologetically and I was going to do it in my own aesthetic and my own delivery style not trying to be someone else okay delivering it with the personality that someone might see talking to me on a daily basis some people can handle it and some can some are never going to be able to handle it they're gonna die in their state of weakened I'm offended by everything mentality many of the people okay who can't handle one second of a mark passio video that's not who I'm doing this for though see I decided a long time ago my target audience was the strong people who would be able to hear what I was saying because they had come partially so far and I would try to influence them to become the next generation teachers of the world to put this work out there in many different ways so that other people can get it I can only do it I'm only going to do it this way I could do it a million different ways if I you know put on a bunch of masks and pretended to be somebody else this is Who I am okay as a matter of fact I hold back a whole lot on the air ask people who know me in person I hold back on the air okay so you know that works with some people it's not going to work for everybody okay so the idea is service the truth mentality says how can I in my own special way in my own way right put the work out there so that other people's people can get it and that what is which what way can I do that then I'm gonna make the maximum impact in the world and do the most good as a result and if you're really in a higher level consciousness mindset this is the question you're asking what is the best way to help not just one way to help but what is the best way you can have and that's your will that's your true will if you follow that path that is the way that you if you keep doing it the universe will open doors to you I know I've done it okay and I've seen those doors open to me you know just the fact that we're I'm doing this show it is proof of that that it came together it manifested it took a couple of years but it manifested okay and all of the dynamics the resources and the people came together to make that happen because I was in this mentality that's the reason that it happened I had to push for it I had to fight for it but as long as I stayed in that mentality of service to truth and focusing on what is the best way to help that's why that manifested and see this is what I'm trying to explain to people the people I'm talking about they imagine themselves to be awake many of the people that I'm talking to be talking about in this presentation but they're not really in this state of mind okay they haven't really gotten that and don't really understand this is a spiritual war where you have to ask that question what is the best way to help okay most people don't ever get there you know if they're doing well they get to the mentality of well how can I help somebody else maybe I'll try to enlighten my mother or my sister and my brother okay but they never really go to that service to truth mentality and that's where we all have to get to so moving to the next slide I'm talking about people who have entitlement attitudes attitudes of entitlement what does that mean okay we hear the word entitlement but let's actually define it okay entitlement is a belief that someone is deserving of or entitled to certain privileges certain privileges with which they did not necessarily themselves earn or should have the right to it is also entitlement is also a set of social expectations which are considered unreasonable or unduly prescriptive upon others in other words making demands upon other people's resources making demands upon other people's time wanting you to give them leeway in instructions that you that you've set because they work for your time and schedule and resources right make exception for them because they are considered special they're considered entitled right and there's a million reasons why they want it well I don't have as much money as the next person or I don't have you know the same resources or you know I live in this country or that country or that country you know and it's like okay I get all of those things I understand but at the same time then you don't need to accept an offer that is made it's like someone who wants to go out to a restaurant with a bunch of friends and doesn't have any money to pay for his meal well the person might want to go to the place to enjoy the social interaction and the good food with his friends his or her friends but if the person doesn't have the money to pay for that meal they probably should not go to the restaurant empty-handed and then expect someone else at the table to pay for them this is what this is like okay it's it's it's like saying well I didn't work for what I'm getting right but I want to change all the dynamics and all the rules involved and get it on my terms anyway okay and that is again the words here it's a perfect

perfect definition unreasonable or unduly prescriptive means that you have made unreasonable demands upon the others resources time efforts etc okay they're unreasonable unduly prescriptive and this image perfectly describes it that this image is what I see spiritually playing out inside the mindset the mentality the psyche of the people with this type of an attitude and I want to I want to tell you like it sits in the anarchist movement it's in the so-called freedom movement see because we're many of the people are still of this notion that this is all just an external conspiracy ok the conspiratorial aspects of this are worth studying they're worth noting and studying and they're real ok but see if you get just lost in all of that and you you don't go back to the beginning of my work ok which is why started with the solution what was the solution in the beginning of what on earth is happening the presentation and the podcast right was it no every aspect of the conspiracy you know no that wasn't the solution was it right was the solution blame one group you know that you think you think is the be-all and end-all of who's controlling the world and point the finger at them and say that's the problem that they just have to be eliminated and everything will be fine was that the solution presented at the beginning of what on earth is happening no that wasn't the solution either was the solution come up with redic ridiculous models for the shape of the earth all right we're not gonna go there ok but that wasn't the solution either folks ok the idea was change your consciousness understand what higher consciousness is and means and then do your internal work to change your consciousness and thereby change your behavior and then start influencing other people to change their mindset and behavior and here's the here's the problem folks you wanna know the reason why there are a hundred thousand teachers teaching at my level because they haven't gone through the personal transformation in consciousness yet they're still studying all only the external factors about the world control system and they have not learned all of the dynamics of human consciousness that is the required causal level factor for creating the change in the manifested reality to change one's own consciousness and this is why the world isn't changing because we're not doing that internal work and most of us look like this baby with their arms crossed the making demands on other people and see this isn't again people will turn the table and say you're doing that no I'm explaining what other how other people are falling short in doing the great work I'm not making the ban I'm saying you and other people out there saying you want this change to take effect okay therefore there are prerequisites there are requirements in work that must be done for that change to take effect you you're in slavery you want freedom well there's prerequisites that have to take effect that means you have to change certain things in your mindset and behavior I want those things that change so I change those things in my mindset and behavior that's why I am acting like a responsible adult when I deal with someone else not like an angry child with their arms crossed okay you know making unreasonable demands I've come out and said I won't continue to do work unless people step up and do contribute resources and time and effort and I don't see it as the same thing because of what I've already freely given okay having freely given of my time my energy my resources my respects periences from my own caring from my own desire to want to enlighten other people which is what the true great work is about okay I don't think that that's the same as going up to another person who is said okay I can I can do this for you and then me saying well you know I want you to do this this this on my terms okay I can say no that's okay if you can't be here every every Tuesday when I work then we we I I don't accept your offer of help just like somebody can say well I don't have money to ship an art drive to you so I can't take you up on your offer maybe when I have the money I'll take you up on it you know but there are people who want you to jump through their hoops to do everything to do it for them and this is I'm gonna explain it comes out of a socialist mindset the attitude of entitlement actually comes out of a mindset of government taking care of everybody and it comes out of this staying a child again this is the perfect image go back to the image okay you see the child not getting their way right this is wanting immediate gratification not wanting to work for something right it's a lot different you know wanting immediate gratification not wanting to work for something people will compare this to me saying I want some help for doing the great work with what on earth is happening how dare I you know how dare he asked for for volunteer help because I've been doing this for like 12 years so I don't desert freely I might add and out of my own pocket only recently if people come forward to really contribute resources financially for me to make things go to the next level with this and you could still say that they're at somewhat of a semi-pro level you know this isn't anything like some of the production values of really bigger podcast but it's it's not bad for doing it on the budget that I have available to do it on okay but my point is you know entitlement is something different than asking for justified help and resources that you know after someone puts a whole lot of work in you could say hey they deserve that this is undue mindset of deserving something when they the person hasn't earned it that's what makes it entitlement okay something can be deserved but not given okay but this means it's not deserved and demanded for that's what entitlement is all right so you can't get the two things confused with each other all right because there are legitimate things that people should receive especially if they put a certain amount of work into something to benevolently enlighten and guess what it's not just me there are many other people that deserve resources that people should go out and fund you know because that's what they do you know they give up their full time to do this to research and then to present in whatever form they present it and those people should be making more money and have more resources at their disposal than imbécile basketball pliers and imbecile baseball players and imbecile football players who don't give a damn about anybody themselves and lead totally hedonistic selfish satanic lifestyles okay to play children's games they get there those kind of resources because that's what this the the whole society values this is how screwed up our value system is okay the people who are trying to teach people what real values and real principles are I have to scrape by by the skin of their teeth and people who play an idiotic children's game so that people who don't want to think about reality can crowd into crowded stadiums and watch grown men play children's games you know they're making millions you know while the people who are actually trying to enlighten humanity are scraping by not having the resources that that they have to even help you know their their pay their staff or or or even live themselves you know it's ridiculous and then then we'll get flak from imbeciles saying how dare we ask for donations I mean like shove it up your ass okay people who think like that so I'm talking about almost invariably people who have done absolutely nothing and yet think they're entitled to a whole lot okay for having done nothing just because they want something on their own terms just because they're used to getting what they want on their own terms because daddy government mommy government has given me everything since the day that I was born for free and that's how it the whole world should be nobody should work for anything government should just provide everything for us so I'm gonna sit here with my arms crossed because you just asked for me to follow instructions what why should there be any rules on anything why shouldn't I just you know get what I want at any point in time just because I feel like it cuz that's what's always been given to me by mommy and daddy government is this is this child mentality that's coming out of a lot of people all right and it's embarrassing and I'm trying to try line here folks again I said this at the beginning between being harsh but not too harsh that I make people totally tune out and say I don't even want to improve myself it should make people feel uncomfortable to the point of that they're somewhat embarrassed for previous bad behavior and want to say you know what we have behaved like that it is due to cultural inculcation in our way of life prop you know hammered into us by the media and the government and we can do better and we can change this mentality all right so let's move on the people that I'm talking about that are doing this are Millennials and Europeans in other words what we're going to talk about what the Millennial age group is it's basically people who were born around the early 1980s into the early 1990s mid 1990s maybe okay so but and of course Europeans are people from just about any country in Europe and but they're taking an entitled attitude which we just looked at what that means and they're taking a socialist attitude and again I feel that these attitude of entitlement actually is derived out of in stems from the socialist mentality so what is the dictionary definition of socialism according to the merriam-webster dictionary which whether you consider that a valid source or not it's a basic dictionary definition this is someone else's slide by the way government ownership and administer socialism me government ownership and administration of the means of production and distribution of goods okay now some people will twist and contort that definition is simply public ownership okay which there is no such thing in the lark and roads just did a great video on how public ownership is utter nonsense there is no such thing if there isn't private ownership there isn't ownership because ownership means you decide exclusively what happens to to an item a piece of property how it gets to be used period okay so if that is an exclusive it's not owned by anyone okay it's in the case of socialism it's a tool for the state to control that's all it is okay and it isn't just collectivized ownership or quote public ownership it actually is in the hands of the state so people want to nitpick and fight over that definition that's what socialism is ladies and gentlemen it means the state owns the means of production and distribution of goods period that's what it means that's the classical definition of socialism and guess what it's the correct definition of socialism all right now right off the bat if you can't see how that's going to end in a nightmare situation then you haven't read world history and you haven't understood how this descends into totalitarianism fascism Nazism communism etc and ends up with starvation and we're mass deaths by military or secret police you know or starving people out because that's how it happens and every recorded instance in human history and that's how it will continue to happen as long as total retarded people who are completely slow on the uptake which is what the word retarded means you don't need to have any kind of a syndrome to be retarded in your thought process it just means you're slow on the uptake that's all it means to retard means to slow down look it up in a dictionary go look it up in merriam-webster okay it means to slow the progress of and it means that people are slow on the uptake in their ability to understand what things mean and what direction things are going so yes the people who haven't understood that that's where socialism goes are retarded in their thought process okay socialism is also defined as a system of society or group living in which there is no such thing as private property and I would agree this is what these idiots believe this is what people who think that no one can own anything see all rights are property rights we talked about this when we talked about natural law if you don't understand that go back and listen to the natural law seminar go back and listen to the podcasts on natural law without property there are no rights all rights or property rights everything that is a violation of any human right is a violation of someone's rightful property property is real it exists in nature in nature is not a constructor idea money is a constructor idea that doesn't exist in nature it's an agreed-upon thing rights aren't constructional they exist in nature property is not construction it exists in nature okay you are actively using it into the 3d world its property okay going back to the definition of socialism a system or condition of society in which the means of production are owned and controlled by the state perfect definition correct definition okay the means of production owned and controlled by the state again what socialists naively believed is we're going to give all this power of the state we're going to then solve all the problems of the world because in their beneficent knowledge there are mittened beneficence the state is going to take care and provide for everyone thus ending all problems of the world by their effective distribution of the means the distribution of the means of production and the distribution of goods and services solving all world hunger all world problems and then in that state of ultimate power of controlling everything how everything is made produced and distributed the state will magically dissolve itself out of its own beneficence thereby producing an anarchic world yeah that's how it'll work yeah where's our vomit guide do we we got to have him on file okay we got to have our vomit guy on file okay so we can play him at any time so I could go back to you know hold on let me see if I could find him real quick just to back off of my slides I'll go to my through my stuff and we just see if I could find that guy give me a second okay all right hold on a minute yes switch back switch back to my laptop real quick I can't do it wait wait give me a second I'll do it full screen go back give me one second here I'll do this full screen for everybody yeah we're gonna improvise here on what on earth is happening that's how important this is okay I should have planned for this but I didn't so I'm gonna make a slide real quick and I'm gonna play it and I'm gonna go fullscreen hold on give me one more second there we go go fullscreen now there we go here we go folks yes the state is going to control all means of production and distribution of all goods and resources and services and then the state after we after arriving at this ultimate source of power is going to dissolve itself oh it's not it's not even our benevolent leader folks this is the per average person who believes in socialism okay this is the believer in socialism spouting this nonsense the the state's going to control everything folks it's going to control all the method of production the means of distribution and then it will dissolve itself leaving an anarchist Society Oh what pure beneficence aw it's so wonderful this is how imbecilic people sound this is how really imbecilic they sound folks you know again I I think people should really record themselves right they should record themselves and then play themselves back so that they can hear how ridiculous and nonsensical they actually sound when they speak or what their ideas are speak your ideas aloud then play them back to yourself so you could hear how ridiculous some of the ideas that people speak actually sound that this is what socialists believe that's what they actually believe will happen this is what marks the Antichrist if there ever was an actual Antichrist in the world what Karl Marx pumped into the mindset and it wasn't Marx it was the social engineer occultus who controlled him and his family members and his associates like angles and and basically commissioned him to put the planks of the Communist Manifesto out there you know Marx was it was a puppet okay he wasn't even somebody with this type of mentality you know it was like Levay in the same sense that Levay conquer ties the Satanic mentality and put it out in the Satanic Bible it came forward years after that that he was charged to do that by higher levels Satanists namely the Bush family okay who were friends and handlers of lavae all right so what we ostensibly believe are put out there by certain writers / philosophers i ideologues are not their real really their own work okay they're they're commissioned to do that so that the real source of these ideologies and mentalities can remain secret it away okay so anyway we have to understand what we're talking about we're talking about a socialist attitude of entitlement this is where it comes from because it comes from the belief that oh the state should provide everything for everyone and therefore hey you know how dare you you know go against that mentality by saying aye you want me to do something and it costs me money and resources and time and effort and energy even if I'm taking you up on your offer you know oh I have to make demands on you even though you offered the thing to do it my way and and as free and little resources I have to put into it you know I mean I just go back to this folks I'll do it when I get to the the Europeans okay let's just move forward invariably unwaveringly socialism um always descends into communism or a form of it okay and it can descend into nationalistic fascism as well it is possible okay or it can descend into a very twisted inbred variant of the to where you have certain aspects of the society acting fascistic or corporatist and then other aspects acting completely communist socialist but in general the social engineers of the world have decided that communism through socialism arriving at communism through socialism is the most effective means because it is largely done culturally and over a long swath of time compared to a nationalistic fascism form of totalitarianism which is often done as quickly as possible often through military coos and conquering other nations militaristically through military invasion this is seen as not preferable to the long marks through the cultural institutions that a socialist / communist regime would choose because it is done almost imperceptibly and then people wake up in a totalitarian society not even understanding how they got there often accomplished over multi generations multiple generations but people like Stalin said you know I only need one generation to you know have the future generations for hundreds of years and you know the generation that has been gotten in our culture is Generation Y other otherwise known as the Millennials okay and when I mean gotten I mean they are hardcore God okay to put it in Street lingo they are God okay and they don't even know how gotten they are all right see that's the problem is you have a a an entire entire generation of individuals an entire demographic of people that are so overly intellectualized and overly quote educated formerly that they largely don't have the common sense to understand how completely duped they've been okay that's why so many younger people in this generation believe in socialism and communism all right and what communism is people have to understand it and they have to go and read and understand really what this ideology is because people don't understand what it is I'm not going to get into all the planks of the communist manifesto today that's a whole nother presentation I will be doing that in I'm gonna do a long-form presentation it's probably gonna be about eight or nine hours called occult the dark occult origins of Nazism and communism because they have a shared dark occult origin okay so I'm gonna be getting into that in a formal long-form presentation not probably not on what on earth is happening more likely than not that will probably be being done either probably at the near next year probably toward the beginning of next year in Philadelphia I'll set up a location and I will deliver probably an all-day seminar here in Philadelphia just myself called the occult the dark occult origins of Nazism and communism probably in the year 2020 if we're all still here okay so what people have to understand about communism is communism is a system of international socialism see so the words national socialism is in the definition of communism here but the the prefix inter is applied at the beginning so national socialism is what Nazism was you know the the word Nazi is a truncation of Nazi oh now so Silesia to Deutsche arbeiterpartei and pricks use my German pronunciation I probably butchered that but if you take the acronym of it it's NSDAP National Socialist German Deutsche Workers arbiter party okay National Socialist German Workers Party NSDAP was the initials for the Nazi Party and then the truncation of it became Nazi in English because they didn't want to say the whole thing in German okay and in that is National Socialist it was a socialist regime but again it was National Socialist again that's what fascism is it's national socialism okay it means that you've accomplished socialism through a more individualistic nationalistic approach you've gotten it there appealing to people's egos and nationalistic pride and then you've largely conquered militarily instead of culturally you through military might that those are the mechanisms of National Socialism folks just read about it historically which most people won't pick up basic history books and read about it okay what we're talking about here in the form of communism has practiced by you know Red China and Soviet Russia we're talking about international socialism that's the only difference between communism and Nazism one does it through nationalism one does it through internationalism okay so this is international socialism it means instead of putting people on a nationalistic path you are putting them on a common world path the common goal common purpose to a world system okay and that's why this is favored by the people who talk about they want a new world order the new world order is international socialism and that's communism all right that's why they want us to go to the the gap in between going straight to communism you've got to get to full socialism they want democratic socialism they wanna they wanted to degrade from a republic okay down to a quote democracy down to democratic socialism then into pure socialism then eventually into international socialism which is communism okay so moving forward to understand the dynamics of why people do not understand what communism is and do not understand why people in high-level positions of Finance and banking and military and government okay want to bring about world communism through socialism and always want to project that socialism is a good thing for the masses of people and they want people subscribing to the idea of socialism it's the same thing is why do they want why do Satanists want people subscribing to the ideas of communism but oh I'm sorry of Satanism but on a lower level many me Satanism well you get a if you're a high level communist and you want to bring the world into totalitarian communism the New World Order the dark New World Order you have to bring people into a mini-me version of your mindset which is socialism that's mini-me communism it's the same thing as what I call mini-me Satanism and let me tell you something folks this book right here that I'm putting on the screen put this fullscreen okay this is probably the most important book any human being will ever read in addition to the end of all evil by Jeremy Locke and the most dangerous superstition by Larkin rose okay I have now asked multiple rooms of people at events that I've been at who has read this book cover-to-cover in its entirety it's a short book it's like 150 pages to 200 pages depending on how big the print is in whatever Edition you're getting it in okay maybe even less than that and hardly anybody's hands ever go up in my personal life I asked people how many people do I know of read people this book cover-to-cover I might know three or four people personally as individuals that have read this book cover-to-cover I'm telling my whole listening audience my whole viewing audience right now this is the most essential book right now that anybody could read at this point in human history this is it none dare call it conspiracy by Gary Allen I will link to a PDF copy of the book in this podcast download it put it on put it on your damn reading device whatever it happens to be whether it's a smartphone a tablet whatever the hell you want to read on okay and read this book cover-to-cover anybody who wants to claim that they're awaken has not read this book you're asleep I don't care what else you know you don't know what's going on in the world if you haven't read this book somebody had high position of government writing about it from the inside from his own knowledge from the inside just like I'm telling you about Satanism because I on the inside and came out of it this person's telling you about what's going on inside high-level positions of government because he was on the inside it's not prophecy folks it's a game plan okay all right people want to say it's conspiracy no it's called a game plan of internal collusion between high-ranking members of politics banking military industry etc that is operating in the very real world that you don't have to apply the moniker of conspiracy to to understand that it's happening and he called it none dare call conspiracy because it most certainly is an organized conspiracy and he was trying to explain to people what why do these people want to bring it in through socialism because this is what people don't understand they think they're trying to help you by bringing socialism in nothing could be further from the truth these people aren't interested in helping you they're interested in controlling you in enslaving you for anybody in the truth movement that is not read none dare call conspiracy by Gary Allen you are asleep and you don't know what's going on if you haven't read this book I don't know how much more how much much more harshly I can say it those who haven't read the book none dare call conspiracy are not awakened to the political machinations of what is are really going on in the world and if you can't take the time to read a hundred some page book cover-to-cover you're not worth anything let alone putting the time in to awaken or helping to awaken other people so read the book no problem my producer was just informing sorry folks are just informing we had a little network screaming hiccup there I apologize for that hopefully everything is working fine again but you know these things happen we are live so you know we'll just continue to go going back to this slide I'll link it in the you know in the podcast when I put it out also just as a brief aside people and ask you know well you know the live stream goes on YouTube when it's live it goes on Facebook when it's live on Vimeo you know we we simulcast on Vimeo Facebook and YouTube in addition to what on earth is happening calm slash show okay but the podcast officially gets put up from the raw video okay yeah and it's largely uncompressed video so I wanted to look as pristine as possible and I usually put that up the night after the show I'll take a break for a couple of hours after I do it because this show leaves me pretty drained and then I'll take a break I'll eat something I'll relax for a little bit then I'll go put the video up okay so you know don't expect the podcast immediately this isn't an automated process folks one day I'm gonna leave that till the next show okay one day I'm gonna leave doing the podcast til the next show and I'm gonna show everybody what I have to do to put the podcast up so you understand the work that I do after the show which nobody does for me I do it okay so you know coming some slack on the time it takes me to recuperate after I do a three-hour live broadcast you know to the time when I got to go back and sit at the computer immediately again and start working on the podcast okay there's no magical podcast button oh wait a minute oh I see it it's so bright above the return button there's the podcast button I thought that was the back slash but apparently that's the podcast button you hit that your podcast goes live right out boom oh it's all tagged everything it's up there in the format you want the XML feed is built boom podcast stop no work required it's one button on the keyboard sorry folks I missed it I didn't know that there was a podcast button on my keyboard see that's why you got attention and when you buy new technology you gotta look at the instruction manual you gotta look at all the buttons I you know if I would have known that I'd be hitting that button boom one second after the show is done play and it would be live so you know understand it's a complicated process okay and it takes a little while all right I'll do it live on the air one day thomas jefferson said and he was really talking about socialism here i predict future happiness for americans if they can prevent the government from wasting the labors of the people under the pretense of taking care of them that's what socialism is ladies and gentlemen it's taking all of the labor of the people into the hands and usability of the state as tools and then you're telling them we're doing this so we can take care of you and provide for everybody as nanny and mommy and daddy you know but really what they're doing is enslaving you all the while patting you on the head and patting you on the back saying we're going to take good care of you that's all it is and Thomas Jefferson understood that as did all the founding fathers okay but people don't want to listen to that conventional with that true conventional wisdom no they want to say they know better than you know our ancestors did in what to look for as far as government control goes yeah because we're doing a real good job of being vigilant for it now you know we're halfway into communism we're almost all the way in because this is what the Millennial hears and most of the Europeans free stuff because we love you you know the crown the state the government they just want to give you all this stuff they don't want to give it to you to keep you dependent and keep you acting like a little child just taking and sucking on the tit no they want they want to give it to us they love you keep calm right keep calm there's my there's my take on keep calm okay there's my take on the crown asking us to keep calm okay that's my answer okay to use psychopathic inbred cases of pure filth pedophilic filth okay but this is the attitude of most of the children of the world and by children I mean the adults of our society the eternal children and this is the podcast title this is the title of the show gimme gimme gimme right because we're in service to self mentality and I'm entitled and I deserve that you know how about stop allowing yourself to be robbed and spend your money how you want to spend it by not paying taxes you know stop allowing the Psychopaths to take from you find methods of doing runarounds around their system by whatever means necessary to do it and don't contribute into their taxation system of slavery and then put your money where you want to put it voluntarily you know but this is everybody's attitude gimme gimme gimme cuz I'm entitled I deserve to get it for free even though somebody else labored to create it to produce it to distribute it it's because there's no respect for property no respect for property rights see in their in their whole attitude there should be no such thing as property well if you dump property you dump rights with it because if you understand natural law all rights or property rights there can't can't be rights without property then think about it if the word proper means right its moral its proper its rights we use the words to mean the same thing that's not accidental those words were chosen to mean the same thing for very specific reasons so why do the Millennials have this mentality okay they have this mentality of instant gratification first of all who are the Millennials that I'm talking about who are the millennial generations who is the millennial generation so the millennial generation could be defined as Generation Y in between X and Z I'm a generation Xer I come from Generation X born between the years 1965 and 1980 I was born in 1974 right in the middle of Gen X okay you know in Gen Xers are more like focused on sort of a vocation you know they're not like Drifters from one project or career to another or you know they're generally like identify with like doing a a vocation of some type of task that they are very good at Gen Y is more you know flowed from job to job or work for from company to company mostly because there isn't a lot of job security anymore but it's like you know they don't really have that like sort of vocational idea about what they want to do in life so there are more drifters they're also highly focused on self service to self mentality not all of them again these are generalities not blanket statements in this case again some blanket statements are true and sometimes I'll make them in this case I'm making generalities generalized statements that are largely true but not always okay Generation Y was born between the years 1981 and 1996 some people will place that slightly higher I've heard you know 84 to 97 to 98 it's in that region okay you know early early 80s to mid 90s - even late 90s okay and they're highly focused on the it's like these are the people I was talking about last week - think the personal computer is over with we don't need high-end desktops or laptops we could just use tablets and self and smart phones okay they're always in their phone they're always in social media obsessed with social media this generation is obsessed with social media status on social media is like there life's goal okay and thinking that I can do everything on my cell phone I could do everything on my tablet well actually no you can't and that was a deliberate effort on the part of the social engineers to get you off of a truly creative platform like a powerful personal desktop computer okay or a powerful laptop computer all right that's that's what who we're talking about here okay so this has been also called the me me me generation and there we have it again mini-me Satanism me me me gimme gimme gimme instant gratification you know my generation has some of that but not to the extent that the next generation does now generation Z I'm hearing good things about that are seeing all the bullshit of Gen Y of the Millennials and going good god how do we let it get this bad and they're stepping up and doing something about it already as young as they are you know they're realizing how totally fucked their parents are you know how fucked up in the head that they are and realizing how fucked they're making the world and they're basically saying no we got to do something about this some of them not all of them but you know a portion of them are waking up just by the nature of how mentally screwed up their parents generation is okay and guess what I'll blame it right on my generation my generation made Gen Y Gen X produced Gen Y okay we produced the Millennials my generation produced the Millennial generations because largely my generation was so screwed up from the baby boomer generation that created us that we passed the nonsense right down to the children that my generation produced and created the Millennials it seems like the cycle is being interrupted a little bit I'm not going to use the word completely broken but it's not progressing in a cyclical pattern as it did over the last three generations something is going on with Gen Z that isn't the way that the social engineers are really planning for it now that being said let's see how it plays out I'm not prophesying anything there okay I'm saying that I think they have a little bit better of a chance that the gen Z younger generation does than the Millennials because the Millennials have I'm what I mean the mind control worked perfectly upon them when I mean it worked perfectly I mean it went flawlessly the Machine had not one kink in it during the formation of Gen Y at all the social engineers I have to give them a round of applause I mean you guys brilliant work okay you yeah it's there no joke these people are not a joke the social engineers who program Generation Y with their belief systems did a flawless job I have to say okay a flawless job because I have never seen in my life a more brainwashed generation ever ever okay and thank God your children aren't listening to your bullshit thank God okay that's all I have to say you know thank God your children are infinitely smarter than the dunces that you are most of them most of them I'm not talking every single person in that generation because there are some that are legitimately awake okay but I'm talking to the vast majority as a whole as a group okay you're you're not gonna get done to your children the mindfuck job that that the previous generation unfortunately allowed to happen to you it's not gonna happen with your children okay there's too much information too much data and they're just a little bit more streetwise than you are okay and they're not buying the lies that you bought from the mainstream media because let me tell you something folks this generation that they'll portray them in the media as oh they're always on their cell phone they are addicted to mainstream media addicted addicted okay and you want to say oh no they don't watch as much television they watch just as much television and they watch TV and other four just because they're not watching TV on a television doesn't mean that they're not paying attention to the mainstream media on other devices okay just because they absorb the same bullshit on a different device doesn't mean they're not taking the same bullshit into their minds okay so this is who Generation Y is the Millennial Generation okay and this is what I'm talking about that has this attitude of I needed on my terms I'm not interested in in your daily work of or what you have to go through or your routine your schedule your hardships it's me me me is this gonna be better for me well then do it even if it's harder for you okay that's their whole mentality their mentality is I care about only me it's a satanic mindset okay Satanism was very much propagated propagandized to this generation of individuals and they bought into it hardcore hardcore what else was very much propagandized to these individuals was socialism okay socialism was that the long march through the cultural institutions the Graham sheep land coming out of the Frankfurt School of Germany okay was brought into the mindset of the millennial generation in a hardcore form more so than any other generation on earth and that was done through the university systems of North America specifically the United States and of all the European countries the university system is where the Communists and socialists decided to spread their tentacles through okay and that's where they decided that they were going to actually conquer ties and conduct the the long march through the institution's that the plan of antonio gramsci the italian communist okay read about him read about the Frankfurt School which was you know said the conquering a nation militaristically with communism and then bringing to the rest of the world is not the way to do it that you would have to extend your tentacles to the far corners of the earth and then conquer the world culturally conquer each nation culturally weaken its people weaken the sexes divide the sexes divide people along all kinds of boundaries which we talked about on former shows about division and then conquer them through cultural means and that was called the long march through the cultural institutions and it has worked flawlessly and it has worked most flawlessly on Generation Y the millennial generation they bought into that whole plan of divide and rule divide and conquer bringing in socialism and eventually communism through a cultural mechanisms okay that is the mindset that largely their parents pushed them into that came out of the socialist schools of thought of the 1960s and 70s okay that invaded this country through Soviet Russia and other places in Europe this is why we've seen Millennials propagating socialism so much in the modern world and saying we don't want a capitalistic Society not that we have one they don't even understand that what they think capitalism is is actually cronyism or what is known as crony capitalism which is a collusion between government and corporate power it's not real capitalism okay and they want now to bring in what they call and many politicians in the world today like Sanders and Cortes are calling democratic socialism so here are basically communist flag wavers that are waving you know flags akin to the hammer and sickle although you know they're not putting the hammer and sickle on it or you know the Chinese star just straight red flags and calling it democratic socialism and you know look at look at the age group folks the age group is exactly the people that I'm talking about we're talking about people in their mid to mid 20s to early 30s who are getting you know politically quote active in the political circles and attempting to change the United States into a communist country which would then of course eventually fall into outright totalitarianism through communism as it always does throughout human history when ever attempted and they'll just give you these lines like oh it hasn't been done right yes Stalin just didn't starve enough people you know you know mal just didn't have enough people murdered you know that's all so you know they think that we're gonna get out of the crony capitalism by going into the opposite polarity which is called socialism and they want to do it through demo a blending between what they consider democracy and socialism and all this is folks is this is like you know well we're going to use the mechanisms of government to have voting and we're going to basically even if people are wrong and you know fifty-one percent of people vote to cannibalise the other 49 well then it was passed through law and it was democratic and so you know dive in with your forks and knives and chop up your fellow beings you know because it was put to a vote and it was democratically done you know that's what the real mechanisms of government are all about you know that's all they've ever been about they've never been about anything else except violence through coercive control that's it and you do that through voting and if the vast majority wants to commit whatever heinous acts of violence they want to commit well hey you voted on it you know forget individual rights this is about the majority rules you know it's about collectivism and majority rules well guess what most of the time the majority is wrong most of the time the majority is immoral you know you have to go down to the individual principles individual rights if you're going to get to truth if you're going to get to real prints if you're gonna get to real values okay and if you're ever gonna get to real freedom you certainly need to get down to individual principles and rights but yeah here's uh here's the Democratic socialists of American I want you to take a look at all the faces I want you to take a look at the age group it's a very nice neatly packed age range isn't it there's no very very young people and there's no certainly no people with any gray hairs in the head there's certainly no much older people you know from like our grandparents generation you know none of them are in there okay this is all you know people in their late 20s to maybe mid 30s max and that's the Millennials right now that's it okay and they think they know what's going on they think they have it figured out they think they know whether the woes of the world you know now they know what the mainstream media and their socialist professors told them that's what they know because they've been put through the gauntlet through the wringer of outcome based education which is Soviet style education based upon former Nazi style education based upon former Prussian military style education and if you don't understand that again you haven't been paying attention you're not awake you don't know where the modern education system comes from or the former systems of education that it was influenced by okay so what I'm trying to explain to people is real methods of Education to get people out of this type of a mindset and the real method of Education is the classical liberal arts education methodology known as the Trivium and quadrivium which we talk about here a lot on what on earth is happening these people none of them the the classical liberal arts education methodologies were all pulled from the schools of these people long before their birth okay they are not involved in true critical thinking methodologies they're not involved in real scientific methodology really never have been in the schools that they went to and that's why they came out outcome based education they came of that gauntlet that they were put through thinking exactly what the engineers who built that system of indoctrination want them to think that's how social engineering works folks and people are just too overly educated to acknowledge that they were duped and put through that wringer you know they don't want to admit that to themselves largely also because they're still drowning in like probably hundreds of thousands of dollars of school debt you know so-called education debt okay so you know this lifestyle leads to them basically not even making enough and being in debt so much that they can't even eat out a modest living and then they want to blame capitalism for that look I'm not I'm not you're you know huge proponent of capitalism and monetary systems and everything like that I'm a proponent of higher consciousness and true spirituality and a lot of the selfish assholes that you find in on the other side of the spectrum when it comes to being radical capitalists you know they don't understand a thing about real spirituality there are people in the anarchist movement they are say they're anarcho-capitalist and they say the word spirituality has no meaning to them consciousness is a meaningless term well left right asshole is a meaningful term to me which is what those kind of people are you know and you know these people are just as in basilic you know because they think that the state should take care and provide for everybody you know like a benevolent parent you know that's gonna take care of them from cradle to grave and provide further every need so in a recent poll conducted in America they just basically asked a bunch of people from many different states and many different walks of life and age groups provide the definition of socialism and of course the socialism is the means of production and distributions of of goods are in the hands of this state basically that's if people basically just answered that said you know publicly collectively whatever the means of production and distribution of goods as in the hands of the state is in the hands of the public or the state they would have been gauged the correct answer okay and in doing that only 16 percent of Millennials actually gave the correct answer of what socialism was when I'm gonna read you an article now coming up that talks about over 58 percent of Millennials want there to be socialism or don't want capitalism and yet only 16 percent could pretty when polled could provide a correct answer of what socialism even is Americans in general only did twice as well Americans above 30 years old only 30 percent of them correctly gave the answer less than a third approximately one third it's disgraceful that people can't give a simple definition of what socialism is you know and yet you know over half of them we're gonna be advocating for it I'm gonna pause the presentation right here and I want to go to an article okay so I'm gonna switch over to my web browser you can you can cut back to the browser and we'll go back to the presentation but I want to read this article now okay it's from The Washington Times not the most reputable source but I'll tell you what I believe the article that they're writing right now that they're publishing right now okay so they are they are they did a poll where they polled Millennials and asked them would you rather live in a socialist or communist nation than under capitalism and guess what folks in this article they actually also said if if fascism was a choice would you accept that over capitalism okay so it says this troubling turn highlights widespread historical illiteracy in American society now for the Washington Times that folks okay this is how radically off-base this poll got that even the Washington Times published that this is troubling and it indicates widespread historical illiteracy from a paper that I would say you know isn't that the most trustworthy source in the world okay however it at least tells the truth in this article which I'm gonna read okay so here's some former you know Soviet you know leaders including Lenin and Stalin busts they're shown it says the majority of Millennials would prefer to live in a socialist communist or fascist nation rather than a capitalistic one according to a new poll I just want to read that first statement again listen to this folks if this doesn't trouble and worry you you need your head screwed on straight because it's not okay the majority of Millennials would prefer to live in a socialist communist or fascist nation rather than a capitalistic one according to a new poll in the victims of communism Memorial Foundation's annual report on US attitudes toward socialism fifty-eight percent of the up and coming generation opted for one of the three systems either socialism communism or fascism compared to 42 percent who said they were in favor of capitalism the most popular socio-economic order was socialism with forty four percent support communism and fascism received seven percent support each so again they are for the stepping stone to communism which is socialism Marion Smith executive director of the victims of communism Memorial Foundation said the report shows Millennials are increasingly turning away from capitalism and toward socialism and even communism as a viable alternative this troubling turn highlights widespread historical illiteracy in American society regarding socialism and the systemic failure of our education system to teach students about the genocide destruction and misery caused by communism since the Bolshevik Revolution 100 years ago mr. Smith said in a statement Millennials are more likely to prefer socialism and communism rather than the rest of the country 59 percent of all correspondents chose capitalism as their preferred arrangement compared to 34 percent who said socialism 4 percent fascism and 3 % communism some of communism z' luminaries are admired by Millennials 31 percent said they have a favorable view of Shigure era 32 percent had a favorable view of Karl Marx 23 percent had a favorable view of Vladimir Lenin and 19 percent had a favorable view of Mao Zedong okay think about that folks that's one in five thought the Chairman Mao was an admirable human being who indirectly as a dictator led to the deaths of an estimated 90 million people okay that's an admirable soul Joseph Stalin was viewed favorably by just six percent in the poll only 33 percent of millennial of Millennials were able to identify the correct definition of socialism in this poll were they largely favored it still only 33 percent that that nationwide poll I just showed you only 16 percent could tell you what socialism was only 33 percent in the very poll in which 58 percent said that they would live in a system either socialism communism or Chisholm all out of them only 33 were able to identify correctly the definition of socialism they fared about as well as the rest of the country which only successfully identified socialism at a 34% clip generation Z the millennia the generation after the Mongols was the most informed group with 43 percent correctly identifying socialism you see the younger generation isn't taking the bullshit they're not taking the indoctrination as well as this Generation Y class of individuals just swallowed it down like I said they stayed they funnel it down the gullet okay with a funnel and a fine a firehose okay forget spooning it in you know can't get it in there fast enough throw a funnel down down the throat get the hose in there and just turn the valve on as fast as it can pump it in you know that's how fast we got to get that propaganda down the gullet okay so we're Millennials struggled compared to other generations was in the identification of capitalism just fifty one percent correctly said capitalism is the economic system based on free markets and the rule of law with legal protections for private ownership that was by far the lowest of any age cohort Americans as a whole correctly identified capitalism 67 percent of the time Millennials are also less likely to have a negative view of communism just 36 percent said they had a very unfavorable impression of communism and only 44 percent said they would be insulted if they were described as a communist think about that that means that 56 percent of the millennial generation said they would not even be offended if they were described by someone else as a communist could you imagine that this is this is who many of the people who listen to my show that these are your children okay that's all I have to say all right this is that this is the job you did raising children all right and then people want to say go pump out as many kids as you can is one of the reasons I haven't had children okay because this is the kind of job people do raising them or I should say not raising them all right as a whole 56% of Americans view communism very unfavorably that's tragically low that should be a hundred percent so only 56 view it very unfavorably and sixty-three percent would be insulted to be associated with the ideology one possible explanation for the millennial infatuation with socialism is that 53 percent of the cohort reports feeling burdened burdened by the economy so because they feel economically burdened they think we should trash any form of capitalism and have a socialist system by which this state controls everything and just meets it out the people as they deem fit for their needs yeah yeah it's worked so well it's it's just it's you know just look at it historically you know if forms of socialism have been responsible for the deaths of over 250 million people in the 20th century alone that's a quarter of a billion souls it's worked so well as a matter of fact it's worked exactly as intended folks it's worked exactly as intended Millennials were the only age group more likely to say America's economic system works against me rather than for me generation Z had the most positive impression of the economy with 66 percent saying it works for me although many of them yet have to have yet to enter the workforce the victims of communism Memorial Foundation survey was conducted online from September 28th to October 5th it pulled 2,300 members of the general public aged 16 and above all right so we can cut away from that for a moment I'll switch back to my slide presentation I think that was a very pertinent article to view and to you know explain to people that that is a what is going on in our culture so to go back to the slides this was that national poll only 16% of Millennials and in the whole country were able to identify correctly what socialism was by definition so you could see why so Millennials have this attitude okay and why they're identifying with it they're poorly schooled they're poorly educated and you know whether you I'm not talking about like you know compulsory schooling I'm talking about they're not educated at all they're not truly educated they're indoctrinated and again that's the do to the gram Qi plan look it up okay understand that stems out of Europe and it's another reason that Europeans have a lot of the same mentality as well okay but look up the gram Qi plan of the long march through the institution's front that came out of the Frankfurt School inspired by Antonio Gramsci okay that's GRA MSCI gram Chi the long march through the cultural institutions understand that was their plan they did it through education through cultural infiltration of the educational system in America and through you throughout all of Europe okay and they put communist professors in these areas that or we're Soviet and or outright try come in their mindset okay and they put them into these positions of Education high-level positions university tenured at university and they just absolutely let the floodgates loose brainwashing the American and European public of young people okay they knew that that's how they were going to hit the population going to educated cultured centers where people would you know propagate the ideas out to the next generation down below them and that's exactly what happened so Europeans why do they take this attitude and therefore why do they act entitled okay cuz I'm gonna explain some of the things that they've done and what they'll ask okay see let me before I even read this let me explain talk about some of that dynamic okay what people will ask me you know when I have already said in instructions this is a set way that I do it this is all the time that I have I don't have time to do it any other way that's the main thing that I want people to understand right if you were me dealing with many many many many people on a daily basis which you don't do you're not see there this is why they're in service to self mentality and they don't look at it from anybody else's point of view they never put themselves in somebody else's shoes that's the whole part of the problem they can never turn or turn it around and look at look at it from a different perspective something from somebody else's point of view they don't do that they're only ever thinking me me me me me me me what can I get out of this right so I'm like I can't do this any differently would you be willing to go and use this carrier over here oh it's only you got to go to the other side of the city no I drop packages off in one location because I do multiple packages a day I don't have time for anything else I can't make an exception for you it has to work in a regimented way I can't be specialized toward any individual in this case because I'm one person trying to do the best I can to get the word out there with the time that I have to do it see that's why there's a set way of doing it I'm not telling you I don't respect individualism that's ultimately what this is all about okay but I can't tailor the experience just for a each individual person or I'd be running myself ragged more than I am okay and the point is is if someone has generously made you an offer that you want to take him up on you don't want to do the work that I did to assemble all of that data right you can do it don't find it yourself right you don't have to get it from me no one has to get the ark from me I'm not forcing it on anybody you have to receive this this dataset from me you don't have to no one has to look into it right you want to it's something you want right so then everybody is like well this costs too much can I send it this way no I don't want it destroyed or lost I want it insured a certain way I want to carry it and handle a certain way I want it packed a certain way want to know why I'm the one who's going to fulfill the offer for you I'm providing the service so the service is on my terms not your terms right so it's like if a cable company doesn't have the channel as you want you don't subscribe to it you go to somebody who does oh you're free to go and get the data from someone else I never told anybody they couldn't copy it for someone else I couldn't once it's in your possession you can do whatever the hell you want with it you could set it on fire for all I care I think it would be highly disrespectful to all the work that's on there but it's your property that's what property means you're allowed to do what you want with it that's one of the reasons I'm stringent with the instructions for the arc Drive because I don't want damage to happen to someone's property that isn't mine I wouldn't I would I would treat my property the same way with that level of care and respect why wouldn't I do it for someone else's property okay so the point I'm making here is that I I see in my experience and you could say okay this is subjective right but in my experiences with American citizens who have done taken me up on this offer they seem to really understand and respect personal property they seem to get it and that's because I think in America we have more of a culture of don't mess with anybody else's stuff they work for most of us do now again that's not a blanket statement cuz there are some people that have no respect for other people's possessions things a property etc and or will steal lie cheat to get whatever they want and harm anybody else or their property that's also a mentality here in America don't get me wrong there are low-lives who act like that okay however the people who take who are into my information and take me up on the offer that I have given about the arc Drive okay seem to really respect my time and effort and don't get uppity in asking me to do it a different way they see that my time is limited that I am trying to put the resources that I can into doing what I can for people and they seem to take it in a humble way and just say if this is what I gotta do mark then that's fine then I'll just I'll follow your instructions and they generally don't even ask they don't ask for anything different now multiple times I asked people nicely nicely I can't do this personally I can't tailor it personally for you I'm sorry but I can't I don't have the time the energy the resources I have to just have it a set way and just knock these out okay because I have so much other stuff I got a do during week again I'm sorry but the slideshow fairies just don't come to me anymore and build all my slides for me during the week right the package packing fairies they don't arrive and pack up all my stuff that I have to ship right okay the research gnomes don't hop into the house and do all my research for me and it's all waiting there I do all that stuff okay so I wish we had all of these beings we need the package Pixies the research gnomes and you know the the the the slide making the the presentation fairies okay but I'm sorry but these are mythical creatures that don't exist in real life okay so what I've noticed with Europeans and Canadians are they don't like it when someone says I have personal rules regarding this offer they don't want that to exist they think everything should be completely on their terms and I've it's not so it's not something I'm saying because I've somehow don't innately like Europeans or Canadians I hang out with anybody treat them on equal terms I judge people by the content of their character nothing about where they're from you know their culture their skin color anything their sex nothing like that okay I treat people even-keeled based on how they behave that's it and all I want to see is do they behave morally and do they behave respectfully toward other people so when I have interacted in many cases and again I just I want to say emphatically not all okay there are many people from Europe and Canada they're highly respectful individuals and there they're just they're like look I cut above okay that's that's all I have to say however they're in the minority until I really had to get in their face about it now it's improved okay so this is I'm largely talking about in the past but I think this is a holdover from how inculcated into socialist attitudes they are in the European Union okay so what I would say is I don't want to do this on your terms you can do this for me you know why can't you do this differently for me right this is gonna cost me more money doing it your way if I do it my way I won't have to pay as much money to the carrier well who said any word about how much it would cost I never told anybody a thing about what a package would cost to send to a private carrier which is what the Ark requires you can't send it through the post office I've had so many arks lost or damaged through the post office I don't use them as a carrier anymore okay I send out things that are you know less important items like just t-shirts or you know DVDs that can be easily replaced okay rather than someone's hard drive with a ton of data on it which I want to have a little bit of reverence for because this is not their own property it's not my property okay it's theirs okay and it has the data of what can potentially transform the world on it so I want to show that a little bit of respect right yet they'll continuously ask I want to do it this way instead of your way right when I asked nicely don't ask for special treatment I'm not going to give you special treatment because I can only afford to and have the time to do it this way when I deal with so many people and so many packages on a daily basis right so the Americans seem to get that and say I'll respect your wish I'll respect your time I'll respect your resources because I know you're one person trying to send out all this stuff it's like a server in the server model that we talked about last week the one server okay and then all the clients receiving the data from that one server okay I'm like the server in the middle of that model okay well and the other people will say how many people continue to say put the ark online first of all that's not the point of the ark okay the Ark the whole point of the Ark is that you're researching offline so that you have to make no internet connection at all no matter how fast or slow or non-existent of an internet connection you have the data is already local that's the point of the ark I don't want to distribute it online first of all the other thing is people who haven't dealt with this much data try uploading a terabyte of data see how you do see how well you do on your internet connection then I want you to try to download a terabyte of data off of some web server or something see how well you do okay all right yeah you could probably do that with a torrent file right but you know it depends on also how much it's going to be seeded and and people are gonna keep seeding it all right so in any one of those instances trust me trust me folks I've put out more arcs to people personally through my house than anybody has online trust me it's in the thousands okay you look at just about any tort and see how many times it's seeded you're lucky if it ever hits a thousand okay more people have the ark do to me copying it on a personal computer right here in my house and have it from anybody that's ever attempted to distribute any amount of that information online so I'm not interested in putting it online stop asking me okay I hope that clarifies why I don't want it online the Ark is to research offline so you don't need an internet connection to have access to all this data okay so I want to read this it's a maybe a little bit small may we go fullscreen that's better okay this woman says this is a meme I believe taken from some social media or a website he is she says I'm a school teacher in Denmark making about 61 thousand dollars a year we get free education you don't have to pay for the doctor or the hospital and students even get paid to learn it all sounds so great right however I forgot to mention that nothing is ever free the minimum income tax in Denmark is 40 percent okay and I believe this was back in like 2007 or eight or nine something like that it was it was a while back okay this was this was not now okay I don't know if the date is in here but Waka I'll keep reading also we pay a sales tax of 25% that's on top of their income tax sales taxes 25% there and on top of that the government applies duties and fees a gallon of gasoline is about ten dollars ten dollars for a gallon of gas tax on a car is 180 percent this is called a V 80 in Europe a value-added tax so anything that they deemed non-essential they put a v8 e on like a car meaning that a car that sells for about twenty thousand dollars in the United States like a Honda Accord raises the price to an astounding forty thousand dollars in Denmark for the same car Denmark is the highest taxed nation in the world not just Europe but in the world taxed an average of 80 percent on every dollar earned Dane's have the highest personal debt in the world few will ever own a car or a house anyone who makes over $80,000 annual annually pays a personal tax of 68 percent this means that people with higher earnings have either found ways to evade the tax or have left the country taking their companies with them what's the motivation when you're giving that much money back to the government what's the motivation to succeed or improve nothing you know they won't let people do anything that they want with their own money that's how heavily taxed it is this is what communism is folks here's the new tagline that has to be brought out on every show is that's what communism is this isn't just socialism that's what communism is okay and it's worse it gets even worse than that Denmark suicide rate for the past five decades has averaged twenty point eight per with the highest rate of 32 the American suicide rate has averaged 11 point one during the last five decades and it has never exceeded twelve point seven more than 11% of dein of adult Danes supposedly the happiest people in the world are on antidepressants and I'd say it's higher than that that's a very low estimate everyone wants the American Dream in Denmark's neo communism economy no one will ever own or accomplish anything this is because there is no respect for individuality and personal private property okay individual property okay and this is the attitude that is being taken by more and more this is that the cultural inculcation that is being taken into the mindset of most Europeans this is why they act like they are above someone else's time and effort that you have to tailor to their needs and whims okay I cannot tell you every I won't even go through them but every single solitary data point that I requested in the arc Drive has been fought tooth and nail toward me by Europeans and Canadians Canadians to a little bit lesser degree than Europeans but not drastically and again they've both gotten better because folks let me tell you something I have since going through visually what to do for the Ark Drive and going through the instructions and telling people how I do this myself okay and what I am how I am offering this and why I ask these things because of respect for trying to protect other people's property okay it has gotten a lot better that they have they have not gone as terribly into the obnoxious you know bickering back and forth with me over change this stipulation do this for me the way I want it done okay and you know what I had to get almost mean about it right I told you I asked nicely first and said please don't make requests never saying I'll do anything if you do but I said please respect my wishes respect my time and and my efforts this is how I do it it's a set method it works for me please don't ask me to do it any other way nicely right then repeatedly knowing that I had asked to respect that I would get back more and more and more and more and more requests in the face like flaunting it in the face throwing it right in your face like oh you've asked me not not to ask you to do it this way here let me throw it right in your face I'm gonna ask anyway like just totally disrespectfully you know when when I only asked nicely please respect my time and my wish is to do this a certain way that's all that's how I asked at first well then when would come back over and over and over again Oh like I would say 90% made requests to do it a different way 90% okay so at that point after I said don't ask me it would drop it's still about 3/4 what asked me to do it a different way so I had to I had to say if you ask I'm gonna take away the offer right that's how I had to get that nasty about it I had to almost like show teeth because and I didn't want to be like that I generally you got to understand how non-confrontation I am at first when people push me though then I don't just become con for take confrontation all getting outright aggressive if I'm pushed okay I just don't think people should push people like that don't press other people's buttons because you don't know how much they will snap right I don't press other people's buttons because I don't know what who they are I don't when I go on the street I mind my own business and I'm armed III am armed when I walk on the street okay but I mind my own business I don't say a word bother anybody because I first of all I don't know who they are I don't know how crazy they are I don't know what happened to them I don't know what kind of a mood they're in I want to let them be I don't know anybody anything except non-aggression that's it that's what I owe anybody and that's what everybody else knows everybody leave it other people alone okay I apologize for the noise in the background I'll know if that's coming through but there's a car alarm somebody's not shutting off obviously they've you know left for the day another car alarm has gone off and it's blaring in the neighborhood and you know unfortunately hey I don't have a soundproof studio I do my show out of my home you know I'm sitting in my bedroom right now folks because that's the shoestring budget I can do this on ok it looks pretty damn good for being on that shoestring budget but unfortunately I don't have a soundproof studio you know I wish I could afford something like that but I can't so we got to deal with it anyway this is where Europeans are at culturally ok and that's the problem there culturally in a position where they've been totally brought into a socialist mindset and now because so much has been taken from them they feel entitled to take from other people as if like we're just perpetual we'll just perpetuate this cycle like oh I'm given all this the government they're providing me well you got to do things for me for free too you know I think that's where this comes from and again we're well into the third hour now I don't think we're gonna have time for calls I'm just letting people know if there are time we'll take them but I as I said it'll take as long as it takes I also want to show people a video downloading okay which I didn't get to I'm going to do an addendum of last week's show still if there's if time allows for that but anyway I I thought just providing an explanation for why helps to clarify this I don't think these are just bad people right Europeans aren't bad people I think they should be our brothers and sisters in the fight for freedom right Canadians our brothers and sisters to the north of the United States should be in the truth and freedom movement fighting alongside Americans in the fight for truth and freedom okay we are not we shouldn't be at each other's throats I'm not bringing this up to further divide people and be at each other's throats I like Europeans and Canadians I want them to understand what's really going on I want them to champion for the truth and champion for freedom okay but we also have to understand our shortcomings and they'll say many Americans are ignorant I couldn't agree more you'll go out on the street yet look at what these polls I just showed you today's show I mean look at how ill-educated my own American brothers and sisters are I mean could you imagine this I'm horrified by these numbers that are shown in these polls these are in polls that's like of like that probably underestimate how bad it is and these aren't these aren't even like new sources that would like say won't even tell people the truth about how bad it really is okay and I'm showing you those numbers and they're horrifying you know the numbers are probably much worse okay but the point here is is I'm showing people this for improvement I'm showing people this because if you some people don't even know that they should be embarrassed about their beliefs and behaviors about their attitudes and behaviors they don't even understand that it looks childish it looks like you're telling someone else that their time isn't worth your time you know that you're better than them in that way it's a very entitled attitude to have I'm not gonna use the word privileged it's entitled there's a difference okay you know it's saying that you deserve this when you've done nothing to achieve it or earn it okay and again there are some people who request the Ark that have done a lot of their own work but they're few and far between folks I mean you know if I really had to gauge how many people request the ark drive out of out of that number percentage-wise how many people really have their own thing going and are doing it well it's less than 1% I'd say maybe about 1% okay so and I get it the people who are requesting this are in the in infant stages of this growth and learning experience experience so that's why they want the knowledge and that's great I don't want to discourage people by talking about this to get the ark nari so the whole point here also is it's gotten better since I talked about it publicly I said I was gonna talk about it publicly and it was still getting bad at that point then when I finally brought it up and told people why their behavior was rude and even ignorant you know it got better I gotta say congratulations the people who are sending these from overseas wherever it has to be Europe and other overseas countries you guys have been doing a fantastic job since a podcast number 199 about the Ark drive like fantastic nobody's arks been damaged you've been packing it great so that the it doesn't get damaged and you've been having some basic respect for the offer which I very much commend you for and appreciate and that's what this is about it's about improvement it's about getting better yesterday then you were you know getting better tomorrow than you were the day before that's all not nothing else and that's all I ask that's all I could ask anybody for okay that's what I've been asking from day one with this show do your research look into things deeply come to your own conclusions but do it through logic reason and intuition right people don't understand that that that's to come together you know people will say oh that's a contradiction no it isn't not a bit you have to have good intuition to even go no where to go and what books to read and what videos to watch you got to use both you got then you have to even use it to say is this worth pursuing more and get downloading more regarding this is it gonna help it ask the big question what's gonna help the most what is gonna do the most what is gonna be the best way to help what is gonna help the most in the world okay so that being said I want to just wrap this up with talking about ultimately all this is about is about the difference between collectivism versus individualism okay when we get into talking about political ideologies okay versus real freedom okay we're talking about people who believe in the collective versus who respect the rights of the individual the collective is a group construct it's a constructional idea doesn't really exist in nature individuals exist in nature okay so this whole thing of the collective it has this mindset okay that is all construction again this is the nature of my work the underlying basis of all my work ladies and gentlemen is what is the difference between the natural and the artificial the real versus the illusory and the constructional well this is it this is what it all comes down to the individual is real the individual owns property the individual has rights the collective is a construct that can be used by the state to prey on somebody's you know desire for better just a state of being in the world more equality under Rights etc but it's preying on that it's preying on that you know altruism that is in most people okay and that you can legislate that or you can get that done through coercing through collective means which is what government is so here you have the black sheep that represents the individual saying I just think that all interactions all human interaction should be voluntary that's it very simple that's non-aggression principle all human interaction should be based on voluntary meet you know consent that's it everything should be consensual once you break consent you have something called coercion which is violence I believe that all relationships should be consensual okay voluntary and then you have the herd with their herd think they're collectivist herd think mentality company that's a you that's utopian hippy but who would build the roads freedom isn't free move to Somalia government is a necessary evil and on and on and on and on we need democratic socialism let's throw that in there you know it's the same collectivist nonsense think that leads to all kinds of injustice --is destruction of freedom and ultimately slavery chaos and death okay this is what eventually results from collectivism every single time and if you don't think so all you have to do is pick up a history book and read it which far too few will do you know I've been asking people to read none dare call conspiracy for the better part of 10 years now and like a handful of people have done it you know and they yet people will still call themselves advocates of the truth and freedom movement when they haven't read practically the Bible on the subject you know ultimately this is what it's ultimately all about folks this is where collectivism versus individualism goes we move more down the road of collectivism we're moving down the road of totalitarianism and slavery we respect the rights of individuals and we get out of this socialist and entitled mindset and understand principles and rights and natural law we are moving toward a world that is based on real freedom under natural law the laws of morality that ultimately govern the consequences for the behavioral choices of human beings and beings that are even beyond human beings but natural law isn't about animal animal kingdom see and people talking about objective morality versus subjective morality and can't understand the concept that the laws of morality don't apply to animals the animals in in the field living in the only earth do not have the brain capacity and understanding and development in the brain and central nervous system to understand the difference between right and wrong to be held to account according to the laws of behavioral consequence you have to have a brain that is capable of understanding the laws of behavioral consequence and the difference between right behavior and wrong behavior animals don't have that you cannot put them in the same category as human beings and getting gauge them on the same behavioral standards are you nuts are you completely nuts that is like saying oh we're gonna give an award here for who has a you know built the best model of the solar system and you know we're gonna gauge you know Charlie here in the third grade versus Charlie's dog well Charlie's dog can't do an operation like that so you know you're we're gonna get gage that according to the same standard they're it's not the same capabilities this is why people have to understand natural law which is the laws of consequence have nothing to do with animals it has nothing to do with Darwin Darwinism or Darwin in Darwinian theory at all okay look I think next week's show or maybe in a couple weeks not sure if I might have a guest next week I might do a show on this if I don't have a guest okay I might do a show called what natural law is not okay so I've never done that I've never actually done an entirety of a show on all of the things that people who have a zero understanding of what I'm talking about when I order the phrase natural law think in their own mind their own mental definition that it means and then they babble on and ramble on and they spew out all that nonsense that verbal diarrhea about what they think natural law means that has absolutely zero to do with what natural law really is so I think maybe I'll take this as a segue okay and maybe next week the topic for the show will be what natural law is not okay so we can clarify that once and for all time here formally on the show of what I do not mean when I talk about natural law and what you can never use as an example to represent the laws of morality or even objective morality at all when it comes to human standards for morality animals can't have standards for morality because they're animals they don't have the capacity for understanding morality and yet you still have imbeciles debating this okay so I'll end on this next slide which really sums up the entirety of the thing don't be one of the sheep racing toward the edge of the cliff with your attitude about socialism and your attitude about entitlement okay be the dog who's saying the black sheep I'm sorry who's saying excuse me excuse me excuse me and going the opposite direction against all the herd of groupthink and collectivist mentality that thinks they know what they're doing but is racing over the edge of a cliff to their deaths be the black sheep who is the individual who understands individual property individual rights and natural law as the mechanisms that will all ultimately lead to true freedom and true voluntary human interaction which should be the only form of human interaction okay so you know you could be harsh about it you could be polite about it and say excuse me but I'm going heading this way you could head that way okay but in one form or another be the individual and don't go with the collective mindset because the collective mindset always leads over cliff alright so with that my formal slideshow aspect is finished I'm going to just go back to it briefly because I'm going to ask people if you find donation in the work that I've done here on what on earth is happening please visit what on earth is happening donation gifts that's gifts dot what on earth is happening calm best way of visiting it is just hitting the gifts tab or button on the website this way you can just read the caveat and then click into the green button if you're okay if you have a Bitcoin account or a PayPal account that's the methods that I take for donations here also if you want to make a if you want to get the ark Drive which I've talked about on this episode a whole lot okay because this was the impetus this was the influencing factor for making the content of this episode so if you want to get the Ark Drive go to what on earth is happening slash Ark or just click the Ark drive tab or Ark button okay and you can read about what the Ark is what's basically on it and what's required you need fill out the form to get the shipping instructions to receive the Ark drive and please you know follow them people have been following them very well and their property has been in great shape it's been making the full round trip back to them and they've been enjoying the contents of the Ark and becoming enlightened as a result and if you want to make a straight donation to the cause of what on earth is happening go to what on earth is happening calm slash donate there are ten different methods for donation now including PayPal a patreon Amazon wishlist to donate directly with tech needs and several crypto currencies or you could do it the old-fashioned way with a good old fashioned check or money order so check out the donate tab or button on what on earth is happening if you want to make a donation thank you to everyone who has contributed we couldn't do this without you and this is what earth is happening is run solely on your donations through the gifts donation donation gifts and through straight donations without your support I wouldn't be able to continue to do this so thank you so with that being said I want to give an addendum to last week's show because a few people wrote to me and basically said that it was a pretty big oversight on my part and I agree with them that it was a large oversight that I didn't cover how to do something that everybody should know how to do and that's download YouTube videos so I'm gonna do that here today in the last half-hour of the show and if there's time for calls we'll take a couple before the end but let's see how this goes okay so let's switch over to my laptop I'm going to go to YouTube okay and I'm going to type in individualism versus collectivism individualism versus collectivism okay and let's see what videos come up collectivism and individualism okay here we go okay I think this is a perfect one so here's gia or Griffin on collectivism versus individualism okay let me just click this it is a lecture it looks like it's an hour and 17 minutes long let's just look through it why we have these problems in the world we're not going to all right all right all right this looks like a perfect example to download okay now I am using Firefox okay now different people will have different takes and preferences for browsers I'm a fan of free and open source software that's why I use Firefox I try to use open source software wherever possible I am using a Mac which is the antithesis of that if Apple is the antithesis of that I should say not really the Mac per se but Apple is certainly thin - this is of that in the modern world I use it because I am sort of tied to the platform by you know a lot of media that I've made in programs that I built with it so I do prefer it as a creative platform I hate the company but that that's neither here nor there I'm using Firefox and it is open-source software I think it's a good choice for a browser number one because I think the rendering engine the quantum rendering engine in the new Firefox is probably better than most other rendering engines I don't really prefer the WebKit engine engine that's in Safari or Chrome rendering engine personally so I like the speed of Firefox I like the layout engine and I like the plug-in architecture the add-on architecture which is what I'm going to show you right now so YouTube doesn't make any other videos downloadable for you no copyright reasons or censorship reasons okay so this will show you a way to preserve things that are potentially going to be censored on YouTube by just downloading them to your computer and then you could distribute them by other means like on a hard drive a thumb drive on other areas of the internet through BitTorrent through other YouTube channels Vimeo whatever okay so it's a way to do an end run around censorship of any kind on the web okay so let's let's look at I'm gonna do it through an add-on to Firefox now there are other means of doing this which I'll get to but this is a universal means through a universal browser what that means is you could do this on any platform okay so I'm trying to keep it as I'm trying to keep the methodology of doing this as platform agnostic as possible okay so you could do this on Linux you could do this on Windows you could do this on a Mac with Firefox and the add-on I'm about to show you okay so I'm going to click the menu button on the Firefox interface that's on the far right underneath the the title bar okay so that's this little see this little a hamburger 3 lying menu icon that's iconic for menu ok I'm clicking that now in there I'm gonna click on add-ons ok so I click add-ons that makes a new tab and it shows me the extensions that I have in my browser so I'm using one password which lets me keep my passwords and encrypted database I'm using Downie which is a program I'm going to show you if you're a Mac user in a few moments I use something called furniture that I could open video windows outside the browser in you know I use a pop-up blocker called pop-up blocker ultimate I use an ad blocker called you block origin and there was an acrobat plugin I have that disabled ok so anyway these are some extensions that don't come with the browser that I've added now I'm going to show you one called video download helper ok so I'm gonna type in 2 here where it says find more extensions in Firefox ok video download helper so download helper is all one word download helper just like that ok and now that's gonna and folks we're doing this in real time ok so you know if there's a technical glitch it's what it is this is this is a live demo ok just that as a caveat there alright so video download helper you'll see it is the most popular with over 3 million users so the people who do YouTube or or any other video downloading this will not just work on YouTube this will work on any page that embeds a video so if there's an embedded video you can grab the embedded video with this plug-in with this add-on for Firefox so about three million people have this plug-in because the people who are doing this know that it works ok so I'm gonna click there on to the add-on and it says video download helper the easy way to download and convert web videos from hundreds of YouTube's like websites add to Firefox I'm gonna click this button here that says add to Firefox ok Firefox is going to ask me do you want to add video downloader it requires these permissions I'm going to say yes I want to add it ok congratulations you've just installed video download helper ok I'm gonna hit OK right here and then now there is one more thing you will have to do before you start downloading video you'll have to go to the settings and you will have to install the companion app the companion app makes it possible for your operating system to actually download the video to your file system so you have the browser plugin but now you need the application which basically takes it from your browser and saves it into your operating system ok so I'm gonna click here again I'm going to go back to add-ons click the menu go back to add-ons now video download helper is in my installed extensions and I'm gonna hit preferences right here this is the Preferences window and you can customize it however you like I'm not going to go into all the ways it can be customized I'm just going to show you it says companion app not installed right here this is what we have to get installed ok so I'm going to click this disclosure cross right there and it says you have to install the companion app ok so I'm gonna click install companion app that's gonna take me to another tab in my web browser and I know this is gonna look complicated but it you don't have to do this once ok so then for the Mac this will show you for linux for windows whatever system you're on it'll show you a way that you could download and install this okay so i'm just going to use the recommended installation method I'm gonna hit it's a package installation I'm gonna hit download all packages is just it's a piece of software it's like an installer you just double-click it and you install it so it says you've chosen to open this is the name of the package net download helper Co app okay I'm gonna hit save file so I hit save file you just saw my folder down there jump that's my downloads folder okay I'm gonna go to my downloads folder and open it okay so this takes me to my Finder interface and I'm gonna just double click on the file I just downloaded which is net download help or Co app this is the package okay for the companion app okay I'm gonna double click that and it gives me an installer I'm gonna hit continue and then install alright I'm gonna just allow it to install and I'm gonna hit close and you can either keep the package or move it to the trash I'll move it to the trash I don't need that anymore okay now I'm going to go back to Firefox and I'm going to close this tab and I'm going to right here hit recheck for the companion app so it says verifying companion app companion app installed we found the companion app in your Applications folder you're set now to download from any site that you can browse to that has a video embedded on it okay I'm gonna close these other tabs okay and so that wasn't too bad you know some people will consider that technical it was one down it was a download of a browser add-on and a download of a little small companion application that goes into your Applications folder that's it that's all so yeah an extension to a browser and a small program okay now we can download this video okay so I'm gonna refresh the page and it I have to allow access through my firewall which I will okay I'm gonna pause the video here okay now I'm going to go to this button right here you'll see that it put a new little button on the interface next to that menu okay so if I click that it will show me a couple of variations of the video that are available for download so I there is a 720p version and the 1080p version so I'm gonna download the 1080 version which is the full HD version okay so all I have to do is click here and hit download or I could just hit quick download now it's downloading so if I click in here and I hit running it will show me that the video has started to download and again it's a long video you know it's a it's an hour and 17 minutes and it's full HD so it's gonna take a while to download but you'll see it's already gotten one percent okay and it will put it in a folder inside your home folder called DW helper okay nothing's in there yet because it's not done downloading but it'll make a folder in your home folder and it will call it DW helper which is the download helper and when it's finished downloading you will then have the full video in your d DW helper folder inside your home folder you can go in there you can move it wherever you want you could double click it to watch it right there that is how to download just about any video that you find on any webpage that you can navigate to okay so I'm gonna show you one other method for doing this okay now this is my preferred method but this will only work on a Mac okay now there are other apps that are equivalent to this so again last week when I showed you that there are methods for downloading things with BitTorrent okay the idea was don't memorize the steps right the steps are just the method that we used in this particular instance on this platform using this app right if you're on a different platform it might have different steps if you're using a different app it might work a different way right so for example I was talking to a friend about IRC okay and you know a former friend showed me how to use direct client to client search engines they call DCC search engines right so I went on one and you know I was gonna download a file that I wanted to watch a documentary and this server had it on IRC and you know I started downloading it and my client program for IRC was very buggy it hadn't been it was I used to use an IRC program called Lincoln asst okay for the Mac which I liked I thought it was a good one there's a lot of old clunky ones old pure text interfaces this one had a nice window to interface it had like a direct client to client transfer feature worked really well when it was in its heyday I just checked you know I haven't been on IRC a lot and I haven't run Lincoln US in a while the last time this app was developed on the Mac was back in 2012 the developer has like you know it's abandoned where that's what they call when the developer stops making improvements and just lets the software just go so this program was abandoned where right and I think you'll you'll benefit from this anecdote okay because it helps demonstrate the adaptability that you have to have when it comes to doing things when you stay rooted in your ways and just tightly I'm gonna do it just this way this way this way okay and memorize steps and not just go along with the flow of something of how a general idea works right you're gonna find you're gonna be lost in computing okay this is about correlative thinking correlational thinking right this is what we've talked about this endlessly when we talk about the occult okay the occult contains tons of examples of correlative or correlational thinking the same applies with the technological world okay so I found Lincoln us to be super crashy when using it again in the real world on a modern operating system it hadn't been developed I guess since you know Mac OS 10 point 11 or 12 years ago right I'm using 10.14 now right so I said well let me see if there's another better IRC client so I downloaded something called textual right and I've never seen that program before in my life never saw it downloaded it for the first time open it up right there's a few things in different places but in general I recognize where to go to do things immediately because it's a general idea how does one use an IRC client right a general idea how does one use a a BitTorrent client a general idea how does one use an Internet video downloader they're going to have general principles that they're built on right that's the principle that's what you have to understand all right if you try to just memorize cotton memorize you know details of where this is at where this is at word and menus and tasks you are not going to be there in something that's built differently so you have to adapt and say I'm not looking for exact memorization 'el tasks this isn't a trained monkey thing where you know do this then this then this that no it's about the conceptual idea of what does this program do what is the purpose for it where might these items live if the person has a general idea of interface development okay and then you're going to adapt or correlate correlational you're going to correlate in your mind where functions might be in that other app okay so I open up textual and I was almost immediately able to start using a program that I've never seen before in my life because I got the general concept instead of memorizing tasks this is what good practices in computing are okay and in teaching technology which is going to be a big part of what on earth is happening going forward because I'm telling you folks I meet technologically illiterate people and it's it's unacceptable this is the equivalent of not knowing how to read and write in today's world ok it's not acceptable ok because if you're going to actually try to communicate and effectively teach other people you have to know how to do this stuff this isn't optional it's required so get the concept don't memorize tasks ok so I'm gonna show you a video downloader that is custom built for the Mac meaning it's a native Mac OS application you might go and type in to a search engine for example the program I'm gonna show you briefly is Downey ok so Downey is built for the Mac that there's no Windows version there's no Linux version however you might be able to type into a search engine of your choice what is a equivalent of Downey for windows of the Downey video downloader application on the Macintosh for Windows or for Linux so you know I when I'm on Windows or Linux I'll just use video download helper I know it I'm used to it so I use it and it works ok but you might want a native app on Windows or Linux so find something that does the same thing look on software comparison websites you know on all type in alternative to and then type in Downey for Macintosh right and just you'll find an alternative they exist then learn about the software buy it you know if you have to and start using it ok so let me show you Downey and how easy this one is so this is the interface for Downie okay oh it's a blank window that's just uh hovering I'm gonna even make it smaller so I have it kind of stretched out there it's just a tiny little window when it opens right and you can do a couple things here okay you can copy and paste the URL from your web browser that has the video on it to the downing window okay you can drag and drop the URL onto the downy window or you could do what I did and I installed the downy add-on okay so all I did here was I went to add-ons same way I did the video downloader and you'll see it's already in here so I'm not gonna redownload it I'm just showing you I've already done this process and I'm gonna just type down in here and again this is Mac only okay so this is the downy extension there's not nearly as many users you saw what was there let me go back there there was three thousand one hundred ninety eight users compared to three million users for video downloads so this is absolutely not as popular of an option okay yet for me I feel it's the best it works natively and it works very efficiently even easier than what I just showed you okay so it's already installed in my system so it says remove they're not install I'm not going to remove it because I use it okay so I'm going to use it to download the this GL Griffin video on YouTube so I'm actually I could start with it open or I could start with it quit it won't matter okay I'll I'll quit it so I've start with the program completely quit out of okay I'm just going to click this button which is the Downey button the Downey it says open with Downey okay so all I do is click that Downey opens it finds the video and it starts downloading now now Downey you'll notice is incredibly faster because it uses multi-threaded downloading technology which means it's initiating many downloads simultaneously for the same video and combined him that video is done downloading already folks the other one let's see where this one's at the other ones still at 28% okay now you understand why I use downy instead of you know download helper on the Mac okay not knocking the other one it's a good open-source alternative but look here's another thing folks not to belabor this point I talked about it a little bit there's a reason proprietary software people are willing to pay for it did you see the difference I know I did okay I want the free and open source community to succeed man what I mean I want I'm telling you from the bottom of my heart I want to support it I do support it I don't want to support it I do support it I wanted to improve okay the free and open source community cannot just make their selling point that it's free and open source your software must be good it must work well okay so let me tell you something if you give me the choice between that free and open source program that I can modify to my heart's content but it's going to download like that versus a proprietary program that I don't have the code to that I had to pay a developer for but it's gonna work like Downey just did I'm taking Downey 100% of the time every time and that's what most of average people that are using a computer to get things done are going to do so this is what the open free and open source software world has to learn okay you they gotta learn that it's a hard lesson to learn they don't want to hear it but they have to learn I believe me I'm one of your champions you you if people build free open-source software I'll highlight it on this show if it does the job better than anything else okay but I just showed you the program for me that does the job better than anything else for me okay you can choose what you want but you know I'm gonna just click this window and I'm clicked right here this little magnifying glass that'll take me to the finder we're the video is that and I'll just show you it is the full video and I can play it in its entirety in HD if we switch to the sorry and we switch back to the computer hold on there's a yep we're having it okay we're good I thought we were having a tech glitch there no worries here we go so I'll just show you this is the full video in HD and you know we can at ease let me just pause it I'm just gonna show you I could scrub all the way through it from beginning to end just as part of the middle you could it be injured you might even get kick I'll go all the way toward the end you know and it is the full presentation that G or Griffin gave on individualism versus collectivism all one hours one hour and 17 minutes worth so that is how to download a video from YouTube to prevent it from being censored folks okay you know I'm finished I'm quitting the program there close out of my browser so we're running out of time so I think I will let's see do we have time for one call going out let's see let's do one call we have about two minutes left in the show I hope everybody enjoyed that little addendum who do we have waiting here let's go - lets go - let me unmute myself I'm unmuted there alright let's go - lets go - dutch patriot dutch patriot you're live on what on earth is happening welcome i should be being heard in the room you have to unmute yourself this is what we have to put an addendum in here let's go to essence of an arc ani you're live on water hey Mark can you hear me yes I can loud and clear welcome to the show alright very limited time so go oh cool things then it's funny that we're talking here on do such harmony on something's that's you know with the green language and the data caps are probably more about cycling information flows than uh you know trying to make you look around you got digital I mean you look at fire satellite just looks like a low resolution image on the and I remember hearing that you were you're a fan and in the trip and I'd say they'd probably call you mark the shadow because you are diamond cutting people through the shadow cells I appreciate that your audio is cutting in and in and out a little bit so I'm gonna let you go but I got the essence of what you were saying we do have to press on with trying to cut through that darkness and you know part of that is showing people how to get information on their own and also to distribute it on their own you know we have to be not only people who download that information and take it into ourselves but who also propagate it and publish it out to others so let's go to electric boogie you're live on what on earth is happening welcome now let's go to true rebel true rebel you're live on what on earth is happening thirty seconds not there I think that's all the time we're gonna have for this edition I tried to squeeze a couple calls in toward the end that's all the time we have for this edition of what on earth is happening ladies and gentlemen I hope you enjoy the show we're live here every Sunday from 3:00 p.m. to 6:00 p.m. East Coast time remember everyone government is slavery we'll see you right here next week [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #206

Topics: *What Natural Law Is NOT, Teachability, Internal Mental Definitions vs. Reality, Natural Law Seminar, Natural Law Working Definition, The Law Of Freedom, Conscience as Knowledge and Common Sense, the Etymological origin of the word Natural, Human Beings want to BE God, Natural Law has absolutely NOTHING to do with Darwinism or Darwin's theories on Macro-Biological "Evolution," Darwin's theories have not yet been proven through evidence of transitional fossils in Earth's fossil record, the work of Llyod Pye, People who don't do enough research yet believe they are correctly informed, Mark's "Cosmic Abandonment" presentation, Natural Law has absolutely NOTHING to do with the Darwinian notion of "Survival of the Fittest," Natural Law has absolutely NOTHING to do with the so-called "Law of the Jungle," Social Darwinism, Eugenics, Social Darwinism and Eugenics as major tenets of Satanism, Natural Law has absolutely NOTHING to do with the behavioral of animals that are less advanced than human beings, Why Natural Law applies to Humans and NOT to animals, the Triune Human Brain and its components, Left Brain and Right Brain hemispheres and the modes of consciousness they make possible, Natural Law has absolutely NOTHING to do with the ANY aspect of Man's "law" including "Common Law," the differences between Natural Law and Man's "law," Natural Law is the Key to unlocking all aspects of Human Enslavement, the state of Human Consciousness, Mark's Vitriol and Disappointment regarding Humanity's rejection of Truth, Mark naively believing that more people would respond to the call of teaching Natural Law by now, Conscious Parenting, Un-Schooling, Teaching by Example, Mark's contention that Prisons should not exist, Dealing with Criminals of our own making, Ivan Oyola's presentation from Anarchizona*

freedom mat that's what it's all about you have to move on freedom into space welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time this show is live every Sunday from 3 p.m. to 6 p.m. East Coast time that's 12 noon to 3 p.m. Pacific time today is Sunday April 14th 2019 we have an awesome show lined up for you here today we're going to be talking about what natural law is not I told people that I would probably be having this as the topic for discussion on this show last week it is something that is long overdue it is something that I should have actually formalized as sort of a presentation or a show probably a long time ago because I'll tell you what folks I think this is one of the things in the so-called freedom community in the spiritualist community that people still do not have a firm handle on I see on websites and on social media almost all the time people with complete misunderstandings miss apprehensions about what natural law actually is and that term has to be clarified now without going through the entirety of my entire natural law seminar which I'll be talking about I'm going to very briefly go over what natural law is in my presentation slides today and then we're going to talk about all the things that people hear in their internal mechanism in the mind in their own internalized definition when they hear the word word or the phrase I should say natural law you know it triggers so many different responses for different people but very few people have really ever done a formal study of what natural law really is now are with the podcast today I'll probably also after the podcast comes out probably sometime late tonight or tomorrow I will link to some resources regarding natural law some of the things that I think very clearly explain what it is I put out a source list of books in the past in the in the podcast that I did on natural law previously many years ago and I will put some of those books in with the resource list for for this show and I'm gonna put a couple of new books in there that I think helped to clarify it and I'll also link to some other material from researchers that I'm going to talk about on the show today so with that having been said I think that we can go ahead and jump over to the computer slide show because I'm gonna start my formal slides alright so today's episode for what on earth is happening is episode number 206 and is entitled what natural law is not thank you to brett Hatton for the awesome artwork that he's been churning out every week looks great so this is the title slide for this week's presentation and I think it hints at what we're really going to be talking about because this is the big stumbling block for most people when it comes to the understanding of natural law they always want to try to claim that you are applying morality okay that is gauged in human standards to the animal kingdom and or vice versa that you are trying to apply animal behavior to human beings and nothing could be further from the truth okay people want to confuse the term natural the word natural meaning having to do with the natural world okay with the term natural law which has to do with the consequences for behaviors that human beings take regarding whether they are moral behaviors or not and the set of consequences that are actually delivered by the universe as a direct result of the free will behavior of choices that human beings make one has absolutely nothing to do with the other the way that animals behave versus the way that human beings through their free will choose to behave and we have to understand that natural law does not apply to beings that are of lesser developmental complexity than human beings okay so that's the main thing that I'm going to be going through in this presentation today and trying to forcefully hammer home because I'm telling you there are people out there that still don't get it I still get emails from people asking me well if animals can do this to other animals you know why are human beings judged according to different standards and the answer is we're not just other animals okay we have to understand that we are held to different account because of the complexity of the human brain structure and the human nervous system and the human complexity of the human soul you know and the freewill compared to what the animal kingdom has available unto it okay yeah we are not the same as the rest of the animal kingdom this is actually the idea that we are just another animal and no different than the animals that behave with purely instinctual behavior is a satanic concept this is one of the things that we'll be talking about when I get into Darwinism regarding this because that's another thing people confuse natural law with when they hear the word natural this is what's been completely co-opted as the term okay people think that natural is immediately associated and correlated with Darwinism okay we're gonna be talking about how that's not true so let's jump into the slides okay so the first thing people have to understand here is that when we're talking about the term natural law you have to completely set aside what you think you know okay what you think you know by hearing that phrase because this is what people do and I've noticed it I see I observe human behavior I'm a keen observer of human behavior I don't always like you know tell people exactly what I think about what they're what I'm seeing okay I am serve it like generally stay quiet about it but I then I bring the findings forward from my observations here on the show to try to help people to understand what's really going on in the human mind in the human psyche as in the aggregate okay in the in the far reaching numbers of human beings on this planet the first thing we have to understand is that most people when they hear a phrase or a term that they don't fully understand or they they they don't really know what you're saying when you say the term or phrase they don't want to appear stupid okay they want to think that they understand what you're saying because one of the worst things that anybody can really undergo is another human being going to them do you understand what I am saying it's probably one of the most insulting and degrading things that really you can say to another human being can you your brain and the processes going on in your brain follow the words that I am saying and extrapolate correct meaning from what I am saying okay so we're talking about internalized definitions in the human mind okay and this is where the disconnect happens when it comes to natural law because when you say that phrase what people immediately go to is the internalized definitions that they have for the words natural and the word law the words natural and law okay and when they bring forward those definitions that of what has been repeatedly hammered into their brain since the moment of their birth since the minute they dropped out of the womb okay are these socially accepted you know colloquy alized definitions okay every day speaking term definitions of what the word natural and what the word law means and I'm telling you right now they they immediately associate the word natural with Darwinism in their mind because of the term the other phrase that we'll be talking about called natural order which has nothing to do with order whatsoever okay so this phrase sums up the battle that were immediately up against when anybody tries to teach natural law or to convey the correct understanding of natural law to other people and I know there are many people with this frustration it's not just me there are people who try to explain to people what natural law means and it's like they fall straight on their face because they don't address the person's misunderstanding in their own internalized mental definition that they are ascribing to the term natural law instead of starting from a blank slate and saying I don't know what that term as you are using it means okay they don't want to admit that so the first thing here is this quote by epictetus it says it is impossible to begin to learn that which one thinks one already knows if you think you already understand what somebody is actually talking about and trying to teach and trying to convey and that you don't need to actually listen and hear what they are saying in fullness then you can't really be taught it is impossible for you to really learn okay this is that whole idea of teach ability so teach ability derives from a balance between healthy skepticism and an open-mindedness willingness to learn and grow that's where the optimum teach ability comes from learn ability how whatever you want to call it the ability to be taught by someone else the ability to learn through being helped or taught by someone else okay so you we have to understand this is where most people are approaching natural law from they hear the phrase and they think they know what it means okay they think they already know it and this is what has to be I would say in people trying to convey this to other people directly confront that directly confront it with people and say it directly to them you have an incorrect internalized definition grinding away in your mind and you think you know what I mean by the term natural law and you do not you it's confrontation it's almost belligerent because you're directly saying to someone else you think you know and you do not know what I am talking about or what I mean you're extrapolating what you think I'm saying instead of actually listen listening to what I am actually saying and this goes back to the idea that 99.9% of human beings on this planet hear what they want to hear they don't hear what's actually being said they only hear that which they prefer to hear okay so we're starting with the most direct confrontation that you could possibly say to another human being you're not really listening to what's being said you're operating according to prejudiced prejudged internal definitions okay and what I am saying is not directly correlating with the meaning that's being interpolated and extracted in your own mind to really do that you have to be one print truly in the present moment you have to stop thinking about all the other things you're going to respond with or what you think it means and you have to be present fully okay and then - you have to silence the mind see even if one isn't actually speaking to really learn and take something in you have to silence the internal dialogue of the mind because that's chattering away off and louder than words okay and it blocks an internal reception of understanding and meaning okay this these are spiritual concepts that help with learning and growth and development the ability to actually listen to stop the internal chatter and listen to what's really being said okay we all get distracted we all have things we're thinking about but again to directly confront this dynamic up front is I think one of the most effective ways of doing this and saying be present in the moment empty the mind of all other clutter and internal dialogue and actually listen to what's being said okay and then you're in the maximum position to learn so if we step into that present moment awareness if we step into that true spiritual center that's where real learning and growth take place okay that's where we're in an optimum position to learn alright and I'm telling you folks one of the things that is gonna absolutely open the gateway of the mind and the soul more than anything else is truly understanding natural law this is the key to everything okay it's the most important foundational aspect of all of my work of all real spiritual teachers anywhere at any time that I've ever lived as far as I'm concerned this is the these are the keys to the kingdom ladies and gentlemen okay so first of all I want to say this will not be a total review of natural law and where my natural law seminar so this is the title slide of my natural law seminar it was called natural law the real law of attraction and how to apply it in your life okay so I very highly recommend that anyone who is not going through this lecture in its entirety it's a nine and a half hour long seminar okay to go to my website and/or YouTube channel and listen to it in its entirety all three parts I want you to um let's temporarily back off the slides because I'm going to bring up in my web browser where you can get this this seminar okay so we're in the web browser now and I'm going to just show you all you have to do is click on videos on what on earth is happening calm so go to what on earth is happening calm click on the videos tab alright so when you get to the videos tab I always keep the natural law seminar videos at the top okay so there's three of them okay and the page is loading all right there we go it's loaded so this is natural law the real law of attraction and how to apply in your life part one of three if you look underneath this if you scroll down this is part two of three okay and then if you scroll down to the third video on the page this is part three of three they're approximately are a little around the three our mark each give or take a little bit okay but that's the entirety of the all-day seminar that I gave back in New Haven Connecticut on October 19 2013 okay so if you haven't seen this that is the best place to go for an understanding of what natural laws so we could back off the slides one more time and I'll go back to my presentation slides okay so just moving this slide forward one more time this is the Stargate folks this is this is the spiritual Stargate of inner transformational understanding that needs to take place in the human mind that's I don't know how I could word it any more accurately okay and people will say oh you're you know making it sound so grandiose and self-important no it has nothing to do with me okay the natural law is either understood is is discovered and understood or it is not it is a force that exists in the universe in nature inherently as we're going to talk about this seminar explains how it operates and how we can bring our behavior into alignment with it if we want to change the world for the better and that's a big if okay if we're being honest with ourselves if we want to do what we say we want to do okay so please if you have not already watched it everybody who's really a fan of this show should have already seen this but if you haven't you need to watch this in particular aspect of my work in its entirety from beginning to end all three parts okay so let's look at what natural law is before we look at what it is not okay so we're going to do the opposite this is the Cata Phatak variant of what natural law is meaning we're defining it in the affirmative before we look at the apophatic which are aspects of what natural law is not which I'm going to go through in order okay natural law is a set of universal inherent objective non-male and made eternal and immutable conditions which govern the consequences of behaviors of beings with the capacity for understanding the difference between harmful and non harmful behavior that is a mouthful as a working definition I've said it before this is probably the simplest that natural law can be defined however it is still a complex definition that almost reads like a run-on sentence but if we take each part in order of the words that I'm using to define what natural law is the meaning becomes very unambiguously clear okay it is a set of universal conditions meaning there's not like one thing that you could define as natural law it's a set of dynamics I would define it as the governing dynamics in all of nature when it comes to human behavior or the behavior of advanced beings in the universe okay whether you want to consider human beings quote advanced I'm talking about beings with the ability to think in our level or beyond our level okay that's all so it's a set of universal conditions what does universal means it means exactly what it says that it exists and operates everywhere in the entire universe there is nowhere in our universe that you can go to escape the conditions known as natural law they exist everywhere at all times and places in our universe okay they are inherent inherent means that they are existing within nature they are not created as a construction idea these laws exist inherently in the universe okay that's what the word inherent means it means it's not artificially constructed they are natural dynamic within nature itself okay they are objective meaning that they exist independently of human perception or any perception for that matter okay they exist in the three-dimensional world in the 3d space time continuum in the natural universe okay they are laws which operate whether we understand them believe in them want them to exist okay or have any type of sub subjective idea about them that's all irrelevant they operate the way that they operate completely independent of human perception they are non man-made human beings did not make these things they are not constructional ideas that exist in the human mind or psyche okay like man-made laws are okay they're not psychological constructs okay they're not agreed-upon ideas all right this is the bulk of my work the underlying essence of all of my work with what on earth is happening is to distinguish between the genuine and the artificial the real the natural the genuine versus the artificial the illusory the constructional that dichotomy that understanding the ability to discern between those two things is one of the underlying foundational aspects of my work with what on earth is happening so these are not man-made constructs okay they exist inherently in the universe they are eternal meaning that they will exist and always have existed always will exist you will never take these laws out of the fabric of creation that it cannot be done for as long as the universe exists these laws will exist because they are part of the universe they are actually embedded into the fabric of creation itself as a part of nature they are immutable conditions that means that they can never be changed since they're eternal they can never be changed there is no thing there is no event there is no task there is no action that anyone can do to change how natural law operates okay you are not going to do anything to change how the force of gravitation is at work on any given planet it is that way it is a law of nature you are incapable of doing anything to take that law out of nature okay even if you destroyed the planet gravitation would still exist okay the force would still exist inherently in nature the same thing here it's immutable you cannot do anything to change it and what does it do what does this set of universal laws that have all these properties do they govern the consequences so they govern consequences meaning once a behavior is chosen through free will and then acted upon you receive a set of circumstances based upon the wisdom that is inherent or lack thereof in the freewill choice that was made regarding the behavior and that's done not just individually but in the aggregate meaning it's done collectively over all of an entire species okay and then we reap what we sow doubt into the universe so this is a mirroring factor the natural law is a mirroring dynamic what we put out into the universe through our freewill behavior okay is then reflected back toward us by being given the consequences of that freewill behavior there is free will to act in a certain capacity but there is not any freedom to escape the consequences of the freewill behavioral choices that we choose to enact that cannot be done so this is the idea that every action has an equal and opposite reaction okay you could boil all of this down all the way down to the physical domain see natural laws come to us through physical laws through the physical world okay but they are spiritual laws because they are operating in the realm of the causal realm then they become manifested on the the manifested plane the plane of manifestation or the physical world okay so and they govern the consequences of behaviors of beings with the capacity for understanding the difference between harmful and non harmful behavior so I did not say in this definition that natural law applies to all beings did I never did okay it doesn't apply to all beings it applies to beings at our level at the human level of spiritual understanding and development that we have reached and beyond not backwards or lesser in spiritual mental psychological development which means any animal that is outside of the human domain okay so this is the first thing to understand about what natural law is natural law applies to human beings and more advanced beings that have the capacity to think at our level or beyond it does not apply to beings that don't have the capacity to think at a human level to understand the difference between right and wrong behavior objectively so can you expand you have a discussion about morality with a cat no you cannot the cat cannot cognize it's cognitive functionality does not operate at that level can you sit with a field mouse and have a discussion about which behaviors that a human being can take that are right because they don't cause harm versus behaviors that they can take that do cause harm to other sentient beings that are therefore wrongs can you sit and have a bee have a conversation about that topic with a field mouse okay if you say that you can you're a little slow in the in the mental capacity meant maybe natural law might not apply to you because you might not be as smart as the field mouse okay that's the problem with most people okay is that they're really operating from a place of mental retardation and I'm not talking about any condition again when I say that people are like oh don't insult people with these conditions no I'm not talking about that talking about being slow being slowed down that's what the word to retard means the verb retard look it up in any good dictionary and it means to slow the progress of and that's where humanity is largely at they're in a process of retardation of having had their mental faculties slowed way down to the point where they have a hard time grasping the true meaning of anything and how it works and that's why the globalists that's why the Satanists the dark Luciferians the dark occultist whatever you want to refer to them as the mind controllers the social engineers ok the powers that shouldn't be operating in our world and conducting and holding people in the state of slavery that they are ok that's why they're winning they're winning hard core they're winning ok they're not on the ropes they're not on the run ok these people have humanity exactly where they want it exactly where they want it so it doesn't apply to all beings it applies the Bing's with the capacity for the understanding of objective morality and that's not Anna that's not the animal kingdom folks that's human family and beyond ok the understanding of natural law which is what we need to arrive at that's the discovery and the internal understanding of it is centered upon bringing our own conscience which is a form of knowledge as we're going to talk about into alignment with objective morality morality is objective it is not subjective it is not a constructional idea or thought brought about by man and and agreed upon it exists in nature in the natural world because the behavior that we conduct exist exists in the natural domain therefore the characteristics of that behavior being either harmful or non harmful to other sentient beings also exists in the natural domain this just follows logically and anybody that cannot follow that logical progression of thought doesn't have a logically ordered mind and that's the problem that's one of the big parts of the problem folks okay they can't get down to first principles because they don't have a mind that operates according to philosophical first principles it's a catch-22 they can't reason at that level in many cases that's why there's so many moral subjectivist or moral relativists out there they're slow on the uptake they can't reason at a philosophical level and reason from first principles so understanding natural law ultimately means definitively knowing not believing not accepting not grasping at straws not just conjecturing okay it means definitively knowing read the actual words I've written definitively knowing meaning absolutely definitely without any shadow of a doubt in one's mind definitively knowing which behaviors are rights because they do not cause harm to other sentient beings and which behaviors are wrongs because they do cause harm to other sentient beings they initiate harm to other sentient beings that's what a wrongdoing is and rights are rights are right behaviors because they do not initiate harm to other sentient beings this is the definitive correct definition of what a right and a wrong is and most people in humanity cannot give you anywhere close to her a semblance of that definition sadly that's why we're losing our rights because people don't even know what they are so this is what natural law is I of course picked the Justice card from the tarot deck to represent natural law because it is the natural law card of the tarot deck it is the universal force of Justice that operates in the universe that can never be escaped and is the enthroned King of creation okay it is the enthroned ultra sovereign of creation is the only thing that all the other sovereign beings of creation are ultimately subjected to are bound by these laws that's it and when we understand them we can bring our behavior into alignment with them and become masters of free will okay not just having the capacity to exercise it but mastering it and when we do that there's no ceiling on what our capacities are as individuals or as a species but the problem is we don't understand these laws we're operating according our behavior we're operating our behavior according to total ignorance regarding these laws and therefore work conscious were unconsciously creating in our lives as human beings all together in the aggregate we're unconsciously aggregate Lee co-creating our reality okay until we understand these laws and we bring our behavior into alignment with them we will never be consciously in the aggregate co-creating the human reality together we're just going to be chaotic Lee you know wandering about not understanding how we got the result in the universe that we got how we got the result in our world that we got that we received as a result of how we collectively behaved so that's what natural law actually is here's how it works in the world when human beings in the aggregate live in harmony with natural law and are therefore moral they become and remain free when human beings in the aggregate live in opposition to natural law and are therefore amoral they become and remain enslaved I refer to this dynamic of natural law as the law of freedom and I would state the law of freedom as this as aggregate morality increases aggregate freedom increases and as aggregate morality declines aggregate freedom declines or in other words if you want to write it out as a simple mathematical equation the sum of freedom or in other words aggregate freedom is directly proportional to that's what that infinity signed what the last quarter of it cut off means in it is directly proportional to means if you increase one you increase the other if you decrease one you decrease the other in direct proportion okay so aggregate freedom of course the sum of the freedom of all the beings that comprise any given society is directly proportional to the sum of the morality of all the beings that comprise any given society aggregate freedom is directly proportional to aggregate morality that's a mathematical definition in the universe of how the laws of nature ultimately behave when it comes to human behavior this is how freedom is created or destroyed okay and this is part of the problem folks is that the whole so-called freedom community which we don't even have we have the my freedom community that just wants freedom for various selfish reasons in their own mind do not want to understand first principles and objective reality when it comes to the laws of the universe they don't want to get that they want to believe it's just all random and that they can still have all their subjective opinions when it comes to morality and still somehow be free you know what people who think like that are they're clowned out asshats okay to put it in Street lingo if you are a moral subjectivist or a moral relativist and you think you can somehow ever create a state of freedom with that mindset you what happened to you is that the social engineers the satanic social engineers of our society clowned you the fuck out boy that's what happened that's what happened get his offended as you like but that's eternally true and can never be made untrue that's what happened to you boy okay get over it get his offended as you like and get the fuck over it natural law is all about conscience folks conscience now people think conscience is action conscience is not action the exercise of conscience is action conscience is knowledge though the word science is right in the word conscience so conscience comes from two Latin words the first is a Latin prefix con when you put that in the front of a Latin word it means together okay and the Latin verb ski adder a which is the infinitive of the verb ski o ski o would be the first person so ski o means I know in Latin ski are a means to know okay it's where the word science comes from science is knowledge real science is knowledge so when we put these two together consciousness conscience literally means to know together to come to a state of knowledge together it is the knowledge conscience is the knowledge of the objective difference between right action and wrong action it is not the free will exercise of the behavior that's exercising conscience the exercise of conscience is the behavior then conscience is the knowledge so when we take a behavior and we do it in conscience that means we know what the difference between right and wrong are and through our freewill we're exercising that choice we are actually exercising to behave within our rights or outside of our rights conscience is common sense knowledge or at least it should be see that herein lies the problem again okay I'm giving you the answer but in the answer you can see where the problem is conscience should be common sense in humanity but unfortunately it's not the knowledge of the objective difference between right and wrong action is not common sense knowledge in the body of humanity and that's the problem that's why humanity is enslaved for that very underlying causal factor reason that people believe morality is subjective and a constructor idea that exists only in the human mind and not inherently and objectively in nature that's the reason human beings are enslaved that's the very underlying causal factor reason but you can't tell that to hard-headed fucks in the freedom movement you can't do it see I'm not interested in debating anybody on it I'm telling you this is the way it eternally is whether you understand it or not or whether you ever fuckin understand it or not it won't matter doesn't matter I'm this is testimony that's all this is all I'm doing I'm testifying to what the eternal laws of creation actually are not because I say they're that way but because we're I among many countless others who is insignificant in the entire cosmic play of things okay have it was one of the infinite amount of people who has discovered it or whoever will discover it because this is a law that exists in nature that is discoverable has nothing to do with me whatsoever that's like saying because you understand gravity that's like oh you're saying that because gravity gravity exists because you say it does yeah this is this is the logical fallacy people use okay no gravity doesn't exist because I say it does it exists because it's an inherent law in nature that's it period and we understand it through its observable effects the same way we understand natural law through its observable effects but once again what it all comes down to folks and it always has come down to nothing else but this human beings want to be God that's all comes down to human beings want to be God that's all comes down to no other dynamic and they want to be the lawmaker and they want to say there's no law that operates outside of my law that's it and I'm not bound by anything that's where human beings one ultimately that's called the ego completely run amok taken over the soul of the individual setting up shop in the brain and saying I run you motherfucker that's what that's how out of control the ego is in the human mind that thinks like that that's exactly what it is and this is the vast majority of the freedom movement so-called freedom movement freedom my ass freedom movement it's a bunch of people it's a bunch of little clown baby boys and girls fighting amongst each other just like the social engineers want them to when they pull on their puppet strings pulling on their puppet strings making them dance like like marionettes that's all that's what the freedom movement is it's a joke a joke I'm calling people out in it okay you know I can see how unpopular I am it I don't give a fuck I'm not interested in popularity I'm not here to win popularity contests I'm here to explain how the laws of morality actually work so that ignorant human beings can attempt to align their behavior to them and stop being fucking enslaved that's what I'm here to attempt to do yeah I know how futile it is because I know how burnt the brains of most human beings are believe me I know I'm not naive in that capacity I know how burnt people's minds are I talked about on a couple of former shows the etymological root of the word natural briefly go over this the English word nature is etymologically derived from the ancient commission slash egyptian word netter okay so this is what natural law is all about folks this is the the underlying etymological definition of the word nature and Nate the word nature has been co-opted it's been co-opted to mean you know something that has to do with Darwinian survival of the fittest which we'll talk about okay and this has nothing to do with the word nature from its etymological roots the word nature in Commission meant God it was the word for God and some people will translate it as spirit but it means great spirit grand spirit that underlies everything the intelligent creation that underlies all things all matter and all laws of nature so for lack of a better word we're gonna use the word God here okay get his offended about it as you like nectar was symbolized again there's no real vowels in Egyptian okay it's a phonetic pronunciation netter okay this is how most people pronounce it but as we'll see that's not how it was really pronounced ntr let's say was symbolized hieroglyphic Allah as a simple stylized flag on a pole stylized in other cultures as a cleaving ax we get the judges gavel you know we get Thor's hammer from this symbol okay we get the axes of early us hero cults you know solar cults stellar cults etc okay we get Thor's hammer from it we get the judges gavel that comes down in the modern court system from this okay this is it's the idea of where real power lies okay because that's what the court system wants to be it wants to be God okay so it's taking that and using it as a proxy symbol okay so what ntr were the flag on a style a stylized flag on a pole represented was a force which was known to exist in nature through its observable effects like the force of wind operating in the world but difficult or impossible to see with the eye it's not something that is a physical of a distinct physical thing okay you largely know about it through its effects in the world okay you're not going to actually see it like fire or smoke okay so that's why they depicted it as a flag because you don't see the air and it holds the flag aloft okay and TR was actually announced nature not nectar as many people will pronounce it the actual pronunciation in ancient Commission was nature okay extremely close to the English pronunciation of nature and that's where we get the word natural from from the Egyptian nature okay natural so when we tack on the suffix al which comes from Sanskrit and then later you know Indus Valley root words that then came into old English as al all it means of from we're related to the suffix al okay and when we add that with the word nature it means of from or relating to God okay now if you want to even look at it from the Arabic and or Hebrew word L okay that al could also be derived from what does the word L mean in those languages in in Arabic it's the definitive article but in Hebrew it means God literally the word L means God in Hebrew so the word natural is completely related to the idea of God meaning that man didn't make it God did or ultimately the creative energy and intelligence that underlies all matter made it so what put natural law into effect not man the ultimately the underlying intelligence in all of nature or God put natural law into effect so we are talking about when we talk about natural law we're talking about God's laws laws that are put into a thought and again this is why atheists will never be able to create freedom it is an impossibility for an atheistic culture or a morally relativistic culture to create freedom can not be done according to the laws of nature impossibility because you are absolutely dismissing the source of we're right and wrong and the consequences for choosing between right and wrong came from you don't understand freedom is derived from you just don't understand you refuse to accept it because you want not to be bound by those laws or in other words you want to be God because only something that created those laws can ever possibly exempt oneself from those laws and that's not really the case because the creator and the laws of creation are one in the same even that's not above the law it is the law so how could you separate the creation and that which it has created it is not possible to separate those things they are one this is the problem with the whole traditionally religious worldview is that it always creates a separation between creator and created when there is no separation they are one in the same because the natural world is the physical domain and the physical domain is the spiritual domain they are not separate things the universe is the body of God you know this is what people who want to just take it into a religious mindset instead of a spiritual understanding always degrade the understanding of nature and God to bicep causing that separation and something that can never be separated okay so the word natural means out from or related to God natural law are the laws of God okay you don't want to use that term say they're the the laws of the underlining underlying creative force in all of nature that gave rise to all of nature okay if you don't like the word god if you're that babyish okay and you know whimpering over a word you know crawl under the stairs and sit there in a fetal position over a word okay so now let's get into the meat of what today's presentation is ultimately all about what natural law is not so I don't know how I could word it any more definitively okay so for all the people out there the thing natural law has to do with animals okay you have a retarded mindset your mind doesn't work according to regular speed you have been slowed down by the social engineer and you insist that something that has 100% nothing to do what you are talking about is equivalent to it that's called mental retardation okay so let's snap out of it and let's really pay attention to what's really going on okay what natural law is not natural law is definitively not and has absolutely nothing to do with any of these things nothing to do with them and we'll be taking these one at a time and going through them natural law has nothing to do with Darwin's theories regarding macro biological evolution has nothing to do with the Darwinian notion of quote-unquote survival of the fittest it has absolutely nothing to do with what people call the so-called law of the jungle it has absolutely nothing to do with what people call the so called natural order of things which isn't natural and it doesn't create order what they think is the natural order okay and here let me just definitively state this it has nothing to do with animals period natural law has nothing to do with animals except don't cause harm to the animals okay that's the about the extent that natural law has to do with animals human beings shouldn't be harming animals because they're sentient beings okay so it has zero to do with any aspect of behavior in the entire Animal Kingdom for any creature with less cognitive development and capabilities than a human being so I don't know how much more clearly I could state that definition or caveat that natural law has absolutely zero to do with any aspect of animal behavior in the wild on this planet on any other planet if the animal has a less developed brain nervous system cognitive capacity our understanding of you know the ability to comprehend right from wrong language systems etc okay you look there's any moron can look at the difference between human being and the rest of animals on this planet if you can't there's something very seriously broken in your brain so let's not get into the whole semantics of this this isn't a semantical game okay with the state of the world you don't have time to play fucking semantical games okay it's very clear what's meant by this natural law doesn't have anything to do with animal behavior has everything to do with human behavior get your head out from up your ass the people who still want to say natural law has anything whatsoever to do with animals because it does not okay I'm sick of hearing this shit from imbeciles who know nothing and have studied no aspect of it and talk out their ass because that's what they are people who talk out their fucking ass all right I'm just gonna come out and say it just like I would to you if I were talking to you on the street because this is how hardheaded fucks people are all right they just want to state something that absolutely isn't true just to hear the sound of the verbal splatter eeeh coming out of their gullet that's what they want to do natural law is definitively not has absolutely nothing to do with any and every human made law including what people call common law this goes for all the freemen on the land okay has nothing to do with common law has nothing to do with free man on the land systems of law because they're they're all they all give credence to and believe in the legitimacy of the laws of man that's why they operate within their court system and I'm telling you that all that system is is people who want to be God that have absolutely no bearing on reality whatsoever have nothing whatsoever to do with natural and they have absolutely no legitimacy at all and they don't rule anybody including me okay they want to think that because they think their God nothing could be further from the truth they're little boys and little girls who never grew up who's a mommy and daddy and it didn't pay enough attention to them when they're young they have all these mommy and daddy abandonment issues and so they grow up to be fucking Psychopaths they want to be God that's who everybody in the whole court system in the whole legal system is imbeciles who think that human beings are God because they're social Darwinists trash that's what they are social Darwinist trash I'm fired up today people I'm fired up because I'm sick of the lack of understanding of the term natural law you know I was considering just calling it cosmic spiritual law because that's what it is it's an accurate definition but though the word the phrase is natural law Lex Naturalis okay the word is natural law the term is natural law I'm not backing down I'm taking the term we're taking the term you get it it doesn't belong to you okay there's a real meaning to it that's why definitions exist all right you're not twisting it into something that it's not the people who do understand it aren't going to allow it that's how it's gonna work okay so we're we will hammer this understanding into people hammer it into people it has nothing to do with any of these things if you think it has to do with animal behavior other than human beings you are a dunce who hasn't listened to one thing any philosopher or researcher since the dawn of time has ever said about our natural law works and operates in our world it's called being a dunce who wants to create your own internalized mec definitions of things and then say that applies and it is operating in the real world when I just made it the fuck up okay that's where most people are at with natural law with an understanding of they have zero understanding of it and they want to insist that their definition is the correct one so let's take these one by one let's take them one at a time and go through them people insist that natural law has anything to do with Darwin's theories regarding macro biological evolution the so-called Darwinian theory of evolution and that is not what natural law is has or ever has been or ever will be natural law has zero to do with Darwinian evolution oh it has to do with real Universal evolution in consciousness it has a lot to do with that but it has nothing to do with this clowns theories on how species allegedly transition from one species that is fully formed to another species that is fully formed when his own theory of transitional species in the fossil record has never been borne out by actual real-world evidence people trot out certain examples oh like Archaeopteryx Archaeopteryx or this new you know alleged amphibian that like somehow eventually became some sort of a land dwelling creatures you know and there there's no transitional speed fossil records there's no transitional skeletons in the fossil record this is just what's stated as evidence to support the Darwinian theory that one species becomes another now I'm not saying there's no such thing as evolution in all of creation I'm just saying I don't accept the theory that Darwin postulated which he himself in his later years said would have to be distinctly evidenced by a lot of transitional species in the fossil record not one or two that they find and trot out and aren't even clear examples of transitional species that's just what they are claiming are transitional species okay but if you really look there's real transitional species found in nature okay there are fully formed forms of species and then they might look somewhat similar to other fully formed forms but you never see something that is completely interspecies transitional you don't find that in nature or in the fossil record so now they want to partially you know it's the very quick changes it's not as fast as we you know formerly thought you know because they have to go back and forth and keeping people's minds occupied with belief in the theory because this is all just part of the debate between religionists and scientists that's where they want to keep you they want to keep religionists on one side of the equation they want to keep people who believe in scientism and Darwinism on another side of the equation and atheism okay fighting amongst each other none of them understanding natural law therefore none of them able to really truly create a society based in real freedom it's brilliant you know like I said I can't really uh look at the social engineers and go wow I really hate you guys I can't bring myself to really hate the dark occultus and the social engineers folks you want to call that whatever you want you think that's some kind of a complex you go right ahead and call it whatever the fuck you want I don't really don't care okay I'm done with what people think I have been for a long time but I'm super done with it as most people can tell okay I was around these people I'm telling you they're among the most intellectually advanced people in the world they're they're way operating on a way higher level than people in the so-called freedom movement you have no idea what their minds are like you have no idea what they're capable of you have no idea how advanced their willpower is none unless you were involved in the dark occult you don't know you think you know but you don't really know okay you make the claim that you know I'm telling you from being around these people I do know their mental state I do know their willpower and I'm telling you it is so far in advance of what the average human being is like it can't even be calculated that's why they're winning that's why they're gonna continue to win I don't care whether people like what I have to say whether you agree with it whether you accept it I'm telling you that's true you don't know you weren't in the position and anybody who was in that position they'll tell you the same damn thing because it's true okay and and unless we start understanding this stuff don't expect the playing field to be leveled it will never be leveled until we are operating on the same mental level of mental acuity that our enslavers are operating at and I see no signs of that happening anytime soon so going back to the slide I see Darwinism as another religion it's just something that is asked of people to believe in just like religion is where there is no actual evidence for it there's only postulation and speculation okay natural law has real-world evidence it's called look at the state of human freedom first and foremost and exercise discernment judgment and common sense and when you see societies behaving completely immoral and descending into totalitarianism you know that's the causal factor connection morality and freedom are inextricably interwoven in the fabric of creation there's tons of evidence to support that through all of human history the problem is people are as dumb as ten pounds of shit in a five-pound bag okay and they haven't studied human history you know you have Millennials like I talked about last week you know claiming they want socialism and they don't even understand the definition of socialism that's how retarded they are and then you have people that are so retarded that they think I'm a socialist because I'm telling you that socialism is the root of all totalitarianism I'm sorry that think I'm a you know a right winger I should say not a socialist because I'm attacking socialism and telling people that's the root of all totalitarianism including national socialism that somehow I'm some radical right winger you know I mean this shows you how religious in their political viewpoints people are and how limited an understanding of polarization dialectics they have they don't understand mine they don't understand the strategies of mind control they don't know what polarization dialectics are because they're in that mental schism of their having to be these two conflicting things the only two conflicting things folks are whether something is in alignment with natural law or not meaning is it based in freedom or is it based in slavery you know our people condoning slavery are they understanding that it's inherently illegitimate in nature that's all nothing else though that's the only real dichotomy in all of nature so look if you want to understand this isn't gonna be a long-form presentation about the proofs that Darwinism is wrong okay I'm gonna recommend one particular researcher to do that okay the researcher I'm gonna recommend is Lloyd Pye okay Lloyd Pye is the guy to check out as far as I'm concerned again some people might like his research some people might not okay but I guarantee you'll be enlightened it will trigger some things you have not considered if you really look into it see this is the other point folks I'm going to get to in a moment most people don't do the research they operate from a point of belief they're not they don't really do the work to look into it because it takes years you can't do this research in a day or a week or a month it takes years to do it because you have to read read read read and watch and listen and watch and listen I'm gonna give you some resources with this podcast okay Lloyd Pie's done tremendous work written a lot of books put out a lot of videos a lot of lectures okay he wrote a book called everything you know is wrong book one human origins and he followed that up with everything you know is still wrong he wrote a book on intervention theory regarding how human beings were interfered with as a species in the ancient past and then he wrote another book called where did we come from the mysterious island alien origins of humanity now whether you ascribe to the ancient aliens hypothesis or not Lloyd Pie's work is brilliant when it comes to looking at hominids which of which human beings are of the family hominid I okay or we are the class of primates known as hominids okay we're really we're actually not if you really want to get down to it we're classified as that Lloyd Pye is really saying we're something entirely different than that we're a hybrid that came from hominids and another species which I would feel is closer to the truth okay so check out his website Lloyd Pye Lloyd with two L's ll o yd py e Lloyd Pye com you could check out his research material try it you know looking for his books online if I find some of his full books I'll link to them but I'm definitely gonna link to some of his videos ok so again this is somebody I highlighted and actually dedicated cosmic abandonment to okay very scholarly individual his research is incredible alright so here's some Lloyd Pye videos for people to check out you want to go on youtube or any other video sharing site and you want to type in Lloyd Pye everything you know is wrong there's the actual YouTube URL okay you can you know pause this when you know when you're looking at this video and open up a new browser and type that in if you want or just type in everything you know is wrong into YouTube Lloyd Pye an evening with Lloyd Pye that's another great lecture to watch okay that gets into all of his research material regarding hominids and intervention theory he has one called hominoids 20 million years of suppressed history okay highly recommended his nexus conference from 2003 his nexus conference lecture from 2003 is also brilliant and then he has a personal interview called Darwin was wrong okay this is now look I'm only giving you one researcher right now because first of all you research this guy you can go on for like ten years into his research okay but I'm just pointing out one person I'm not saying hinge everything about Darwinism not being correct on Lloyd Pye no you can launch into like 50 other researchers by looking in the one person's research you know looking at his notes looking at all the people that he talks about in his lectures etc okay and this is what I did in my cosmic abandonment series if you go forward with the research that I presented in cosmic abandonment and you look at all of the researchers that I talked about that's like a lifetime of work that's literally a lifetime of research and again I talked about this last week alright I talked about this dynamic last week cuz I get flak over it okay and I get flak from total know-nothings that when you say well let's have a conversation about it are you familiar with this individuals work have you looked into the work of Brian Forster okay and they're like I have no idea what you're talking about man you know have you watched the entire Nephilim series by la Marzulli what the hell is that right have you read all the books of the earth chronicles by Sitchin never even heard of it right so it's like you're talking with somebody who only wants to present an opinion but I was actually never looked into work the work of researchers who have made this their entire life's work but then you can go to source material okay you can go to material that came out of the ancient world talking about interaction with these beings okay the apana shots the Vedas the Eddas okay the Maha Bartra you know the Book of Enoch the Bible itself you know this about me in particularly the Old Testament all right you could go on and on looking into source text and most people don't do this you know they don't want to spend the time to do the research they just want to have an uninformed opinion and think that their opinion is as good as someone else's years and years of research you know that's the epitome of hubris so the cosmic abandonment present goes hand-in-hand with what I'm talking about okay when it comes to understanding that natural law is not about Darwinism okay because Darwinism isn't about real human origins this is all right so you can get that in my video section you can order a copy a hard copy on DVD or flash drive from donation gifts on my website so look into the it's not just about my findings my presentation about my conclusions and cosmic abandonment that's you know I feel that's important but that's not the ultimate aspect of why you should look into this the ultimate aspect of why you should look into this is to look into the work of all the researchers I talked about in this presentation and also the podcasts the extended podcast series I did on it let's go back to what natural law is not and has absolutely nothing to do with let's look at the second aspect the Darwinian notion of survival of the fittest okay so when you when people hear the word natural that's about survival of the fittest that's about Darwinism isn't it what they mean by that when they say survival of the fittest is they're talking about Darwin's book On the Origin of Species okay now a lot of people don't know the full title of the book because many modern covers of this book in their modern printings the the modern editions that they're printed in leave out the rest of the title and they just call it Origin of Species the book the full title if you read this entire title is on the Origin of Species by means of natural selection that's the first title now many older books had secondary titles that they list not just some titles but it could have been an an additional title that you referred to the book as it was it usually would say or and then it would thought be followed by another title this isn't really done in most modern books it's a it's a it's an older practice that was done in you know the nineteen 1800s Early 1900s okay and before so if we look at the alternative title for the book it is preservation of favoured races in the struggle for life okay now that didn't mean I'm gonna blow this up to show this to you okay let's zoom in okay and it says on the Origin of Species by means of natural selection or the preservation of favoured races in the struggle for survival now here's the term that I'm talking about here favored races now

Darwin himself did not mean favoured human races he's talking about species in the animal kingdom however people who wanted to take Darwinism which had to do with survival of the most ruthless and ones who would do anything to other members of their species and other species in order to continue surviving and living okay and propagating their genes in the animal gene pool okay people in the elitist world okay in the psychopathic ruling class wanted to take Darwinism and adapt it to the human domain and say because human beings are just nothing but animals and you are no different than other animals we can take the theory that Darwin came up with in the preservation of favoured races in the struggle for life which was his alternative title to on the Origin of Species by means of natural selection we can take his theories and we can apply them in the human domain so we would end up with instead of which animal has the biggest teeth and sharpest claws and the highest drive to to kill to survive you know and I'll do whatever it has to to kill and eat other animals and therefore it rules the roost in the animal world okay and others who don't have that viciousness or that surviving instinct will just go by the wayside and be eaten and or made extinct we're gonna take all of that that idea of quote survival of the fittest and we're going to apply it in the human realm so that it will be considered purely the natural order when a subclass of human beings who are actually occult magicians come out on top of everybody else because of what they know about the human psychology and about and because of their psychopathic mindset and desire to rule and so they can actually apply that notion of the animal kingdom the ruthlessness inherent in the animal kingdom and therefore they could just apply that in the human domain and it's perfectly fine and acceptable and their genes got them there they were the fittest in society their genes made it that way their genes got them to that position because they were you know just genetically superior and came from you know a more pedigreed bloodline in humanity you know that got them to that position of power and and got them into the ruling class and they we could just apply that to the whole structure of humankind the whole hierarchical structure of humanity let's just apply it all the way down and that's what gives us social Darwinism and eventually eugenics as we're going to talk about ok but this is the operating system model that the elite class are working with that the social engineers are still subscribing to and working with and unfortunately it is still the model that the majority of slaves who are willing slaves and who are happy slit to be slave slaves ok are still operating under believing that it's true believing in social Darwinism believing that oh these people's genes got them there because they're just the best and the brightest and they're just number one you know it has nothing to do with the accumulation of wealth that happened over the years that there's just passed on to them without doing anything you know no nothing whatsoever to do with that right most of them never having to work for anything they've ever gotten there's some of the weakest people they're not the the survive that see the only thing that makes them quote unquote stronger than other people in this society is because they got handed things down from future generations that often pillaged and raped and conquered to get what they had and they are just um you know using that wealth and influence just to preserve their position in an artificial construct because people believe in the social structure that they built if that social structure that these social engineers built were to not be believed in anymore by human beings and collapse I mean forget it these people would not be able to defend themselves like they wouldn't they can't punch through a screen door you know what I mean they can't they can't punch through a wet paper bag you know these are the kind of people that if left to their own devices in nature would be dead and within 24 hours they'd be dead in the first 12 hours you know in like a Hunger Games situation or something like that they won't they have zero survival ability index okay would not be able to do it because they're not naturally adapted to anything that's going on in the natural world it's all artificial constructs that they've built their power upon which we require and depend on the belief of the average slave that's why they're so successful because people are so fucking gullible and will believe just about anything that they're crap that they're told about what's real instead of actually discovering what's real that's why they'll believe in shit like money instead of understanding natural law that's the one of the main problems with the whole freedom community let me tell you folks the religion is their their money is religion and they couldn't give a goddamn about natural law and they think that's going to be convert did that mindset they believe erroneously in their own destroyed brain that that mindset is going to be converted into freedom in the real world they actually are that retarded that that's what they believe can happen enjoy being ruled by this class of people dopes that's all I have to say okay because that's what you are that's unfortunately what you are there no nothing dopes that in their hubris want to believe they have it figured out how it really works you don't know anything boy you know nothing about how it works little boy zero okay but keep telling people that you do your people like that are a cancer in the freedom community ah cancer and they're spreading their viral infection throughout the entire community okay because you don't understand the causal factors of what have led to the human condition of slavery and therefore if you don't understand those causal factors you are in zero position of empowerment to do anything about the nature of the situation until you do correctly identify those causal factors but these dunces don't want to do that they just want to believe their God because they've trade positions with the sorcerer in this image in a heartbeat like that put put the image up on the screen full screen see the the bulk of the freedom community and the bulk of the people who are slaves who say they want to be free you'd trade positions with the sorcerer and a heartbeat if all the money were flowing to you and all that influence and power were flowing to you because of an artificial construct or idea that doesn't exist in real nature in the world of the real okay see but that's the god that's worshipped that that the the people and the so-called freedom or anarchist community worship at the altar of okay now I'm not telling you you know be some kind of ascetic pauper and you know try to not even eke out a living in what is unfortunately the world okay we need resources to do what we are doing because other people still believe in money okay so you're gonna have to operate within that system till we collectively recognize it for the illusion that it isn't take it down and disassemble the structure back to what natural law is not let's go to the next point we'll take them in order the next point the so-called law of the jungle okay so many people think this is what natural law is okay and this is another dialectic we're gonna keep hammering on the idea of dialectics over and over and over and over again folks it cannot be understated because there's this dualistic thinking and anybody thinks that thinks that nothing could everybody thinks nothing could exist outside of these dialectics so you hear these two things bannard about man's law the rule of law they're not talking about the rule of natural law the rule of law is the rule of man's law right man as God being the law maker creating legislation through government that's what they say that is the rule of law no that's called slavery that's called moral relativism because there's no such thing as two places where the laws are the same or two times when the laws are the same they're constantly being renewed and refreshed in every position in place in time which is the definition of moral relativism okay you know and then they want to give you the notion that the opposite of that is how animals behave toward each other in the wild okay so they want to they want to give you those two dichotomies they want to give you those two dialectics polarization dialectics mind-control dialectics and then they want you to think that's all there is there's no other kind of law so you either believe in man's law as the rule of law as the ruling law for all human beings or you believe in we should live by the law of the jungle and neither of these things are true or acceptable natural law is not the law of the jungle hammer it through your brain it has nothing to do with animals or how animals treat each other never has never did never will doesn't mean it now and never will okay so this is that the title image the the the overarching image that we used for the whole you know title card for today's show a lion in the fields of Africa taken down a water buffalo okay by the throat you know it'll kill it it'll tear into it it'll eat the internal organs and whatever else it's gonna use as its food fuel and supply and some other lions will probably join it in that and then other you know creatures who are those who come after a predator feasts and then feasts on the remains you know the carrion etc this is all animal behavior this has absolutely nothing to do with natural law nothing to do with human beings because human beings are not these types of animals they are of a whole different family of Animalia okay which I'm going to talk about there is a specific place when natural law begins to apply in the classification system of life okay and we're going to get to that in a little bit but this has nothing to do with natural law folks and you need to get out of your notion the idea that natural law has anything to do with the way animals behave in the wild now I'm gonna play a video clip of a demon okay you're gonna actually see a demon in real life okay who very happily left this world last year along with his demonic cohort okay and I'm going to play George Bush senior's playing out the polarization dialectic on the public okay that's what this guy is doing he's a mind control social engineer okay he's one of the mind controllers one of the dark cultists one of the social engineers and he's totally playing the public like a fiddle in this video where he talks about the New World Order and the rule of law so let's hear what this demon has to say we have before us the opportunity to forge for ourselves and for future generations a new world order a world for the rule of law not the law of the jungle governs the conduct of Nations when we are successful and we will be we have a real chance at this new world order an order in which a credible United Nations can use its peacekeeping role to fulfill the promise and vision of the UN's founders okay so folks he said so many things in this clip that have to be analyzed okay he said we have an opportunity for a new world order okay this is obviously the dark new world order this is the new world order where the globalists have really taken the entire planet through some form of international socialism and have turned it into the quote global village by which they can centrally dictate all of man's laws and they would apply everywhere in the world okay so this is a global totalitarian society the dark new world order okay it is not the new world order that I often speak of of a society that has learned natural law and brought their behavior into alignment with it and therefore can create a new world order based in freedom that's the blight new world order or the positive outcome of the world in transition okay in between a state where there is some freedom left in the world and some truth and light left in the world versus a state where a world where all of society has ultimately been closed down and turned into a totalitarian regime we're not in either one of those places yet that's why the world is in transition between one of the New World Order's or the other I call the world where we really propagate natural law and freedom the the light New World Order okay and I call the the world that this demon in this video clip is talking to the dark new world order okay so to go back to what he was talking about he says a world in which the rule of law governs the conduct of Nations not the law of the jungle so you know you notice he's pulling the dialectic here he's saying we only have a choice between man's law the rule of man's law of government and descending into the chaos and ruthlessness of the law of the jungle of how animals live amongst each other in their struggle for survival in the wilderness so think about what it's doing psychologically in the mind it's saying well would you rather live as beasts of the field as animals do in nature no of course you wouldn't that would be what you would consider chaos and disorder and discomfort so the only other alternative is to give us the control to bring about this global village this new world order in which our law rules over everything okay very significant dichotomy very significant polarization dialectic so the next part of it is he says to fulfill the promise and vision of the UN's founders a president of the United States talking about that his job he's standing in Congress when he sang this saying that his job is to fulfill the vision of the founders of the United Nations not saying he wants to fulfill the vision of the founders of the United States the founding fathers of the United States no he's saying that he thinks our goal should be to fulfill the promise of the UN's founders well what's their promise their promise is the global village of the New World Order of international globalism communism international socialism okay that's the vision of the UN's founders okay so I'm going to jump back to the slides and move forward all right and let's go to the next point so again natural law has absolutely nothing to do with the law of the jungle now another phrase you hear they're in direct conjunction with survival of the fittest law of the jungle is the quote unquote natural order okay and we've already touched on this that this is where social Darwinism came out of from the the Darwinian theory of evolution because certain people who were high-level elites and or social engineers okay and we're family bloodline members of the ruling class wanted to take Darwin's theories and extrapolate them and interpolate them and extrude them into the human domain all right so let's look at how this worked so social Darwinism came up shortly after Darwin's original theories on macro biological evolution came forward in his book on the origin of species and again this is where they're talking about favored races that he talks about in the title the the alternative title of the book and they don't apply that to the animal realm as species but that now they're applying it actually to the human realm social Darwinism is simply the application of the theories of Charles Darwin to society evolution had become a largely accepted belief in the Second Industrial Revolution this was a continuation of those ideas outside of the scientific realm William Graham Sumner and Herbert Spencer both promoted social Darwinism by stating that men were either to struggle to compete to succeed or to fail those who succeeded were fit to remain in society and those who did not would eventually be eliminated so this is the actual root some of these individuals these you know ideologues here are the original champions of the idea of social Darwinism and that led to eugenics which led to the eugenics society in America led to influencing the eugenics operations of the Third Reich okay and you know we have the horrors of World War two from that point so one of the other individuals who is a social engineer that people have to understand brought forward who was considered the father of modern social Darwinism was Francis Galton Galton's was Charles Darwin's half cousin he discovered and were invented many advances in science including in statistics and in fingerprints but he tried to apply Darwin's theories to human beings again that's what social Darwinism is this is what people talk about as the quote natural order not only when it comes to human beings but many people actually idiotically want to apply how animals behave toward each other and carry that and bring it into the human domain whenever I hear this by people especially people who say that they're advocating for freedom I just absolutely cringe you know I have to absolutely just cringe in horror at the pure imbecilic thought process okay which I don't understand how people who say they want freedom can actually believe that human beings are just any other animal which proves to me they don't even understand basic classification of life okay they're not even they're not even adept enough to learn basic biology let alone understand we shouldn't behave like the rest of the animal kingdom you know cuz and here's why they're just they're atheists they're scientism worshippers and they're social Darwinists that's all people like that come down to and you put all those three together yeah you show me a person who's an atheist a social a person who believes in social Darwinism and who is a moral relativist okay and I will tell you I will show you right back in the mirror a psychopath because that's what they have to be to believe in all of that okay that's what these people are they're deep down inside whether they want to acknowledge it or admit it or not they are diseased they're psychopathically diseased their soul sick that's what it really comes down to folks social Darwinism the belief in eugenics the belief in moral relativism is soul sickness all right and that's what most of the people in the freedom community have more than don't if I had a gage it I'd say it's about the same as the rest of society it's 1/3 its 2/3 to 1/3 2/3 of the people are 100% soul sick left brained jackasses who are scientism worshipers who believe in the theories of Darwin and apply it to the human realm believe humans are no different than animals and except social Darwinism and ultimately moral relativism and I don't care what name you want to call that I call it what it really is Satanism that's what Satanism is as we're going to get to in these slides planning on taking your calls in the third hour folks it's like every other show it's gonna take as long as it takes last year last week I went right up to the end and didn't really get to take calls I'm going to endeavor to take your calls but the presentation comes first and we'll take it'll take as long as it takes okay so Galton's was an elitist he believed in breeding an elite class which is not agreeable to democracy the person made this slide use that term are just it's not agreeable to freedom okay it's the belief that some some people should be rulers and other people should be slaves that's all that belief really comes down to it's the belief in a master class in a slave class he was a eugenicist meaning he believed in the hierarchy of the human races and social classes meaning that those who are in a higher position of power can ultimately dictate what happens to the people in the lower positions of a hierarchy of a hierarchical system of control and power therefore if the people in the higher level positions of the hierarchical system of control and power felt that there were characteristics in the lower class that they wanted bred out well they could breed them right out of them and or kill them because they're they to have they have characteristics that are simply undesirable to the people in the higher class in the hierarchy that's what eugenics is and this is a part social Darwinism and eugenics or tenets - and I'm sorry three and four of Satanism tenets one is self-preservation above all else which is the notion of survival of the fittest in the animal kingdom applied to the human kingdom that we must do anything we have to to physically survive even at the expense of our moral fiber okay even at the expense of harming other people the ends justify the means that's the the first tenet of Satanism when it comes to the improvement of the self when it comes to the enhancement or comfort of the self or were you know coming into a higher level position of power or influence or just having resources okay the self comes first and everybody is second fiddle there that's the pecking order okay and that's the first tenet of Satanism the second tenet is moral relativism that there's no objective standard or of right and wrong we can make it up as we see fit because we're God you know no other law binds us so therefore we can make up what right and wrong are and then you could easily see when you do that and then you take the flawed theory of macro biological evolution and then you extrude it into the human domain you end up with social Darwinism which is the third tenet of Satanism and finally you know which is there has to be a social strata pecking order in the human domain like there is in the animal kingdom and the the most ruthless humans will naturally rise to the top of the human roost okay then you you come to the final solution you know you extrapolate this all the way out to its final ending which is eugenics which means some people are gods who can determine who gets to live and who must die that's it okay that's the final aspect of the plan for Satanists becoming God on earth and that's what that's what this you know elitist class that included Darwin and Gault inand the other social engineers who came up with social Darwinism we're all about actually really not so much Darwin as those who came after him who weren't his contemporaries but who came after him and and adapted his theory to the human domain because that's what it's ultimately all about folks is eugenics you know that's what these social engineers are and they're not only operating in the realm of the physical to promote and conduct eugenics they are operating in the epigenetic domain which is the domain of consciousness the domain of the mind they are changing human thoughts so that the expressions that get manifested in the world based upon human thought get changed that's how you're conducting eugenics through epigenetics or as I like to refer to an epi eugenics see epi eugenics is getting the herd to call itself and call characteristics out of the human herd based on mind control techniques that you apply say you're getting your mind controlled cattle to actually do things to their own gene pool without you having to do it directly through physical means by killing people or forcibly sterilizing them you're getting them to do it by what how they think the erroneous ways that they think that's what eugenics is and folks everything that I've been talking about here all of these aspects of social Darwinism that come from a missile that are all aspects of the misunderstanding of natural law okay where people think it's all about the quote natural order of Darwinism that the natural order is dog-eat-dog and you know we should be be behaving like the lion taken down the water Oh on the plains of Africa being the most ruthless in the human domain okay if you switch back to the slide I just want to show you what this ultimately all is it's all Satanism it has nothing to do with anything regarding natural law folks it is the antithesis of that these beliefs these ideologies are purely satanic and come out of the Satanic religion and if you don't believe me just look at the source material involved in Satanism or particularly go and look at some of the publications put out by like you know the cloven hoof you know look at some of the things that are written in that publication that was put out by the Church of Satan which was there and like you know by monthly newsletter supposed to be monthly or quarterly I'm not really sure but you know maybe I'll publish some of those and you could read inside of those how absolutely in your face out in the open the idea of eugenics is you know National Socialism is huge in that whole field in the whole Satanic field and social Darwinism huge you know this idea of a natural order and where the gods of the society and you know and ultimately it just comes down to eugenics of them wanting to be God and you know kill who has characteristics that they think are unfavorable I don't care by what definition anybody talks about that as okay I'm gonna tell you what it really is and all of that mindset is Satanism and guess what folks they give you mini-me Satanism many me Satanism is we're one of the tenants of the satanic religion folks just look it up if you don't believe me just read it in the Satanic Bible in the Satanic rules of the earth etc okay man is looked at as the satanic statements I believe this one is in hey just another animal that's one of their main tenants and that's what social Darwinism is you're applying Darwin's theories of the animal kingdom and bridging them into the human a social strata okay so look at human beings as just any animal just any other animal no we are not just any other animal that's incorrect human beings are not just any other animal nor are we suppose to behave like animals our moral standards should be higher than any standards that are applied to the animal kingdom you don't apply morality the animal kingdom for the very reason that you understand they don't have a actively developed brain or entire cognitive development and capabilities that human beings have it's it's common sense apparent it should be readily common sense apparent to anyone looking at it even cursorily so let's go back and look at this dynamic ok that natural law is definitely not and has absolutely nothing to do with any aspect of behavior in the entire Animal Kingdom for any creature with less cognitive development and capabilities than a human being this means natural law does not apply to any animal in the human Kingdom that we have classified as animals except for human beings it only applies to human beings it does not apply to any animal with any less cognitive development and mental capabilities and psychological capabilities than a human being period so here's one of the things I hear tragic morons saying in the so called freedom so called spiritual communities regarding natural law when again they should just videotape themselves I say this to people constantly look I do it every week so I'm not giving you any advice that I don't do myself folks and I go back and I do listen and I understand that nobody is doing the job that I'm doing with the explanations of what's going on on this planet better than me sadly I'm horrified and upset by that ok but let me tell you something there is no show like this anywhere on the airwaves in the entire world I go back and I listen to the job that I do and again not to you know have any hubris about it or to my own horn but I'm telling you I don't hear any body else speaking as plainly and clearly and talking about these dynamics directly out in the open and explained and actually how it really is just about anywhere else on the internet airwaves and that's that's a tragedy in and of itself because like I said in in my earlier years naively I was expecting that by if you told me approaching the year 2020 how many people would understand this and be teaching I would have told you at least 10 million people throughout the world that's what I would the number I would have given you of hard core advanced natural law teachers that were propagating this notion through it to all the people of the earth I would have told you they would have been by now 10 million people teaching natural law like Mark passio has taught it by this point in time in history and boy oh boy did I in my early in my youth underestimate the pure sheer stupidity of humanity and the the dark occultist who tried to tell me how thick and hard-headed humanity was and how spiritually dead they were I wish I would have listened in my youth you know what I might have done I might have stayed right put where I was never set foot outside that door and never set a fucking word okay and I would have probably saved myself a lot of fucking aggravation because I I know that they're correct humanity is unteachable I'm no longer even do I no longer even do this folks because I believe we can really truly turn it around I don't really believe that you know humanity's way too fucking hard headed for that way too fucking hard-headed the ego is too strong people think they're God way way too strongly you know we're not we're not we're not pulling this around folks I do this now too as testimony that's all that's why I do what I do I do what I do only to put the truth out into universe as a witness this is witnessing this is witness testimony and we know who's on trial okay that's all this is all right so back to the slide I hear tragic imbeciles tragic morons in the so called truth and freedom communities saying yeah you know what natural laws I might have to go to the vomit puppet I may have may have to let's see okay but I may have to okay they say yeah you know what natural law is let's see if I can get the voice right yeah guys you know what natural law is I'll tell I'm gonna tell you all about what natural law is now you know all you got to do you got to go out in the wilderness you gotta get out grab your camera you got to sit there for hours and you got to observe animals in nature or you got to just observe natural processes that's natural law that'll teach you all you need to know about natural law yeah I mean you smacked s well I don't even how can i insult you more please somebody tell me how I can insult the intelligence of these people anymore because again you need to record yourself then play it back and hear how fucked hearted you sound okay that's what you need to do back to the slide this is not natural law this has nothing to do with natural law at all nothing to do with it you are not going to learn natural law by sitting in the wilderness and observing what happens you're not going to learn natural law by observing animal behavior will not happen will not occur two different things two totally separate things one having nothing to do with the other I don't understand where this even comes from and I hear it over and over and over again by imbecile if our imbecile have imbecile it's unbelievable it's unbelievable how social engineers can get people to believe this bullshit and have no understanding of what natural law really is none and then claim that they do and are telling people that this is how you learn it it's sickening it's sickening folks I'm going to actually give you the dividing line of where natural law understanding starts to apply okay we're in the development of life that natural law begins to apply to living beings okay so this is the classification system that scientists on our planet at least have come up with to categorize the many different varieties of life of living things okay so you have domains right so you have prokaryote domain eukaryote domain there is a third I can't recall it off the top of my head but you you carry out I believe it's like there is nuclei to the cells okay then you go into the kingdom of either plants or animals okay or single-celled organisms okay so we're eukaryotes that's our domain human beings we are in the kingdom of Animalia which means animal life now it's very interesting to note that Animalia comes from the word animus anima animus in Latin meaning spirits okay so we're talking about those that are imbued with a soul now the plant kingdom is a hive mind Kingdom okay it's not an individual animal okay so that's why plants aren't in the kingdom of Animalia meaning having a soul all animals are okay they move independently because they are imbued with spirit this is why it is different eating a plant than it is eating an animal people don't understand this classification distinction not only should they look at it from a scientific point of view they should also of course look at it from an occult point of view and you're not going to understand it from an occult point of view unless you really study Kabbalah Freemasonry and especially Rosicrucianism that's that's the field of the occult that you have to look into when it comes to understanding the soul dynamics involved in life okay so then you have a phylum which is a further classification down below Kingdom and we're Chordata meaning that we have a spinal column okay we're vertebrates okay then there's a class Mammalia mammals were warm-blooded organisms as opposed to cold blooded like reptiles are then there's a order within mammals that are primates so we are like other primate beings because we're that type of mammal okay so we're like our cousins ancestors in the primate Kingdom and then finally you have family okay now this is where natural law begins to apply when you hit this aspect all the way down in the classification system of life it begins to apply in the family known as hominid I committed a how many died okay meaning the hominids this is where brain structures begin to become complex enough for the cognitive functions that are required for morality for an understanding of whether something is a moral behavior or not then the universe says okay that the biology is in place now we have to start applying the laws that apply to the beings with the capacity for holistic intelligence or in other words the understanding of the difference between right behavior and wrong behavior and this is where it starts in family hominid diet okay and then you go below that you have a genus and a species Homo is the species of humanity and then this the genus of humanity and then the species of sapiens sapiens meaning wisest of the wise it's pretty hubris okay to even call us that but there you have it that's why we're Homo sapiens sapiens and folks it is a total truth that the only living species on earth belong to the family hominid is Homo sapiens sapiens or modern human beings you know there are some scientists who want to classify other types of primates in with hominid I am in and die hominid I I should say but in general it is classically considered that the only species in the family of homina homina die is homo sapiens sapiens or in other words modern human beings so this is why natural law applies to the family of hominid die and does not apply to lower order animals if you want to look at it as higher lower okay I would just look at it is more complexly developed versus less complexity developed okay and this is one of the things that makes us more complexly developed than any other animal in the animal kingdom the human brain so we have a three-fold aspect to the brain this is called the Tri triune brain model put forward by Paul MacLean the neuroscientist okay human neuro chemistry and you know brain development is definitely more complicated than a simple threefold model but it generally explains in very easy to understand terms and simple terms and simple structures where the functionality of the components that comprise the brain lie so we have a reptile brain the brain stem and the cerebellum which is largely responsible for respiration and motor skills and survival mechanisms fight-or-flight responses okay and then you have a central component to the brain comprised of a lot of different complexes that are responsible for the generation of neuropeptides which regulate our emotions and make our motions possible and that's called the limbic brain okay you have things like the thalamus the hypothalamus the pituitary and pineal glands etc and other other constructs within the the midbrain as it is called okay so that's the mem million brain so you know reptiles have a similar brain to the brainstem and mammals have a similar brain to the limbic brain but only human beings has a have as developed of a neocortex which is the new brain or the human brain as human beings okay and our neocortex is responsible for higher order thought functions and we talked about this in podcast number one okay I went over the structure of the brain and how the brain functions all right so all the things that make us human wouldn't be possible without the neocortical part of the brain and it's bilaterally symmetrical and there are certain functions that are more governed by the left hemisphere of the brain and other functions that are more governed by the right hemisphere of the brain again this is not a cut-and-dried absolute left and right model it's a generalized model that the left hemisphere largely makes possible and is responsible for these modalities of thinking of course you're using your whole brain and any given task or you know aspect of the of the of thinking okay but largely when you're using the left brain you're engaging things when using it more you're engaging in dynamics of thought that are more analytical logical precise repetitive organized detail-oriented scientific detached literal and sequential okay so it is the series processor of the mind okay it takes things in sequential linear order it breaks things down to their constituent elements it thinks rationally Linnet linearly very organized detail-oriented and it's also like the reptilian part of the brain repetitive okay and can be very detached from the rest of things okay and other people this is where the problem in the truth movement lies you have very left brain people who are selfish and aren't spiritually developed because they have a imbalance toward the left brain you know and you have a lot of selfishness you have a lot of me mean me thinking you know but then the right brain the right brain hemisphere makes other dynamics possible in human thought you have the creative intelligence this is intuition imagination you know general heuristic thinking intuitive conceptual big picture or your ristic thinking empathic now our our empathy sympathy for others comes from there this is compassion okay figurative and irregular forms of thought alright so this is the parallel processor there's no linear time with this aspect of the mind okay it takes things in parallel it sees the whole big picture all right both of these things are critically important it isn't to say the right brain or left brain is better we need to exercise all of these thought functions and bring them into balance that's how we bring our psychology into balance that's how we ultimately bring our soul into balance and the people who are soul sick have gone off and one modality or other all the way into the left brain are all the way into the right brain right brain people can't focus they can't get anything done they imagine a whole bunch of stuff but can't perform it and pragmatically in the world to actually accomplish real-world tasks left brain people become you know overly analytical assholes who only care about themselves you know so you fall off an imbalance in both directions the idea is to bring it into balance and harmony and use it all you know when we use that we become something that is greater than the sum of our parts when we operate on that kind of balance so the last dynamic in this list is any and every human made law including common law natural law has absolutely nothing to do with man-made law if you are reading in any book pamphlet essay anything written or any lecture that tells you that natural law is a system of man's law it's either completely wrong the person is ill educated uninformed or is absolutely lying to you to try to deceive you about what natural law actually is natural law is are the laws of God they have nothing whatsoever to do with the laws of man okay so let's look at this dynamic here's someone who wants to be God who thinks that their God they're in the Saturnian you know cult the black road cult the disciplinarian cult of saturn okay wielding the hammer of God right wielding the symbolic hammer of Thor or net sure they are commanding Netzer the axe the hammer the flag okay this is the idea in the of the stylized flagpole that then became an axe or hammer in other cultures in the Norse culture it became the hammer of Thor you know and again in hero cults that would eventually pave the way for Freemasonry it became the sacred axe often depicted as having a single blade but then often depicted having a double blade looking very much like if you turn it upside down Thor's hammer okay and that's what the this is depicting here this is someone saying I wield nature okay because I'm God I wield the law this is Satanism ladies and gentlemen make no mistake that's a Satanist all of them not some of them all of them by the very nature that they believe there the law that they even represent the law that's the Satanist go go back to this image fullscreen ladies and gentlemen that is a Satanist that's what a Satanist looks like and they give you their mini-me version of Satanism to believe in so that they can control you and judge you and wield power over you and because you believe it you've fallen into their cult power and influence let me tell you something it's a cult without a name it's a cult without ethnic boundaries it's a cult without financial boundaries it's a cult without cultural boundaries it's a cult without ostensibly religious boundaries it's a cult with no boundaries according to age with no boundaries according to sex none they don't make those distinguishment they don't make those uh you know gradations as long as you're working toward the aims of the cult that's all that matters and this is what people have to understand about worldwide Satanism you know they're not all rich white men it's not all Jewish people it's not all Freemasons it's not all Jesuits these are all lack of understanding of how the dynamic of the occult really works in the real world okay that's like saying all mafias are Italian mafias no incorrect there's Jewish mafias there's Russian mafias there's Latino mafias there's French mafias there's mud there's Chinese mafias mafias in every culture has absolutely nothing to do with one group of people folks the occult are people that understand the human psyche and the laws of nature are holding back that understanding from other people by discouraging people from looking in to those laws and therefore they willed an extreme power differential over the ignorant okay you have the psychopath eye ruling over the ignorant I all right that's what it really is has nothing to do with the Illuminati it has to do with the psychopath I and the Alou and the ignorantiy okay and the psychopath I ruled the ignorantiy because the ignoratio main ignorant the illuminated the Illuminati are people like me who are trying to explain the truth of people that don't want to fucking hear it you know who need to just give up this endeavor and say it was never possible from the beginning because you were never working with Prima Materia you were never working with prime matter with first matter that is capable of being converted into a you know a body of light mentally you know you can't shine shit in other words you know and when you slap it it's mirrors when you slap it it splatters and when you're trying to shine it it smears okay that's what humanity is you know I wish I didn't have to say it that way folks but my life experience has taught me otherwise my life experience has taught me then what these people are saying is absolutely true and I doesn't mean I agree with their methods or want them to succeed you know at some point it's like I don't take anybody's side but the truth that's it I'm not on their side and I'm most certainly not on your side I'm on the side of truth itself and that's what I serve let's look at finally before we take some calls a few couple of slides from my natural law seminar this was the breakdown between natural law and man's law and the difference between him natural law is based upon eternal principles and truths that are inherent to creation man's law on the other hand is based on dogmatic beliefs which are constructional ideas that exist nowhere but in the human mind natural law is can only ever be harmonized with it can be discovered and harmonized with due to knowledge and understanding whereas man's law can only be complied with due to fear of punishment that's the only reason people follow man's law the reason people follow natural law is because they develop an understanding by way of knowledge regarding what the consequences of human behavior will be in the natural domain and if they say that they want a better result then they adjust the behavior to bring it into accordance with higher-level spiritual law natural law excuse me is universal it exists and applies anywhere in the universe regardless of location whereas man's law differs with location based upon the whim of legislators which is one of the definitions of moral relativism natural law is eternal and immutable it exists and applies for as long as the universe exists and cannot ever be changed man's law on the other hand changes with time based upon the whim of legislators a definition of moral relativism when we understand the differences the true inherent differences between man's law and natural law we have to ask the question we come down to an understanding more so what does this mean for man's law well here's what it actually means for man's law we apply simple if-then logic if we have the ability to reason and cognize at a simple if-then logical level if a particular man-made law is in harmony with natural law that it then it follows logically that it is redundant that's like stating that the sky refracts a blue color on the earth during a cloudless sunny day that's a redundancy you cannot writing that down and saying it is a law that the sky refracts a blue collar during a sunny cloudless day from the earth is a redundancy it just does that that's how it just works you writing it means nothing ok you can come to an understanding of that and write it down so that other people can come to an understanding of it but that doesn't mean that that's what makes it true just like me saying this isn't what makes it true it's true regardless of whether I ever spoken or not so if it's in harmony with natural law it follows logically that a man-made law is redundant since it is stating a truth that is inherent pre-existing and self evident therefore that law is both irrelevant and unnecessary you are stating what is already true if now let's do another if-then statement if a particular man-made law is in opposition to natural law then it fought then it follows logically that it is both false meaning it is incorrect and it is immoral meaning it is causing harm it is harmful to other sentient beings or in other words it is wrong the word that we use for both false and immoral whereas we use the word right for both true and moral therefore that law cannot be legitimately binding upon anyone it cannot be legitimately binding only the natural law can be legitimately binding so what does this mean for man's law it means you throw it out it has no place in the natural world it doesn't bind you or me it has absolutely no bearing on human behavior except when people believe that it's legitimate and then live their lives violently in opposition in natural law because of their cult belief in man's law that's all that's happening folks we have to understand natural law is a force that exists in the universe in nature itself it has absolutely no basis in man or humanity it only applies to humanity but it is not man-made it is not a man-made force natural law exists everywhere in creation there is no place you can go in the universe to escape it man if humanity humankind in general if we are being honest with ourselves the only thing that we can really genuinely do is to discover how natural law operates in our world and then we could try to convey that understanding to others to help them not to have to go through the immensity of suffering that is culminating at the period in human history in which we are living and which our descendants are going to unfortunately have to live you know this is what the occult is to me when I was looking for an image to represent the world of the occult the world of the understanding of the hidden laws of nature this is the image that I pulled from the internet because it represents striving to understand natural law it represents what delving into the matter that comprises the occult world more than any other image that I've ever found and look folks when we understand natural law it's the key to everything okay it is the key as I've said many times that will unlock all the doors all the locks on all the doors to all the cages all the prisons you know with that key we can do anything without it we're wandering lost in a desert blind so if you can hear the wisdom in the words that I have spoken here today try to understand deeply what natural law is watch my whole seminar on it and other podcasts that I've done on it read the resources that I'm going to post with this podcast watch some of the videos I'm gonna post with this podcast ton and understand what natural law most certainly is not and understand it well enough that you can convey that to others because that's what the great work is ultimately all about once you have that key in hand okay just to go back to this final slide one moment okay once you have that master key in hand right it's not there for you to just hold and wield selfishly it is there for you hand off to other people just look at it making copies of your making digital copies of it and you're giving out those decryption keys for how the universe works to the rest of your fellow brothers and sisters in humanity okay that's what the great work is to do all right so with that that concludes my formal slide presentation for this episode of what on earth is happening entitled what natural law is not I hope you enjoyed it I want to go back briefly to the slides to let people know that if you have found value in the work that I've done on this podcast and on all of my work here at what on earth is happening please go to what on earth is happening calm and click on the gifts tab ok that'll take you to the donation gifts area of what on earth is happening which has hard copies of all of my work on DVD and flash drive you could also get other nice promotional items like t-shirts and coasters and you know keychains and buttons and stickers etc so it's something that I do to give back you know hard physical resources to the community to people that you know want to give them out to families and friends they make great gifts and not only that but they're educational they help teach people these lessons ok so if you found value in what on earth is happening please visit gifts on my website what on earth is happening calm also go to the arc tab and request the arc Drive ok you could fill out a form there in a request that you can watch a video on how the arc Drive works what it's all about what on earth is happening calm slash mark or just click the arc tab ok many people have taken me up on this tremendous repository of knowledge which is the foundation of the research that I have done and and amassed from the internet you know as an aggregator of esoteric information so that's an offer that I make and is still going strong today at what on earth is happening also if you just want to make a straight donation if you find value in this work go to the donate tab that's what on earth is happening calm donate ten different methods for donation on the donation page including PayPal patreon IB I believe five different cryptocurrency methods okay of traditional personal check traditional money order and also our Amazon wishlist if you click on the donate supplies button okay that'll take you to my Amazon tech needs list I'm very very humbled to say that people have donated every item that I've ever put on that tech needs list I mean that is I mean seriously folks like that I couldn't have even imagined that when I first made that needs list okay you know we always require technical stuff here at different times you know for to do what we do on what on earth is happening I'm telling you it really it almost chokes me up that I've put items there that I require for the daily operation of this whole production and everyone has been sent to me as a donation like that's tremendous so thank you to everyone who has done that it really means a lot ok so that's all I'll get into as far as um you know talking about resources that are needed so we're gonna go to your calls now now we've been having some issues getting started with calls right just getting the whole process started so what I'm gonna do is I'm gonna go through this for the next several weeks to get people into the habit of this so I've done a couple of things this week okay one is I've left my microphone off and on the table on my headset next to me now obviously that's not going to produce really great sound coming in but it's going to keep the stream active and it's gonna keep people hearing me in real time in the water on earth is happening call room okay and that's why I did this okay so I'm not wearing the headset right now okay so you got to understand when I put the headset on those who are listening through discord are gonna hear me a lot clearer and louder okay so the next thing I want to say and actually I'll do that right now and I'll say say the rest of this while I'm wearing this okay now I put this on during the calls folks because this microphone here that I do the bulk of the show through okay is not connected to my laptop right here and to do that would require a lot of rigging of audio connections which I'd rather not get involved with pushing the same mic splitting the cig the audio signal and pushing it through through two different computers it's going out through the main computer that the show is transcoded on and is the stream is going out over okay so that being said I use this mic right here to talk to people on the discord chatroom with this USB headset okay so I'm leaving it on through the show so people can just hear the difference between the live stream and the real time coming through the discord room okay so because the live stream could possibly potentially be delayed by upwards of 20 seconds depending on how fast or slow one's a home internet connection is okay so what I'm going to do now is I'm going to just reiterate what to do and not to do if you're in the discord call room okay part of the reason that the main reason the people are not immediately coming on the air and hear me call them is because they want to watch the show on the live stream on what on earth is happening calm slash show or on my Facebook page the mark passio Facebook page or on my youtube-channel okay so we simulcast on three other platforms so that the show goes out through the show tab on my website right that's the main stream but we simulcast on Facebook we simulcast on

Vimeo we simulcast on YouTube okay so now the whole point here is you cannot be watching the live stream and hearing what I'm saying in real time if you want your call taken you are going to be in the discord call-in room the what on earth is happening calling room that you can link to through the show page okay when you listen to me in there you're hearing me in real time okay because it's a direct IP connection to my headset okay there's no delay okay so when I go to calls no one should be ready for me to call on you watching a live stream you should only be listening at that point in other words if you want to have your call taken only listen to my voice in the discord room don't listen through a web browser don't listen through YouTube don't listen through Facebook you have to only listen through discord I hope I'm making that clear that's the only place you're going to get real-time and the only people that applies to are people who want to have their call taken it doesn't mean to anybody if you don't want to call in just please watch the stream wherever you find it whether it be my website Facebook Vimeo YouTube you just watch the stream okay because it doesn't matter whether you're in real time or there's a lag of five seconds seven seconds 10 20 seconds it doesn't matter okay who it matters for our callers okay so just to get these little tech things out of the way it matters right so the next thing is there's always a mute function in discord you want to always have it unmuted wait inside the room with your call function your voice function in the software wherever that happens to be whether you're using the top version whether you're using the mobile version unmute your phone and/or microphone in the discord software find out where to do that in the discord interface regardless of which version or variant you're using you unmute yourself and leave yourself unmuted your voice will not be going anywhere it will not be traveling to me it will not be going over the airwaves it will not be going to other people in the discord chat unmuting yourself just means you're ready to talk that's all it means so unmute your microphone now okay listen in discord unmute your microphone now find where to unmute it and unmute it now okay and then finally I have everybody muted at the server end so there can't be any crosstalk me and the caller are the only ones talking what I do is I pick who I want to go to right I choose that I go to that person by calling on their name and unmuting them from the server end that's how the calling process works okay so you don't control whether your mic is live or not on the airwaves I do okay so with that having been said I think that giving people enough time to get ready unmute their mics to be ready in the callin room okay and now I'm gonna we're gonna go to your calls okay so let's go to let's see let's go to so I don't have I wasn't paying attention nor do I have someone monitoring who was coming in so I'm just gonna try random order okay so let's go to J an Archon I like to name JJ an Archon you're live on what on earth is happening episode number 206 welcome to the show can we get a first successful can we ever get someone coming in successfully right off the bat I don't think we all right let's go to law is king law is king you're live on what on earth is happening mark their egos laws King then you just change your name the Lex

Rex oh yeah great so Lex Rex what do you have for us on this edition of what on earth is happening well it's it's so great to talk to you mark I've been having deeper conversations with people lately and inevitably your name and your work comes up and I you know I just have to tell people you're my favorite philosopher out there like you said yourself in this show nobody else is doing it as clearly and as thoroughly as you are doing it and it can be very frustrating you know it's it's like I really legitimately thought probably about 12 years ago I'd say that's about right maybe a little more I'm gonna say about 14 years ago I was kind of sitting at an old job you know in my office knowing I would eventually be doing this you know I knew what I knew now back then didn't really like what I was doing not going to really get into it but you know some morally questionable things happening at the location where I was working that I had a big problem with and I wanted out and you know I was sitting there thinking yeah I'm definitely going to start teaching this you know and I thought like hey maybe 20 years from now or so there'll be at least 10 million teachers of this I was like I can help propagate it to that kind of a number employ was I wrong oh my god I mean I mean you need to just like tattoo on my forehead I was wrong and that's that's horrible it's it's sad for me to say but you know I'm not gonna I'm not gonna sit and lie to people you know we're still we're in way worse trouble than we were back in 2005 you know way worse I mean things have gotten infinitely worse and there's a less of an understanding spiritually I think now than there was back then namely because the millennial generation has just man dude have they dropped the ball you know and you know my generation Generation X you know they're very reticent a lot of them are very I don't know there's there's a lot of people who are very cowardly and don't want to come forth as public figures I think there's some people in my generation who could potentially become very good teachers if they grew an ounce of courage within their soul you know and said this is I doesn't matter what happens to me you know this is about generations to come after me and this is about truth this is about all of humanity is about what's right you know so you know I'll let you continue what your comments or questions but that's kind of my take on you know yes I I feel like I am doing a good job conveying this and I could be very vitriolic and I'm fired up most of the time because I'm very very depressed over the direction things have gone very very disappointed and depressed and so it comes out through you know anger in many cases I think it's justified anger but I'm trying to again try to balance between not being so vicious and vitriol to people that I that they don't want to hear it but I also want to just call things like they really are I want more of my real personality to be displayed on the airwaves with this show and I think I'm doing that you know I'm though you know flowers and unicorns type of person in real life in case you couldn't tell okay you know like this is these are very serious issues that affect something that is that them should be the most precious to another human being and that's freedom our freedom is at stake you know and um you know by this point I naively thought that there would be millions of people doing this work far better than I ever could and it just hasn't materialized the the knowledge isn't there the care isn't there most importantly the courage isn't there but maybe we could get to it I don't know again part of the other aspect is I want to hammer enough on people who are potentially somewhat awake to get them motivated to light a fire under their ass you know so I don't know time will tell but you have anything else for us oh yeah I mean I I wanted to say you know I feel the same way and I'm sorry to hear how discouraged you feel what you said one of the things you said you know talking to my wife's parents about this you know these problems they're finally starting to to wake up like they finally finally texted me back about yeah there's chemtrails and yeah it's bad oh you're getting that in 2019 right now no when I was out there with a video camera with you remember those old VHS cameras where you actually put the VHS tape in the side of the camcorder I had one of those right I had one of those things back then I was videotaping chemtrails outside my home in South Philly in the year 1997 that's 22 years ago okay telling people about this and people calling me nuts back then you know 22 years ago I was trying to tell people about this agenda even though I really didn't like officially really start till about 10 years ago 12 years ago I'd say I've really started I started the show when I had an opportunity about 10 years ago so but that's how long I've known about this stuff yeah so yeah I mean we see it every day it's amazing people can just ignore it so yeah I'll get to my question um I think like I mentioned I've been having better conversations your material is coming up and I keep telling people about you but I guess like I get worried that they're just you're gonna see the 8 hour you know time thing on there and they're gonna run away do you have some advice on how to introduce people to your material you know maybe like really good interviews that you did or I'm sure you've thought about this stuff but I thought it might be yeah that's a great question that's a great question so let me let me see if I could do my best in answering this for you I feel that my shorter form material like let's take for example anarchy and the occult part one that's on my website anarchy in the occult part two by the way folks I'm will be giving to my editor okay and we'll we'll see if we can get that out pretty soon okay which I'm pretty proud of the job that I did for that presentation and hopefully it'll be available in the donation gifts area very shortly and once we probably put that one in Oh put the Tesla and humanity's missing paradigm shift out for free on YouTube and other video platforms so when you give someone a short-form presentation there can often be enough material missing that it will confuse them and they will not have a large enough frame of reference with the material to gain a an accurate enough understanding now that being said when you give them the really long form stuff like not the natural law seminar they're turned off because they have the attention of a goldfish and don't want to spend and invest the effort in watching a long-form presentation or seminar that you know lasts over nine hours really natural laws over nine hours long okay so there is a you know a battle that you have to wage to gauge where the person is at I'm always going to tell you that you'll come away with better understanding with longer presentations but most of all you'll come away with the best understanding if you listen to the podcast in order from number one okay now that's hundreds of hours of material if not thousands okay so it's at least in the hundreds of hours okay so that's going to be the most daunting task for most people and only the most hardcore people who really want to learn this stuff and potentially be teachers of it go through the entire podcast okay but that's where the maximum benefit is going to be garnered okay I would tell them you can you you can sit down and watch a movie right maybe it'll take you two nights if you don't finish it in one night right okay well take you know each natural law part now there's three parts to it there are about three hours long look at it as a movie that you watch over two nights right do part one one week take the second week to do part two take the third week to do part three I mean that's really breaking it down into baby chunks can you watch an hour and a half video twice a week you know take Tuesday and Thursday night right and generally people aren't doing much those nights take Tuesday and Thursday night watch half of part one on Tuesday half a part one on Thursday and then do the same thing for part two and three the next week two on week two and three on week three I mean if somebody can't just devote that much time to check it out you know a seminar do they really want to learn that that's what you have to ask is like you know people people want to finish a movie to see what happened right people want to listen to maybe a fictional audio book to see what happens and be entertained but when it comes to actually paying attention to you know real life information that requires thought because that's what philosophy ultimately is you know this is stuff that's really going on in the real world that's generated by human thought that you have to understand by thinking about it at a deep enough level this is where most people don't want to do that work it's tiresome you know look folks I said it last week I come on the air and I do a show like this I'm drained by the end of the show you know I want to sit down I want to relax you know I want to have a have a cold drink you know and I want to you know enjoy myself hang out with friends or you know relax for a little bit at least you know and then I'll go back to the podcast it's like this is a days work you know we were setting up for two hours before I even went on the air you know that's what people don't understand again it's not the what on earth is happening show gnomes don't pop in and you know do all the work for us you know this is done by real people and it's it's hard work it's tiring hard work you know so when I I put the podcast up the next day usually okay I try to start uploading it like right after the show is over but occasionally you won't get the podcast on the podcast page until Monday you know that's just how it's gonna be some some weeks depends on how I feel after the show you know like today I'll probably kick back you know crack open a beer and watch Game of Thrones you know I'm you know I'm curious to see where that goes because it's about freedom it's about the dynamic of slavery versus freedom and you know hopefully George Martin is or was at least enlightened enough that he's gonna end it properly but who knows you know it's also Hollywood's involved you know so you don't know which direction that's gonna go but uh you know I think it's a good enough allegory at least to give it a shot and check it out you know I've followed it up to this point so I might as well finish it all right so anyway with people who have a short attention span show them the short form one obviously you don't want to bombard them with too much but you could ask them to do it in chunks you know over a period of time but give them like anarchy in the occult part one you know it's a good synthesis even though it's targeted toward anarchists you know or just like let them start with the first podcast and if they like it just keep listening you know that's another way of doing it all right so let's go to lioness lioness you're live on what on earth is happening Hank sorry say again all right looks like your audio was breaking up try it one more time let me go inside maybe I don't know that's good you're good it'll just work out self out there we go good good to hear you so you always say that you're you know you've pissed people off and and to me you're so refreshing like you might be one of the people that you could just handle my personality type you know I I sometimes get vitriolic and maybe even yell you know and get nasty when I'm thinking about like where people are very you know deficient in their understanding but you know you have thick skin you can handle it you know somewhat I don't find it I don't find it confronting I find it comforting I don't know maybe I'm different maybe perhaps meant might I suggest you share some of the same frustrations you see where people are at you're as frustrated so when my my words that condemn that leave my mouth you can identify yeah I find it refreshing because I mean it's it's you know it's what we need and it's it's a truth so it's it's you know it's a breath of fresh air and you know maybe I'm you know I'm like you I get angry at stuff like you know and I don't have a problem with that most people do but I don't right and so you know that doesn't bother me at all like oh yeah well should be and then one that it doesn't affect me so that shows that when people can hear that hear another person even getting angry it means that they're like emotionally mature themselves as far as I'm concerned people are all offended by that or like there are these like delicate snowflakes that can't even hear somebody else getting angry over something that they legitimately have the right to be angry about like something like our freedoms being taken away yeah that's awesome yeah so it shows that you have you've devout to me it shows that that person has developed sort of an emotional maturity and a thick skin Ness you know that they can just you know here's something that isn't necessarily pleasant but not be all upset or offended by it hmm yeah well or or you know just really grateful to be hearing that instead of the usual bullshit right so what I wanted to talk to you about was something that I think it's really important which is getting your children out of the system and so I think what I have to offer to your audience maybe is that both my husband and I you know I was raised by Jesuits well by nuns and then like you I was one of the first women I think the first women in my country that went to a Jesuit school they the government made them and I was the lucky one anyway so so I was you know but I have a penchant for education for reading just like you and so you know

I wanted my son to have that I want my son to have that power that mental power so I took him to a prep school and you know and in two years not just my son but all the children there we're changing and you know we're we're giving them this beautiful beings you know the zest for life is eager being to learn and to experience and alive and happy and with light in their eyes and all of a sudden we're getting this you know this people who were retreating they were getting angry they were children were changing and and so I talked to my husband I said look you know we always want things to be different and we want to do things differently and we always talked about this and now we're doing the exact same thing with our child is it wrong and you know the teachers are super nice everybody's super nice in there they do give a good education but also obviously something is off so I started studying like crazy I research that like crazy and then I realized that all the models of Education or you know like you would say I'm sure you know geared to enslavement and and to mind control and and and I just totally saw it unless I call that's not really how children learn they don't learn by you know measurable little increments that happened little by little and you can measure this learning happens in aha moments in like realizations in immersion in your own rhythm in your own ways and every child is different and so we pulled him out and you know it was really difficult and dangerous in and uncomfortable and and we got so much shit from everybody and long story short I I'm not sorry I mean it was difficult but it was amazing and the kids now 20 and he's in imaginary University studying physics all on his own he did it with basically unschooled so actually you for doing that that's an an extreme I mean yeah it was it was definitely you know how people should like that choice you know because yes you know homeschooling is definitely the way to go and there's no better thing that says that the parent is directly invested in the real education of the child than doing something like that yeah I wouldn't say it was homeschooling though no like I'm school it was more like unschooling it was like we'd looked for alternative schooling like there's some school in India it's called Sri Ramananda and it has this method called the KPM approach and there was only two schools in the world now there's only one I mean it's not something that isn't well-known or anything but basically the the method is that the child you chooses the teacher so the and there's only one teacher per five children and they choose what they want to learn and so the the teacher is taught to enter the the child's world and not the other way around interesting and so they never leave their world and and so if they want to learn something the teachers go behind it's like you know they're running around they're climbing the tree and you know if they have a question the teacher will answer but the moment the children lose interest they drop it right and they move on to the next thing so everything they accomplished it's their own you know it's their own merit and and they never forget it they never forget they learn soo a deeper interest as their as they develop that interest right yeah yes and then only a different model than the Prussian outcome-based model of compulsory education that we have going on in this country that's for certain right exactly yeah because well and there's this a fantastic book it's called the leipzig leipzig experiment or something like that there's this tiny little book from the 17th that when I read that I was like oh fuck that's what they did I mean it explains exactly what we know from Germany how they brought in the 1890s or whatever you know how the brothers system and it's it's very lab radley had laboratory enough for psychology to they know exactly what they're doing so that was very interesting but there was another book that was very hopeful which was the KPM approach which was a study on this approach that we took our child to buy a professor in Austin Texas Col Gary boric and that explains that system and it's the opposite I mean it's it's you know it's very involved but anyway that's kind of you know what caught me there that definitely you know we're not teaching children the way what we don't have anything to teach children really we're we're there to serve I mean and then we don't respect children that's another thing when you talk about slavery we don't respect our own children and we don't trust them then how they're gonna learn freedom how they're gonna be free right sure so we touched them more like respect for following Authority like a mindless robot do this because I said so instead of actually teaching them underlying reasons for behaving a certain way to optimize the outcome that you want say that you want to achieve you know and I think that that's a part of the whole approaches that parents often take the attitude of that the parent-child relationship more like an authoritarian relationship then a relationship by which you are passing a long life experience for learning and growth so I really want you know think that more people have to reevaluate that whole authoritarian approach to to parenting but at the same time there has to be a deep conveyance of morality as well and we also have to try to really put that moral understanding forward so that our children can really get how morality really works and what natural law is as well so it's a balancing approach that's the morality about you absolutely know that I really agree with you that morality isn't the root of everything I'm told you agree with this but I think the morality is taught with your behavior so because what happens is that you know we tell our children hey you know here's how you should be you should be good you should be respectful ah but then you're doing the opposite and they see you every day and your day to day life you know taking you know we're both artists my husband and I and so we you know if we take to design something for them or something and we despise this person right every colleague does that and we don't not anymore like we've made a conscious decisions that we're never going to work again with somebody we don't respect and that we don't align with and that and everybody's like crazy so you know Bank of America comes in opers you know we won't take it and so you know and that actually brought more abundance to us than anything ever had before to tell you we were so scared to to do that but we just did it was just like you know we can't keep doing that you know it's not gonna go well for us which is gonna do what we you know we want to do and and that we know we should do and what is right and so that's what teaches the child behavior because he knows I mean he's gonna he's gonna rehearse erectile narration living by example you know showing them an example of a way to live yeah and not making exceptions you know too many people make exceptions by saying like oh we want to teach the child you know to respect others and you know learn right from wrong and not do violence and not be coercive toward others but then we want to make an exception for government you know they're somehow exempt from that there's somehow different you know it's all about alignment with principles and it's all about being consistent because the child will recognize inconsistency and call you out on it you know they're very attentive they are much more attentive than most people give them credit for and that's why we should treat them with respect that they are attentive aware souls that are learning and growing just as we are and make sure that we're consistent with them in our models with education and morality so thank you for the call lioness great viewpoints brought up there so let's move on and let's go to let's go to Magdalene Magdalene you are live on what on earth is happening welcome to the show hello can you hear me I can unclear fantastic fantastic so I want to speak about very important thing about morality so you see thanks to you I must say I started speaking out to people about there's like a simple simple example you have people drinking beer peacefully in the park right the police comes over it gives of the kidding I think if they have to pay for something and they the harm wasn't wasn't caused right so I confront people on that and they say you see this this mentality this thinking that you also mentioned about they say ok but what if those people attack somebody right what if those people do this do that your frenemy havior imagination is wrong I think the end they cannot disattach these two things like ok people people drink beer peacefully in the park so they might as well I don't know kill somebody whatever you know how many things the imagination can conceive of and but you know the shorter you crank it in their home they clearly couldn't leave their home I mean with the with the patience that you have and with the frustration with the with the depression that you get sometimes from this I fully understand you because you know after 10 minutes conversation with somebody like that I really get frustrated I get excited in a negative way really negative way cuz really I tend to get really also angry about these things and people cannot make a connection and that really bothers me so I give examples like to that person last time I talked to a friend of mine about that and I tell them ok so but there are examples where people are even even the park near your house you see do you have people sometimes they're smoking weed it's a country world and we just some some amount of it is we go right so this market but if they have too much on it right too much on themselves then they can pay tickets right so let's say they have a little bit too much weed on them they smoke they get a ticket okay but this harm wasn't made and then he goes like yeah but what if what if what if what every for in a thousand but but what if oh my god the beginning of all slavery what if it's been said the fear of death is the beginning of slavery but because you know so even more so yeah exactly this is so I mean it might be difficult to fix that but as you always say in the code is very simple to understand this this is what all begins Malaga wasn't made so what's the point of making somebody right to pay money for it or to go to the to the box and how does that teach them anything all that does is let me avoid convenience you know oh I might not do it again just so I don't get caught and have to pay again but it does not teaching anything it's you know the whole system that they say is Corrections it's not correcting anything you know okay that's why I'm you know I I think that's some great points that you made regarding you know man's law and fear of punishment and what if thinking you know why so many people are just so afraid about the world how many people are just so afraid about what could happen what if this what if that it's like man just get over your your what if fear-based thinking such fear down to the core of their soul fear fear fear you grown men you know and you know this goes to the point like I don't believe in prisons you know I've said this before many many times on the show I don't believe anybody should ever be put in a cage any for any reason for no matter how heinous the crime you know I don't believe in locking people away sequestering them from the rest of society so that society can be you know comfortably insulated from their behaved from their bad behavior they should have to uncomfortably have to deal with that behavior so use your imagination regarding what I think about hardcore criminals okay I don't think they should be put in cages okay I think they should all be released from the cages they're in right now right back into the communities that created them by not morally educating them and that community should have to deal with the consequences of the behavior of those animals until they decide to deal with it you get what I'm saying okay you hear me I think some people hear me okay let's go to Ivan from Phoenix Ivan you're live on what on earth is happening welcome to the show hey Marc you know it's just funny to me that every last caller pretty much touched on something that I crammed into my little 25 if you notice that all right I watched it I thought you did a great job man a great job for a first presentation great job for any presentation that's amazing that it was your first one is what I should say yeah yeah and like everything else there's pros and cons you know damned if you do damned if you don't a lot of people that were already initiated they picked up on everything since there was like 80 plus slides and only 20 plus minutes to go to they picked up everything and then the other few people that had no clue on this they already nitpicking oh you went by everything so quickly you should've just focused on one thing and but that's what the video is a collab so you can pause it and play it back later you know pause it and watch this section pause it absorb it you know so much of what I do I have to do quickly too you know like I've given short form presentations like 50 slides I got to deliver these 50 slides in 25 minutes oh yeah great good luck you know it's like sometimes you've got to cram in information get it in there do your best explaining it with the time you have available especially if it's at a public event and then let the video do the rest you know and then what they don't get in that so give them some links or send them to other source material you know and that's the best that you can do but the time and all you did for the time you had after watching it you did a great job managing your time so don't let the naysayers regarding that get you down I thought you did very well okay well thanks yeah that's why I quit little links on the bottom you know resources you know the websites or where I got the information from and as I said in the presentation like you said before a waiter I'm not feeding someone for speeding I'm putting the information right there and it's up to them to come and serve themselves and even even stating that you can see the evidence of today's society what is it that you know quick satisfaction just just you know in five seconds quick I want to get everything in there and comprehend it and have it all explained it's not like that like you say it's a tapestry yeah but we're just laying down the starting point for people to you know get that and run with it that's right you know further research on their own that's gonna take a lot of time it's not an instant process waking up is not instantaneous it's a process Ivan let me ask you a quick question tell me about the dynamic at the anarchism a conference like what was the conference in general like what kind of people turned out you know tell me anything you think was pertinent because it sounded like an interesting event all right well maybe time for me to piss off some more people again like hey hey just be honest you know what I mean it's like you know yeah yeah don't be afraid before if it needed improvement in certain areas just you know whatever well it's good to see people come together and share ideas and speak according to what they quote-unquote know now this go to what you covered in both an arc apoco talks how there's this this conference up here was a spinoff I guess you can call it of an arc apoco so this was organized by a few people that attended an arc apoco several years ago and last year and decided to hold something here in the States here in Arizona in Sedona and I'm noticing that just like Anarchy has been misinterpreted so mean chaos and we know the etymology is with our rulers I'm starting to see a rhythm being built there now Anarchy or Anarchy conferences are beginning to now fall under the umbrella of cryptocurrency yeah I see a lot of yeah yeah so that's what this basically was about majority of speakers there was only 10 of us myself Larkin spoke on you know government and this other lady was more on the heart based thing and everybody else is pretty much anarcho-capitalism esto and that's why am I so heavily in our balance away from the spiritual director Chanin more toward you know political and financial aspects right exactly that's what I'm seeing that a lot of the anarchy movement for the most part sees as the solution oh just get rid of from I mean I think that's all the time we have for this episode of water earth is happening thank you brother always great to hear from you ladies and gentlemen government is slavery you for watching what on earth is happening we'll see right here next week

What On Earth Is Happening Show #207

Topics: *Least Harm Possible: Plant-Based Nutrition vs. Carnism, Dark Occult Season Of Sacrifice, Christchurch New Zealand Mosque Shootings, False Flag Events, Notre Dame Cathedral Fire, Goddess Sacrifice Rituals, Sri Lanka Easter Sunday Church Bombings, Not wanting to hear the Truth, the meaning of the word Controversial, Nutrition and Morality, Connection between human food choices and Natural Law, What Natural Law IS and what Natural Law ISN'T, Definition of Carnism, Carnism as a Religion, the "Normal-Natural-Necessary" Lie of the Meat Industry, Natural Law Truth regarding Animal Life, the ONE and ONLY Question to ask oneself when it comes to whether or not Human Beings should kill and eat animals, the clear and obvious between eating plants and eating animals, Animals' emotional characteristics, Justifications for Carnism, Occult Initiation, the First Step of Occult Initiation: Stop Lying To Yourself, If Human and Animal roles were reversed, How Humans would react to being food for an Alien species, the Occult Law of Correspondence, Humans will be food for more advanced beings for as long as they continue to eat other animals, Heart-Based Intelligence and how most Humans lack it, a Balanced and Whole Natural Food Diet, Eating Truly Natural Food is NOT Extremity, Moving to a Plant-Based Diet is a Process and NOT an Event, the importance of Transitioning Slowly to a Plant-Based Diet, "Militant" Veganism and how it is hurting the Vegan Cause, Extremist and Fad Diets, Keto and Paleo Diets, Dangers of the Keto Diet, the book "Natural Cures" by Kevin Trudeau, the False "Where do you get your protein?" Argument, Animal Sentience and Biology vs. Plants, the Occult aspects of the difference between Animal and Plant Life, the real reason Why the Controllers of our world want people to go Vegan, earth as One Big Farm, Facebook Post from a Soul-Dead Carnist, Reverse Osmosis Water Filtration, the importance of Juicing and Blending, Air Fryers, Pea-based Protein Powders, Adaptogens, Proper Nutrition as a form of Self-Respect*

freedom man that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time today is Sunday April 28th 2019 we have a great show lined up for you here today this show is live every Sunday from 3 p.m. to 6 p.m. East Coast time that's 12 noon to 3 p.m. Pacific time today on what on earth is happening this is episode number 207 we are going to be talking about a plant-based diet versus the religion called carnism this show is entitled least harm possible and what I'm really going to be getting into today on this show are the moral implications of how humanity eats this is going to be about real plant-based nutrition and a balanced and holistic approach to food and nutrition so that's gonna be the main topic on the show today I'm also going to be right now getting into a very brief recap of what is known as the dark occult season of sacrifice so let's jump right in because I'll tell you what there this is a huge topic today with plant-based nutrition versus carnism and we may or may not even have time for calls I'm gonna try to get the presentation into the first couple hours and then leave time for calls if there's not a lot of time for calls today I'll tell you what I think I'm gonna do since this topic has so many different air avenues that we have to explore and I have about maybe around 50 slides maybe slightly less than 50 slides to go through today I may just if it extends over into the third hour we do a whole call-in show just on this topic for next week and I do nothing but take your calls on this topic so we'll see how the time goes with the formal presentation and then determine what to do with calls after so I have one piece of housekeeping to get into before we jump into the season of sacrifice and then into at least harm possible we I do still require an in-house video editor now don't get me wrong there are people who have been absolutely of tremendous valuable help who have been doing a phenomenal job especially my friend Jeff Ritter who's been editing videos for me remotely there are some in-house tasks that I really do need to work with people on here while I am here that really doesn't lend itself to video collaboration very well I need to sit with someone and do some video editing tasks so if there's anybody in the Philadelphia area that knows I prefer the person to use Final Cut Pro because the person will be editing on an iMac Pro System so if the person you know prefers another video editor we could perhaps work with that and I could get the software install it and we could work with that but if there is someone in the Philadelphia area that can actually come to the office here at what on earth is happening and do some video editing on a voluntary basis it is not a paying job right now I don't bring those kind of resources in just yet at some point I want to get my entire staff that is working on voluntary basis right now paid for their efforts so that is only going to really happen if more resources come into what on earth is happening right now you know what we're what we're making here insofar as donations is not going to be sufficient for that so I have to ask for this on a voluntary basis for those who understand what we are doing here if you have video editing skills with Final Cut Pro I'll take someone who works on premiere or you know any other video editing platform nonlinear video editing platform you know if you use resolve or something like that or Vegas will work with you but ideally if you use Final Cut Pro and know it well and can volunteer at least one day per week during the day you know to come and do some video editing here that is what we really require here at the one on earth is happening headquarters so if you do have those skills and you want to take this offer seriously to volunteer for what on earth is happening please send an email with examples of your video editing work to the address the email address Leah at what on earth is happening calm that's my assistant Leah Boone her name her first name is spelled L e eh eh it's right there on the screen okay so Leah le IH a at what on earth is happening calm put in the in the subject video editing help okay and send that email to Leah Boone and you know what we'll go through them and see if you know your skill set is is meets the requirements and you know hopefully bring you over to help out so thanks for you know listening to that pitch there and let's jump into the actual subject matter for today's presentation so Brett's been doing a great job with the artwork as always Brett Hatton thank you so much here's the title card that he came up with for the show today called least harm possible plant-based nutrition versus carnism revisited now I did this before I had an entire podcast on this topic I believe it was podcast number 122 people can correct correct me if I'm wrong on that number but I believe that was the number of the podcast and um you know it got a whole lot of reactions all across the spectrum to people who you know write to me and say it changed their life for the better to other people who write to me and tell me I'm an agent working for the dark side because I don't believe we should be harming animals for our source of fuel okay for our bodies so we're gonna get into all of this dynamic a little bit later on in the show but first what I want to do is do a brief recap we are still in the 40 day dark occult season of sacrifice which I talked about a few shows ago you go back into the podcast archive just click the podcast tab what on earth is happening calm and you'll go back through the video and audio archives there and you can see in other shows I've talked about the dark occult season of sacrifice this is a 40 day period between the spring equinox around March 19th to the midpoint of spring May Day Orvil purchase knock that is as it is called is one of the four major Sabbats of the occult year this 40-day period is considered a time to make a sacrifice to the Sun and the earth so that you know the cycle of life will continue it grows out of ancient pagan beliefs however it becomes perverted in the world of dark occultism where they the darker cultists who are really running things in our world conduct mass murder rituals during this time of the year as humans an act of human sacrifice okay because they believe they are appeasing the spirits of the Sun and the earth so that crops will continue to grow on the earth by giving blood to the earth it's a sick twisted belief system I of course don't subscribe to that belief but there are darker cultists who do and it doesn't matter whether you believe in it they believe in it and as sick twisted psychopathic religionists their beliefs affect other people in the world because they are certainly willing to act upon them so this year we we have seen many different occult sacrifice rituals during the season of sacrifice now I want to say one thing I think they started early about four days early on the Ides of March we saw these uh you know shootings alleged shootings that took place in Christchurch New Zealand and there's a whole lot of you know speculation and data regarding whether this was a real or staged event what I want to say about this is I do not ever really come down on the position and make it a big thing whether something is actually took place in the physical world or whether it is a hoax or completely staged event and there's a reason for that and the reason for the is because I don't want to get bogged down in the particular zuv any given event I want to talk about always the why behind why this event or whatever it happens to be occurs and what the justifications that are gonna come out of the political world for why rights must be taken away from other human beings who did not conduct any such acts okay that are depicted okay so I have my own personal takes on what happened at Christchurch New Zealand and you know I don't I see a lot of problems with it let's just put it that way okay I don't believe the official story okay I believe all of the official stories of any of these types of events are fabricated and it's done to politically charged people and polarize them into varied mindsets so that they could be turned against each other and ultimately conquered by the ruling class all the while having their rights taken away in the process this is what all false flags are about and when I use the term false flag it does not imply that no one died okay or it doesn't imply really anything except that something is being used for some type of a political justification and to take rights away from people by staging an event whether it be staged and real and real people are harmed or whether it be staged and it's called what other researchers like David Icke have called a no problem reaction solution event in which the the actual alleged victims aren't even actually victims but crisis actors okay so what I'm saying is that a false flag just because something is a false flag it does not mean that either some people really died or they didn't die a false flag can be a true event that take takes place in the 3d world and people are harmed and a false flag can be something that is completely fabricated like the Gulf of Tonkin incident which never actually took place okay so just because something is a false flag says nothing as to the nature of the reality of the event regarding whether people were harmed or not so I want to make my position clear on that false flags can be either real events or completely staged events but they are still false flags because they are events that are constructed for a political purpose to to ultimately take rights away from people because you're presenting the problem to the public they're reacting in a horrible way because the perception of the event is that it is such a hard thing that the government must do something about it and then the original orchestrators of the event step forward with a predetermined solution this is called the Hegelian dialectic applied politically it is known as a false flag event now regardless of what anyone thinks of the christchurch shootings okay we are certainly seeing an aftermath in which they are using it to politically justify the taking away of people's rights to own firearms and protect themselves and with any amount of force required when self-defense requires it okay and that's what this event was ultimately all about that being said I think this was the beginning the official beginning of this year's season of sacrifice even though it was four days before the date of March 19th they liked the Ides of March as well the dark occultists you know this goes back to the story of Caesar being stabbed in the Senate okay the that that's the whole idea of the the the dark aspects of the Ides of March now that's when we saw this to place okay so now jump forward exactly one month to tax day here in the United States and we saw another event take place this time you know in Europe in France in Paris at notre-dame Cathedral which you know a huge portion of it you know burned and if you look at these flames they're you know orange to yellow hot producing large amounts of white billowy smoke when you have a hydrocarbon fire burning certainly under 800 degrees you usually don't have anything like this taking place usually this is indicative of some form of an accelerant okay so I also don't believe the official story I cannot tell you exactly what took place but I don't accept the story that is put out by politicians and mainstream media okay now again you look at this taking place right in the middle of the season of sacrifice right in the middle of the month of April and it is our lady which is what the words note read I'm in French means our lady because it's about you know Mary the mother you know the the biblical mother of Jesus and that's the this isn't alchemical Cathedral okay so the first thing you have to understand is how chemical cathedrals often made you know in the Middle Ages are these are books in stone these these are books of occultism carved in stone and the inside of them tells and the outside tells amazing stories regarding what is going on with humanity in the human condition so if you're interested in learning more about what really cathedrals are all about in some of the mysteries that they concealed by the the sculpture and painting that is within them contained within them I recommend reading the works of some alchemists from you know a little bit later like Fokin le in in his essay long-form essay called the mystery of the cathedrals the mysteries of the cathedrals I'll post it with the podcast I also highly recommend the work of J Widener the researcher J Widener he wrote a book with the occultist / Alchemist Vincent bridges and that book was called the mysteries of the great cross of Hendaye I don't believe that I have a digital copy of that I'm a I'll have to check it's a very large tome it's about 650 pages if I recall it was one of the best books I've ever read people should definitely check that book out as a matter of fact let me briefly step out of the slide presentation and go to the web and I'll go to Amazon and see if I can find the mysteries let's say mystery of the great cross of Hendaye Hendaye is spelled H a and D a ye h en da ye okay we can bring up the laptop there it is it's the mysteries of the great cross of Hyundai okay you can get a Kindle or paperback version on Amazon this is the book right here it's about an alchemical monument in hen de France on the border of France and Spain and it really gets into a lot of interesting information about alchemy Kabbalah occultism in general and end times type of prophecy especially that which was kind of predicted by medieval alchemists so this directly relates to this year season of sacrifice because more likely than not there's a dual edged purpose to the event at Notre Dom first is you are symbolically seeing the immolation or burning by fire of Our Lady again the dark occult this love to immolate the Sacred Feminine in the season of sacrifice we you'll see this over and over again we talked about it on the podcast that we did here on what on earth is happening I would recommend going back and looking through the symbolism that I talked about about goddess symbolism and how often goddess symbolism as the certainly the Notre Dame Cathedral is an example of is always used in human sacrifice rituals especially when it comes to rituals involving fire okay or some type of burning process okay like the re-entry of the Columbia space shuttle which burned up okay Kalume means dove the Dove was a symbol of Semiramis and even Isis and the holy spirit okay so in the Christian tradition so we're talking about a symbol that represents peace love etc being destroyed being immolated similar to the you know ritual a bohemian grove the cremation of care okay again cremation immolation sacrificed by fire destruction of care the Sacred Feminine you'll see the symbolism repeated over and over again if you are conscious of it and what the symbolism means so this as soon as I saw got word that note riddim was on fire during the season of sacrifice I immediately thought this could possibly be a you know season of sacrifice ritual so you know I'm not definitively saying that's the case but I'm saying that you know we have to look at this as a distinct possibility especially because of the symbolism involved now some people will take this as an example of what is known as synchro mysticism which is events that are seemingly perhaps are coincidental but really are telling us something in into the human subconscious mind at a very deep level that is profound so it could be an example of that I lean more toward a direct false-flag myself it's just so overwhelmingly coincidental and then what I know about materials science okay which I took at an Ivy League university as part of the curriculum there with engineering this absolutely looks to me like there is an accelerant used because fire in open air burn of hydrocarbon material which would be presumably in that spire and attic region at Notre Dom is not going to burn that bright and produce that type of billowy white smoke unless they were actually storing tons of chemicals there so you know that's my take on it from a material science point of view I'm sure experts have chimed in I think many experts have chimed in and said that they also see something very fishy in how this Cathedral burned but anyway I would certainly highly recommend reading more about the Gothic cathedrals the cathedrals of the Middle Ages and you know understanding what these alchemists who built these cathedrals were trying to depict regarding the human spirit and the human condition because they're beautiful monuments and in stone that are really books that are there for us to read so that's what I wanted to say about note Redang then as a alleged response you know or alleged continued response to the mosque shootings in New Zealand you have the Easter April 21st church bombings in Sri Lanka that happened across the country I think a total of 290 people are said to have been killed in these regardless again of what you think these events are they are they're too politically charged people and polarize people the whole theme of this year's season of sacrifice seems to have been the polarization of religious thinking people between Muslims and Christians okay so that's what I think we're seeing there in the Easter bombings you know an interesting how the mainstream media uses the term Easter worshippers instead of Christian you know showing their their bias but if Christians do something extremely heinous as that of religious extremists and that religious faction often do then suddenly they are fine to use the word Christian so but anyway absolutely season of sacrifice events okay taking place here no doubt in my mind whatsoever so we have three days left in the season of sacrifice ladies and gentlemen may 1st is the end of it and I'm telling you be vigilant wherever you are and understand that if something takes place in the next three days especially on May 1st which is the highest holiday of the occult year of all purchase knocked in April 30th into May 1st you know you can almost rush rest assured that this is part of the season of sacrifice ritualistic killings that take place almost every single year during this time of the year like clockwork ok I'm not a prophet it's not a prophecy to say it I understand their belief system I understand how their minds work they don't deviate from a plan once the plan works and guess what folks it's working people are falling for all of it hook line and sinker the political and religious polarization is at an all-time high you know because people cannot see through the facade they don't understand the occult they're not truly spiritually awake or enlightened ok and they will fall for whatever the mainstream media tells them and still paying attention to sources of mainstream media okay there's still the vast majority of the population especially here in the United States and throughout Europe and Canada and Australia and New Zealand are all still paying largely the population is paying close attention to what the mainstream media says on whatever source that they prefer to listen to from the mainstream believing that they are properly informing them and even want to tell them anything resembling the truth this is how asleep the population of Western civilization really is and really throughout the entire world okay anybody who believes mainstream media is trying to tell them the truth at this point is such a absolute child dunce I mean take it as a hominem attack because it is but that doesn't mean it isn't true anyway okay it's certainly an ad hominem attack against who I consider to be dumb uninformed naive childish people who should be adults who know better by this point in time with all the information that is out there okay believing the mainstream media I mean is about the most naive childish imbecilic thing that anyone can do and yes it is an ad hominem statement it is an ad hominem attack and yes it is still true okay so I mean this is the part of the problem here okay is that people still don't understand the mainstream media is not there to inform you regarding what is true and what is not true the mainstream media is there to instill and inculcate political narratives into its target population to make it easier make that target population easier for the control class to rule over that is all the media is and never has been there to do okay and the people who still don't understand that your children your children you haven't grown up mentally you haven't grown up psychologically and you certainly haven't grown up spiritually okay so let's move on into that's my little wrap-up of this year's season of sacrifice since I won't be on the air until next weekend the season of sacrifice will have officially ended not to say that events can't take like that can't take place at any other time of the year but I just wanted to do that as a brief recap now let's jump into the main topic of discussion which is called least harm possible plant-based nutrition versus carnism revisited now the title is revisited because again I covered this topic and I want to go back and say some more things about it and clarify some of the things that I talked about and what I want to start by basically putting this meme up here that I downloaded from the internet okay Ally doesn't become truth wrong doesn't become right and evil doesn't become good just because it's accepted by a majority okay lots of things are accepted as by the majority the slavery of humanity through government is accepted by the majority it still doesn't make it moral it still doesn't make it right it still doesn't make it good okay conventional wisdom is almost always wrong it's it's almost never wisdom and it's almost always wrong okay so just because most people think a certain way doesn't mean that it's the correct way of thinking or being in the world okay now that being said I'm gonna try as I did in past weeks you'll hear me say very harsh things get his offended as you want okay I'm not going to mince my words but I'm also going to strive to strike some form of a balance between telling people the truth which is going to be harsh and being at least compassionate enough toward compassionate enough toward other people's situations to understand that not everybody is there yet and not everybody understands yet okay that's why I'm doing this topic again to revisit a very what I consider a very important topic we're going to get into so many different dynamics of it and many others callers will bring up and probably remind me of that I didn't cover okay but again the main thing here is the morality aspect I'm not so much even talking about it from position of diet and nutrition I'm gonna get into that okay that's important okay however the main thing I want to cover is the moral aspects and implications of how human beings eat and what that does on this planet so the truth doesn't change just because you don't want to hear and I want to say a couple of things regarding this dynamic okay regarding the dynamic of most people are close minded to the truth they don't want to hear it if it conflicts with their pre-existing belief or what they

they themselves have come to understand through their limited amounts of research and think that they know in its fullness okay so they've made a conclusion based on often what is cursory researching and reading headlines about things instead of really deeply delving into articles and books okay and then doing testing in the real world themselves to test what they read okay most people hear things and make a judgement about it okay based on their pre-existing belief system that's called a religion okay so what we try to do here is break down religious belief systems and thought because they are holding us back from an understanding of the truth so if you find yourself being triggered by things that I'm gonna say in this podcast you should ask yourself why you're emotionally triggered are you emotionally triggered because what I'm really saying is wrong bad evil etc okay or are you emotionally triggered because you recognize the truth in it perhaps that it even even at a subconscious level but even at a partially conscious level you recognize that your thoughts emotions and actions are not in alignment with that truth and therefore you're reacting with anger instead of actually listening and saying it is possible for me to change because my actions are a choice okay but to do that the ego has to get out of the way okay the ego must be calmed the the constant jibber-jabber of the thought thoughts that bounce around in the human mind have to be partially laid and set down so that you could actually hear what's being said because another dynamic of this slide is most people don't hear what's being said I've said this over and over and over again on this show most people hear what they want to hear they don't actually listen to the words that are leaving the person's mouth they're waiting to talk they're my is racing thinking about other things in order to learn you must learn how to listen to truly listen not just hear the words but to truly listen to what's being said as it is actually being said not interpreting it according to your internalized definitions or preconceived notions about what you think is being said but actually listen to what is being said that's part of teachability that's called the part of what's called the teachability Index the ability to learn by way of being taught by someone else okay so keep that in mind as we move forward in this whole series I'm going to bring back a few slides from the first episode that I did on this topic okay I believe again it was episode number 122 so this is a controversial matter and when we break down the word controversial into its etymological roots we get the prefix from Latin contrib which means facing face to face up against okay and then the verb verse over sorry the verso is the first person present tense and then verse re is the infinitive form so it means to change to alter okay so when we put them together the word controversial literally means from its etymological definition face to face with changing coming face to face or confronting having to change okay that's why topics that are hot-button topics with people are controversial because it involves a dynamic whereby one side or the other involved in the dynamic must come face to face with changing one's self and that's one of the white's controversial topics are one of the most uncomfortable topics to discuss so is this a controversial topic yes absolutely it is okay is there a truth regarding it yes there is a truth regarding it that truth is knowable it is not an unknowable dynamic what proper nutrition for a human being should be okay now I'm not claiming to know everything there is to know about every dynamic of nutrition but I do know the dynamics that involve morality that's what I would consider myself someone who was extremely knowledgeable on that and I wasn't always III you know when you I'll tell you what I was like in the past as we go through this presentation I was one of the biggest carnivore meat eaters that you could possibly imagine trust me I put you down when it came to going toe-to-toe eating meat believe it talk to the people who know me from my past and ask them how I could eat and how I how much meat I could eat okay you would not even be able to conceive of it and I'll tell you some anecdotes later in the presentation okay and I was able to change I was able to change I was able to reverse a lot of health issues I was able to really you know come into a much better state of health and energy okay so this presentation is about nutrition and morality and there is a truth regarding what human being should and should not eat that is not an opinion okay and it is not just a lifestyle choice there is a truth morally regarding this get is offended about that statement as you want it will never make it untrue there is a moral reality regarding what we should be fueling our bodies with and what we should not okay now I'm not here to be totally judgmental I'm not a militant vegan I'm gonna talk about militant vegan and how I stand against that position later on okay I make this as a personal moral choice for myself my dietary choices okay and I am a vegan because of that okay III engage in a plant-based diet I don't even know whether I want to use the word vegan because it has religious connotation that word in the modern world okay I'll still say yes I I am vegan okay but I don't want it to mean what a lot of people think being vegan means which many people think it means being militantly vegan which I am NOT okay and we're going to get into that dynamic later but what we choose to fuel our bodies with has absolutely everything to do with morality under natural law this show is about what natural law is and what natural law is not okay we're going to talk about that dynamic next okay so the the human diet should my whole take on what the human diet should be about is not a position of extremity it's a position of balance but balance doesn't mean doing harm to other sentient beings that's not a position of balance that's a position of violence and that's an extreme position okay and again I'm not saying anybody needs to make this change overnight this is another thing people will hear one saying and they won't listen fully to what they're saying they won't understand I'm I am trying to help people to understand where the morality of this issue lies and then make a decision to slowly over a period of time change themselves change how they think about it and change who they are okay I am I never have told anybody to change their diet immediately and never would you'd be doing harm to somebody else by telling them to do that so no one can find anywhere on any media where I've ever told anybody to change overnight never it's never happened and it never will happen okay so that's I'm gonna talk about that dynamic a little bit later okay so I'm also gonna talk about fad diets regarding this and extreme diets that people sell never eat this kind of food never eat that kind of food go on this type of a high carb low carb you know high glucose low glucose all these fad diets are nonsense I'm gonna get into that okay we should be taking a balanced approach when it comes to natural food truly natural eating means as much as possible eat the food that nature grew unmodified by man okay you could cook some of it okay but you want to have most of it being raw okay and then you want to do juicing and blending which we're going to get into as health benefits of what many people don't and that's why they don't enjoy optimum health okay so I'll be getting into juicing and blending later also now this is an issue of natural law okay this is an issue regarding morality and therefore natural law comes into play what natural law is is a set of universal inherent objective non man-made eternal and immutable conditions which govern the consequences of behaviors of beings with the capacity for understanding the difference between harmful and non harmful behavior the understanding of natural law is centered upon bringing our own conscience into alignment with objective morality this means definitively knowing which behaviors are rights because they do not cause harm to other sentient beings and which behaviors are wrongs because they do cause harm to other sentient beings so when we take what we eat into account there is a question that must be asked did we harm another sentient being in order to procure what we are taking into our body as fuel and that's the only question that really one should ask when it comes to determining the morality of the human diet the only one as we're also going to get to a little bit enough in a couple slides okay so this is a moral issue and it is all about the aggregate morality of human beings so this factors into it how in the aggregate how many human beings believe government should continue to exist and therefore slavery should continue to be enacted upon the human population the vast overwhelming majority so overwhelmingly there are more carnivores carnist s-- i would call them people who believe in the religion called carnism which we are going to talk about and define on the show today then there are people who eat a plant-based diet as nature intended okay overwhelmingly in the aggregate so what is that doing karmically we're going to talk about that okay when you see the suffering of animals how many animals are suffering needlessly every single day at the hands of human beings all of this goes into the etheric field the energy field of the earth and karmically has an effect in the aggregate on human beings okay and what we then must undergo and experience as a consequence of our collective behavior okay so moving to the next slide what natural law is not this has absolutely nothing to do with any of these things Darwin's theories regarding macro biological evolution the Darwinian notion of the survival of the fittest the so-called law of the jungle the so called natural order any and every aspect of human-made law including common law so-called common law but here's the one this second to last one that's highlighted in red that we're really gonna be talking about here today natural law has nothing whatsoever to do with any aspect of the behavior of the entire animal kingdom for any creature with less cognitive development and capabilities than a human being natural law only applies to human beings natural law does not apply the consequential laws of behavior do not apply to the animal kingdom other than human beings because they do not have a complexified brain capable of truly understanding the difference between right behavior and wrong behavior and being able to express it okay through their language because they don't have language okay that doesn't mean that animals cannot exhibit forms of morality which I'm going to show you they most certainly do okay but it doesn't mean that we should apply the standards that can be applied morally to the animal kingdom to the human Kingdom this would be a complete ridiculous logical fallacy to say because animals behave a certain way humans should also behave that way no we are not just animals we are not just any other animals we are special in the animal kingdom as I talked about the family hominid I in the whole classification system of life is only contains homo sapiens sapiens and that is why we are the only animal that is capable of being bound by natural law because we are the only animal that has the capability to understand the difference truly understand the difference between right behavior and wrong between which actions are rights because they don't cause harm and which actions are wrong because they do cause harm to other sentient beings okay so understand the laws of the jungle the so called survival of the fittest and and so-called natural order when it comes to the animal kingdom has absolutely nothing to do with natural law the phrase natural law means what it I defined it as on the previous slide it has nothing to do with animals natural law has nothing to do with animals except whether human beings should be eating them or not then natural law absolutely applies but natural law has absolutely nothing to do with animal behavior let me say that again a couple more times natural law has absolutely nothing to do with animal behavior meaning animals that are not human beings that are of a lower classification than human beings when it comes to the complexity of the brain of the central nervous system of the abilities the capabilities of that being okay that's why they are in the animal kingdom lower than Homo sapiens sapiens on that scale of complexity there that doesn't mean that they're you know they're they don't have rights like we do but we are a more advanced and complexified Byng and obviously having more capabilities when it comes to language creativity technology even our spirituality an emotional dynamic range of emotions complexity and thought you can go on and on and on with everything that separates animals and human beings okay and then you can go on and on and on with everything that separates the entire animal kingdom from the plant kingdom which we're also going to talk about because people make the the fallacious argument that because plants live that you know people who engage in a plant-based diet are causing harm unto plants okay when they don't because they don't understand the complex offical life and how there are scales and orders to that and that's why we an animal okay are gonna be held to two different moral standards when it comes to natural law animals it's not going to apply to them but it's going to apply to us okay so our food choices are going to have natural law implications all right so once again natural law has nothing to do with the behavior of animals lower than human beings I can't stress that enough it does not apply and it does not have anything to do with them if you understand it properly there are people who will disagree with that and they don't understand what I am referring to as natural law they have their own thought about what it is and their definition their internalized definition is incorrect about what natural law is and is not I've made this abundantly clear on past shows so what does a plant-based diet conflict with okay if we should be eating a plant-based diet that is naturally growing from the earth okay what is the thing that is standing in the way of us aligning our behavior with nature it is a religion as every other thing that causes harm in this world has its roots in religious thought okay so carnism is a religion we are not born carnist so we are not born people believing that we should be slaughtering animals and eating them for our food okay if you don't believe that you know don't indoctrinate a baby into eating meat and when they grow up to be a young child see how they react to the killing of an animal to eat it they would be horrified by it okay when I was at an arc apoco and watched Gena cars presentations I talked about before she showed it a video of a girl you know trying to free I believe it was a turkey could have been a duck I'm not sure in some third-world country from somebody who was trying to hold it down and cut its head off with an axe okay and I think it was a turkey or a chicken and this baby was crying and finally got it away from the person and you know wanted it to go free because they recognize that we don't need to do that it's unnecessary to do okay and most people see that especially from when they're young but then it's beaten out of us and carnism is beaten into us that compassion is beaten out and carnism is beaten in it's a religious dogmatic belief system carnism is a dogmatic religion based entirely upon violence because that's what has to be done for people to eat the flesh of animals violence has to be conducted upon them the main belief system of carnism is that it is morally justifiable and/or necessary for human beings to kill animals and eat their dead flesh ok now first of all if you saw what the meat that we're really eating looks like before it is quote-unquote dressed most people wouldn't need it because it has the the absolute color of death ok it would be looking like you're eating a zombie carcass if you ate meat as it really would look if it was shipped to the supermarket without the dressing of the meat industry and just look up what that's called ok I'm not really gonna talk about it much in this presentation but it's called dressing meat ok the process of dressing meat literally they're dressing it up to make it look like something other than what it really is the red coloring that's not what meat really looks like that's not what anything that is is being consumed that came from an animal looks like it's often pale gray to even a black collar to a dark gray or even black ok they inject it with dyes to make it colored that that red color ok so most people would be horrified if they looked into the meat industry look up the documentary called Earthlings ok Earthlings was the documentary that started to really wake me up about what's going on with carnism ok look up the look up dr. Melanie joy there's another individual look up regarding the belief system called carnism and I would also recommend the work of Gina car ok so and there's many others many many many others ok too many to go into in this present as I have too much to get to all right but that's what carnism is and I define this as a religion and it is the what I call the ultimate expression of domination this is dominion over others that's what it is which is what human beings do not have we think we have it but we don't have it we should only have dominion over ourselves which is where freedom ultimately leads when we have dominion over ourselves we enter a state of being free that's what the word freedom really means okay we don't have dominion over ourselves we can't even control our own animalistic tendencies and behaviors okay and the urge to kill the bloodlust that's within us most of us okay but we certainly don't have dominion over other creatures that are not us including the animal kingdom including other human beings and including the animals of the animal kingdom okay anybody that thinks that is a religious nut that believes a wrong interpretation of the Bible because it never says that we are given dominion over the animals ever anywhere in the Bible and it never says we should be using them for sources of our food it says take the fruit of you know the trees and every every you know fruit bearing and you know a tree and plant and its seeds etc you know and use that as your your food that's what it actually says in the Old Testament believe it or not and I know most fake-ass Christians won't bother to look it up because they only go by what they're fake-ass Christian preacher told them at their fake-ass church on Sunday okay now that's all they give a shit about you know they have a religion the truth be damned what God intended to be damned what nature intended to be damned you know they just go by what their Bible thump and preacher told them you know or their church the dogmatic religious belief system of their church tell them we're gonna get into that the whole false religion argument of carnism because there's tons of justifications for this religion okay the so-called normal natural necessary argument provided by Carnot's and the meat industry is provably false an amoral meat industry propaganda all right carnism or eating killing animals and eating their their dead flesh is not normal it is not natural it is not necessary people will make a billion arguments though our ancestors had to do this this this this and this in survival situations it is not meant to be done all the time see this is the whole thing that people have to understand there's a difference between a total dietary pressured survival situation for a short period of time and what you should be habituating and doing indefinitely okay that's why this became a religion because probably out of cataclysms that happened in the past dietary pressures were exerted in our environment upon us and we had to engage in karna stick practices for a short period of time the problem is we made it of dogmatic religion and kept doing it okay and then people will argue the point but what about the Eskimos way up there in the north territories that you know don't have access to being able to grow on on you know fertile land and I've made the claim what makes you think that's where human beings should be living you know you know the whole dynamic of if you can freeze to death by going outside maybe you shouldn't live in that region of the earth maybe your older people's migrated to that region and again may be driven there through environmental pressures but we're not meant to stay there and live in and inhabit and make habitable places there maybe we're meant to live in the temperate zones of the earth okay that's why they're the temperate zones of the earth that's why different climatic areas and regions of the earth exists okay for certain things to thrive in certain areas human beings are meant to thrive in certain areas of the earth and that'll be rejected by people okay just about every aspect that I bring up in this entire presentation I'm not naive enough to think everybody's there's gonna be somebody somewhere there's gonna have a problem with every aspect of it okay and I'm gonna tell you that is because they haven't done enough looking and they haven't done enough research and they haven't gathered enough knowledge they haven't gathered all their grammar they haven't understood what the gathering of that data means by performing the actual processing upon it to come to the logical conclusion and they certainly aren't spreading the knowledge by telling this truth to other people through rhetoric okay through spreading it through speech telling the truth to others if it were being done much much more of the world would be reducing the suffering of animals and I'm telling you that's nowhere near happening nowhere near happening as many people go plant-based that many more people are born and continue to eat meat the percentage doesn't really change okay and the suffering of animals more animals are suffering today than ever have been in the entire history of the earth and guess what this is part of the worldwide and continuous season of sacrifice because what's really going on year-round worldwide is the altar of sacrifice is constantly flowing with the blood of animals and it's constantly flowing with the blood of human beings through war and and you know sacrifice rituals that take place year-round but I'm telling you it's happening every second of every day through the best lauter of animals it's a bloodletting satanic endless ritual an endless satanic bloodletting ritual that's what carnism really is let me say that again you want to know what carnism really is more so than just a dogmatic religious belief system it's an endless satanic bloodletting ritual that's what it really is whether you accept that or not nothing will ever make that untrue that statement is eternally true and will never be untrue the practice of carnism is an endless satanic bloodletting ritual okay and trust me the people who are the high priests of that religion the Satanists and Lucifer LARC Luciferians of our world absolutely are overwhelmingly in just brimming with joy that that this sacrifice ritual goes on non-stop every single second of every day throughout this planet now what is that doing okay now I'm gonna let's go back to the slides I want to show you the entire truth about this in dynamic and it's the only truth anyone ever needs to know about this dynamic it's the only question that it ever needs to be asked natural law truth regarding animal life eternal natural law truth regarding animal life to know the moral truth we need only ask ourselves one simple question regarding the practice of carnism and that question is about property and property rights ladies and gentlemen all rights or property rights your life is your property your rights are your property your physical property is your property ok every violation of rights under natural law is a violation of property rights all right so the only question it needs the BS is a question regarding property do the lives of other beings belong to us to take and then what humanity needs to do is ask that question and then answer it honestly answer it honestly and I should say other sentient beings sentient beings there is a difference between sentient and non-sentient beings animals are sentient beings and as we're going to talk about plants are not really sentient beings there are many who make the claim that plants are sentient plants have a biological instinct response mechanism to certain stimulus stimuli in the environment but that does not make them sentient in and of itself plants are not sentient animals are sentient there are many people who think animals aren't sentient in the year 2019 there are people who would say animals are not self-aware creatures that they are not sentient and don't have a form of identity yes they are more group thinking type animals responding more to instinctual stimulus response mechanisms than our human beings which are much more waited but they absolutely have a range of emotions a thought process have the ability to feel pain and empathy and they are imbued with spirit that is why they're called animals the word animus in in Latin anima animus means soul an animal to be an animal means that you have a soul that you are imbued with spirit and that's why we call them animals because they animals means you can move independently of the earth you're not attached to the ground or reliant upon the earth the ground itself to take your nutrient sources okay that's why plants are different than animals we're going to get into that that that difference between plants and animals okay and why the whole argument that Oh plants are just like eating plants is just like eating animals no it's not it's not the same thing and I I feel bad for people who don't understand that it's not the same thing it's a 100% complete difference as we will see so here's the here's the problem folks this question isn't being asked and it's certainly not being answered honestly it's not being answered honestly okay I want to tell an anecdote about a friend okay now I don't really don't even want to mention the person's name maybe I'll bring this individual on for an interview perhaps you know maybe I can bring him on for you know an interview and then take we could take questions about this dynamic but a friend of mine tried to go vegetarian a couple of times and failed at it not because you know of any other reason that he had cravings for me and wanted to continue to eat the way he had always eaten okay so the person just said I'm not strong enough to do this that's being honest that's it I'm not I'm not telling anybody beat yourself up over not being vegan today okay one it's a process you don't have to do it immediately all right I'm gonna talk about that that's how most people fail at eating a plant-based diet they do it too quickly and they throw your their body into shock into a form of shock okay so all I'm asking for is honesty folks that's it I'm just saying acknowledge where you're at acknowledge what the truth is acknowledge what the moral position is and then try to move toward the moral position and maybe you will be able to and maybe you will fail and then you acknowledge that and you're honest with yourself about that I fail in many ways that I try to be better I try to be less angry with people I fail at that every day folks okay I still strive to try to control my anger and hatred toward other people because of their ignorance I struggle with that on a daily basis but I'm not a liar to myself about it I don't say oh no I don't have that problem I have that problem okay I recognize it as an issue that I should work upon for myself and that's all I ask of anyone I don't demand perfection of people immediately if we are moving toward what is right that's good enough for me but we're not that's the problem see the biggest statement that I just said there was the word if that was the most important word if we are moving toward what is right and better for Humanity that's wonderful but we're not doing that as a species we are not doing that that is not happening that's happening in tiny little little isolated pockets of humanity but it is not happening with humanity as a species in the aggregate and that's why freedom in the aggregate is being destroyed that's the only question - one needs ask right there on the screen and it needs to be answered honestly from where we're really at right now not lying to ourselves because that's the first step of a cult initiation and there's the correct answer we're having a technical issue folks give me one moment to resolve this and I apologize but sorry okay I apologize for that I don't think we stopped streaming but there was a glitch that happened with my producer and not no worries so let me step that back one moment and take that again if we're being honest with ourselves okay and we're answering that question honestly okay and we ask the question do the lives of other sentient beings belong to us to take no they do not that is the correct answer of that question morally that is the correct answer so if you know that to be the correct answer then what you should do is try to change how you are contributing to that dynamic of suffering and you could do it to the extent that you are able and you know what that means folks that means if you can only say one less day out of the week I'm not gonna eat meat then that contributes and makes things slightly better than it was the day before you know you could take small baby steps to the this destination okay I'll work with somebody who isn't going to go immediately plant-based and say I'm just gonna reduce the amount of red meat I eat or I'm just gonna reduce the amount of meat in general or eat meat less days out of the week wonderful any amount hey I'll take you know going less authoritarian than more authoritarian you know that doesn't mean that you know menurkey is the end goal there's still something after it same thing when it comes to vegetarianism I was vegetarian for 12 years I never thought I could become vegetarian I became vegetarian inside of one year that was an accomplishment to me it took me 12 years to become vegan or a fully plant-based 12 years okay so it was a process it wasn't an instantaneous thing that happened overnight and that's all I'm saying is move toward the truth when it comes with anything that's the best that anyone could hope to ask of anyone else just don't move away from it or shut it out because it's not what you want to hear you think it's not what what you know is true for you instead of looking at what's actually true in nature according to natural law and that's the only natural law question that needs to be asked folks is this your property do you have the right to end the life to take it for what you how you see fit to use it when if that's not necessary that's the other argument you know meat eaters insist that it's necessarily going to show you the absolute complete ignorance of people especially on social media where you cannot even believe how this debate rages and it's politically polarizing okay I'm trying to take this out of the realm of polarization okay I'm saying yes there is a truth about it but no we shouldn't be beating each other up about it that's why I could have a conversation with a carnist and not want to kill them we could sit and have a conversation about it okay you know status I would say I'd say that's why we got to work on government more than this we got to work on ending government more than this I think the number one thing that will help the animal kingdom is the ending of government quite honestly I think ending government will help people to become so much more compassionate beings okay getting rid of the notion of human slavery will help us end the slavery of the animal kingdom for the militant vegans out there to think it's going to work the other way you're delusional you're delusional that you're human beings will never end the captivity slavery and torturing of animals until they end the captivity slavery and torturing of human beings first it's like putting the cart before the horse when it comes to free energy people think oh we're going to invent all this free energy technology based on Tesla's visions for the future and then humanity is going to be free wrong doesn't work that way putting the cart before the horse when humanity ends government free energy technology will emerge only then see that's good because we don't understand we have give up our religions you got to give up your religions okay government is the religion that's holding back the going away of the religion called carnism look at all the government subsidies of the meat industry how many tax dollars go to pain to have these animals slaughtered for human food so-called food it's the feeding of death to a population that they want to emulate death that's what it is and that's a ritual in and of itself and trust me when they're capable of getting away with it if they haven't already of feeding human beings to each other they'll be doing that too okay so we need to be honest with ourselves okay and yes there is a difference between taking fruits and plants and vegetables off of you know trees and bushes and shrubs and plants that they grow on and versus slaughtering cows and chickens and pigs pigs will often have the consciousness of dogs you know if not even more intelligent there's probably as intelligent as some young human beings that's how intelligent pigs are okay so if you can't see that there's a difference between these two things do it eating a plant-based diet versus engaging in carnism there's something seriously fuckin wrong with you I would say it's possibly a latent psychopathic tendency if you think this baby doesn't deserve more rights than a potato you're a psychopath if you can't see the difference in the complexity of life between a pig like this that is almost like a puppy a dog when it's a puppy okay versus you know taking some fruit off of the vines that they grow on and and consuming them fresh then there's really something broken in someone's brain and they've often bought again fallacious arguments that come out of pseudoscience when it comes to the plant kingdom and then they are trying to make that association to the animal which cannot be made it's a false equivalency I'm gonna play a video for you that shows you the compassion that can be displayed in the animal kingdom which is utterly amazing this is a dog who comes across in a market of unfortunately a fish that is already dead and tries to help it by splashing the puddle of water that it has fallen into over its body I mean look at that you know most human beings don't have that kind of compassion you know this is obviously some kind of a market where fish have been thrown on the ground probably in a third-world country somewhere you know he's trying to even determine whether it's still alive knows that it needs to be in water that's how intelligent animals can be you know knows that that animal belongs in water and is trying compassionately to put water over them I mean you know and we say animals many people insist animals don't have emotions or so or a form of sentience you know unbelievable you know they're doing better than we are in many cases these animals in their spirit believe me Gandhi said that a nation's moral progress can be judged by the way it treats its animals let me tell you something folks I think we should take a lesson from some of the animal life as we're not doing so well okay the barbarity and viciousness that people will kill animals with treating them like they just absolutely own their lives because some fuckin religion told them that they do you know just about every world there's there's factions of just about every world religion that believes humans own all the animal life on this planet and can take it whenever we whenever and however we see fit to take it and nothing could be further from the truth see human beings aren't doing so well when it comes to their moral progress because we're constantly lying to ourselves and we're constantly trying to make all these different justifications for our behavior for our criminal behavior okay for our immoral and often criminal behavior from carnism practices all the way up to genocide okay because it's bait it basically one is the same thing as the other believing that you own life that you do not and that you could take it as you see fit one form of twisted religion leads into another form of twisted religion carnism will eventually pave the way psychologically and spiritually to eugenics it's part of why there's so many you Genesis believing that well here hey if human beings have been given the me dominion over the whole animal kingdom why not the human Kingdom as well after all they believe human beings are just any any other animal and what is that belief called that's called Satanism one of the tenets of Satanism is that human beings are just like any other animal and in many cases are worse than other animals and I'll tell you what that part of it is true that in many cases human beings are worse than other animals but I don't believe were just any other animal we have the capacity to understand the difference between right and wrong behavior we have the capacity for changing who we are mentally and psychologically and emotionally and spiritually so what does justification mean when we break it down into its etymological elements you want to know what a word really means not just a Miriam Webster dictionary version but you want to get down to the real root of what the word was intended to mean by the people who put language together from its older roots in older languages jut the word justification comes from the latin noun yes yes URIs which means right or law where we get the word justice and jury from okay and the word the Latin noun the Latin verb fetch array which means to make or to create so when we put them together to make a justification literally means to create a right to create a right to invent or make up a right that does not exist so when we are justifying immoral behavior we're saying that a right exists to do that immoral behavior when in fact it does not we made it up we invented it it's a religious belief here's all the justifications for carnism and there's many more these are some of the most popular ones the apathy and ignorance justification oh we as human beings have our own problems we don't have time to worry about whether animals suffer or not just ignore it or don't care about it at all who care that's them this is us you know the apathy and ignorance justification I'll just ignore what's going on again I'll post uh if I can find one now Earthlings the Earthlings documentary with this podcast in a related video section the people who haven't watched Earthlings don't understand what eating meat is or even just generally using animal products period is you don't understand the colossal suffering that you're contributing to or you don't care or you believe the lie that we have to do that when we do not it is scientifically proven you know and there's endless places that people go can go to look that science up you know I'm talking about the moral aspect of it here if you don't want to do that homework that's on you the fundamentally flawed idea of the natural order justification this is believing that you know natural law means the Darwinian natural order which it does not well the other animals kill other animals for food so why shouldn't we do the same to them this is believing that animal standards for behavior should be applied to the human domain okay social Darwinism in other words the natural order the survival of the most ruthless which oh why shouldn't that just happen in the human Kingdom why not just eat humans then since they eat other animals why shouldn't we just eat other humans right cook that baby up put him on the spit and roast them up over that fire why not right no cuz we're just other animals they kill and eat other animals why not just kill and eat other members of our own species why not you know this is how ridiculous people who make this claim sound and they're often scientism Asur religionists almost invariably these are the two groups again the two polarization dialectics than we've talked about endlessly on this show people who believe in science as being the arbiter of truth and people who believe in religion as being the arbiter of truth both equally have their head firmly up their ass and will probably never get it out till the day they die and that is exactly what is driving the harm of this world religious thought the next justification the false religion justification perfect timing God gave us dominion over these animals so that means we can just murder them and use them as we please because we have dominion over them yeah right mm-hmm you know just believe it because your book that was written by the Pizzo dynasty of Rome you know there was one of the most influential cult families you know under Constantinian rule you know and after you know told you that that that's okay you know the way that they handed down the Christian religion Constantine II

Anna T is what I like to call it you know with it with a nice helping from the Pizzo family the Pizzo you know bloodline the next justification the 1984 doublespeak justification don't worry this one was killed humanely as if there's such a thing as killing humanely hold on a second I'm gonna run this not big knife across your throat I'll do it humanely great I'm just gonna take your life when I don't have the right to but it'll be humane you know 1984 double speak we can main make words mean the opposite of their dictionary definitions killing and humane yeah the separation worldview justification they're not conscious or aware like us so it's okay to kill them for food you know I've just proven that's not true in the video I showed and if that doesn't prove it to you on your hearts broken not just your brain but your hearts broken and a part of it is that's what the problem is folks part of this has nothing to do with somebody's ability to even think properly it's their ability to feel properly has been destroyed there's no heart based intelligence and then they want to justify why they want to continue the practice by saying well oh plants are also conscious no they're not conscious in the same way and no they are not the same forms of life and no they do not have the same level of complexity ssin and no they don't have this spirit plants do not have individuation they're not souls they're connected to the earth where I'm gonna talk in depth on this and explain to you a book that really should be read and not just that book but many many other books you know but I think you to really understand the dynamic that's taking place regarding life in general you have to go into the occult you have to go into the occult realm and look at the hidden dynamics the unseen dynamics regarding the spirit and most people don't even think that that exists because of how rooted they are in materialism how connected their ego is to the flesh and all things rooted in the worldly domain they can't even think at any level spiritually they don't even believe there is anything to spirituality at all and then we have finally what I call the no justification justification or in other words the actual truth I do feel bad but I could never give up my meat it's just too tasty see this is what it really is about folks it's about feeding the animal dynamic in us just feeding the desires the lower base desires in us as human beings instead of trying to work with those desires and those appetites to transmute them into something better which most people never grow spiritually enough to learn how to do and again it's not an instant thing it's a process this is what people fail to understand you don't need to achieve enlightenment in a day you don't need to go to a plant-based diet in a day it's a process you just need to be honest with yourself that there is a goal and a destination to get to and yeah it is goal based it is destination based all the people say oh it's only about the process no not true either that's false pseudo spirituality it is about accomplishing something see this is why I don't like the Eastern traditions nearly as much as the Western mystery traditions Western occultism has done more for the advancement of the human spirit and real spirituality and all the Eastern traditions put together ever could in the entire time that they existed and that's because the Western occult tradition is reality based and it deals with the shadow work of not trying to be ascetic and push everything off and and push it out and just meditate etc it's about working with the shadow it's about calling the shadow up bringing it right before you and making it as real as possible and then saying let's go let's do battle let's see who's stronger and if I fail and I find out I'm not as strong and I'm weaker then I fail and I find that out and I know what my work is to do the east one that the Eastern traditions will never never teach that they never have as far as I'm aware and I've studied them all okay but they'll never teach it like that they'll never teach that internalized shadow work not in the form that the Western mystery traditions will not with the honesty that the Western civilization mystery traditions will not with the honesty of it okay and that's that that's the calling of the student of the genuine occult the real occult okay most people have never even laid a finger upon it most people have never touched it a day in their lives and never will they'll die in their ignorance the vast majority of human beings will probably die in that level of ignorance but for those who really want to go further into it you have to understand to understand this in its fullness you have to take it out of the realm of just science you have to take it out of the realm of even just empathy and compassion and you need to study it from a holistic occult perspective and that is the only place you will ever find the truth regarding this dynamic and I cannot just teach you that that is a lifelong journey of study that's what Hermeticism is sequestering yourself from the rest of the world to study and that's why most people will never do it like I sequester myself from the rest of the world to make slide presentations like this after what I've sequestered myself from the rest of the world to learn hard-won knowledge through time and attention and care you know all of those justifications just form a big wall to wall us off from where we could be going and the world better world we could be making here at all the justifications are here oh there's the biggest one on the top left getting ready to collapse you know morality is subjective moral relativism Oh lions eat meat so why shouldn't people oh maybe because we have 100 percent completely different biological makeup evolutionary pathways digestive systems teeth you know built completely different as animals period plants have feelings so why should we just eat animals because I applaud what we're doing harm to the plants no plants don't have plants have instinctual mechanised instinct response mechanism to environmental stimuli that is not the same as feelings it can be confused as feelings but they do not have the bio complexity to experience emotions in the same way than animals do in the animal kingdom I'm sorry but nothing that anybody sever says or any pseudoscience presented will ever make that true okay they are not the same as animals and never have been and never will be that's why they're in different kingdoms one is the animal kingdom one is the plant kingdom Animalia and plant i okay we need meat for protein going to prove to you that's not true absolutely untrue okay there's great sources of protein that are highly bio absorbable that you could do that has nothing whatsoever to do with killing animals there it's for their free-range oh yeah I'm gonna show you a free-range farm in a couple minutes and what people think you know actually I don't know if I'm gonna left that slide out but you know what people think of is free-range or just chickens crowded and extremely crowded barns on their unsanitary conditions just because there's no cages in them you know our ancestors ate meat yeah once again in instances under extreme dietary pressures probably brought about by earth cataclysms that's not our situation and it was meant to be done in a survival situation hey folks if I'm in a survival situation am I gonna go try to hunt some smaller animals that I could take down and and and eat yeah I would do it I'm gonna not gonna lie to you because it's true that's what I would do to sustain my life you want to know why given me stayin alive to propagate what I know and a squirrel stayin alive I'm gonna choose myself over the squirrel in a survival situation but given not being in a survival situation I'm gonna leave the squirrel the damn squirrel alone and let him go forage for his nuts in my backyard okay and and you know build his little nest out of foam in the backyard okay it's not bothering me you know that nature be what it is let Nature lie what do we need to constantly be disrupting because we can't learn how to leave other life alone that's what it's all about that's what it's about with human slavery regarding government people just can't leave other people alone we can't just leave the animals alone real freedom is the right to be left alone and we should respect that right for all other sentient beings leave the animals alone folks there's plenty of human beings that need hunting trust me you know we want to sell we need our guns for hunting yeah we need our guns for hunting a lot of human beings that need to be hunted leave the animals alone they didn't do anything to harm us one person can't make a difference untrue totally untrue I'm a living example oh they're grass-fed as if that makes a difference to taking their life what if you were on a desert island yeah but we're not okay the whole what if justifications you know humane slaughter there's that 1984 speak they're bred to be killed yeah yes they are in many cases and that's the the wrongness of it it's the circle of life well there that Darwinian natural order you know I'm gonna talk about hey what if that's the case why don't people just lay down if alien life comes here be the first on the plate you know that they they feel like we're a good source of protein for them well then you'll be the first on the plate I'll get to that God put them here to kill well yeah God get God would do that to give dominions or us dominion over the animals to take their lives and find it in the Bible you will not be able to do it because it's not there cuz I've read the whole damn thing and it's not there it ain't in there so-called Christian fake-ass Christian it's not in there we have canine teeth yeah which are constantly getting smaller practically generation after generation after generation you know not just that our canine teeth are basically to chomp into harder fruits and vegetables so to be able to rip pieces of them off okay they're not the same canine incisors that like lions and tigers big cats bears etc have eating meat is the natural order of things our bodies are designed to eat meat just look at these incisors if we didn't eat meat where would they go animals where would they all go besides plants feel pain right and tigers eat zebras and and and you know this is a vegan street meme the arguments for eating meat really need to evolve and that is what we look like when we make these justifications we look like you know primitive primitive beams you know and this is an insult to our you know cro-magnon and Neanderthal you know brothers and sisters from our ancient past really because they probably knew better but people want to keep making excuses it's that's all it is it's called not being honest with ourselves ladies and gentlemen that's all it is all it is whenever people are gonna have a problem with this presentation and say oh yeah he's full of shit about this this this and this I know better about regarding this it's all lying to yourself it's all all lying to yourself it's all lying to yourself all of it every bit of the justifications that's all it is and that brings us to this and this is why people can't get out of their case of the egos they can't get out of it I just ran across somebody posted a meme from myself from the past on Facebook and I was one of my favorite memes that I've ever seen it said it's not so much that human beings have an ego it's not so much that we have an ego it's that the ego has all of us see that's what it is the ego has us it controls us and we can't escape from it and what is the ego the force that tells us we're never doing anything wrong we don't need to change you can keep doing that here's another justification for why that immoral behavior is okay okay see what Earthlings showed me is that I was participating in immorality and I don't want to contribute to that level of suffering because if you watch it and you watch how visceral the it's designed to elicit a visceral emotional response deliberately because when you actually see life being taken the proper visceral emotional response is one of repulsion and one of wanting that not to continue wanting it to stop and if you don't feel that you're broken at the soul and heart level and I would argue your brain is also broken that's what's turned your tendencies towards psychopathy going back to the slides this is all about the occult initiation what I've called beginning the process of beginning the spiritual journey and what is the first step stop lying especially to yourself speak the truth even if you aren't living up to it say what's true you can say this is the truth but I'm not there yet see that's all that's all right me and my friend who attempted vegetarianism not full veganism of vegetarianism and failed at it at least could say I know that this is the better way to live now I couldn't do it guess what you're honest with yourself you're not lying to yourself and guess what that puts you 99.99 percent ahead of the rest of the human world in my estimation okay because most people will never admit that about themselves their ego is too calcified and in the way so that's the first step of initiation we've covered the others but the first step you don't begin until you make that first step of saying I'm not gonna lie to myself anymore here's the justifications put into the mouth of alien beings eating a human being for their Thanksgiving dinner we have our own problems no time to worry about whether they suffer they kill other animals for their food why shouldn't we do the same don't worry this one was killed humanely God gave us dominion over them that means we can murder and use them as we please they're not conscious or aware like us so it's okay to kill them for our food well I do feel bad but I could never give up my meat it's just too tasty these are the justifications that are used now all you have to do is put yourself in a position right where it's being done to us by what we would consider a higher order or they would consider a higher order of beings than we what we are you know here's what I say to all the people who make all these justification arguments and especially you know who talk about you know well oh we have to survive off of these animals you know they're our source of protein and they're our source of energy and fuel and that's what creates health imagine if a species decided to show up from space in monstrous craft and you know okay they came through a wormhole right they came through an einstein-rosen bridge wormhole and then there their technology malfunctions and they can't reopen that wormhole to --home said they're stuck in our neck of the woods in our galactic neighborhood and they come across earth and they say oh what tasty species live on that earth on that planet you know this will fuel us and give us a source of protein until we can get our wormhole technology repaired so let's go down and start you know harvesting the planet of these humans and taking them in ours our food ok well in in the case of the person who believes that because we're more advanced beings that we've been given dominion over these lower creatures that we should just be able to murder and eat them you'll be the first on the aliens plate then I guess you would go voluntarily you would not say that if there's anything morally wrong with doing that to human beings and you would just say because they're higher order beings than we are we're much less complexified than they are well boom you just put yourself right on their plate and you tell them to dig in how many people would do it if it's them in that situation a big fucking goose egg that's how many that's how many would offer themselves up well you know what I don't know maybe I shouldn't say that because humanity is pretty damn self-loathing and maybe there would be people who would just say let me be your food after all isn't that what's really being done now isn't that what's really being am I really talking about a hypothetical situation if you really take my cosmic abandonment presentation into account and you really have done the work researching ancient accounts and ancient evidence for non turn on earth originating beings who are really involved in interfering with the human natural evolutionary progression and you realize this is exactly what's happening now it's not a hypothetical situation we are their source of food actually and this is a farm and that's gonna answer one of the next questions that's going to come up ok but folks the reason that we are going to constantly be enslaved and farmed which is what's really happening on this planet it's one big farm it's actually a series of farms you know the nation states are just walled off farms that's all where one ruling-class you know rules of certain animals and then on the other side offense another human farmer rules another set of animals that's all that's all the earth really is folks it's a big set of farms big set of factory farms and this is because the universe is obeying as it always has and always will the law of Correspondence it is one of the natural laws embedded in the universe that which is above is light to that which is below and that which is below is like to that which is above shortened as above so below as below so above the universe is self-similar across all scales of existence and with regard to all forms of behavior as we farm farming will be done unto us as we consume animals we have no right to take others will consume us this scene does not depict the natural order as many will insist that it does Oh all life eats other life all life has to kill other life to live untrue not true you're not killing plant life to use vegetables and fruit to sustain oneself it is a continuous growth cycle you're not taking an individual in life as we're going to talk about plants are an earth consciousness that is embedded and bound to the earth and when you clip things off of plants and or out of the earth it is like taking hair out of a human being or cutting hair from a human being you know obviously trimming it is better than plucking it out that's why people make the argument we should be moving more toward a diet where you're not taking the plant from the earth well you're using what it produces I'm not that much of a purist I still eat vegetables and fruits you know and not seeds berries etc okay and forms of you know some human modified foods that are protein based okay so this scene does not depict the natural order rather it depicts the chaos that we have chosen and created for ourselves through false belief systems or religions so this middle fish that is eating the smaller ones but also being either eaten by the big fish will be humanity for as long as we continue to engage in fundamentally flawed ideology such as carnism what we do unto others will be done unto us and that is a universal law that can never be broken that's called the law of Correspondence I believe it is the the third of the hermetic principles behind mentalism and polarity because what this is all about folks is heart based intelligence this is where people fall short they're always trying to reach the understanding of something from the head from the brain only and that can never be done not with with true holistic intelligence you can only maybe come to some conclusions accurately about things intellectually but only so many things and only for so long at some point it has to go to the dynamic of the heart energy and this is where so many of us fall short because we're not growing in spirituality and heart based intelligence and many people think there is no such thing as real conscience or it's subjective where there is no such thing as real spirituality or there is no such thing as enlightenment you know that's that's how solipsistic the world has become we can't just put ourselves into the heart energy and just feel whether something is right or not compassion is so lacking in human beings we become technologically advanced and practically compassionless creatures even when we see bad things happening to human beings let alone 100% totally innocent beings that have done nothing to harm us like the animal kingdom that we're supposed to be stewards of like parents are stewards under their child under their children we're not doing any kind of a good job as stewards of this planet or the other creatures that live upon it as a matter of fact we're really fucking it up badly and that's because we can't step into the heart and that's all this is about that's all it's about that's that that's the crux of all of this is heart based compassionate intelligence which most people fall short of and want to make excuses and justifications for why they're not developing those capacities so what I want to do is talk about now actual nutrition from a dietary standpoint when it comes to a plant-based diet versus a meat diet because see not only is what is true moral what's true is also good for you it's what's best for you can you eat a meat-based diet and be healthy yes but only because you're really taking in the nutrients secondhand from what the animal consumed that's why but you're not really doing any real health benefits to the body by eating a large meat largely meat-based diet as I'll get into a little bit but I'm not gonna make this the crux of this argument you want to stay as close to the source as possible folks that's what this is all about and you know what you want to know what the source of it all is there's one source of all of it folks and without that there's nothing and that is the Sun the Sun is the source we don't even know what the Sun is we have no idea what it really is we have no idea what the universe really ultimately is from a spiritual dynamic but let me tell you something folks something is powerful is something that can sustain all life in an entire solar system and that's what the galaxy is really comprised of is in and so far of it it's it's the magnitude of its mass and that's what's making life possible you better damn well believe the Sun is something we barely even scratched the surface of understanding how and why it is the source of life so if you stay as close to the source as possible okay that's where you're gonna find optimum health and nutrition that's why eating whole fresh fruits and vegetables should be the staple of one's diet unmodified from the earth see there are certain things you do need to cook potatoes beans etc you know legumes beans etc and that's you use them sparingly but if something that you could take right from a vine you know or right from the earth and eat it that's what you want to stay as close to as possible when it comes to your diet and that's where energy and nutrition come from see what these contain is phytonutrients micronutrients okay plant-based micronutrients and we get them when we break it down by chewing by mastication chewing the food breaking it down getting the water out of it plants in their root system have an uptake system into the roots of all the nutrients in the soil if the soil is nutrient rich and has to be acidic the soil for nutrient dense foods to grow that's part of the whole chemtrails agenda is to you know the geoengineering agenda is to spray alkaline earth metals so all the things they spray are in the alkaline earth metal group on the periodic table what that will do is alkalis the soil and an alkaline soil cannot grow nutrient-dense plant food that's what they want they want the food yet to grow but they don't want it to be nutrient dense that's why they're messing with the soil and the water table so the root system also acts as a filtration for the water it's almost like a distiller and a structure ER it brings it up into the plant material and then you have structured water in plant material this is why it's so healthy to eat it and juice it and blend it the more you break down the cellular walls of the plants the more that energy can get directly into the human bloodstream and then into the cells eating truly natural is not extreme a truly natural based diet for our nutrition of plant-based foods is not an extreme position as many will insist that it is Chadwell esel Esselstyn jr. md said some people think the plant-based Whole Foods diet is extreme half a million people a year will have their chests opened up and a vein taken from their leg and sewn onto their coronary artery some people would call that extreme you know coronary artery bypass surgery because heart disease is the second leading cause of death behind cancer well I'm sorry it's the first leading cause of death I think cancer is the second heart disease is the first and again it's because we're also not living from the heart and eating the way that we are eating what is the first organ that gets affected the heart does this is a direct law of Correspondence direct law of Correspondence it's not an accident or a coincidence this quote by Wendell Berry people are fed by the food industry which pays no attention to health and then they are treated by the health industry which pays no attention to food you know the food industry only cares about making its profits and growing as much food on the land that they have allotted to them as possible they don't care about what that's doing to human health they just care about the profit that comes with it largely not a total blanket statement some some organic farmers do but not many and then the health industry pays no attention to food because they want patients they don't want people healthy they want people sick so they could be treated and that's how they make their money and that's certainly how big Agra and Big Pharma work hand-in-hand to make their money and if you don't believe that again you're a naive fucking child I don't know what to tell you you know I mean I hate to just have to say it that way but sometimes people just need to hear it that way you don't understand this is all collusion and conspiracy done practically right out in the open in front of people but the naive children of our world do want to believe everybody has our benefit in mind and oh the world is just so hunky-dory and people wouldn't do that they're not psychopathic enough to do that no you're not psychopathic enough to do that but you are naive chump enough to believe them to believe those psychopathic people that they're trying to help you the food industry all they want to do is get you to buy more okay and the the pharmaceutical industry once you ill so they're working with the food industry to keep you that way so that they can sell you their products called pharmaceuticals and surgery and that's it that's it and that that process works glove in hand so part of why many people who try to go plant-based fail is for this reason they believe that it's an event that has to take place Oh Saturday morning I'm done eating meat forever I'm going fully plant-based okay no it's not an event it's a process it's a process that could take years it's a process that could take most of your life you you just move in the right direction and you contribute less to the dynamic of suffering you know we can get into all the dynamics of how yes plant-based diets do create less suffering in the world they are more ecologically sound and sustainable as well absolutely it takes like two football fields a year to feed one human being if they eat a plant-based diet in land size and being able to maintain healthy soil approximately two football fields it takes over 14 to 15 football fields to feed people one year with animal husbandry or animal farming okay that's seven times or greater the amount of environmental impact at least that's that's a probably a conservative estimate so part of why people fail they go cold turkey and they try to make their body adjust to a very very difficult to adjust to dynamic taking place within it practically overnight bad idea very bad idea I've always been of this position I've never told anyone see this is what people will say I tried to go vegan and I failed at it and it made me sick and I will always ask them how quickly did you try to do that they're like I just stopped eating meat one day and just went to the supermarket and bought nothing but you know vegetables and fruit and I'm like well there you have it that's why you fucked up that's why you got sick you know I mean imagine an alcoholic with the DTS with delirium tremens trying to stop drinking you you're you'll probably die literally you know you got to go into a detox clinic and probably receive I can't remember what the name of the drug is but you got to receive a specific drug to make your body handle the rejection that's gonna take place when it comes to the withdrawal you're gonna be going through and it's a physical withdrawal that can destroy your body that can actually kill you it's this say it's practically the same thing not as extreme but it's almost the same when it comes to trying to go and eat a vegan diet or a plant-based diet you can't do it overnight it has to be a gradual change and some people at the feet you have to feel that by doing it gradually and seeing what you can handle you know it's like it's like taking nee-san iodine some of them are stronger than others - you know a friend of mine took a dropper full of nascent iodine and like was so messed up for hours and hours you know couldn't settle down like you did like to send him off into a spin you know some people have more of a Constitution to be able to handle it you know you start with one drop and you see how you do with it then you move up to two then you move up to three you know it's like weight lifting weights you don't go for the biggest heaviest barbell in the gym you start small when you build your way up you know that's that's that's this is part of the ego where people want to do everything right away they want immediate gratification and immediate results it doesn't work that way it doesn't work that way with understanding the truth you have to read and study over a long period of time and get so much diversified information you can compare and contrast it to come to an accurate understanding of what's really taking place it's a life journey it's not an event here's why I get upset with people folks they never try to start they look at it and go oh that's too hard fuck that goodbye don't bother me with that anymore because they don't want to challenge themselves to be better than they were yesterday or to be better tomorrow than they are today that's what I have a problem with I would never cut somebody down for not being vegan but saying that they think it's the right way to be and they want to move toward it I would never cut somebody down from being vegetarian but not vegan when they're trying and they're reducing the suffering of animals I mean you know the understanding that we have to allow for time with any process even the process of learning what anarchy really isn't moving toward it that's a process - I'm not expecting anybody to get that overnight I didn't get it overnight but you got to be moving toward it you can't be saying I'm just gonna sit here and stay here I'm pitching my tent halfway up the mountain and screw the peak I don't want to get there no wrong you have to want to get there that is the destination it isn't about just excusing people's behavior who are halfway errs that would be like saying hey men are kisses that's that's the perfect path no it's not anarchy is the goal there is a specific goal and it's not menarchy it's anarchy just like there is a specific goal it's to eat a plant-based diet and to even go beyond that that is not the end-all you know who says anarchy is the end-all of enlightenment and spirituality it's not it's the beginning that's the transformational point that really will set us off on our own an even further journey and it never ends and that's why people have a problem with it they have a problem with infinity because infinity is infinity is a part of the notion of God which most people have a problem with just as death is you know all of these things people don't want to wrestle with because they don't want to turn inward and Lee and look at these dynamics and sit up at night thinking about them alone with with no other source of distraction that's what most people can never do you know they're not comfortable enough with themselves in the world to be able to do something like that that's really where the shadow work lies people you know and I see too few people doing it so the the the beginning step is stop lying to yourself acknowledge what is the truth but from a moral perspective then look at yourself in the mirror and say where am I at in this process and be okay with it as long as you're acknowledging what the truth is if you're not acknowledging what the truth is you shouldn't be okay with it acknowledge the truth and then start from where you are at don't try to jump 10 steps ahead don't try to jump jump 10 light years ahead how about you try to jump 10 centimeters ahead how about you put one foot in front of the other and see how it goes you know that's called a balanced approach to changing which most people never take they what they take either the total extremists position or the I'm not doing anything position and both of those put things will get you to the same place nowhere so don't go cold turkey to be a you know a little bit of a funny pun there take a plant-based diet and a stepwise progression I would never tell anybody to do a cold turkey because I'd be doing harm to them by telling them that okay your body is gonna go through changes most people do it the wrong way by doing it too fast and too extreme and their body can adjust it can't keep up and then they develop some imbalance and it makes them sick and then they blame the plant-based diet on being sick but when they caused it and the other thing they do is they don't eat the right foods they want to go and eat all sugary starchy foods just cuz they don't have animal products in them that's the wrong approach okay you want to eat healthy whole fresh fruits and vegetables largely unmodified from the from man as nature intended and grew it in the earth you do that I'm telling you you will never not be healthy you transition to that kind of a diet okay let's move on and this is another thing that I think people think of when they think of veganism because there's so many militant vegans and I'm here to tell you militant veganism is hurting the cause of veganism absolutely I see it every day I see it happen I see how people talk to and treat other people who aren't vegan and I'm telling you by being a militant vegan you are hurting the cause of veganism yet as offended as you want get as offended as you like that's also the truth okay most people see all vegans as assholes just because of the militant vegans okay and there's a very big proportion of vegans that aren't assholes that are doing the right thing and trying to help transition people over to the right way of being when it comes to how we eat and the militant vegans are hurting that cause because of their over-enthusiastic attitude and that's putting it politely okay they think that you know you know okay we can treat humans as badly as humans or treating animals well you're not doing any good by projecting that attitude okay first of all look when it comes to statism I may have an extremist attitude okay but guess what we have to solve the human slavery problem we call it before we can presume to solve the animal slavery problem that's that's what the great work is it's help yourself first right enlightened self-interest so that you are better and you are in a more spiritually advanced understanding and position in life then you can help those who are still below you and haven't made that journey yet see you do that in the same way when you do the great work with human beings you have to help yourself first then you helped other people I couldn't start doing the great work until I helped and fixed myself then you'd start doing the work toward others and you still refine yourself while you do it it said you never reach perfection you can only strive toward being perfect I'm not perfect when it comes to anything I make mistakes in just about everything I do and I acknowledge them I try to learn from them and then I move on and try to do better than I did be previous ly it's the same that's the same approach we should have when it comes to a plant-based diet or veganism being militant about it insulting other people making them you know saying that you know we should kill them just to save the animals is not going to help the cause you want to be militant about something being militant about human freedom how about that you know then we'll help the animals when we free ourselves up and guess what it'll be infinitely easier because you'll see the mindset that will change when we end the slavery called government will create such a colossal chain reaction when it comes to consciousness regarding animals that you you will scarcely be able to believe what we will be able to do when it comes to the liberation of animals once we liberate ourselves and so don't put the cart before the horse get it in the right order and understand that we have to free ourselves before we start you know worrying about permanently freeing all animals it's part of the process though ok you know many have said if you're not a vegan anarchist you're not doing it right ok you know we have to move toward being a plant-based diet which is the only voluntary non-violent means of sustaining ourselves right now in the form that we are in at some point hey we could probably all move toward a fruitarian diet at some point we could all move toward living off of just breath and light it's possible I know people I actually know people who are doing it I know people who have gone from being total carnist s' to being vegetarians then vegans then fruitarians are doing nothing but sustaining themselves from light from the Sun um I'm not telling you I think that it's possible I'm telling you I personally know human beings that have done it and have sustained themselves we're only losing slightly marginal amounts of weight and still maintaining optimum health really coming to their base line of weight that is optimal for their body type okay it is absolutely possible to do not for everyone right now in the state that they are in but being at least vegetarian is absolutely possible for just about every single human being and then at over time that can be transitioned you can transition to fully plant-based forgoing any animal by-products and it's a process you don't have to do it overnight I've never claimed that you do and I never will but the militant approach isn't helping the cause extreme fad diets don't help the cause either and they have nothing to do with the truth about nutrition certainly not optimum nutrition and you have a million of these the Atkins diet the South Beach diet the grapefruit diet the zone diet the power protein diet the flush plan you know cabbage soup you can go on and on and on about all these things the macro diet the macro by biological diet that's another one you know then you have I'll be talking about them actually actually right now this includes all the keto diet and the Paleo diet these are the big fads right now these are the huge fad diets okay all of these fad diets have zero in the form of a balanced approach to holistic nutrition and there I said it okay you know what keto comes from ketones in urine you know what that means that means there's no sugar in your cells okay that's why type 1 diabetics when they develop ketones in their urine and their blood sugar is really high the sugars the glucose is not making it into the cells and it's staying in the blood that's why the blood sugar is so high when they take a glucose reading in the blood so what you're doing is you're putting your body in the state of ketoacidosis that means it's in an acidotic state it's one of the most dangerous things to stay in for your health what does what does an acidotic state start the body into a chain reaction of doing because it's not getting the fuel that it needs through glucose which is the fuel for the body and then the brain along with certain fats okay it starts to turn on the adipose or fatty tissue and that's why these diets make you lose weight now the Paleo diet slightly different because it restricts a lot of the things that it does in the keto diet but it also includes other foods that were unprocessed and were available when you know we say human beings were hunter-gatherers and before animal husbandry and and uh you know farming practices agriculture okay basically the ancient Paleolithic diet of Paleolithic man again another fad diet that you know keeps meat and you know says that we you know should eliminate anything that needs like partial cooking like corn or beans or things like that look my whole point when it comes to nutrition is if it grows in the earth it's not something that is there you know it's not something that is there to be shunned okay yeah there are certain poisonous berries and poisonous plants I get that okay that's not what on those those those anomalies are not what I'm talking about in general if the earth grew it it's something that we can put into our body even if we cook it a little bit okay you know so like beans are gonna have to be cooked potatoes are gonna have to be cooked I'm not saying use them as the staple but it's not like like there are macro biological diet people that say all bananas are poison and should never be consumed you know how dare you put a banana in a smoothie or every form of mushroom is a poisonous object and should never be consumed this total extremists irrationality okay I mean some of the macro biological diet followers are some of the craziest out there but so are the paleo and really the keto people really don't have it figured out what harm they're going to do their body long-term you can go look at the keto thing you'll see people have talked about before keto during keto and after keto and you'll have a slightly heavyset person who has a lot of body weight on them a lot of fatty tissue then during keto they'll slim down and then after after it you know they'll way gain a lot more weight back okay because it sends your body into an unnatural cycle you cannot put your body and leave it in ketoacidosis the acidotic state means that the body is actually eating itself okay it's it's just an unhealthy extremist approach okay so all of these fad diets are not gonna maintain optimum health you know it's gonna maintain optimum health true natural nutrition from high density water and nutrient foods that grow in the earth naturally without human modification that's the eternal truth of the dynamic when it comes to nutrition folks and no one will ever convince me otherwise because that is how nature intended it and that's how nature works so and secondly many many people including myself are absolutely living proof proof you can live strong and healthily eating a plant-based diet okay so that's my take on fad diets I want to show you this book because along with Earthlings this book is probably the best book that I have ever read on holistic nutrition okay now people can say whatever they want about Kevin Trudeau he's in jail right now now I'm gonna say he's not in jail because of what they claim that he's in jail for which is fraud because of a diet program that he released okay he's in jail because the rulers of the whole world but specifically those who control the pharmaceutical cartels and who controlled big Agri cartels wanted to put this guy away and make an example out of him for largely this book natural cures they don't want you to know about it's probably a six or seven hundred page book most people haven't read it and most people won't just like they won't read the next book I'm gonna tell them the read okay but let me tell you something throw in the garbage can anything that you think about Kevin Trudeau I don't care whether you think he's an honest human being or a dishonest human being okay somebody who did dishonest business practices could still be telling the truth about food okay so this is where discernment comes into play where you can say maybe he did do dishonest business practices when it came to money but that does not negate what he said regarding human nutrition and food this book woke me up to the dangers in factory farm food and all the preservatives and additives and chemicals that are in most packaged foods that are on the supermarket shelves okay it's long it's well documented and detailed he goes into just about every dynamic of food and nutrition that you could possibly imagine in this book it is it is it is a text book it's not like a textbook it's a text book okay and it reads like one alright but if you make the time to read it cover-to-cover all the way through you got to read it all not skim chapters not read the headlines of the chapters or go to the images and read the captions read it cover-to-cover and if you don't come out with a transformed understanding of what's going on with human food in the modern world I feel sorry for you because this is the book that blew the top of my head off when it came to understanding what's really going on with food and and really making the very beginnings of my dietary changes and subsequent body and health changes okay so why this guy is in prison is because they wanted to make an example out of him gave him a 10-year sentence for claiming that he was involved in fraud regarding a diet program and then saying he was in Caen of court that's why they added so many years to the to the prison sentence because they were saying he didn't acknowledge the authority of the judge and didn't cooperate with the court rulings of quickly enough so they ruled him in contempt and added years to a sentence and who gets 10 years for any type of financial fraud and contempt of court and guess what no parole he's been in there since 1999 saw 2013 he went to prison in 2013 he's not gonna be out until 2023 okay and they're gonna keep him in there that whole thing with no parole the whole sentence murderers get parole and within three to four years in some cases murderers that have killed other human beings to take something from remember just because they wanted to kill them murderers come out come out of prison on parole in like four or five years in some cases this guy's already done almost seven years on his sentence and it's gonna probably be in there all ten it's a disgrace and anybody who's not angry about it isn't paying attention to what's going on in the Justice so-called justice system and the immoral injustice system in the United States because big Agra and Big Pharma made an example of this guy you want to know why else one of the one of the most knowledgeable cultists on the planet regarding the real occult for people who are unfamiliar with his work you want to know why he's knowledgeable about the real aspects of the occult because he was involved in the occult not because he read about it in books because he joined an occult organization called the great the Brotherhood of the great white temple okay or the temple of the great white Brotherhood I should say he joined an organization called the temple of the great white Brotherhood is the actual name of it they simply call it the the great white Brotherhood were simply the Brotherhood okay so he was a member of that organization and he learned about both the dark and light aspects of the occult from the inside just as I learned of the dark aspects of the occult from the inside in the Church of and other satanic organizations so here's the one of the first things that I always talk about about people don't understand when they claim to be enlightened or they claim to be spiritual or they claim to understand freedom they don't understand any aspect of the occult they don't understand any aspect of occultism at all and that's why they're completely asleep they're not awakened you know everybody wants to throw this word walk around I'm Loki's woke yours were woke as a bag of dog shit on somebody's porch is about how woke you are because they don't know any aspect of the occult and haven't learned any part of it and until you do don't you throw the word woke or awakened around because you're no part of it now here we go when it comes to nutrition the ridiculously tired but where do you get your protein cliche I mean how many times have we heard this fucking thing huh how many times how many more times that we need to hear this fucking thing where do you get your protein from how about spinach kale beans peas endlessly and go on and on peanut peanuts nuts in general you can go on and on and on the protein Wars an eight ounce steak is about 1.8 ounces of protein with only 0.27 ounces of usable protein for the body products like spirulina rice protein and yellow pea protein especially the pea protein provide five ounces of usable protein for each eight ounces consumed I'm going to show you a pea protein based product that you will not believe I mean look at the meat substitute products that are coming out based on P protein like you know the impossible burger or the Beyond burger you know I mean you know not to say you should make that any kind of a staple of the plant-based diet but if you do have a craving for meat burger you know then you know that's something that acts as an acceptable substitute providing lots of absorbable protein without harming animals too be made in the next tile four ounces of ground beef contains 20 grams of protein in 320 calories but it is high in acidity meat is very acid forming again the plant-based diet is an alkaline forming diet when we take fresh whole natural foods into our diet we are putting alkaline forming foods into our body it doesn't matter whether their pH like an oranges pH is very acidic but when you take it into the body when you eat a fresh orange a fresh organic orange you are taking an alkaline forming substance into the body okay that citrus fruit is alkaline forming and disease cannot thrive in an alkaline environment in the body internally when the body is alkaline internally so for ounces but with the ground beef there you're also adding high acidity high cholesterol saturated fat no fiber and header' hetero cyclic yea heterocyclic I me a means not really sure what they do but you know I'm assuming that that's some sort of a negative amino acid 4 ounces of black beans on the other hand contains the same 24 grams of protein only 120 calorie lower acidity no cholesterol no saturated fat and 9 grams of fiber what and tons of phytonutrients and you know nobody's gonna tell me sitting down and making a nice black bean burrito you know with other vegetables in it isn't a great lunch or dinner you know where we don't need what we think we need when it comes to animal products it's untrue you know then the normal natural necessary argument doesn't hold any water human beings are scientifically proven to be able to survive there's a book I'm gonna see if I can maybe find it for the discussion or question session next week probably um it's called we don't need meat I found it in a thrift store and it's a whole book talking about the whole myth of the need of eating animal meat you know it's sorry it's not normal natural or necessary it's a religion it's a religious belief system that we are indoctrinated and inculcated into since the time we are young then you have the book but plants feel pain to this argument which is all too common okay no plants don't feel pain in the same way animals feel pain as I explained before plants have while they are connected to the earth an instinctual mechanised of instinct response mechanism to external environmental stimuli okay they don't have a central nervous system a spinal column like a vertebrate animal they don't have the brain of the animal they don't have the the sense sensory organs that an animal does and they certainly don't feel pain in emotion the way that animals do because they are less complexified organisms than our animals and that's why they are in a completely different kingdom of life than our animals so stop making the argument that because people believe erroneously that plants are sentient which they are not animals are sentient plants are not okay and here's another thing plants need to stay connected to the earth where animals do not we can exist independently from the ground that means we can move that's why we are imbued with spirit that's what it means to be an animal not to have to be connected to the earth itself you remove a plant from the ground you have to take some of the ground with it okay the plant has to continue to survive in the earth in the ground okay so it's a less complexified form if you really want to study the the differences between plants and animals and human beings you want to get into the occult you want to get into readings in Freemasonry and Rosicrucianism in pretend Kabbalah in particular the Western mystery traditions okay and they'll talk about the evolutionary progression all the way down to the mineral kingdom mineral then up to animal I'm sorry then to plant then up to animal then up to human and then beyond human okay so you know just do your basic biology and do a basic comparative anatomy study between plants and animals and they're not the same never have been okay and yes it is acceptable to cut that cucumber off the vine and consume it where it no it is not acceptable to shoot the cow in the head and eat it okay there's a difference and if you can't see it there's something broken in your brain in your heart that's my that's my final word on that here's the book that I recommend for people who really want to get into the differences in nature between plant life animal life and human life and again skimming sections is the wrong approach you have to sit down with this book in a quiet environment and read it cover-to-cover over a multi-day process or a multi-week process if necessary okay it's it's it's about sitting with the information going through all of it consider everything the author has said and some things I don't agree with okay but I'm telling you right now if you look into Freemasonry approach on nutrition Rosicrucian approach on nutrition Kabbalistic approach to nutrition the Western mystery occult tradition approach to life in general you're gonna find a common theme they all recommended less harm to the animal kingdom why and this book is called the Rosicrucian cosmo conception by the author and famous Rosicrucian us from the early 1900's named max Heimdall that's ma X and his last name is hind L hei n de ll I will be posting this book with the podcast in searchable PDF format I've not been able to locate it as an ePub an electronic publication text with reflowable text if anybody does have a copy of it please you know shoot it over to me you know or make me aware of it send me a link or something but I do have a searchable a nice nicely scanned searchable PDF version which I'll post with this podcast so in this book he talks about the progression of the soul oles and the forms the bodily forms of the many different forms of the body of the mineral kingdom the plant kingdom the animal kingdom and the human Kingdom okay and he goes through all these different cycles and progressions that are undergone by life in this book and he talks about the differences between plants and animals and human beings and when you understand plants are part of the earth spirit they're connected to the life of force of the earth I mean as are we all to a certain extent but we are animals are more individuated than plants and more complexified life form and therefore we should strive to do less harm and not depend on them for our food sources because of the etheric energy the killing of a being with the soul is going to fuck is going to put into the the etheric field of the earth and create a karmic dynamic there you know just like you shouldn't kill a human being because of the karmic dynamic you shouldn't kill animals because of the karmic dynamic when you do it on a mass scale you are creating an etheric energy field on the earth that is polluting the entire earth with negative karmic energy okay they gets into all of this in this book which why just about every occultist worth his salt has always advocated for a more plant-based diet whether they just advocate for vegetarianism or going to a full plant fete entirely plant-based diet they all advocate for doing less harm to animals and that's what this is about it's not about being perfect it's about doing the least harm possible that's the title of the show no one is ever going to be perfect okay it's about using your discretion and your your spiritual discernment to understand that eating less animals and contributing less to the suffering of the animal kingdom is going to be better karmically in the aggregate for human beings and for animals okay you know how much has the life evolutionary progression of animals suffered because of what human beings do to them probably a ton just like we can suffer as a result of what higher beings have done to us okay so this is about getting into the heart that's why I recommend the Rosicrucian tradition the lamp of wisdom combined with the flame of the heart that's what these symbols are you know one represents knowledge but one represents holistic intelligence through heart based intelligence the symbols depicted on that that is what the rose Cross has always depicted there the ring of roses around the cross representing the heart energy and the chakras of the body the center one being the the heart the seven roses on the cross the cross representing the physical domain in which we live if you understand Rosicrucianism like any other aspect of high-level occultism from the Western mystery traditions it will clear up a whole lot I'm not telling you that this book is the definitive be-all end-all source on you know the truth about you know a soul progression and or nutrition I'm telling you it's something that if you read in the right mindset with the right reverence for knowledge you'll probably come away with it somewhat transformed as to what a better way of living is because that's what the book is ultimately about it's about the golden rule and that has nothing to do with organized religion it was a concept that was around thousands of years before formalized Christianity okay it's about doing to others and living with others as you would prefer to be treated and not be harmed so don't do that harm to other people the apophatic version of the golden rule to start with you know then you can move up to actually truly treating people in a better way which is transcending morality and then getting into ethical treatment of other beings we're not even at a moral treatment of other beings let alone an ethical one you know morals is just about not doing harm ethics is then about treating people nicely and helping them being altruistic because you're in a position where you can do that because you're strong enough you know that's a very difficult place to get because most people are still living lives to completely embrace immorality and contributing to the suffering of other beings folks read this book and read books that deal with real occultic traditions in the Rosicrucian tradition the free Masonic tradition the Kabbalistic tradition the tradition of taro there's so much out there I'll do another show at some point where I show you how to get more materials from the web you know because I'm telling you this is the first part of the great work is gathering the grammar then you got a process that you got to go to work on it you know this book can take some people weeks to read ok you have to sit down and power through it even if you don't understand sections of it read them anyway and then go back and revisit them later you know take it in in to the extent you can now that's what it's about doing what you can do now so that's all anybody can do but see most people are too lazy to do that that's why I'm hard on people I see what they are capable of then I see what they're actually doing and the two don't jibe they're way out of whack here's what they're capable of and here's what they're doing you know not good enough I'm not one to baby spoon feed people and tell you that you're doing great when you're not you know many of us most of us could be doing far better than we are and that includes myself sometimes the point is be honest with yourself here here this this is free-range is what we call free-range you know animals crowded into you know often filthy pens big barns you know where they're given small amounts of feed and water you know until they're ready for slaughter and the ones that they don't even need or want go into a grinding machine you know look that up but anyway this is the question everybody asks they'll say you're working for the dark side the vegan veganism agenda is an agenda of the New World Order you know and the the globalist elitist they want people to become vegan I agree in many cases yes they do so why does it seem like the masters want their slaves to become vegan or to go to a plant-based diet okay and I'll answer this question okay and the thing is when people is instantly as assume that someone's an agent just because they're talking about something they don't want to hear or they don't like to hear okay it's a again a childish naive position with no discernment applied little to no discernment applied alright yes it is true that the whole idea is that they want to move people off of a meat-based diet to a plant-based diet but not because they're concerned for our health not because they're concerned for karma of the animals okay they'll probably still find ways to torture and kill animals and children and people okay but the reason they want this to be done is because they realize the ecological turmoil and imbalance the world has been heading into headlong largely because of the ways that we're in balancing the earth due to practices like big factory farm farming okay the kind of runoff that it produces how it's polluting rivers and streams and oceans they don't want to upset the ecological balance so much that it proverbially burns down their farm they need economically and control wise to keep controlling the animals on the farm so they're they're not interested it's not like they're trying to make people healthy or undermine health people so they want people to become vegan to undermine their health I'm gonna read you things about what people think something about what people think veganism is or what they say about you know not living to cause less harm it's an utterly ridiculous I'm gonna get into that in a moment okay but yes there is an agenda to take people more toward a plant-based diet for a very specific reason the farmers of the world of human beings have an active interest in maintaining their farm they don't want the farm system to collapse because if the farm system collapses because of the imbalance is done onto it because of the practices of breeding so many animals and polluting the earth to that extent then their whole system of control is unable to be maintained so they are interested in sustainability but sustainability not from a point of view just because the the earth is it will be really truly healthy and thriving they want it just healthy enough to maintain the control system and keep it on lockdown for their slaves that's why they don't want the ecological imbalances and disasters that could come at a future point when it comes to continuing to maintain unsustainable practices when it comes to animal usage and that's the only reason that they're promoting veganism more okay that's what people have to understand which they don't they automatically assume because they're trying to propagate it that it means that it's got to be something harmful for us know sometimes they do things that are just in their interest alone and they they take the the hit you know just so they can continue to continue to farm the system they'll take a hit and say well hey we'll have to have less animals in in slaughter sacrifice you know but they'll do that and take that compromise because not doing it would mean the whole farm system is going to collapse from the amount of decay pollution and unsustainable practices that they've been continuing to exert so farmers of human beings will often modify their practices once their farm gets polluted enough just like a pig farmer will modify his farming of pigs once his farm gets polluted enough it's the same dynamic when it comes to farming human beings no different before I get into the next section I want to keep this slide right here and I want to show people I want to read to people actually I'm going to jump out of my slides so I want to read to people a PDF of something that I found online I will keep the person's name anonymous honestly I'm going to keep their name anonymous not not to embarrass them because their words are embarrassing enough I'm going to keep them anonymous because they don't deserve to have their name mention on what on earth is happening but I'm gonna mention their words and to show people how utterly nonsensical and outright sold dead their mind their body their soul their words that come out of them are that's what this is here for and I'm gonna tell you most of the human species is this way most of the human species okay so this is what I'm calling a semi recent Facebook post that I stumbled across when I was looking into veganism versus carnism dynamics one day this person wrote on Facebook publicly for the world to read minimizing harm is pointless and futile ever heard of a species of cicada that gets stung and paralyzed by a specific type of wasp it then eats the organs out of the cicada and leaves its eggs inside its shell to form a new baby wasp okay so wasps one of the more aggressive forms of you know insects in the insect Kingdom you're going to compare their behavior to human beings as if we should somehow emulate the behavior of wasps and Yellowjackets okay yeah great we're off to a good start okay nature is disgusting I'm not about to change my diet and get health problems when I've likely evolved to this point as a result of my ancestors eating meat actually no not true you probably haven't evolved to the point you have because they've eaten me you've probably evolved to the point that you have because nature took it there and certain people were strong enough to endure environmental pressures you know and it's not just eating meat did that it's because they had a will to survive and propagate to take knowledge down to the next generations more likely than anything else sickening yes humans are predatory species here we go with the poison worldview okay and that we are like any other predatory animal I'm not entirely convinced there isn't an agenda behind veganism either we just talked about that misunderstanding yeah I'm entirely convinced that there is an agenda behind veganism but I just explained to you why it exists and that's the truth about why it exists could be to awaken or to weaken or cause health problems amongst the greater population that has switched to eating plants know not why it is to continue a sustainable practice of human farming is the real answer but this person wouldn't understand that I already have a restrictive diet I'm not switching from the Mediterranean diet it seems to work best for me and my health Jordan Peterson recommended the diet of meat and salad there's a great source that you want to trust when it comes to nutrition somebody who's eaten practically nothing but meat yeah great idea putting the body in the ketoacidosis okay it's going to have a long-term negative effect on the organs because your body and brain are not getting the glucose they need into their cells and then into the the the energy producing centers of the cells in the nuclei Petersen recommended the diet of meat and salad it seems to clear up most health problems only in the extreme short-term for specific problems the keto diet was originally created in the in the medicine industry and propagated to try to treat certain conditions the neurological conditions in children I can't remember the exact one it was it was some form of a neurological condition and in the short-term it helps with that but it's not intended to be eaten as a dietary you know staple or a continued diet for regular adult human beings ethics and morality simply isn't enough when it comes to these dress changes know why not why isn't doing the right thing enough because see he's not actually convinced of the real science that shows and proves we don't need based proteins or products in our diet if we transition off of them having eaten them people who never ate me and we're brought up being on a plant-based diet never have had a problem eating a plant-based diet people who have lived on a life of eating meat on a Carnot carnist diet yes you have to transition off of it gradually or you will do harm to your body I need scientific evidence that eating just a plant-based diet is going to supply me all with all my nutritional needs it's out there in such droves that you are practically drowning in it secondly all you have to do is go to people who have done it and show they've been doing it for decades in many cases with no problems to their health secondly the science is in on that and you can read about it I actually in the earlier slide it was a new study that the site has the study and it talks about that the the most effective diet for long-term nutri nutrition and health was one of a balanced diet of whole foods that come directly from the earth just as I've been saying some other products are made from says some of the vegan products out there are packed with chemicals are absolutely disgusting I absolutely agree that's the first true statement that he made okay yes there are vegan products that are not healthy for you that's called using your discernment you can go buy a whole bunch of vegan cookies full of sugar and there there are no animal products in them and you could eat vegan cookies all day and undermine your health very easy to do okay no one is suggesting to anybody to do that okay that would be equally as healthy as eating animal Laden junk food okay some other products are made from nuts which certain people have allergies to yes and this is appropriate to people who don't have allergies because waiting for an answer from the dunce who wrote this okay let me go back sorry why would you want to be stuck being a cow is that why you care well who made that claim we're talking about other animals are a cow in this incarnation in their life and don't deserve to have on needless suffering exerted upon them okay incapable of higher forms of thought they can't write speak or create this is the whole point I just made with which is why they're different from us and why they're different from the plant kingdom they just eat and enjoy food they aren't trying to take humanity to the next stage of existence and that is why I would say I would choose my life over a squirrel's life in a survival situation yes I am a more complexified and in that case important being because I am capable of influencing other people in this world to take their life to a higher stage of evolutionary growth than an individual squirrel that I might hunt in a survival situation but if I don't need to do that I'm going to cause the least amount of harm possible here's another solution for you why not take up the burden of converting humans into solar-powered cyborgs that way we don't need anything but sunlight to recharge ourselves well I just talked about the fact that I actually know two people that are living off of sunlight know them personally as friends who are not eating solid or liquid food don't even need to drink water if they don't want to okay living on the Sun already in it this year today I know two people who are doing it and they're in good health and no they are not weak and no they are not frail or emaciated rather than whining to people like me that have no ability or power to shut down those industries you know I don't know what that has to do with anything I didn't ask to be raised as a meat-eater neither did any of us I just spawned and found myself in this fucked up world it's a nice way to say that you know your mother gave birth to you I give give me a procedure to survive off sunlight and I'll gladly take that up again that is a process it's not an instantaneous procedure it's a long-term process which most people in the world will never get to in this lifetime right until then we are breeding animals into existence and killing them for energy in an amoral capacity yes you are that's what's going on that's the altar of sacrifice that's the continual satanic bloodletting ritual that's taking place on this planet without any doubt I'm not going to fuck with my biochemistry especially my hormones by eating soy and tofu who said you had to if you don't want to eat soy and tofu don't secondly soy and tofu aren't the problem it's genetic modification that's the problem with that and no one is saying to make soy and tofu a staple of your diet I don't have a problem with the soy bean as long as it's not genetically modified quite frankly and in moderate eaten in moderation as should all beans be eaten in moderation because we don't need as much protein as they say I'm going to show you a product if you're worried about your protein intake okay that I use I'm gonna go through a couple of things that I use that I think people should be aware of isn't you think my life isn't already difficult oh here the truth starts coming out right I don't want to do the work see my life is already difficult enough you're adding another thing for me to be concerned about and to research and to do work regarding si si that's the truth coming out from the shadow self you think my life isn't already difficult there's that one of the truest statements uttered in this nonsense I'm working round-the-clock like a slave so I could have a roof over my head now you want me to have health problems too by screwing with soy and tofu no not what anyone said and putting words in other people's mouths okay so this is the dynamic as it always is hearing what you want to hear and that's where most people are at they can't hear what's being said they hear what only what they want to hear that's a mind that is closed to the truth and that ladies and gentlemen is what what is it is creating right there that's the reason it's called religion a mind that is closed to the truth that believes whatever the fuck at once is creating that and farm globally so I'm gonna wrap up by talking about positive aspects of things that you could be doing now that really will go into it you will go into overdrive by doing these things you will put your body in optimum condition okay that with moderate exercise on a daily basis you have to filter your water you have to filter your water you have to filter your water get over it the people who insist that you could and I'm not advocating for any particular reverse osmosis or any other water for your purification system here's the thing filter your water just do it okay just do it I use reverse osmosis for water filtration in my home okay this is not the one on the screen that's gonna be on the screen right now is not what I use it's just a picture I found I don't care what brand you buy get a five-stage reverse osmosis system even for stage ones are acceptable okay I'm right now using a five stage reverse osmosis system with a five gallon tank okay you can get one of these nice brushed stainless steel you know faucets to put above your sink where normally it'll go in the hole where your soap dispenser would normally go okay but you'll get clean pure water down to like maybe eight nine ten parts per million with a good one okay close to distilled all right there's first of all nothing better that you could do stop drinking the water that comes out of the tap and cooking with it don't put it in your body hook up your reverse osmosis system to your ice maker in your fridge if you have an ice maker you don't want to use that for ice you want to use the reverse osmosis system for your ice okay I don't use I don't consume tap water only thing I do and it's dangerous enough with all the chlorine and chloramine and other derivatives chlorine based derivatives and other toxic substances to even have it go through the the pores of skin and your hands to do dishes with it I should be wearing you know protective dish doing gloves every time I do dishes but that's the only thing I use tap water for get a shower filter that filters chlorine and other dangerous chemicals that are in the tap water because especially when you turn it on hot you're getting it in ee by breathing it by breathing the fumes so I try to even do dishes and more lukewarm than steaming hot water sometimes you have to use really hot water to get some things off if you leave it too long you know so you know doing dishes immediately after eating helps with that as well because it's much easier to break the food debris away from the dishes but you have to filter your water I can't say that enough for as many times you're drinking pure poison if you're drinking unfiltered tap water if you go to a restaurant okay you might drink some of the water there but you don't make that a habit it's what you do every most of the day every day that counts the most that's gonna have the most impact on your health get a reverse osmosis system folks they're cheap here I'm gonna step out of the presentation I'll go to Amazon and I'll put in reverse osmosis system let's see what they're going for these days looks like they're not selling them amazing I don't know what happened oh I'm in books I'm sorry I think at all departments sorry about that I was looking for a book earlier I forgot to change that menu here we go look at look at the prices on these I mean you're gonna tell me that if - as an investment in your health you won't be able to afford less than $200 or in this case here's one 137 dollars you know 189 for a nice one with a nice you know they they have the nice stainless steel faucets now in many cases you know I mean come on this is a no-brainer three hundred dollars as an investment in your health yeah this is nothing nothing all right let's go back to the presentation slides the next thing the number one mistake people who are transitioning to any kind of a plant-based diet or people in general are not doing is doing fruit and vegetable juicing and fruit and vegetable blending the number one thing that people are not doing enough of or not doing it all that is that they are undermining their health by not engaging in this form of eating is using juicing and blending smoothies as a supplement drinking fresh juiced from an actual juicer fruit juices and vegetable juices and drinking plant-based smoothies health healthy smoothies with a good high powered blender now you can do this with a crappy juicer and a crappy blender I'm gonna show you higher-end products that again I will endorse them I'll say yes I use them I'm not I get no kickback monetarily to tell you that I think these are good products this is the juicer and the blender that I myself use in my home in my kitchen I use the Breville Juice Fountain elite which is the juicer that is pictured here on the left it's made almost entirely out of stainless steel with the exception of the top plate the chute the waste chute is play as a plastic polymer assembly and the collection tank is also you know the juice collection jug is also a non BPA plastic okay but it's solidly built it's built like a tank it has variable to two speeds so it's variable speed cleans up very easy okay will make great juice doesn't oxidize the juice that much they have an even better one now that's called the cold the the Breville cold XL they call it I'll show it to you but now it even heat the juice even less it's a negligible amount of friction from the blades that will heat it a little bit some people will say that will create some oxidation I find that it doesn't really deplete the nutrient content of the juice you could store it in the fridge two to three days depending on the type of juice I would say probably two days is the maximum you ever really want to store it before you drink it this will juice just about anything you can throw and add it in there okay wide feed chute you could put whole apples in there and I often do I recommend celery juicing celery all the time cucumbers high water nutrient you know for a micronutrient dense are all greens basically you could do leafy greens but wrap them around harder greens or carrots and then a masticating juicer such as this will do a good job even with leafy greens but you have to wrap them around a harder fruit or vegetable okay and just get into celery carrot apple that's a great introductory juice okay or even just carrot apple okay look and incorporate the greens do celery try this one celery cucumber apple it's fantastic it's utterly fantastic okay you drink that I mean you're getting so much nutrient content and energy it's it'll keep you going the whole day and then blending you know you want a high-powered blender like a Vitamix 5200 that's what I use they have even higher powered ones now the newer Vitamix is are even more powerful than this one okay they're amazing blenders worth every penny for an investment in your health you can go down to any you know goodwill or some type of a thrift store and find used juicers and blenders they won't be necessarily as good as these but guess what let me tell you something folks I went to a thrift store just off of South Street here in South Philadelphia and I got the juice fountain elite juicer for 40 dollars it's a 200 it's a 300 dollar juicer I got it for 40 dollars in perfect working condition with perfectly sharp blades looking like it had only been used once or twice and somebody said I'm not doing this because they didn't have the willpower to do it and so they took it to the thrift store and I ended up being the proud recipient of that juicer for a measly $40.00 okay that's how I got that's a true story about how I got the current juicer that I use now I lucked out but you know I don't expect to go into the nearest thrift store and find a juice fountain elite for $40 you know but you probably can find a simple juicer you know for less than that even for like ten dollars okay and it'll do the job to get you started okay same thing with blenders you could you get like some cheap shitty blender that's gonna do a half-ass job but let me tell you something that he ain't gonna make a smoothie like my Vitamix is I'm sorry not gonna happen you know and it's a way to get started you know but the better something comes out technologically the better it tastes you know so you could prepare it better you're more likely to continue doing the practice on an everyday basis to habituate it all right here's another let me just show you some juicers before I go into air air fryers okay juicers and blender this is the one that I recommend I recommend going to Breville comm BRE VI L le Breville they're the most expensive or not the most expensive you want to get into like a Norwalk juicer you're gonna pay thousands of dollars that's the best juicer in the world okay but Breville I think is the best compromise between your you're getting a much higher quality often stainless-steel product okay but you are paying a little bit more now you can go on Amazon or Ebay find these for even cheaper okay and you can even go with different juicers or even generic brands well I'm trying to show you something that I feel I can at least recommend in good conscience where you're gonna get a dynamite juicer okay so you could see the prices here are a little bit more expensive but again you have to look at this this isn't just a joke game piece of technology this a heavyweight piece of well engineered technology that's gonna last years and it's an investment in your health you're doing this so you don't have to pay tens of thousands at the psychopathic doctor at the hospital okay who wants you in there sick all right so this is the one I have the juice fountain elite it retails for $2.99 95 I got it for $40 at a thrift store near South Street okay you know this is this one here the big squeeze this is a auger juicer it's it's a slow juicer that tears chunks of things often then squeezes them alright this is the new one juice fountain cold excel a nicer and even nicer one with a much bigger collection container okay that's their flagship model right now alright I had what did I have I had this one I had this one in the past which was one of that is one of the best juicers I ever had the juice fountain duo this is a blender and a juicer in one and has a blender attachment that you could put on top so if you get this you have everything you need okay so and then they have some citrus juicers I don't really recommend them because they do not keep the the pith in the juice masticating juicers like like the ones I showed you up here are much better for citrus okay so you could watch jay kordich on juicing he's somebody I really recommend watching his videos he passed away a few years back I also like john kohler from discountjuicers.com maybe i'll you know link to his page i think he's a definitive source on juicers and juicing in the modern world almost like the modern-day jay kordich I also recommend Dan McDonald Dan McDonald nodes a whole lot about juicing and has great recipes especially when it comes to detox for the body so he calls himself the life regenerator great guy very positive attitude okay so that's juicers now blenders I'm a Vitamix fan you know some people like Blendtec's on people like ninja okay there's tons of them out there at all different prices they're newer ones pretty expensive you're gonna have to for a heavyweight one with a tamper you're gonna have to you know go into like the 400 plus dollar range okay they have some older ones that are you know in the 300 dollar range and so I'm not a miner that this is the one I own I own the 5200 it retails for $400 still today okay when I got it it was even more than that I was like 475 some 465 something like that so you know they've only come down a little bit in price but I'm telling you you you could start with a cheap blender and work your way up to one of these but I'm just telling you there's no substitute for something that works like these things do once you see them in action you will never see it as a regular blender and it's not about the price it's about the investment in your health you're spending a couple hundred so you don't have to spend a couple hundred thousand okay you got to look at it that way okay which you're gonna have to do through you know insurance which is all scammed on top of it all right so that being said I'll jump back in and finish some of the other things that I want to recommend and we all know I know we're limited on time I think we have like two minutes okay so an air fryer this one changed my life too I don't think I've used my frying pan ever since I've gotten an air fryer okay you to cook vegetables you've you know forget pouring lots of grease or some type of you know oil in a pan you know and cooking in it and letting it get all saturated into the food an air fryer you you will never cook the same way again once you start using a good one of these get a good digital air fryer there's a couple different brands listed here I don't use either one of these brands I cannot recall what my model is off the top of my head but you know get a nice big one like a you know at least over five quarts okay minimum and they work great okay cook very fast almost comparable to microwave speed fast cooking okay and you could cook anything in them okay and you could totally reduce having to put any oil on food when you're cooking this way I use a light Cokin oil spray you know and it does a fantastic job much healthier cooking for those still worried about where they're gonna get their protein okay I highly recommend from pure the intestine cleanse formula this was not on the market it was only available through certain health care practitioners and now they came out with it publicly and it is one of the best P protein based powders with all other kinds of amino acids added you got to just go online and look at the the nutrient data on this it will blow your mind okay for people who get into weightlifting bodybuilding any kind of sports activity you know working out at the gym this is the stuff this will keep you going all day okay you take it take a smoothie with this stuff forget about it okay probably the best protein powder on the market as far as I'm concerned adaptogens look into them they work with helping to solve stress through herbs they're compounds which help the body adapt to stress and exert a normalizing effect on the bodily process especially weight hormone regulation thyroid regulation everything ashwagandha astragalus Cortis have ginseng licorice with rhodesia eating well as a form of self-respect that's what this is all about folks respect yourself respect others respect the animal kingdom that's all we have for today on whatever is happening we're out of time I'll see you right here next week government is slavery [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #208
